Wow. And they still couldn't find any complaining witnesses to bring legal action? Why were these witnesses willing to talk to newespaper reporters but afraid to make their statements under oath? How interesting.

The one surviving record of Koresh's own words on this subject is a 1992 video taped interview with a New Zealand news service, in which Koresh asserted that he had only ONE WIFE, and denied having sex with anyone outside his marriage.

A little short on the boasts attributed to him.

> >If the local authorities could not find a complaining witness, how

> It seems *everyone* is against poor Koresh for having sex with
> underage girls, The author of 'The Ashes of Waco', former Davidians,
> etc etc. What's a good pedophile to do ?

It seems that *everyone* finds the alleged sex habits of Koresh to be endlessly interesting, but nobody is interested in the autopsies.

The author of the "Ashes of Waco" makes an income from his speaking tours, book sales, and consultations to government agencies. His financial interest does not put him in any position of authority on the truth. Rather, it argues against ever changing his mind or making the incident less scandalous. Dick Reavis ("Ashes of Waco") shows no interest in the autopsies, yet pretends to be an expert on the Davidian lives and deaths. Isn't that amazing? From ancient times, the investigation of a violent death has begun with the body. But here we have "experts" on these deaths who are utterly disinterested in the bodies. They would rather discuss soap-opera gossip.

Every organization and religion has disaffected ex-members, some quite fanatic. If you collect all the disafected ex-Catholics or ex-Jews together in a room, you would some wild complaints against their prior affilations, not necessarily true. But that is exactly what Rick Ross does in order to break up small Christian churches. He researches and gathers together ex-members and helps them develop their stories into bug-eyed monsters (thus, the Herald articles). And those are the stories you are retailing here. It is not logical to believe all the worst things you have heard about an organization from a hand-picked group of such people. And they are not *everyone*.

Some of these stories may be true, but then again, maybe not. For sure, they should not be accepted on face value without corroborating evidence. Why didn't theses witnesses file charges with the "local authorities" (including a sworn complaint) the day they left Mt. Carmel. Why do they wait for the scandal mongers to come knocking, then make a whisper campaign out of it all?

But you seem so certain of yourself in the face of contradictory statements. How come you never doubt the pale fragments of evidence you are reading from?

Do you have a special source of knowledge not yet revealed, or do you have an emotional compulsion to believe this nonsense to prop up your own picture of reality?

While I cannot speak about O'Brian (don't know him), I can speak about the men and women of the Navy Reserve (and the Reserve personnel of the other service branches). In just about every war this country has fought over the last 50 years, Reserve personnel have been put into "harm's way."

The military now considers the Reserve, and Guard, to be a critical part of our national defense, and fully expects both of those groups to be prepared to serve in time of war. Therefore, it is not uncommon today to see Guard and Reserve personnel training, serving, and fighting, right beside active duty personnel.

As for the training, most military training is far more dangerious than anything most civilians will ever see in their workplace. Each year, thousands are injured, and a few die, during military training activities. Warfare is a dangerious game. At times, training for war can be almost as dangerious.

Well, then don't socialize with "old farts." Ham operators come in all sizes and all ages. They all have different political, religious, social, and educational, backgrounds and viewpoints. So, if you don't like who you're socializing with now, then, just like with any other social situation, find someone else.

By the way, you might want to remind your wife (and her girlfriend) not to laugh too hard about "old" people - she will be just as old one day. I hope young people by then will have learned to be a little more tolerant.

Kim, when I lived in Washington State, I had a nice hill near my house, with lots of curves and steep cliffs beside the road. Would you like to ride on that road with someone using a cell phone? It happened. A lady went over the side and the suspected cause was the use of a cell phone. The cell phone was suspected since the caller reported to the police that she heard the woman screaming as she went over the cliff (just before the phone went dead).

When driving in traffic, or in other hazardious road conditions, it is stupid to stick a cell phone in your ear. Sadly, people do it every single day. It appears that only a law can work when common sense fails these people.

Any person, Amateur or otherwise who knowingly and intentionally transmits on designated radar frequencies can be charged with interfering with a police officer for starters. Then there are other charges that can apply, but we need not go into that at this time.

I like amateur radio but I'm just not much of a talker. I was curious if anyone knows of an amateur RADAR community. Web pages, newsletters, books, etc.

Radiosigs-Guy says he's been ..
>communicating with a zealot

Could it have been Mrs. Rodham-Clinton, by any chance, Sigster? Looks like she's let the cat outa the bag. But it appears that Mrs. Rodham-Clinton is not just any kind of zealot. She appears to be an anti-semitic zealot. Word from London (and a few other places) http://www.sunday-times.co.uk/news/pages/sti/2000/07/16/stifgnusa02007.html quote her as calling Paul Fray

"you f****** Jew bastard".

Now before Chipster starts on me, I didn't make it up (like he did the Waco tape), I just found it on the article on the British media page.

> like to ride on that road with someone using a cell phone?

Dwight: I'd like *not* to go down or up that road with *ANY* distractions to myself or other drivers. I don't think banning the use of cellular phones relieves any problem of having accidents. In order to solve the problem of accidents due to distractions, *all* items must then be legislated, and how much sense does that make? As I said in an earlier post: what about all the other distractions, such as makeup application, shaving, reading, looking at maps, smoking, taking a sip of a drink, eating, etc., etc. *IF* there's going to be *any* law, it should be that both hands must be on the wheel at all times. And, I don't think that's likely.

If I am ever in an accident, I'd be very prone to "blame" a cellular phone if I saw one in the vehicle. But, my common sense and reasoning would apply before I blurted out that I thought it was the fault of a cellular phone. There's just too many other distractions that are going on also.

I have one for you to think about, though. What about DWI? How strongly are the laws of your state enforced concerning DWI? They aren't, generally, here at all. Bet there'd be lots more cellular phone tickets that result in applicable punishment than DWI tickets that result in applicable punishment. Why is that?

> It happened.

I don't mean to sound cold here, but it could just as easily been the woman going over the Cliff because she sneezed, she reached for a sip of coke, she was applying makeup, etc.

> When driving in traffic, or in other hazardious road conditions, it is
> stupid to stick a cell phone in your ear.

Or to apply makeup, or to drink coffee, or to shave, or to read a map or book, or to look at the directions you wrote down, or to look at that gorgeous woman who just drove by in an even more gorgeous pretty car,

or....you name it.

> Sadly, people do it every
> single day. It appears that only a law can work when common sense fails
> these people.
>

NO!!!! Think about it. OK, so there's a law against cellular phone use.
Now, there's a law against mascara application. Now, there's a law against
shaving. Now, ...you get the point. That is as I see it. We can't
legislate common sense. We don't need laws to tell people they're being
jerks.

Just because a pulsed emission type is within the allowable types for amateur
radio doesn't mean that "amateur radar" is. There's more to it than emission
type. 47 CFR 97.117 addresses what is allowable as a transmission from the
standpoint of the PURPOSE of the transmission, and I don't see anything like

"range and/or bearing finding" there (but practically everything, other than tests, that is permitted is for the transmission of some sort of information).

I suggested the GROL only because that is the only license that I am aware of currently offered that does have a radar component in its examination (optional element 8).

Try posting on comp.dcom.telecom.tech

there are many experts there.

T1 carrier peaks around 750KHz.

DSL is balanced, but it can be easily unbalanced.

What a jerk!

OK, stop at every gas station and check your calls.

Ever hear of 'incoming' calls? Opps, sorry, no one ever calls you!

I know, scarey. Don't nail the people who can't drive, nail everybody,
just in case.

Hmm, remember the Radio Shack CB that came with a 'telephone'
style handset?

Where fact does not support your case, invention comes to the rescue.
You are well-armored against the truth: When the State of Texas sought
witnesses to child-abuse, none could be found, nor was any other
evidence available.

Your post-mortem conviction without trial or witnesses does not stand.

> >The one surviving record of Koresh's own words on this subject is a

Since he denied it publicly and no complaining witnesses came forward
willing to make statements under oath, I would say the truth value of
the accusation is weak.

> >[...]

Interesting, but not the highlight of the autopsy reports. If you had
read them when I first pointed them out to you, you would see that

most of the children had been dead a long time before April 19, 1993,
despite the government claims.

http://www.public-action.com/SkyWriter/WacoMuseum/death/map/d_list00.htm
l

It is time you faced that fact.

> >The author of the "Ashes of Waco" makes an income from his speaking

> that must have come from some unknown source ? Aliens ? Angels ?

Not at all unknown. Given the US government willingness to kill off
its own servants when the deaths are useful, government snipers
are the most likely source of the bullets that killed the ATF soldiers.
That explains why they were shot in the side and back of the head.

Note in this video clip of the raid, there is no return fire from the
Davidians. http://members.xoom.com/valentin4/Raid1.avi

There were no accusers EXCEPT former Davidians, and not a single one
willing to make a statement under oath. A group neither significant
nor diverse.

> >Some of these stories may be true, but then again, maybe not. For

> >come knocking, then make a whisper campaign out of it all?
>
> Ask Anita Hill and all the women that have come out of the closet
> about (dare I say this) Bill Clinton ?

No one asked Anita Hill, but Jennifer Flowers came out voluntarily.
But both those women testified under oath and those accusations did
not involve criminal child abuse, so the cases are different.

> >But you seem so certain of yourself in the face of contradictory

Again, you know nothing of the Davidians apart from these inventions.
Let's see you send your children into the company of this grand
company of our nation's finest. Remember, the wooden building they
were so blindly peppering was full of children.

http://members.xoom.com/valentin4/Raid1.avi

> As far as Koresh and the adults go I couldn't care less, my concern
> is that the SOB didn't order the children out.

Most of the children were already dead. Read the autopsies.

http://www.public-action.com/SkyWriter/WacoMuseum/death/map/d_list00.htm
l

One possible cause of their deaths is this:
http://members.xoom.com/valentin4/Raid1.avi

Go reread the original post that started this thread.

An amateur asked about doing amateur radar. Why would anyone even concider
anything other than the amateur bands?

Replace the word "radar" in the original post with "AM". Do you now assume
operation on 500 Khz to 1600 KHz?

Replace the workd "radar" in the original post with "television". Do you
now assume operation on the commercial TV channels?

Why would a discussion of amateur operations, no matter what the mode, involve
anything other than the amateur frequencies?

No, nothing 'going on'. I get maybe 3 calls a month, but when I do,
they
are generally of an 'urgent' nature. At least, urgent to my 14 year old
daughter, and that makes them important.

' DSL is balanced, but it can be easily unbalanced.

Bell Atlantic reference?

' --
' If you are one in a million; there are 6000 people just like
' you.

Depressing thought! Nice observation though. Good sig.

Now for a semi-serious reply.

Serious:

When I was studying to be a pilot, one of the instruments in common
use was a device called a direction finder. It used AM frequencies.
It was basically a three antenna device that used an interferometer or
some such method to triangulate on the signal. It was common in the
days before VORTAC stations to use AM radio stations as landmarks.

Surely `no spam' has the skill to build one of these? I'm not an
electrical engineer, but I understand these devices aren't
complicated. Hell, you know the frequencies. Build a Yagi (sp?)
antenna or an aerial if you prefer and locate the transmitter that way.

Not serious (really):

Once you find the offending transmitter, destroy it. If it is a box
on a pole, shoot it with a high power rifle. Anything of .308
Winchester power and up should put a hole right through it. Use a
180gr JSP bullet. If you are in a densely populated area, make sure
the shot is angled up at least 80deg above horizontal so that the
falling bullet can't cause damage. Be aware that in that area, the

discharge of a firearm could be illegal. Also, destruction of
property is illegal. You might have a defense in ``abating a
nuisance''. Check with your lawyer.

Jeff's original question was crystal clear.

It was the subsequent 'operation by non-amateurs' and 'police radar'
references that widened the window.

Thank you for the detailed e-mail explanation of what you really meant.

Until this got out of hand I don't see any mention by me, or anyone else
of any non-ham bands; just that only a tiny portion of those ham bands
shared with "radiolocation" were assigned to police useage. Then the
assumptions appeared.

Dave

no spam,
Since you've narrowed it down to the two cables(phone/CTV),
why not invite someone from each company to listen to the noise.
If you can get both companies to send someone at the same time
would be ideal! Have one disconnect their cable to see if the
noise goes away. If not, try the other cable. Let 'them' worry
about the problem.

YES! Does anyone believe that "Krystalnacht" could have possibly occurred if German-Jew's guns hadn't been confiscated in the previous year. Would the young Nazi party thugs had the courage to break into shops and homes if there was gunfire coming from every rooftop at them? I think not! The same thing can happen here....the pattern being set up by the liberal Democrats is identical to what transpired in Germany in 1937-38-39. We must stop the erosion of the second amendment NOW. If the first and second amendments fall, the rest are worthless, and the constitution is lost. Join the NRA, and vote for pro-second amendment candidates this next election.

But the Supreme Court has ruled several times in the Nation's history
that "Militia" as used in the constitution applies to all able-bodied
citizens, not just males, and not just organized State/Federal
"Militia". In other words, you, me, wives, and adult children.

Hi.

I have a few kits, and units on my pages, some of which may be used with any rig, but others like the auto tune unit, and the cat opto isolated unit for PSK and other software are specific to the IC706.

Software is also on the site for modes such as PSK,HELL,RTTY,SSTVetc.

Take a look see :-)

Cheers, Dave G3VFP

2874. Sidewinder aimed at ham station

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-17 00:00:00 UTC
From: Dave <nospam@fastband.com>
Message-ID: <39733A4D.8C805A85@fastband.com>
Source record: 107056
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

From The Microwave Newsletter:

"A report has revealed that two amateur radio operators from Montauk, NY were involved in an unusual incident while testing a new microwave antenna setup.

Last May, they were tuning up a new microwave antenna array designed for communications between Montauk Point, Long Island and an amateur relay station to the southwest. They were going to use the link for packet radio, and therefore had the new Montauk Point station transmitting test packets.

As they were testing their stations, the amateurs noticed that the northernmost station was being jammed by a very strong signal which seemed to originate from a point at sea. Spectrum analyzer measurements of the Doppler shift indicated that the "point" was approaching the relay station at a speed of at least 200 MPH.

Believing that their equipment was faulty, the amateurs turned off the transmitter for further checks.

What had in fact happened was that the amateur transmitter had registered with the electronics countermeasures equipment on board a U.S. Navy fighter taking part in an exercise being conducted to the east. The tactical computer on the aircraft had detected and jammed the "hostile" radar transmitter while simultaneously loading attack coordinates into a Sidewinder air-to-ground missile.

One amateur station was about to be obliterated.

Fortunately, the Navy pilot recognized the inconsistencies in his radar displays and did not fire the missile. As required by regulations, the incident was reported to both the FAA and to the Montauk Police Department.

The amateurs involved have so far declined to be interviewed, although it is understood that at least one of them is no longer operating his station at microwave frequencies."

2875. Re: Amateur RADAR

Excuse me for using a relatives system to respond to this topic, but in case you want to flame the author (me) please write to: mgb@tecnet1.jcte.jcs.mil

Some people read regulations to see what they are NOT allowed to do, and some people read regulations and try to see what is OK to do. I believe our legal system was pretty much based on the former, and not the latter concept but to each his own.

As to the matter of using RADAR on the ham bands, something I take a personal interest in because of my occupation, I was surprised to hear an amateur say it was not legal. Ok.... well, I asked the ARRL legal department whether it was ok for me to experiment with a pulse radar with the specific purpose being only to collect range and bearing information from the radar echo and not to "communicate" with anyone else.

John Hennesee N1KB of the ARRL's Field and Educational Services Department (jhennesse@arrl.org) responded: "Yes, but pulse can only be used on 33 cm (902-928) and above. See 97.305"

Now some of us will accept the ARRL Legal Branch as an authoritative body since they are the official representatives to the FCC for our organization. Some others will say "no" to that and demand an answer from the FCC itself. The latter will usually then get angry at the FCC if they still fail to get the answer THEY think is right and will blame the FCC for writing poor regulations.... anything and everything rather than admitting..... "maybe I was wrong".

Go figure, but come to your own conclusion. I, for one, will build my home brew pulse radar using a mechanically spin modulated feedhorn to study range gate tracking techniques, and will quote the answer given to me by the ARRL Legal Branch to those saying "it is illegal", and to those same people... PLEASE do not try building your own radar on 33 cm.... it leaves more spectrum to those of us that want to experiment with electronics rather than ragchew on 75 meters... nothing wrong with ragchewing by the way... but there is nothing wrong with electronic experimentation either... and this includes RADAR.

To the person mentioning transmitting a tone equal to 33.5 Hz per MPH in the amateur 10 GHz spectrum to confuse police radar operating at 10.525 Ghz, ... besides being illegal, that will not work. Remember that Doppler radar of this type determines speed by the amount of frequency shift received from the echo in reference to the primary main bang output. Now a SWEPT SPOT PULLOFF GATE with a MPH Doppler Rate could do what you are attempting, but it is doubtful unless you transmit outside

of the amateur band. If you break the law and actually try to do this, be advised that the police radar going down the road in "silent" mode will suddenly light up with a displayed speed when your vehicle happens to drive by. Even a less than savvy policeman will probably guess that there is something very strange about YOUR car. Also remember that you are going to need transmitters for X, K and KA band, transmitting to the front and rear. None of my business, but I would recommend a really good passive system and very fast reaction times with your left foot, rather than even thinking of an active system.

I have a question and for all of your Motorola Fans. Will a VHF Micor be able to accept Alphanumeric paging information and transmit it without errors? I have been told that although it is direct fm modulation in the transmitter exciter, it might not be able to handle the Alphanumeric information. Is there any modification that can be done to correct the problem, if there is a problem? Please reply via email. Thanks Don Smith KB6GQA

Cell phone industry to
publish RF Radiation data

July 17, 2000

NEW YORK (CNN) -- The U.S. cellular telephone industry will start publishing information on the amount of radiation that enters users' heads when they use various wireless phones.

CNNfn has learned that the Cellular Telecommunications Industry Association is going to require manufacturers to submit data -- called SARs for Specific Absorbed Radiation -- starting August 1. The move is a policy shift for the CTIA.

Manufacturers who want to be certified by the CTIA will need to submit the information, which is expected to start reaching the public in three to six months.

The information will be included in the product literature inside cell phone boxes. How to read the data is not yet clear, but customers will be able to compare SARs on different cell phones.

The industry, however, continues to maintain that all cell phones sold in the United States meet government regulations and are safe.

For years the CTIA has said the radiation numbers would lead to a "meaningless beauty contest" and would confuse the public.

Louis Slesin, editor and publisher of Microwave News, told CNNfn that there was a lot of pressure from customers.

"The public wants to know, and a couple of months ago a blue ribbon panel set up by the British government said outright this information should be on the box. So there is growing pressure worldwide to make this information available to consumers," he said.

Prudential Securities Analyst Chris Larsen said the industry should learn from cigarette manufacturers.

"Why not come out front and say ... here is the information you need to make a decision. We don't know if it's bad or not, but here's the information. We'll be as up front as possible because apparently not being up front has hurt the tobacco companies," Larsen told CNNfn.

CTIA President Tom Wheeler was unavailable for comment, but several sources confirmed the policy shift.

The largest U.S. cell phone manufacturer, Motorola, stands to gain if the public chooses cell phones with low SAR numbers because its StarTac line of phones has produced some of the lowest reported SAR numbers.

There was no immediate comment from Motorola.

2882. IC-746 iambic mode question

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-17 00:00:00 UTC

Message-ID: <7nKc5.768$Zw4.137530@dfiatx1-snr1.gtei.net>
Source record: 107064

My IC-746 came from the factory set to Iambic Mode B. I learned Mode A and don't want to make the transition (nor do I want to purchase an external keyer just to get Mode A). Is there any way to program the IC-746 to produce Mode A iambic? Can't find it in the manual or on the set option program. Thanks,

Gary

Since the Sidewinder is air-to-air not air-to-ground, you point it in the
general direction and the IR tracker guides it rather than "loading attack
coordinates", and U.S. military is not likely to arm major ordinance outside a
range in the U.S. during peacetime, this sounds like horse puckey to me.

A sworn compaint (if there had been any) could have resulted in a
court ordered exam, and the parents would have no choice. But none of
your "witnesses" would do more than whisper to the gossipers and to
the "cult" experts like Rick Ross.

This is a poor sort of truth you are peddling.

And here we have the key to your whole rationale:

> Well let's see .. he's a 9th grade dropout that thinks he's some kind
> of deity, he's the leader of a apocalyptic doomsday cult, he's been
> involved in a prior gunfight with others in his own cult and was once
> tried for attempted murder. Yessiree I'd believe *everything* that man
> said.

Staggering analysis, yes? One element at a time:

> Well let's see .. he's a 9th grade dropout

Abraham Lincoln did not get so far.

> that thinks he's some kind of deity,

So said his murderers. His own words on the subject are different.

> he's the leader of a apocalyptic doomsday cult,

So said his murderers. Koresh predicted the US government would kill
the Davidians, and it happened. The government, of course, takes no
responsibility for the deaths. Supposedly, it was the prediction
alone that killed Koresh.

> he's been involved in a prior gunfight with others in his own cult

History shows Koresh did not start the gunfight, and the man who did
start it died in a mental institution.

"Cult" is a deliberately pejorative term applicable to any religion
you detest. After such words come only venom.

> and was once tried for attempted murder.

And acquitted by a jury of his peers. In other words, not guilty.

> Yessiree I'd believe *everything* that man said.

After this display, your own credibility is open to serious question.

>
> Multiple people (including myself) say:
>
> "your terrible misinformed"

And you are right to say so Sean! Now we need some facts to back that up. I would suggest that everyone go to the following URL's and read the COMPLETE reports found there. For a change the politicians have some decent science to back their call for laws banning the use of cell phones while driving.

http://www.nhtsa.dot.gov/people/injury/research/wireless/
http://www.nejm.org/content/1997/0336/0007/0453.asp
http://www.theautochannel.com/mania/behind/news.html
http://www.theautochannel.com/mania/behind/news.html
http://cartalk.org/Mail/Letters/1998-09-25/10.html

I'm sure there are more studies if you just look for them.

As Kim pointed out there are "other" distractions to be found while driving a vehicle, but cell phone use is wide spread, and easy to identify when somebody is breaking the law. In other words you can see the cell phone stuck to the driver's ear. While this may seem unfair, it is "typical" government action, go after the biggest problem, and make one shoe fit all feet, i.e. band cell phone use while driving. If people used their brain more often, and did not use their cell phone frequently while driving, we would not have a problem, nor would there be a need for a law either.

Since the consensus of the group was that telco technology was definetly in
this frequency range, I called telco.

The person answering the phone was a field tech doing office rotation (I
was lucky). He said he
all he could do was send someone out with a butt set, but admitted this
would be of no use. He said
the testing department, to his knowledge, had no RF gear, but just gear to
test balance and signal quality. So
they would be of no use.

He agreed that if one wire in a pair on a dsl provisioned line was broken,
or more likely, is shorted
to an unused pair, that the signal would radiate into the AM band.

So he is going to have his supervisor call me.

So we know that Cable companies must regularly sweep their network looking
for emissions and log testing. Does
the FCC have a requirement for telco's to do this now that they are
potential emitters?

Anybody know what the RMS voltage of the fundamental (160KhZ) is on ds1,
isdn, or dsl line on 1 wire relative
to earth ground? Just curious.

I wonder how they could measure the Doppler shift of the source. Did
they happen to "guess" the frequency of the emitter?

Excuse me Mr. Tannehill but in your exhuberance to prove that infants should have guns in their cribs, you stated regarding Kristalnacht that the guns belonging to German Jews had been confiscated a year prior to the event.

I find such propaganda humorous because if you'd be kind enough to check out both the Treaty of Versailles which ended World War One as well as the Constitution of the Weimar Republic which was the German provisional government between Nov.11,1918 and Jan,30,1933, the day on which Hitler became Reichskanzler of the Third Reich, you will discover that private ownership of guns by ANYONE was VERBOTEN therefore the Nazis in 1937, one year prior to Kristalnacht, had no reason whatsoever to confiscate guns.

There simply weren't any. Furthermore even if guns had been allowed, the German populace had been so innoculated with anti-Semitic poison, they would have aided their Nazi masters. This is precisely why in this country we must stand up against polarization, hatred, bigotry and hate crimes.

At every level we must resist those who want to divide and conquer. I suggest anyone with hate in their heart, especially the white extremists, to ask themselves if they would accept blood or organs from a Jew or a man of color if implied willingness would save their own lives?

By logic the readers will now know that you are a shill of the NRA and the rightwing of this country with the credibiity of a drunken lizard therefore I respectfully request you keep your bullcrap off this board after having exposed you for what you are. I am sure there are other USENETS that can profit from your attendance-find one.

<Yawn> *And* to the newspaper reporters that originally reported the
series of articles on the Davidians.

>This is a poor sort of truth you are peddling.

I'm not 'peddling' anything, I don't have a web page up trying to get
'hits' , sell my point of view etc. Maybe get paid for a book etc.

And it all makes a hell of a lot more sense to me than your
"Government Assassins" that were under the directive of the Government
to shoot members of the ATF, all of this over a rag-tag religious cult
out in the middle of nowhere.

Ahhh so now Koresh assumes the status of Abraham Lincoln.

>
>> that thinks he's some kind of deity,
>
>So said his murderers.

The Davidians ? The jury found the Davidians set the fire or haven't
you heard ? Or is that yet another part of the GIANT Conspiracy ?

> His own words on the subject are different.

Uhhh writing the 'Seven Seals' sounds rather 'Deity Like' to me. YMMV.

>> he's the leader of a apocalyptic doomsday cult,
>
>So said his murderers. Koresh predicted the US government would kill
>the Davidians, and it happened.

He predicted they'd die in a fire , which tapes show they set. Why folks like you see much of any difference between Koresh and Jim Jones /Heaven's Gate / African / Scandinavian religious suicides etc is beyond me.

> The government, of course, takes no
>responsibility for the deaths. Supposedly, it was the prediction
>alone that killed Koresh.

Nah, last I heard it was the fire and a gunshot wound. The fire was caused by the Davidian's unless (of course- It's part of the Conspiracy) you wish to dismiss the jury's findings and the tapes they listened to.

>
>> he's been involved in a prior gunfight with others in his own cult
>
>History shows Koresh did not start the gunfight, and the man who did
>start it died in a mental institution.

History shows Waco was Koresh's *SECOND* gunfight. In all probability ONE more than most if not *all* of the ATF Agents had ever been in.

>
>"Cult" is a deliberately pejorative term applicable to any religion
>you detest.

Depends on your version of 'normalcy' with respect to religion there pal. 4 dead ATF agents, 6 dead Davidian's, a small army of ATF/FBI agents surrounding the place and news feeds from all corners of the globe. Then for the next 51 days he's inside writing the 'Seven Seals' and preaching sermons some of which last 4 hours or more. Sounds pretty *CULTISH* to me pal but hey if that's any where near *normal* in your book have at it, it's *not* normal in mine.

> After such words come only venom.
>
>> and was once tried for attempted murder.
>
>And acquitted by a jury of his peers. In other words, not guilty.

Yes as I originally stated. But that doesn't remove the *fact* that he *was* involved in a prior gunfight and *was* charged with attempted murder. Actually Koresh and any remaining Davidians from the original gunfight more than likely had more *REAL* Gunfight experience than the ATF. I doubt if any members of the ATF had any REAL WORLD

experience, theirs was more than likely just practice drills.

>> Yessiree I'd believe *everything* that man said.
>
>After this display, your own credibility is open to serious question.

Oh no doubt. Your version complete with Gumm't Assassins shooting
their own members etc would be *THE* only credible view.

Wow.... what a story! You know it would be even more amazing had the author taken just a little more time to get at least SOME of his (or her) facts straight.... let's see.... where to begin?
"Spec An measurements indicated a doppler shift of 200 MPH".

Ok, well if you are receiving a signal, the only way to know if there has been any shift in frequency is if you know what the original transmit frequency was to begin with. The guys on the hill had no way of knowing that.

"loading attack coordinates into a Sidewinder Air to Ground Missile".

Oops... the Sidewinder is an Air to Air missile and does not guide on RF to begin with, it guides on the heat sig. of the target.

Everyone likes a good story, but please rest assured.... our Navy is not going to shoot missiles at ham radio operators for heavens sake. Not even by accident.......

By adding many program shortcuts, my Desktop has become very crowded! Under Windows 3.X I could assign an Icon (like Photography) a name and drag other Icons to it. That way I could click on a single Icon and have access to many shortcuts under the same heading. Is that possible under Windows 98 SE??

Ha Ha, Slow day there Dave?

Here's another one, "This really happened":

About 20 years ago I picked up a surplus Police CW speed radar from
an auction at the Virginia State Police. We had an airshow coming up,
so we took it with us to see if it could track airplane speed. We
parked along the freeway and this F-16 was coming at us, so we
pointed the antenna (it's pretty big, made to fit in the rear window)
at the plane, and it immediately started dropping chaff and flares.
This was followed by what looked like an 11 G turn and a steep
nose over maneuver. The flares had started several large range
fires, and fire trucks were coming from all over to put the blaze out.

We kind of slinked away and went to a bar and had a few beers...

As much as I'd like to say no, I believe Hillary said it and perjoratives as well about other minorities and according to what I heard on Shawn Hannity this afternoon, one of her security guards swore to it. If I were a New Yorker I'd definitely vote for Victor Laszlo.

This of course bears NO refelction whatsoever on Al Gore who's daughter married a Jewish fellow named Schiff. When I watch Gore I get the feeling that he'd like to say something to really distance himself from Bill and Hillary but he's too much a gentleman to do it. However if the allegations are proven, Al SHOULD say something because if not, he will be hurt by this thing.

Incidentally the guard on Hannity also talked about Bill's and Hillary's use of disparaging terms against BOTH Jews and Blacks which is another reason why Al must speak up to prevent the Black vote from being lost.

Dammit anyway--I must be gullible. Here I thought that Hillary was an opportunistic LADY who put up with her husband's wing wanging or was it wang winging for political gain however it's turning out she's no LADY after all. I feel awful about this latest flap and if anyone has words to soothe my rattled pysche, please e-mail me. As Elvis sang, "I'm All Shook Up."

On the other hand, have you ever seen the wonderful film called, "The Music Man" starring the late Robert Preston as con man Professor Harold Hill and Shirley Jones as the librarian Marian Paroo? It's about this slick salesman who roams the midwest in 1912 and has a shtick whereby he comes to towns to convince the inhabitants that he will, for bucks, start a band, outfit them in fancy uniforms and teach them to play all the instruments by the process of "thinking" the notes.

My wife and I saw the show Saturday night at the Neil Simon Theater on 48th Street, NYC. We first dined at Gallagher's Steak House which has been in business for 80 years and then took our, so help me, FRONT ROW CENTER orchestra seats for the 8:00 PM performance.

If anyone reading this is coming to NYC and wants to take in a show, this is perfect but make sure you sit close. We were so close that at the end of the next to last act, when Marian and Harold are sitting on the bridge and she sings "Til There Was You" while throwing rose petals into an imaginary pond which actually was the netting over the orchestra pit, they were bouncing off me. Luckily the dumb broad wasn't skimming rocks. I was tempted to stand up and kiss that lady-that's how close I was. I would have, had it not been for my wife who saw me begin to stand and grabbed me by the seat of my pants.

The show takes place in River City, Iowa and the performance of the song, "Trouble in River City" brought down the house. This young guy, Craig Beirko, who played Preston's role, sounded exactly like the latter. And Mayor Shinn of that town used to be in "The Jeffersons." Isn't the tune, "76 Trombones" a gas? It also brought down the joint.

It was an enormously entertaining 3 hours with just a 15 minute intermission to empty your bladder but the smart people, like I and my wife, empty BEFORE Act One and preferably in rest rooms too. It's literally impossible to get into rest rooms Intermission time and especially for the woman since they must use a cubicle rather than a urinal due to indoor plumbing. And so what happens is that the distaff side will walk right into the men's room and use THEIR cubicles. I kid you not-I've been before a urinal when it happened and more than once. It's especially embarrassing when the ladies, upon exiting, write on the walls with magic markers, "All bulls with short horns, stand close." I felt humiliated way back when it happened. Really traumatized.

That show was written and scored by a midwest genius named Meredith Wilson from Mason City, Iowa who is now long gone but never forgotten. Oh yes, one more thing. After dinner we lined up under the theatre canopy to get in. It rained so hard the homeless bums lying in outdoor alcoves on the other side of 48th street began floating east toward the Avenue of the Americas. What a mess seeing these swirling flailing vagabonds crashing into pedestrians, lamp posts and store fronts. Mayor Giuliani's done so much in NYC you'd think by now he would have outlawed rain.

Recently, I was in Boston to attended a function at the observation deck in the Prudential Center, 50 floors up. I was very amused to see person after person take out their cell phone, punch numbers, and put it away, frustrated.

There is at least one big UHF TV antenna (Ch. 68) up on the roof a mere 2 stories up and no doubt at least a few dozen more radiators in the immediate vicinity (the 60-story John Hancock building is next door.)

(I did have my HT, but was too busy doing what people usually do at functions (eat, drink, schmooze) to think about bringing up any repeaters.)

Take care,

Dave

Sad to say, it must be true, guys. In an email earlier today, the Radiosigs-Guy informed me that he is leaving ham radio. As a last ditch effort, I asked him to get a mobile rig since his new home doesn't have room for a ham shack.

Well I hope before he gets the station taken apart for good, he'll have at least one more qso with Brother John, N4FZ (formerly KC3AU) and David, KB1EVE (formerly KC1ZQ). What an appropriate farewell.

And I hope KT4TR will be on hand for the grand-daddy of all rrrrrrrrrrrrrrooooooolllllllllllll calllllllssssss to mark the occasion.

But for what it's worth .. don't go Radiosigs-Guy.

The Yearly gathering of the Normally Uncommitted Mp3 Boys
and Nihilist Uberstein Terrestrial Shortwavelisteners 69
(NUMB-NUTS) has voted unanimously to decree that Spike
Jones immortal song "Der Fuherer's Face" is herby attained
and confirmed as the official song of 3.950 SSB and it's
"alternate" 3.850 55 or 60 or wherever freq CLN's VFO happens
to lock onto that evening. NUMB-NUTS encouraged a healthy
listening dose of "Der Fuehrer's Face" prior to listening to 3.950
SSB. This will enrich your private listening pleasure immensly.

An MP3 copy of this Classic may be downloaded at the URL below.....

http://spikejones.homepage.com/jones.html

Note: you will also need a MP3 player software. We reccomend
WinAmp at: http://www.winamp.com/getwinamp/

Oh, that's why you specified "designated radar frequencies" and "amateur
or otherwise" I really must learn to read between the lines better.

Maybe if you had used "shared amateur bands" it might have been more
obvious. But then that would have included shared bands used for
non-police radars and ended up still confusing some of us.

> taking a sip of a drink, eating, etc., etc.

Already addressed some of these (smoking, eating, etc.) in another message addressed to Aaron, so I won't repeat myself on those here. And, as I said in that message, these things are not that risky. But, I will agree with you that putting on makeup, reading, looking at maps, and other serious distractions, are serious concerns (unlike smoking, eating, or taking a sip of drink). But, I'm going to hold off on any further comment until after your paragraph below.

> I have one for you to think about, though.
> What about DWI? How strongly are the laws
> of your state enforced concerning DWI?
> They aren't, generally, here at all. Bet
> there'd be lots more cellular phone tickets
> that result in applicable punishment than
> DWI tickets that result in applicable
> punishment. Why is that?

Well, don't know where you live, but DWI laws are enforced strongly around here. In fact, just about every week, the police set up a road block just down the road from my house and they stop every car going through to check for anything out of place (license, insurance, DWI, drugs, etc.). In fact, my wife just got a ticket about two weeks ago for not wearing a seatbelt (poor excuse, I know, but she had just stopped for gas right down the street and was only driving the remaining three blocks to the house - at 25 mph).

Anyway, back to the discussion (I said above that further comment would follow). In many ways, operating a cell phone is similar to DWI, so this is a good point of comparision. Like the DWI suspect, many cell phone users (not all) are are so involved in the phone conversation they are totally oblivious to what is going on around them. The result is the often seen weaving, tailgating, and otherwise erratic driving, often associated with the cell phone user. Therefore, if we're concerned about the erratic driving of the DWI suspect, we should also have equal

reason for concern about the erratic driving of the cell phone user.

By the way, since it was also brought up above, while certainly people putting on makeup, shaving, and reading, do typically display this type of erratic driving, those who smoke, sip on a soft drink, or chew on a hamburger, do not (the key word is "typically" - not occasional worse-case incidents), so these later things do not belong in this conversation - they are not a good comparison.

Read that sentence again, Cam. I said the suspected cause was the "USE" of a cell phone, not that the suspected cause was the cell phone itself. The word "use" generally implies an action, not an object.

> When are we going to return to the days
> when people were responsible for their
> own actions?

In this case, it seems we're doing that. Her action was using a cell phone while driving on a difficult road. The possible result of that was the accident. By the way, I used the word "possible" since it is only suspected that the cell phone was the distraction that caused her to lose control of her vehicle.

Of course, you already know about the rift that exists between active duty personnel and the Guard and Reserve (armchair soldiers, weekend warriers, etc.). Now that I'm no longer closely associated with active duty personnel, I can afford to be generous. ;-)

Actually, I'm kind of glad to see this nonsense slipping away. As the Guard and Reserve take on more tasks, even the active duty people have to take notice.

> And did you know that 70% of the Army's
> medical assets are in the Reserves? (It may
> be more now, I left the Army Reserve in 1998.)

Yes, I do know that the Army's active duty medical assets have been reduced. On a recent extended visit to Italy, our medical care at an Army base (SETAF), consisted of a small clinic with very limited capabilities, and a TRICARE book entitled "Taking Care of Yourself - The Complete Illustrated Guide to Medical Self-Care." More serious treatment involved a trip to an Air Force base about two hours away. Trust me, this was not the best place to get sick or injured.

> rarely participate in an actual informational conversation. :-)

Already addressed that in the message you quoted, Cam. You just forget to quote it in your message. I said, "Because of that, I don't use a cell phone in the car anymore - I use my radio instead. From personal experience, I have found that the radio is far less distracting. Because I can turn up the volume, and the sound quality is generally better, I don't have to concentrate so hard at understanding what is being said."

I continued with, "In addition, I've found the conversation to be far more short, and more to the point with radio. Unlike the cell phone user, who often spends time gossiping, talking about what the kids had for breakfast, discussing business deals, or other nonsense, conversations on the radio are often far less involved (Hi, I'm on my way home. Be there soon. Okay? Catch you later.)."

And, yes, I do know you were trying to be funny. But you had to take my comments out of context to do it.

First, walk an AM radio off your parents property and see how big an area is affected. If it is large, I wouldn't bother hunting around the house for anything you can fix. If it is local to your address, find an area where the interference is worst, and have someone listen while you cut the power to the house. Do I need to mention that you should use a battery powered AM radio? If the noise disappears, turn the power back on, one circuit at a time. When the noise comes back you will know which circuit it is on! Check any items on that circuit. This is a lot faster than running around the house unplugging appliances and lights.

Happy hunting!

Paul

2930. RCA VHF on 6 Meters?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-17 00:00:00 UTC
From: dstalk@execulink.com
Message-ID: <5%xc5.21487$227.404289@nnrp1.uunet.ca>
Source record: 107123

Hello,

I picked up an RCA model 559906-E VHF radio at a flea market and am wordering if it can be converted to 6 metres? The receiver receives some cordless phone calls, so I suspect it operates in the 47 MHz range.

In case the model number doesn't mean a lot, the unit is 6-1/2" wide, 11" long, and 2-3/8" high. There is are heatsink, 2 molex connectors, and a UHF jack on the rear. The controls are OFF/VOL, SQ/QC, and FREQ (2 xtal controlled channels).

Any information would be appreicated.

Thanks,

Don ve3hur

> fast.

Have you ever tried that? Neither the stations nor the FCC have
the manpower to track down anything! If you actually find and
identify the source of the RFI, they will look into it. But they are
all out of the sniffing business. The only way that the FCC will
move is if the FAA reports that the aviation frequencies are being
disrupted. Otherwise, c'est la vie.

>Never seen anyone with a hamburger stuck in their ear

I think that sticking a hamburger in your ear would be just as distracting as placing a cell phone in your mouth, don't you?? And just as silly...

> A radio has a volume control,

And if you turn the ham rig's audio up too far, you can't hear the warning honks, the tires squealing, and the pedestrian's screams. At least with a cell phone you're only disabling one ear...

>Most radio conversations are casual, requiring only a casual
>effort to participate.

So mobile ham radio is safer because the conversations are boring??

>It only requires two fingers to hold a cigarette.

But sometimes there is a momentary failure of those two little fingers holding that cigarette, and it drops between your legs. That may be a whole lot more distracting than using a cell phone, don't you think...

>Trying to excuse bad cell phone users by pointing at
>other bad drivers is not the way to win support.

I'm not excusing bad cell phone drivers. If they get into accidents then they should pay the penalty. But why penalize the millions of users who do it safely...

I guess the answer is yes. You do use a ham rig on the freeway...

>This takes a considerable amount of attention. I know. I've tried to
>use a cell phone in a car before and found it extremely distracting.

If you are uncomfortable using a cell phone while driving, then that
is a good reason not to do it. But most people don't have that
problem...

All I ever operate when mobile is CW. Some might think that it would
be very distracting, but it's not. There is not much difference
between holding a key, a mike, or a cell phone...

The signal is strongest on the incoming cable and telephone lines.

This is not a light bulb or streetlight or a budweiser lamp. This is data.

The signal fades as you move away from the cables. Both cables come right
from a telco splice
and a cable splice.

The signal is not present over a wide area, just the local property.

Does anyone know what frequency content DSL occupies. This could be from a
broken pair.

Thanks

>yours. So why not put a SASE in it? Most of the guys you send a QSL
>to probably don't need NJ. Can you help me with your logic there?
>
>Dan/W4NTI
>

Well, domestically, I only QSL either very good QSOs that were memorable (such as an hour or so ragchew with someone I just met on the air and talked about more than our RF output levels, antennas, and local weather conditions) or someone who sends me a card first (also I QSL all kids and those who mention the QSO with me was their first ham radio contact). Since I'm not out chasing paper to put on my walls, or in a book, or to get some award for Worked All Whatever, if a card does not come back, so be it. I QSL on the DX level basically the same way, but there is a slightly higher level of desire to get a DX card, but for the same reasons. I do not QSL a typical DX QSO that goes alone the lines of a "You're 59. 73. QRZ?" If the DX contact turns out to be a decent and true CONVERSATION between two people with similar or even diametrically opposed interests in different parts of the world, a QSL card is sent. Since getting a return on a domestic QSL would be nice but not necessary, coupled with the fact that it's already costing me first class postage for the outgoing card, and since my return rate is quite good anyway, why should I spend more money on postage that might not ever get to my door? I have very good success the way I've done it for years. For domestics, I just like my cards to arrive in good condition. Like I mentioned, this is why I send cards in an envelope. There's no perceived expectation of a card in return. It would be nice but not necessarily expected. For DX stations, there may be more of a thrill aspect of getting QSLs, but I don't need any at all. I like sending them and receiving them. Additionally, I have a few hundred domestic QSLs. I have received many, many of them prior to me mailing one out. I have received many in envelopes. I have yet to receive a domestic QSL with an SASE enclosed. None have ever included return postage. Many DX stations have sent SASEs. In closing, I wish to mention that I really don't care if no one ever needs a card from NJ. I return to all I receive as a courtesy. I don't need any state or

country for that matter. I QSL to commemorate QSOs worthy of such commemoration...DX or domestic. What's the logic behind spending time trying to crash through pile-ups to get a "59 QRZ?" and spend money, time and potential aggravation, pensivity and anxioty QSLing such QSOs to get an absolutely meaningless certificate of accomplishment that will not help ones quality of life or social stature aside from bragging rights and maybe a line on a list in some ham magazine? We all have reasons why we do certain things. Actually, it is rather meaningless to ask why or explain why...(but I was at work and had time to kill tonight). I do what I do because I chose to. You do what you do because you chose to. Like the beer commercial used to ask..."Why ask why?"

Of course it is because the ham you are listening to requires no
concentration as he is saying nothing of substance.

>
> In addition, I've found the conversation to be far more short, and
> more to the point with radio.

Surely you jest. I never heard a ham get to the point.

Unlike the cell phone user, who often
> spends time gossiping, talking about what the kids had for breakfast,
> discussing business deals, or other nonsense, conversations on the radio
> are often far less involved (

That is well understated. Hams discuss nothing.

> Anyway, I support the cell phone bans. I think they're reasonable and
wise.

I support ham radio bans.

Glenn,
Your music will always be with us but I thought you perished on Dec.15,1944? Glad to see you're still here.

You know what the public doesn't know about you that I do because I've been a fan of yours since I was 10 years old; that was in 1948? And by the way I was raised in Passaic, New Jersey and your very last stateside concert was in the Capitol Theater on Central Avenue, Passaic, Sept.28, 1942.

People don't realize that you failed Freshman music composition at the University of Colorado. And what did you have to do to be re-instated the next Fall? Compose something that would grab the fancy of the directors of the School of Music.

What you composed not only got you re-instated, was phenomenal but also will be around as long as pop music itself. In fact it became your signature tune. "Moonlight Serenade." Damn, you're a genius Mr. Miller.

I found out lot about you for two reasons. I have read several biographies and even corresponded with David MacKay who used to be the executor of your estate. Secondly a distant, now deceased cousin of mine, Wilbur Schwartz, told me much when we met in 1982. You remember Wil, don't you? He played sax in your Stateside orchestra, right next to Tex Beneke and worked with Jerry Gray in arranging one of your masterpieces and the biggest selling instrumental in the history of American music-"In the Mood." You gave cousin Wilbur a big mention in the movie "The Glenn Miller Story" with Jimmy Stewart as you. In fact you credited Wil for giving you that special unique mellow sound for which you were searching for decades.

Glenn Miller-you're in a league of your own.
Doc,AF2Y

Hmmm,
If it truly IS as you say below, then why is it that when disaster strikes, power and communications fail, it is usually the Hams the authorities call upon to help? When smaller boats get into trouble at sea, why is is that HAMS are the ones who are often called upon to assist thru such services as the Maritime Mobile Service Net? Why does the Red Cross rely on HAMS to run most of their traffic in the event of floods, fires, hurricanes, and earthquakes? Why does the weather service rely upon SkyWarn to provide up to date eyewitness data on wind, rain intensity, damage, size of hail, etc? Again a service provided by HAMS! Why is it that the Military relies upon/ supports the Military Affiliate Radio System (MARS) to pass health and welfare, and personal messages between service people and stateside? True, cellphones have lessened the need somewhat, but MARS passes these messages for free. Again, a service provided by, yup, HAMS! Why is this so? Because Hams have proven from the beginning to be a valuable asset to the community, state, and Nation when the chips are down. They have taken the time to get TRAINED for this, and those who are in positions of authority in government KNOW this. That's why.

Tell me, while you are so busy bashing hams, why the authorities NEVER call on CBers on any sort of blanket basis in a disaster? Why isn't there a CB MARS, A CB SkyWarn, a CB Races (except to see who can out-power the other), a CB Maritime Mobile Net? Yeah, you got that REACT stuff, but what do they "react" to? A broken down car on the freeway? I've never heard of or seen any of that REACT stuff at any of the dis-asters I've responded to--such as Hurricane Floyd in eastern NC. Nothing interesting to talk about? HA! I've heard technical conversations on the ham bands that would baffle many a layman--includ-ing YOU, I betcha.

No flames intended towards the majority of the nice people on the board, I'm just responding to someone who apparently is badly misinformed! And I don't care if the original poster was or was not a ham, either!

The annoying thing about cell phones or any phone is that you only hear one side of the conversation. If they were like radios they would be less annoying and the user would definitely try not to have others listen in on him. Could be embarassing.

I know you are too lame and inept to search DejaNews for confirmation
and proof (it's there for the reading), so here is the list of your
lies to remind you. The twenty seventh lie is the one I just caught
you in. I think I'll add your above lie as number 28.

Toilet Boy, you're still a liar and a fraud.

1. I proved you lied about the first date of your appearance on the
Internet.

2. I proved you lied when you denied making the claim about
patronizing under age child prostitutes.

3. I proved you lied when you claimed to have written "several
technical articles" for the ARRL and other technical publications.

4. I proved you lied when you claimed to have adopted your dead
sister's children.

5. I proved you lied when in the span of two weeks you claim to
be married in one forum and single in another.

6. I proved you lied about having college degrees.

7. I proved you lied when you denied you were identified as a
known Internet abuser by Joe Greco on his published lists of
spammers and idiots.

8. I proved you lied when you claimed you weren't stealing
Internet access and your employer terminated you for theft
of services.

9. I proved you lied you claimed you've never used fictitious
or illegal Internet address.

10. I proved you lied when you claimed you were not the most
prolific poster of off topic messages.

11. I proved you lied when you said WD-40 was unsuitable for electronic use by posting another endorsement from Roy Lewallen, w7el@teleport.com, which you ignored.

12. I proved you lied about your place of employment when I posted your work telephone and related data. I also proved that *you* worked at that office and not your retired father.

13. I proved you lied when you claimed that Bill Cheek had never been a member of Mensa.

14. It's been proved by others that you lied when you claimed to have never lost an ISP for your forged cancels.

15. It's been proven by others that you lied when you denied using numerous fake identities on the Internet.

16. It's been proven by others that you lied when you denied you've never blown up a repeater system through your incompetence and total lack of technical expertise.

17. It's been proven by others that you lied when you denied trying to break into other computer systems using Back Orifice.

18. It's been proven by others that you lied when you claimed you had "acquired MORE FCC licenses ... than could be counted on one hand!"

19. It's been proven by others that you lied when you claimed you have made your "lioving from the Radio Communicatoins Field for most of the last15 years."

20. It's been proven by others that you lied when you denied having stalked Bill Cheek for over three years.

21. It's been proven by others that you lied when you denied being kicked off Fidonet by Bill Cheek.

22. It's been proven by others that you lied when you claimed Bill Cheek had been kicked off of Fidonet.

23. It's been proven by others that you lied when you claimed a police had been filed supposedly about harassing phone calls made to you at your place of work.

24. It's been proven by others that you've emailed death threats to your detractors on the Internet.

25. It's been proved by others that you lied when you claimed to "have helped resolve" the problems of the scanner newsgroups and have "rid this NG of trouble makers."

26. It's been proven by others that you lied when you denied sending bogus complaints using aliases to the Internet providers of your detractors.

i don't know of that sound card but if you have the driver for it just
go under control panel, add new hardware,click next,next again, then it
will ask you install from list below,click no then next, then windows
will ask you if you would like windows to fine it click no then next
the next window you will see look for the hardware you are trying to
install which is the soundcard click it or "if you are trying to
install a modem" and windows will bring up a data base when this come
up click hard disk if you have the driver on a 3 1/2 disk this will
take you to the 3 1/2 disk just click the driver you need it should
install the driver at this point. first i would let windows try to
install it. windows program will config the driver if you are not sure
on how to do this fine someone who know about install driver or config
them they will know what to do .

i have to agree with kim. there are statistics that prove there are more "phone boner" accidents caused by blabbing on cell phones, than drunk drivers.

thats kind of frightening if you think about it.
especially out here in california, its a real problem. i see it all the time, knuckleheads weaving all over the road. sure enough you pull up to them, theyre on the phone.
i have a cell phone. i just wait until i can pull over to make a call. the world can wait a few minutes for me.

my question is:
if they pass a law against it, (which i hope they do) will it affect us hams talking on our mobils?
maybe not as we provide a service, and it doesnt require our complete attention. not to mention we dont have to hold it to our ear.

that felt good, thank you.

"radiosigs@mindspring.com" <radiosigs@mindspring.com> wrote:
>Excuse me Mr. Tannehill but in your exhuberance to prove that infants
>should have guns in their cribs

YOU are the only one talking about "guns in cribs".

Your abomination of his argument into "guns in cribs" shows the ng
and the World that your level of reality is seriously deranged.

What he is talking about is a non-felonious, sane adult's right
to firearm self-protection in the US. Only a certified dumbass
like yourself would twist that into "guns in cribs".

>This is precisely why in this country we must stand up against
>polarization, hatred, bigotry and hate crimes.

Fine. But to rape the citizen from self-protection in the process
doesn't solve or remedy anything, except letting the criminal have
a field day, everyday, on the unarmed public.

>At every level we must resist those who want to divide and conquer.

Therefore, YOU must be resisted in your misguided, malinformed goal.
YOU are the antithesis to this country's Constitution.

>ask themselves if they would accept blood or organs from a Jew or a
>man of color if implied willingness would save their own lives?

'Course most of them would. Most of the people you are using in your
argument are chicken-sh*t hypocrites (like a certain 'Doc' on this ng).
HOWEVER, the VAST MAJORITY of citizens are NOT hatemonger criminals.
THESE are the people who YOU wish to rape of their rights, just because
you want to CONTROL a few freaks.

>By logic the readers will now know that you are a shill of the NRA

I am not an NRA member, but I believe in the right to bear arms. YOU
cannot take that away. The NRA is wrongly steroetyped by twits like you,
where you demonize the members.

Care to try this on for size? Oh, that's right, that'd be unfair.
Unjust. But when you use those same tools to paint a picture of the NRA,
or some other poster, you're 100% in the right.

Go to http://www.dictionary.com, and research the term "double
standard". I think they're even using your picture for illustrative
purposes.

>and the rightwing of this country with the credibiity of a drunken
lizard

Oh, sure...riiiiight. Like your credibility has any value over day-old
snot. Let's have the ng compile a list of folks that would apply any
credibility toward you.

(Don't have an aneurysm trying to count past one...)

>keep your bullcrap off this board after having exposed you for what
>you are.

Do the planet a favor. Follow your own advice about "bullcrap".

> relay station at a speed of at least 200 MPH.

to measure doppler shift like that you first have to know what the transmitter
frequency really was. with no reference its impossible to measure the shift.
i could see an aircraft on a training mission having active jammers that could
do this in certain bands, after all we do share some of the higher bands with
various radars and other services. and on some bands the aircraft or shipboard
radars may just overload a microwave receiver anyway. but no pilot in his right
mind would be targeting
missiles outside a specific training range and on a verified training target.
and
isn't the sidewinder an air-air heat seeker anyway?? and why in the world would
either the faa or the montauk police care about a fighter's ecm suite being
fooled? more than likely that report would be classified rather than spread
around to civilian agencies. too many holes, not enough substance, good urban
legend bait.

There's softeare etc. in place already that will do that. I have even seen a demo that'll generate a track of the locations where the cellphone has been. Remember that the cellphone sends coded transmissions in response to more-or-less periodic inquiries from the cell site. Cell sites keep track of where the phone is so it can hand the account over to an adjacent site when necessary. It needs azimuth and distance from the cell site to do this. A running account of these (polar) co:ordinates will generate a track of where the cellphone has been...

>

No. You see, Dan...lawyers know it's usually not good to say what's on ones mind because it can be used against you somehow if twisted the way other lawyers and politicians are prone to do. Politicians never say what is really on their minds because it may somewhere down the road, become twisted by another politicians media specialists (their spin doctors) if they can get the concept past the lawyers. No Dan, I'm neither a jurist prudent nor a political type. I'm just a 40 year old man raising 2 kids in diapers who says what ever is on his mind when it's on his mind without giving too much consideration to whatever whoever might think or say about it. I think Popeye said it best when he said "I am what I am." Love me or loathe me, it really makes no difference to me.

Frequency: Not really. The shift or original frequency can be deduced.
However, one has to know bearing and direction at the time of transmission.
With two stations, this is possible (to detect a third object - thus forming a
triangle).

However, I agree that this may have been unlikely given the circumstances.

I said "casual," Aaron, not "boring." These two words have very different meanings. A casual conversation can be interesting and entertaining. And an important business conversation, or whatever, can be very boring. Perhaps you find casual conversations boring, but I never said that.

To repeat: The author said they used a Spec An to determine Doppler shift. Based on that statement alone, determining Doppler Shift is impossible.

IF you knew the range and bearing to the target using two or more stations to DF the source, determining accurate doppler shift is no longer necessary because you already KNOW the targets relative speed to yourself. So then, why bother to even look at Doppler Shift?

Further, if you want to pick nits.....and some people love to do that.... modern jamming techniques do another couple of things making this story impossible. You can not determine Doppler Shift to them because they INTENTIONALLY jitter the frequency all over the place to begin with. Sophisticated jammers do not just "key down" with a few KW output and just "sit there". They have multiple VCO's going every which way but loose according to very classified modulation techniques. It is a no brainer that they are not going to make it easy for ANYONE receiving said jamming to get an idea where THEY are exactly.

Next, if you are going to launch a missile to guide on an RF signal, you do NOT jam it. You sit back all nice and quiet and fire it off the rails when they least expect it. Ask about 500 Iraqi's about this, they have first hand experience.

These missiles never fire automatically.

Already related.... the Sidewinder AIM-9 is a heat seeker, not an RF seeker.

And.....Microwave Packet transmissions do not in any way even come close to the parameters of any threat radar system. Self-Protection jammers will not trigger on such an emission.
Some amateur radio operators might, but not much else.

Of course the hams in this story were really lucky that the F-14's did not turn on their particle beam weapons. There would have been nothing left for Scotty to beam up!

CQ CQ CQ de K6LDO

Does ANYONE have or know someone who has succesfully (or knows how) to set up an HF station, antennas, etc. at one location (in a home at high elevation)... and then control it via computer from an RF Hole?

I moved into the worst possible "pit" (canyon) in Los Angeles, and I have absolutely no way to set up my HF antennas in such a manner that I can communicate any distance.

I have a 1700 foot location available to me (at a friend's home), however I need to figure a way to set up computer software to control the radio at my friends house, and then have a reliable way to connect my computer with his so that I can control the rig from the "RF Gulch". Also, very important to me is the ability to send CW through some sort of module in my Home computer to the remote Transceiver's computer.

Any realistic solutions would be deeply appreciated.

If you can help, please send me with your e-mail address, and I will send you a toll free number to reach me at so I can hear your ideas.

Thank you es 73 de Dave K6LDO

I am also interested in this topic, since I live in the SF bay area
and have a station in the CA central valley. W6RJ told me he
controls his mountaintop station using PC anywhere and a PC
at the remote, using a phone line modem connection. But he
uses UHF FM for the audio link. There was also an article about
4 years ago in QST about a station in Alameda, CA controlled
like this.

I talked to Kachina about their remote control boxes and you
can control either their transceivers or with their remote boxes.
The remote boxes use one phone line for both control and
audio. The audio is digitized and uses 90% of the bits, while
the remained 10% of the bits are used for control. It utilizes
up to 38K of modem connect speed. If you can only connect
at 28.8 like I can, then you get poorer quality audio. If
you buy a Kachina transceiver, then the whole system is turnkey.
For anything else, you have a project!

I have brainstormed this and come up with the following
untested concept: Use a burst modem to send commands
from the control point to the radio over a phone line. At the
same time, use the reverse direction of the phone line to
hear received audio. (Do not digitize the audio, just use
the line as an analog line). To transmit, send analog audio
with a 3 kHz tone superimposed on it. The 3 kHz tone
activates PTT. A notch filter at the transmitter removes
the 3 kHz tone. While transmitting, the reverse path can be
used to send telemetry related to transmitter status, such
as SWR or ALC, etc. The only thing this scheme doesn't
address is S-meter readings. The advantage of this
setup is that you can full analog phone line quality receive
and transmit audio (less a notch at 3 kHz) and only one
phone line is needed. Since the burst modem would operate
at 9600 baud or less, even the junkiest phone line would
be OK.

If anyone has any further thoughts, I would love to hear them.

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the

group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

So, waddya want, Doc?

The jackboots in this country too?

You're so inoculated with anti-gun poison, you'd aid your liberal masters as they try to subvert the 2d amendment by any process but the two provided by the constitution.

You're exposed as a shill of the left wing of this country, by your own logic, with all the credibility of Hillary 'I-didn't-whatever' Clinton.

Ask yourself. Who do you hate? What process accurately determines whether a man has hate in his heart? We can judge men's actions, but hearts ... ?

Would you accept the organs of Yasser Arafat, or Al Sharpton, or Jesse 'Hymie Town' Jackson, or one of Iran's mullahs, for your own continued existence? Would they be offered? Let's check their drivers' licenses.

As for dividing and conquering, do you extend your tender concerns for 'white extremists' to extremists of all stripes?

We respect contrary opinions enough not to invite their holders off the ng. Do you?

They really ought to publish their data concerning the amount of necessary calls made on cell phones instead. If you think drive-time repeater traffic is inane ("I am turning onto 34th Street. . .aw nuts, I missed the light. . .I never noticed that 7-11 there before. . .I am turning into my driveway. . .I think I smell pot-roast. . ."), then eavesdrop on some cell phone conversations while on line at the supermarket, in the dentist's waiting room, on the bus. All the gab about the utility of ham radio, heh! I don't think cell phone users need worry much about further brain damage from RF, the socailly-induced variety has already pushed them beyond hope.

True. I think however that Cellphones are going
to become what hand-held radar guns were to
police departments about 10-15 years ago.

A health risk!

Read the article which appears below from
www.earthfiles.com It may enlighten you.

Cell Phone Safety Alert
An Interview with Robert O. Becker, M. D.

© 2000 by Linda Moulton Howe

<http://www.earthfiles.com/img/BritishAlert.jpg>

"I have no doubt in my mind that at the present time the
greatest polluting element in the earth's environment is the
proliferation of electromagnetic fields. "

- Robert O. Becker, M. D., Orthopedic Surgeon

May 14, 2000 London, England - The British government this past week
received a medical research recommendation that controls be placed on mobile
phone use, especially for all young people under the age of sixteen. Tayside
University Hospitals in Scotland reported that in its study of the sort of
microwave radiation emitted by cell phones on worms - scientists discovered
changes in proteins consistent with cooking of the tissues. The British
report said that children in particular are considered to be at risk because
their nervous systems are still developing and because the smaller size of a
child's skull allows greater absorption into the brain tissue of the low
level microwaves emitted by mobile phones. Right now in Britain, one in four
mobile phone users is under 18 years of age.

The medical report makes a series of recommendations to the British
government that include:
1) To reduce cell phone radio frequency exposure five times lower than
current regulations.

2) To monitor workers exposed to radio frequency radiation.
3) To do independent audits of microwave masts and their emissions to make sure they are not exceeding agreed upon levels.
4) To create exclusion zones around microwave masts that are clearly marked.
5) To create a national system to test shielding devices and hands-free kits.
6) To fund a substantial research program under an independent panel to study the health effects of mobile phones, financed equally by the public and industry sectors.

As electromagnetic pollution proliferates around the planet and scientists in countries such as Great Britain, the Netherlands and Australia continue to raise cautionary alerts, one of the first medical pioneers to study natural electrical currents in the human body and to caution about electropollution is Robert O. Becker, M. D.

Fifty-two years ago in 1948, Robert Becker graduated from New York University's College of Medicine. Later, he became a certified orthopedic surgeon and spent thirty years as Director of Orthopedic Surgery at the Veterans Hospital in Syracuse as well as Professor of Medicine at New York University's Upstate Medical Center there. During those decades, Dr. Becker pioneered laboratory research in the field of regeneration of bone and muscle after injuries using weak electrical currents. In his 1985 ground-breaking book, The Body Electric, Dr. Becker described the exciting progress in his regeneration research while simultaneously warning the public about the growing electromagnetic pollution in the environment which could do harm. Twice Dr. Becker has been nominated for a Nobel Prize in Medicine.

In Dr. Becker's 1990 book, Cross Currents, The Perils of Electropollution, Dr. Becker showed how our human bodies and immune systems are being adversely affected by man-made electromagnetic fields from power lines, radar, microwaves, satellites, ham radios, video display terminals, and even electric appliances. In his book, Dr. Becker pointed out that radiation once considered safe,is now correlated with increases in cancer, birth defects, depression, learning disabilities, Chronic Fatigue Syndrome, Alzheimer's Disease and Sudden Infant Death Syndrome."

He told me this week that he met resistance in finding funding for his pioneering research in the same way that scientists and medical people today cannot get funding for independent research on microwave and electromagnetic impacts on human health. There are now, he says, too many industrial and political interests vested in the exponential growth and profits of the global telecommunications industry, regardless of the impact on cancers and neurological disease. I asked him what his current perspective is on the controversy surrounding the safety of cell phones and electromagnetic pollution.

Interview Robert O. Becker, M. D., Retired Prof. of Medicine at Upstate Medical Center, Syracuse , Director of Orthopedic Surgery at the Veterans Hospital, Syracuse, New York and author of Cross Currents and The Body Electric: "When you get into this business of the environmental effects of

electromagnetic fields, I was involved in the early stages of questions of microwave radar safety surfaced. My approach was: OK, first of all we have to know if electromagnetic fields, the fields in the space around you emitted from any sort of radiating source of such energy - do they have any biological effects? And secondly, what was the natural electromagnetic field environment before Thomas Edison came along.

Now if you look at the question of: Are there biological effects, the engineers and the physicists say absolutely not. Their view in general of what living systems consist of is that the cells are little plastic bags filled with minestrone soup. And you can then with that sort of a concept calculate the field strength and the frequencies you would need to produce an effect on the minestrone soup. And this is exactly the concept that was employed after it became apparent that radar systems could heat up the human body. The physicists that were involved in answering the question: Are there effects? And at what level do they occur? And what would be a safe level? Basically, they followed a basic precept which was to consider a spherical cow, a circular oval object filled with conducting solution and composed of a skin that is transparent to the radio frequency waves that microwave generators produce. And on that basis, they asked: How much does it take to heat this up? Where does the cow's temperature start to rise?

And that number was calculated and confirmed in actual procedures in the lab using the spherical cow concept. They said, "OK, that's the number at which you are going to start heating people. Let's say that's not such a good idea and we'll set a level ten times lower as the safe levels."

That level was applied for several decades to everything that concerned electromagnetic pollution. Of course, this is not correct. Any biologist can tell you that the body is much more complicated than that and the work I had done up to that point had involved the body's actual use of electric currents generated in the body that regulated certain things like healing. Wound healing is associated with a rather specific electrical current and voltage. So, the premise that was applied by the physicists and the engineers was erroneous from the start.

That's number one. Number two, what would be the normal electromagnetic environment assuming that we're starting from scratch at Edison's time - and not Edison either because he went to DC current to light the light bulb. It was Nikolai Tesla who conceived of the system we presently use and who, incidentally, gets no credit for it: the 60 second electromagnetic field that is carried by power lines, the big lines that are strung across the country, and provides the current that comes into your home and appears in the wall socket and you use to run the coffee maker and the TV and all the rest of the things in the house - 60 cycles. That didn't even exist one hundred years ago.

The only electromagnetic fields on the earth were those inherent in the basic magnetic field of the earth as it is influenced by the sun. And these were all at either a steady state magnetic field which is one that is non-varying. The earth's field is roughly 500 milligauss. The power, the magnetic field strength of the refrigerator magnet is higher than that.

The magnetic field strength inherent in the communication frequencies is far, far lower than that, but all of these are oscillating. They are frequency-dependent. The earth's field does not oscillate very much at all. It goes up and down to a slight extent depending on the time of the day and the situation on the sun.

SO, WE HAVE SURFACE LIFE THAT HAS BEEN USED TO EVOLVING AND GROWING IN A VERY SPECIFIC KIND OF FIELD THAT THE EARTH HAS EMANATED STEADILY AND THEN SUDDENLY SINCE EDISON, ABOUT ONE HUNDRED YEARS AGO, EVERYTHING CHANGED.

Everything markedly changed and if you graphed the curve of increasing incidence of use, it would go up in an exponential fashion. It has been a rise that doubles itself every couple of years.

AND BASED ON YOUR KNOWLEDGE IN THE WORK YOU HAVE DONE IN YOUR CAREER CONCERNING ELECTROMAGNETIC FIELDS AND BIOLOGY, WHAT IS YOUR OWN ASSESSMENT OF WHERE WE STAND TODAY IN 2000 IN RELATIONSHIP TO THE PROLIFERATION OF CELL PHONES AND THE MAST TOWERS THAT PUT OUT THE RADIO FREQUENCIES?

As far as I'm concerned, these factors DO have biological effects. I think that the overwhelming evidence indicates that happens. There is an effect even though physicists and engineers continue to say it's impossible. But the biologists know biology. The engineers know engineering and electromagnetics and the two were never able to see eye to eye on this subject.

I have no doubt in my mind that at the present time that the greatest polluting element in the earth's environment is the proliferation of electromagnetic fields. I consider that to be far greater on a global scale than warming...

GLOBAL WARMING....

yeah, and the increase in chemical elements in the environment. All of these things are reduced when compared to the proliferating affect of the electromagnetic fields. The only difference is that we don't know they are there.

YES, IT'S AN INVISIBLE POLLUTION.

Yes, it's invisible to us. We don't know that it's there. So, it has never been a particularly prominent question even among the environmental people. And part of the problem is that our total economy is based on unlimited use of electromagnetic energy.

WHAT IS YOUR GREATEST CONCERN ABOUT WHAT THE EFFECTS AND CONSEQUENCES OF THIS INVISIBLE MICROWAVE AND ELECTROMAGNETIC POLLUTION IS UPON US ALL?

There are basically two most important biological effects of electromagnetic effects on, or in, living systems are their effects on growth and development. There is potential for producing disturbances in growth processes in the body that can lead to the presence of malignancies. And in that regard, for a long time the National Institutes of Health had studiously insisted there was absolutely no evidence that there was ANY affect of such fields upon any cancer system in the human. I think this is

absolute nonsense. And last year, the NIH - without any fanfare and rather quietly in the dark of the night - issued a little report that says there is a relationship between electromagnetic effects and childhood leukemia. Period. End of story, as though that was all. That's not true. Absolutely not true.

THAT THERE ARE MORE CONSEQUENCES?

Much more. And much more in the area of abnormal growth, the production of malignancies, the production of cancers. That's number one.

The second one is in the operation of the central nervous system, the brain. There are definitive effects of low strength oscillating electromagnetic fields on brain function. Now, we look around at the present time and I have lived through roughly half of this period of increasing use of electromagnetic energies. We're looking at an entirely different behavioral aspect of the population at the present time. We certainly have a far different social attitude at the present time among the majority of the population.

THAN A HUNDRED YEARS AGO WHEN THERE WAS NOT OSCILLATING FREQUENCIES?

Yes.

AND WOULD YOU PUT AT THE TOP OF THAT LIST IRRATIONAL VIOLENCE AND ROAD RAGE?

Yes, I would put it up there. I don't know if it's the first thing on the list. If you look at the proliferation of what is called Attention Deficit Disorder (ADD) - that wasn't even here when I was young. That was not a diagnosis. It never existed.

SO ATTENTION DEFICIT DISORDER WHICH HAS BEEN A BIG DEAL IN SCHOOLS IN THE LAST HALF OF THIS CENTURY IS SOMETHING THAT IS RELATIVELY MODERN AND COULD BE ASSOCIATED WITH THIS PROLIFERATION OF OSCILLATING ELECTROMAGNETIC FIELDS?

I have no doubt of that. There are people who were interested in this. No one, though, has done the definitive study. This would involve the exposure of humans to fields which gets to be morally difficult. But we should know. These are very important questions. And the problem is that this is such an important aspect of our entire economic structure, and not to mention our military posture, you cannot get very much in the way of support from federal granting agencies to study this sort of thing.

SO SCIENTISTS AND RESEARCHERS ARE STYMIED IN THAT REGARD?

Yes There is no money.

AND IN ENGLAND AND IN AUSTRALIA WHERE THERE HAS BEEN SOME SUPPORT FOR THAT RESEARCH, THIS IS WHERE WE ARE GETTING THE LARGEST BREAKTHROUGHS IN TERMS OF DATA AND THIS WEEK THERE HAVE BEEN ANNOUNCEMENTS FROM ENGLAND, SPECIFICALLY FROM TAYSIDE UNIVERSITY IN SCOTLAND. THEY ARE RAISING A BIG RED FLAG ABOUT KEEPING CELL PHONES AWAY FROM CHILDREN. ARE YOU FAMILIAR WITH THIS WORK AND WHAT IS YOUR COMMENT?

I'm only familiar with the press releases that came out. It's a very good idea. I certainly would not permit any child of mine under the age of sixteen to walk around with a cell phone in their pocket.

The funny thing is that 20 or 15 years ago, maybe even a decade ago, cell phones weren't around. Now, when you're using this, you put the telephone right up against your head. The antenna that is emitting the signal that is picked up by the cell phone towers and then sent to wherever you intend to go is irradiating the brain. There is no doubt about it. It does.

Can this be good? As far as I am concerned - No, it can't be good.
Could it possibly be neutral? In other words, have it and not get sick from it?
I'm going to negate that one, too. I say I don't believe that. I think that any time you have an extraneous energetic source of electromagnetic energy introduced into a body carries a potential for harm.

AND THAT'S BASED ON YOUR MEDICAL WORK?

Yes.

AND THEY ARE SAYING IN THIS NEW WORK THAT THEY HAVE DATA TO THEIR OWN SURPRISE THAT "ONE ODD FINDING CAME UP WHEN WE LOOKED AT MICROWAVE RADIATION IN NEMATODE WORMS THAT SHOWED ODD CHANGES TO THE PROTEIN STRUCTURES. AND THAT IT WAS A KIND OF HEAT SHOCK ON THE PROTEIN, SLIGHTLY COOKED." AND THAT CHILDREN ARE THE MOST SUSCEPTIBLE.

That's correct.

THEY ARE GROWING.

They are still forming structures in the brain. They are still forming synaptic connections throughout the whole brain. You introduce something that is going to change things there and you are running the risk of producing a permanent alteration in some aspect of cerebral functioning.

Now, I'm sorry, I know how important this is from an economic point of view. But I think it's a very bad thing to do. I think the cell phone proliferation has resulted in exposing more people to electromagnetic energy that's exceeded only to our exposure to the 60 cycle radiation coming from our power frequency, electric power grid. That exposes almost everybody in the world. It's either 50 cycle or 60 cycle and you can't go any place on the face of the earth and put up an antenna and find an electromagnetic environment NOT contaminated with one or another or many more of these frequencies.

AND IT'S NOT CLEAR WHAT THE CONSEQUENCES OF ALL THIS IS ON OUR EVOLUTIONARY PROCESSES?

Absolutely no.

AND THE INCREASING VIOLENCE AND RAGE AND IRRITABILITIES IN SO MANY LEVELS OF SOCIETY, ESPECIALLY IN THE INDUSTRIALIZED WORLD, COULD BE LINKED DIRECTLY TO THIS?

I don't know of any data that says that, but as far as I am concerned that would constitute a perfectly valid hypothesis.

AND IN YOUR WORK, DID YOU EVER WORK WITH MICROWAVE FREQUENCIES TO SEE WHAT THE IMPACT WOULD BE ON BIOLOGIES?

No, I did not. I stayed closer to the natural frequencies. I did a lot of work on 60 cycles. Back then, microwaves were theoretically considered capable of only heating things.

I've lived through a fairly lengthy period of time in which science looking at this problem - both the biologists and physicists and engineers looking at it - have changed their mind and have grown closer together in regards to the potential for harm.

AGREEING THERE IS A POTENTIAL FOR HARM.

Yeah. I think at the present time that the majority of the physicists in the United States view with practically the same amount of alarm as you and I do. And at one time that was not true. So, there has been a learning curve in all this and we're still on that learning curve! Now, how do we learn more. It's rather simple. Make available more money and make it available to independent researchers who have no connections to any aspects of the economic end of the electromagnetic usage. This is very important.

The Electric Power Institute funded large studies and they found nothing!

BECAUSE THEY HAD A VESTED INTEREST IN NOT FINDING SOMETHING.

You can design a project to be negative if you like to from the very start.

IN THIS TIME WHEN SCIENTISTS THEMSELVES ARE EXPRESSING CONCERN ABOUT THE POLLUTION OF ELECTROMAGNETIC FREQUENCIES, ISN'T IT IRONIC THAT NOW IS THE TIME THAT THE VESTED POLITICAL AND ECONOMIC INTERESTS ARE EVERYWHERE WORKING TO MAKE THIS AN ELECTRONICALLY CONNECTED WORLD. IS THERE ANYWAY OF PERSUADING ANYONE THAT GOING THIS ROUTE COULD HAVE AN INCREASING PSYCHOLOGICAL AND OTHER NEGATIVE IMPACTS ON PEOPLE?

I don't believe there is ever going to be a real solid unimpeded study of these factors. I think we will continue to increase the exposure of the global population, that we will see as a result of this, increases in cancer. We already have. We're at the point now where every other person, one out of two, is very likely to in the course of their life time to develop a malignancy. It was too long ago that it was one out of three. And a little bit further back, it was one out of four.

NOW, IF WE'RE AT ONE OUT OF TWO, IT'S ALSO POSSIBLE THAT NO ONE COULD LIVE WITHOUT HAVING A MALIGNANCY.

That's right. We shouldn't have to have it. We should be able to prevent it. Who is looking at prevention?

And as far as the other aspect of it - growth control and central nervous system operations. Now, on that side of it, I will give you the prediction that you are going to see more and more hyperactive attention deficit

disorder, you're going to see more and more aberrant behavior in the mature population. Where does this end? Every time you start thinking that we're at the end of the line as far as the development of electromagnetic devices that radiate into the environment, then something new comes along. The cell phone is a very new item and it has become ubiquitous in our environment and in most industrialized nations.

In the Scandinavian countries, Sweden, Norway, Denmark, Finland - they have been looking very closely at the power frequency, electric power, 60 cycles. And to the best of my knowledge, they are the only countries that have set up standards for exposure to that and regulations as to what you can build and what you can put into the environment.

WHAT KIND OF RADIO FREQUENCIES ARE EMITTED FROM THE TYPICAL CELL PHONE?

The present generation of cell phones, some are operating at the megahertz range. Others are operating at the gigahertz range which is billions of cycles per second. So, the radiation is oscillating at the enormously rapid frequency. Even standard TV signals are megahertz signals. These are just an awful lot faster frequency. The fact of the matter is that the higher up in frequency you go, the more energy the radiation happens to have.

IN YOUR CAREER, YOU WERE ON THE TRACK OF BEING ABLE TO HEAL FRACTURES AND POSSIBLE SPINAL INJURIES AND WHAT IN THE WORLD WOULD BE MOTIVATING THE MINDS AT THE TIME TO STOP RESEARCH IN THAT DIRECTION?

At that point in time, it was primarily a military problem in the Dept. of Defense. We were shifting very rapidly from the standard warfare or WWII to the more high technology of the Vietnam war. This is where most of the technology that we see now in the military evolved was during Vietnam. The use of electromagnetic fields for communication and remote sensing and things of this nature were considered to be essential and here I was saying, 'Hey, it might not be such a great idea.'

WHAT DO YOU THINK IT WOULD TAKE TO HAVE THE POLITICAL AND MONEY POWERS CHANGE THEIR PRIORITIES?

(long laugh) I don't know. Maybe at the end of the line when the occurrence of malignancy is two in every person during their life time and we have rioting in the streets for no cause and obvious problems with the psychology of the human race - maybe some people will still be OK enough to say, 'Geez, we made a terrible mistake.' But I don't see anything happening between now and then. Or there may be a technology that becomes available that is capable of safely replacing the cell phones. I don't know. But the longer it goes, the more and more difficult it will be in affecting a change in our economic structure."

More Info To register your opinion about California Senate Bill 1699 concerning cell phone safety, proposed by California State Senator Tom Hayden, go to <http://www.sen.ca.gov/>on Tuesday, May 16, 2000.

The theory is quite simple, and based completely on the evidence.

The ATF assault on Mt. Carmel was not routine in anyone's history.
More than 100 soldiers readied for violent attack on a large community
of civilians, accompanied by media coverage appropriate for a Rose
Bowl game. You can bet they would not send rookies to a high-profile
battle like this. They would, of course, send seasoned military vets,
reservists, national guardsmen, and active duty special ops "advisors".

Unfathomable treachery is no stranger to any nation in the world. The
United States Government has engaged in base treachery ranging from
the Kent State murders to Gulf of Tonkin, with innumerable incidents
in between. Thus it would not be impossible for the USGov to arrange
for the assassination of a few "stooge" ATF soldiers in the confusion
of the raid. And of course there would be no shortage of professional
snipers willing to do it, given the desensitization training currently
used on so many of today's military.

It is even rumored that the four dead agents were selected for their
knowledge of the new president's personal habits, having been the
governor's personal bodyguard.

What would be gained by such treachery? Without the deaths of those
ATF soldiers, the siege-torture-murder of the Davidians would never
have been "justified" in the minds of Americans. But as it was, the
issue was positioned to convince the people that the ATF was
"ambushed", brutally murdered, and justified in the use of un-American
military force against civilians -- exactly as the war on Viet Nam was
justified by the deaths in the Gulf of Tonkin incident.

Read about the elaborate efforts to get the Davidians to shoot back
in "Designed to Fail":
http://www.public-action.com/SkyWriter/WacoMuseum/war/page/w_j.html

And the grand plan? Strangely enough, the plan is laid out in the
Treasury Department Report:
http://www.public-action.com/SkyWriter/WacoMuseum/war/page/w_n.html

> About as believable in my book ...

And there you have it: No evidence or criterion of truth weighs as
much with Chip as what he thinks is "believable". He argues the
definition of logic and the limitations of human reason in the face of
quantum mechanics, ...

... but in the end, he measures truth only by what he is willing to
believe.

In "chip", we see the intellect of the moderately educated peasant.
His type has always been and always will be putty in the hands of the
news shapers and spin-doctors. "What is belivable?" they will ask on
the public surveys, and Chip's own answers will then be what Chip sees
in the news.

> as theorizing it was Patty Hearst who killed Elvis by choking him
> with a piece of (Extra Crispy) Kentucky Fried Chicken while he was
> on the throne. But hey , to each his own.

Would you believe a United States Navy cruiser was in the Gulf of
Tonkin just minding their own business when the North Vietnamese
cruelly and treacherously shot at them, killing some US sailors?

OK, you got it. Would you like fries with that?

2998. Re: IC-746 iambic mode question

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-18 00:00:00 UTC
From: Gary Knight <gknight7@gte.net>
Message-ID: <Wg_c5.464$ed1.57867@dfiatx1-snr1.gtei.net>
Source record: 106984

That doesn't address the Mode A vs. Mode B issue. I did, as a matter of fact, reverse the dit-dah using the transceiver's programmable feature so that dits were made with the left-hand paddle. But A vs. B is a different ball game. I talked to ICOM and they finally concluded that the 746 had been built to support *only* Mode B. Couldn't explain why, but that's the way it is. So I'm stuck with using an external keyer even though I really like all the features of the 746's internal keyer.

Wonderful !! It's a *huge* surprise to me that the Davidian's
attorney's didn't use your *Brilliant* , deeply intellectual theory at
the trial(s). I suggest you e-mail/phone/fax them with your
astounding truths. Why waste time with mere 'Peasants' (as you say)
like me when you can SHOCK the whole world with your discoveries ?

>The ATF assault on Mt. Carmel was not routine in anyone's history.

Ahhh yes, I *always* expect a few 'stooges' to be wasted when the ATF
makes a raid.

>It is even rumored that the four dead agents were selected for their
>knowledge of the new president's personal habits, having been the
>governor's personal bodyguard.

The plot thickens !!

Perhaps they witnessed Governor Clinton with his trousers down and saw
that he was wearing boxer shorts with little red hearts on them ? Or
was it a black Speedo with "Hillary" printed in red lettering right
over a certain 'strategic' area ? This would *certainly* be enough
for a death sentence by 'Special Assassins' if I ever heard of one.
Nothing like another GREAT *believable* rumor to add to the paranoia.

Dave,
I can't give you a specific brand name, but a number of years ago
there were a few 'controlers' advertised in QST for remote control
via a 220 or 440 link. At one time there were a number of hams using
440 handy talkies to control their HF radios. If nothing else, you
might rumage through some old QST's for the ads. As I recall, doing
this was never simple, and never really 'cheap', but it did work.
You still hear them using these 'links' occasionally.
'Doc
PS - This was on the order of 10+ years ago.

Chip,
If I remember correctly, Carol Valentine is the wife of that ultra rightwinger Tom Valentine, whom according to several, is a shill for the National Vanguard, a neo-Nazi group.
When I last blasted Carol she had put up some tripe in the form of Holocaust revisionism. Don't waste your time with her-she simply ain't worth it. Based on her writings, she has no use for American democracy and why she lives here to stink up our country is beyond me? Believe me, the FBI knows all about the Valentines.
Doc,AF2Y

Look Cross, you can take your Boolean or Shmoolean stuff and put it someplace. Telling me that logic is truth is just plain dumb. Up to now, did anyone ever logically suspect water on Mars? The fact remains that logic GENERALLY is a mere stepping stone to gain the truth. Based on your writing, logically I assume you're intelligent but the truth indicates otherwise. More often than not, logic means jumping to conclusions much slicker than by guessing.

A BAD TICKET. Gore-Gephardt would win in a landslide and Colin Powell is such a gentleman, he'd accept the job of Sec. of State in a heartbeat. That Albright thing is awful; she ought to go back to doing the dishes and we want Hillary out of here, fast. I'm sick and tired of hearing SCANDAL being a part of everyday life in D. C. and regardless of a Bush or a Gore win, D.C. will be CLEANER! I was in D.C. a few weeks ago and ordinarily it's a magnificent place. A must see for every American but this odor of political garbage is permeating everything from Washington National and Dulles to the top of the Washington Monument.

Hola, holy frijoles, you eejit!!!!

You bin had by the gullible virus!

Don't look now, but a sidewinder is a heat-seeking anti-air missile,
not air-to-ground and does not "load attack coordinates" -- it looks
for hot tailpipes. Further, the whole scenario is out of sync with
reality because an offshore training mission would not include the
possibility of live-firing on any target, least of all on a shoreward
azimuth.

Hey guys .. too bad you're not here in Memphis today. Guess who's in town .. our beloved Vice President and President to Be .. The Honorable Albert Gore, Jr. Yep, get over it dudes, he's here .. in OUR town. About 5 blocks from me as I type this. I sure wish he'd call so I could suggest he nominate Mrs. Rodham-Finklestein as his running mate.

He was NOT fund-raising at that temple.
She did NOT make that slur against Mr. Fray.
He did NOT have sex with that woman - Miss Lewinski.
I sure hope our news media can catch Dub-Yah snorting some "nose candy" before the election.
Jesse Helms is behind the Vast Right Wing Conspiracy.
Those dumb kids at Mena should have known better than to take a nap on the tracks.
Dan Harmon got canned on a bum rap.
Vince Foster committed suicide.
Web Hubbel is a man of integrity.
James Carville should be our next attorney general.
I sure miss Lyndon Johnson.

There, Chipper-man .. good ones ? ?

Not all rural residents are so lucky. My mother lives in a rural area and has a horrible telephone company (Frontier). They provide no internet service. They are so bad that another phone company seized the opportunity and parallel wired the entire town and most town residents switched to the new company. Unfortunately the rural folks are left out and have no choice but Frontier. All phone calls out of the immediate community are long distance calls. Only one local internet company offers internet services to the Frontier customers. There service is pretty bad. For example, presently that companies news group server is 6 days behind in post to this newsgroup. Sorry this is off topic, but I get so upset about there horrible service.

> country is beyond me?

"Beyond you" may be the story of your life. But "stink up the
country"?

What you pretend to fear is America slipping into autocracy. But
Carol's writings are concentrated upon forcing the government to
operate within the law, and you oppose her in this effort.

Isn't that remarkable?

> Believe me, the FBI knows all about the Valentines.

The FBI is a quasi secret-police organization that bribes elected
representatives, spies on citizens, and regularly operates outside the
law -- with impunity. You say you are certain the FBI is collecting
information on "the Valentines", even though you should know that
collecting information on private citizens has been ruled by the
Supreme Court to be unconstitutional under the "search and siezure"
clause.

The FBI collected information on citizens in the COINTELPRO operation,
and got their hands slapped by Congress and the courts for their
trouble.

But since you are comforted by the thought that the secret police are
back at it, let me ask you which "American democracy" you trying to
preserve, and which would you like to see wasting away in a prison
cell?

It happened in the U.K. a while back.
It was a low level RAF Harrier and a police speed radar.
The missile was an anti-radiation missile not a heat seeker.
It was widely reported in the media at the time.
(I think this was the real original, but who knows for sure).

This is like the USN, RCN, RN or even oil tanker ordering the lighthouse
in Scotland, Newfoundland, New England, or wherever to change course to
avoid a collision. A great story and everyone picks it up and modifies
it to their particular field of interest. Even makes some newspapers
every now and then.

Dear: HP you are hereby flamed

[X] Clueless Newbie [X] Lamer [ ] AOLer
[ ] "Me too" er [X] Twit [ ] Geek
[ ] Spammer [ ] Nerd [ ] Elvis
[ ] Fed [ ] Freak [ ] Cryogenic
[ ] Scammer [ ] Troller [ ] Pre-teen

You Are Being Flamed Because:

[ ] You posted MODs in pieces LESS than 5000 lines
[ ] You posted something asking for warez
[ ] You quoted an ENTIRE post in your reply
[ ] You continued a long, stupid thread
[ ] You started an off-topic thread
[X] You posted a "YOU ALL SUCK" message
[X] You posted a blatently obvious troll
[ ] You posted pretending to be someone famous (See "troll" above)
[ ] You replied to the above message type believing it was someone
famous
[ ] You said "me too" to something
[X] You make no sense
[ ] Your sig/alias/server is dreadful
[ ] You posted a stupid pyramid money making scheme and claimed it
was legal
[ ] I think you might be a fed
[ ] You posted in ElItE CaPiTaLs because you think that makes you
cool
[ ] You didn't do anything specific, but appear to be so generally
worthless that you are being flamed anyway

To Repent, You Must:

[X] Give up your AOL account
[ ] Give up your MSN account
[X] Bust up your modem with a hammer and eat it
[X] Tell your Mommy to up your medication
[X] Jump into a bathtub while holding your monitor
[ ] Actually post something relevant

[ ] Read the FAQ
[ ] Be the guest of honor in alt.flame for a month

In Closing, I'd Like to Say:

[ ] Get Wrecked
[X] Get a life
[ ] Never post again
[X] Age 10 more years before you post again
[ ] Yer momma's so fat/stupid/ugly that etc...
[ ] Take your gibberish somewhere else
[X] Get a clue, you pathetic loser
[X] Learn to post or get off the usenet
[ ] All of the above

Damn glad he's screwing up your traffic today instead of here in
Nashville like he often does...including yesterday when he conducted a
first grade sounding seminar on Social Security at his campaign
headquarters. This guy considers everyone but himself a total idiot.
What a jerk.

3021. Final Solution Achieved Re: Please help me identify the source of RF interference in AM band from a perpetual data transmission

About 5:00PM yesterday the noise stops on its on, after being perpetually on for 2+ weeks

This was 2 hours after I spoke to the helpful tech. Never did get a call from telco supervisor.
no spam <nospam@no.spam.org> wrote in message news:cCuc5.1735$K04.1118386@typhoon.snet.net...

Doc had a 75 meter wire up a few years back. It lasted a week and the
squirels chewed it down.

As for the Red Panty and the Porkbutt Song....nothing new under the
sun. Id suggest a hard look at Hickory NC will bring results. And Im
not suggesting Captain Truth either.

Without question.
Actually if anyone's intererested, the Internet was invented in the early '60s by weapons' eggheads working in the Univ. of Wisconsin, Stanford, Harvard, & M.I.T. who wanted a quick and efficient way to pass vital info among themselves. Some computer nerds broke in, saw what was going on and decided to take over cyberspace using weird names, private websites and such. That's the truth.
Anyone know how eBay began? An Armenian woman named Omarkiyan or something very close to it was a PEZ collector. She talked to her husband about starting an cute little website for worldwide PEZ collectors and the rest is history. The C.E.O of it, Meg Whitman, is worth $750,000,000.

Now I remember where these nuts got the idea about our killing ATF agents as
the pretext for invading the Koresh compound.
Hitler needed a pretext to invade Poland. At the German Gleiwitz
transmitting studios, right on the German-Polish border, on the night of
8/31/39, he dressed some of his elite SS in Polish army uniforms and sent
them in to Gleiwitz to MURDER their own comrades who were manning the studio
and antennas. What better way of blaming everything on Poland? It was Poland
who then began W.W.II by "invading" Germany.
The stage was then set for the Nazi invasion of Poland just one day later.
In fact at the beginning of his address to the Reichstag on Sept.1st in
which he announced the invasion, he validated it by stating that it was
Germany's response to the atrocities of the Poles at Gleiwitz.
My suggestion to the conspiracy theorists; don't play mind games with AF2Y.
You're like putty in my hands.

3039. ARRL and TAPR 19th Annual Digital Communications Conference

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-18 00:00:00 UTC
From: srbible@gate.net
Message-ID: <3974e7c2.9017686@news.gate.net>
Source record: 107025

ARRL and TAPR 19th Annual
Digital Communications Conference
September 22-24, 2000 - Orlando, Florida

For more information see: http://www.tapr.org/dcc

Information
Mark your calendar and start making plans to attend the year's premier

event in digital communications. The 19th Annual ARRL and TAPR Digital Communications Conference will be held September 22-24, 2000, in Orlando, Florida - just minutes from the Orlando International Airport.

The ARRL and TAPR Digital Communications Conference is an international forum for radio amateurs in digital communications, networking, and related technologies to meet, publish their work, and present new ideas and techniques for discussion. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results,

and practical applications. The Digital Communications Conference is not just for the digital expert, but also for digitally oriented amateurs of all levels of experience.

A Conference for the Beginner as well
The conference is not just for the digital expert. As in years past an entire session strand with beginning, intermediate, and advanced presentations on selected topics in digital communications will be offered. Some of the topics will include: APRS, Satellite Communications, TCP/IP, Digital Radio, Spread Spectrum and other introductory topics. Come to the conference and hear these topics presented by the experts!

Area Attractions
The Orlando Florida area is famous for its attractions and vacation spots. Disney World, Universal Studios, and Sea World (just to name a

few) are within 15 minutes of the hotel. Shuttle service from the hotel will be available for a small fee. Cape Canaveral and Cocoa Beach are a 30 minute drive East of the hotel.

Symposia, Seminars and Banquet
Two symposia/seminars will be held which allow those with additional time and interest to make the most of the Conference. For those who may have interest in just one symposium or seminar, registration for the conference is not required to attend these activities. This allows

maximum flexibility for those who may want to participate during the Digital Communications Conference, but do not have an entire weekend to devote to the event.

The Fourth APRS National Symposium will be held on Friday and will be moderated by Steve Dimse, K4HG (the developer of javAPRS). It will likely include many APRS software authors, such as Bob Bruninga, WB4APR (the father ofAPRS), Keith Sproul, WU2Z, Mark Sproul, KB2ICI (the developers of MacAPRS and WinAPRS), Brent Hildebrand, KH2Z (the developer of APRSPLUS), Mike Musick, N0QBF (developer of PocketAPRS), and other nationally known APRS leaders. Join this group for the afternoon and evening for in-depth discussions and presentations on the current and future status of APRS. This is a unique opportunity to

gain insight into this fast-growing digital aspect of amateur operations that combines computers, packet radio, and GPS (Global Positioning System).

On Saturday night the DCC Banquet will be held. A guest speaker will speak after the banquet and a prize drawing will top the evening. The

Grand Prize is a Palm VII Personal Digital Assistant.

The Sunday morning seminar will be focused on PIC development, design, and programming. This five-and-a-half hour seminar will focus on the things you need to know now in order to understand and begin to

participate in PIC development.

Co-Hosts
The 2000 ARRL and TAPR Digital Communications Conference local co-hosts will be Lake Monroe Amateur Radio Society (http://www.qsl.net/lmars/),Orange County ARES/RACES(http://evcom.net/~jvoisin/ares.htm), Seminole County ARES/RACES (http://wwww.geocities.com/capecanaveral/launchpad/4773), and Orlando Amateur Radio Club(http://www.oarc.org/).

International Co-Hosts PRUG (Packet Radio User Group of Japan) will be

the International co-host for a third year running. PRUG will be hosting an informal social Friday evening before their seminar and symposium is held. Visit http://www.prug.or.jp for more information about PRUG.

Call for Papers
Anyone interested in digital communications is invited to submit a paper for publication in the Conference Proceedings. Presentation at the Conference is not required for publication. Papers are due by August 7th, 2000, and should be submitted to

Maty Weinberg, ARRL
225 Main Street
Newington, CT 06111

or via the Internet to

lweinberg@arrl.org

Information on paper submission guidelines are available on-line at

http://www.tapr.org/dcc

Hotel
Conference presentations, meetings, and seminars will be held at the Orlando Airport Marriott. It is highly recommended that you book your

room prior to arriving. A special DCC room rate of $89/single and $89/double per night has been blocked for 50 rooms and is available until September 1st, 2000. Once the 50 rooms have been reserved, room

rates will increase. So be sure to book your rooms early! The hotel provides transportation to and from the Orlando International Airport.

Please contact the hotel to arrange specific transportation needs.

Orlando Airport Marriott (conference hotel)
7499 Augusta Drive
Orlando, FL 32822
Phone 407-851-9000, Fax 407-857-6211
(http://marriotthotels.com/MCOAP/)

What you can expect at DCC 2000
- A full day of papers and breakouts for the beginner to the advanced
- Two seminars/symposiums
- The fifth annual Student Paper session.
- A banquet with Special Guest Speaker.
- Informal get-togethers throughout the weekend.
- TAPR Membership Meeting
- An event at which the most important new developments in amateur digital communications are announced.
- Digital 'movers and shakers' from all over the world in attendance.

There are few activities where your participation can be so much fun and important! What a great way to share and renew your enthusiasm for

digital amateur radio! A get-together with colleagues and bringing each other up to date on your latest work -- all this, and more, for an unforgettable weekend of amateur radio and digital communications. We hope to see you at the ARRL and TAPR Digital Communications Conference on September 22-24, 2000!

Full information on the conference and hotel information can be obtained by contacting:

Hey Polly Parrot, aka George Assly....if I wanted any crap out of you
I'd have squeezed your head. How come you ain't been jammin on 75
anymore George? Riley got your tongue? Bet that ain't all he got is
it you piece of garbage.

Tell ya what...you and Al get together and have a common funeral. That
way all the state will need is a garbage dump and a large trash can.
Plus I wont need to drink so much water.

Source record: 107028

I am looking for a reasonably priced, late-model 2-meter HT (not more than a year or two old) with programmable PL tones. Local repeater going PL so can't use present HT. Will buy, or trade Yaesu FT207R in good condition (no PL) with manual and schematic, Larsen rubber duck antenna, one FNB-2A NiCad pack, and drop-in desk charger.
I am also trying to sell a Kenwood TS-530S HF rig. As-is, with manual and schematic diagram. Contact me for price.
E-mail me at wb8nhv@aol.com, reply via this group, or write me at my Callbook address (1999 or later CD or Buckmaster HamCall).
Thanks in advance and 73.

Jeff, WB8NHV

3043. HT selection

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-18 00:00:00 UTC

Message-ID: <3974F16C.D62D0368@uswest.net>
Source record: 107029

I am currently working on my Technician class license and have been looking around at dual band HTs. I have narrowed the field to three choices and would appreciate information on anyone's experience with using these units. The ones I am considering are the Icom W32, Alinco DJ-G5TH and the ADI AT-600HP. Thanks, Ken

Johnson where do you reside? In a Port-a- Pottie? FDR SAVED capitalism in the USA because had he not been elected in 1932, the depression about which Hoover had no clue, would have driven this nation into either anarchy, communism or both. Your knowledge of American history is strictly latrinal. AF2Y

Good, I'm glad to know that our next Prez. was courting Memphis. He should have no trouble carrying his home state. And you ought to hear what's going on on New York City talk radio stations regarding the alleged anti-Semitic remarks made by Hilly. Wow. Dick Morris was on WABC this afternoon in a LENGTHY discussion about the Farts Lady and was he MAD. He too had been the target of one of her anti-Semitic outbursts. I guess I'm next.

Take a look at the Yaesu VX5. It has a nice size and 5 watts of
power with the ION battery that is 1.1 AH, most of the others
are 500-750 mAH. I haven't heard much good about
the ADI products. The rest of my radios are ICOMs.

Good luck!

To all on the newsgroup,

My name is Larry Pritchard, and I wish to apologize for the actions of my nephew who was using my computer on the day that vulgar posting was made. I have reprimanded him for doing it. It was even reported to my ISP, so I think that I have been sufficiently punished for his actions. I am sorry that you were offended. Yes I do belong to those other newsgroups, most of them for professional reasons.

I am very interested in radio and understand the impact that the sun's activity can have upon reception. My 16 year old nephew was simply not exercising the good sense that God gave him, as many his age are apt to do. He has been forbidden to use my computer for one month as punishment for his posting and nearly getting me booted from my ISP.

Once again please accept my sincere apology.
Kind
Regards,

Larry Pritchard

Jim

3054. AF2Y : loops

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-19 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8l4o01$q21$1@slb7.atl.mindspring.net>
Source record: 106790

Something interesting to note---loops. Maybe I'm using the wrong terminology but what I mean is a group, including me, which gets mail that may or may not involve me directly. It's sort of like a mass mailing but certainly not "SPAMish" in nature. And for those who are unfamiliar with the term "SPAMish," it is NOT a Hispanic who sends unwanted advertising through the Internet.

At any rate my question deals with how loops grow? For example you may be in one with five others. Suddenly an e-mail arrives showing seven recipients. You then REPLY TO ALL which launches mail to five known and two strangers. But the next piece of mail shows eleven recipients which says that your reply is reaching more unknowns than known.

How to solve the dilemma? There's a choice. Either launch to all or delete the strangers. Deleting takes time and concentration so I choose to go for broke mostly out of courtesy and time saving and besides, concentrating hurts.
I did that yesterday and lo and behold what happened? Look for yourself. Please then follow what I'm writing at the end of the entire copy and paste. Tnx.

<<<<<Doc,

Please remove my name/email address from any of your
madman ravings.

Thank you very much.

Alright, let's continue. Did you notice all the people in that loop? Do you know how many I actually know from either QSOing or Internetting? EIGHTEEN

out of the whole ganza mishpuca. The rest are friends of friends of friends and so on and so forth. And there's a few in there whom I do know but wouldn't urinate on if they caught fire and so to save time, I didn't delete them either. And because for being a nice guy, I received a nasty note which you saw for yourself. And it came from an pompous meathead who'd been talking down to everyone on 20 meters for years until I ripped him a new one. You talk about a snob-oh brother does this fellow fit the bill. Absolutely obnoxious beyond description!

Incidentally no one can have anything against K4RUB for initially sending some goodies because most are very interesting and enlightening; he's a mild mannered chap who was a boy scout and W2YEE has turned over a new leaf to become a sterling fig. No kidding, Walter Miller has had some personal troubles which have been overcome. Attaway to go, Walt!

Perhaps my analysis of the loop situation will help you cope? If not, then you're too dumb to understand what I discussed anyway so go back to your damn comic books and leave the Internet to real intellectuals.

Mike:
I have a friend in New York that has Frontier, and Frontier internet
service (frontiernet.net?), and is reasonably happy with both,
considering he has no other choices. Maybe you could lean on them to
provide the service inyour mother's area...

Please Chipster, don't include me with those who'd vote for that fraud for top office. He's nothing but a poppa's boy, all set up handy and dandy to take over. All that money flowing in from his crony Republican buddies and his rightwing Christian Coalition flapjackers and other consorts of the devil too. I wouldn't vote for that guy if you'd pay me. Give me Al any day- a real American who cares about ALL Americans and who'll bust his hump for ALL Americans. Al trails by just 4 percentage points now and after the debates, he'll be up by 10 and go on to trounce the hell out of that Texass creep in November.

If Arianespace had been more forthcoming with AMSAT, P3D would be in space already, But they chose to withhold valuable information until the last moment which forced us to miss our ride.

Nah, I wouldn't think of it Doc. I'm just warming up the boys for some
good conspiracy postings if (horror of horrors) DuhBya should
somehow win in November.

BTW: According to yesterday's (Tues) USA-Today Big Al and DuhBya are
in a statistical dead heat ! This could turn out to be a real horse
race.Maybe we should start flooding the newsgroups with reports/rumors
about DuhBya's Nose Candy and alcohol problems, brother Jeb's kind of
'funny' deal in the S&L scandal(s) and maybe resurrect dad's suspected
ties with Iran-Contra ??

Windy, you're a flaming wonder. FDR took us out of the depression that would have imploded this nation's basic foundations and you knock him? You really believe we could have stayed out of W.W.II had it not been for him? You're in a dream world and to knock him is like slapping your own father.
Doc,AF2Y

No, you should apologize because *you* don't know what you're talking about.

>> Telling me that logic is truth is just plain dumb.
>
>Of course. The scribes give you all the truth you need, and it would
>be sacrilegious to test it with logic, wouldn't it?

Some poor SOB gets out of prison after serving 20 years of a 40 year sentence. He was convicted because the jury's best *LOGIC* (beyond a reasonable doubt) found him guilty. A DNA test 20 years later shows otherwise. Tell him about your blanket statement 'Logic = Truth' and let us all in on his response ? The *Truth* has been there for 20 years. Again, one has to ask, where was the logic ?

The medical community (some pretty good *logic* there usually) has treated ulcers as stress related/caused maladies for decades. A recent discovery shows most ulcers are caused not by stress but by bacteria, they now treat most ulcers with antibiotics. Where was the *logic* all those years ? Inquiring minds want to know ?

How many pages of examples do you need ?

>Review of symptoms:
>
>1. Hates free speech

I don't think so. I'd suspect Doc would actually get a charge out of seeing some of your theories getting more exposure. More exposure would equal more laughter.

I would only add that there is a minimal amount of directionality
also involved because each cell site uses antenna arrays which
break up the 360 circular pattern of a site into three 120 degree
segments. That can also be used (i.e. which of
the 120 segments is receiving the strongest signal) along
with the signal strength picked up in an adjacent cell
to "localize" on a limited basis where the cellphone approximately is.

> The FCC has mandated that cell phone systems must at some time in the
> not too distant future provide accurate positioning measurements.
> This will require (in general) a bunch of new equipment in the base

Odds are the "new" system will allow old technology phones for at least an
interim
period.

And THAT IS EXACTLY WHY THERE IS A PROBLEM!!!! It's like the story of the alcoholic who drives home everyday from the bar drunk for 20 years, and never gets in to an accident, or even a drunk driving ticket. The drunk could rightly claim FROM HIS OWN EXPERIENCE there is no problem with drinking and driving. The more informed among us know better from bitter experience what harm a drunk, or momentarily distracted driver, can do on the road. So Aaron all you can really claim is you have been lucky so far by not becoming the cause of an accident and or killing somebody. It is a sad fact there are far too many people like you who believe there is no problem, until the truly unfortunate occurs. That's why these laws are being pushed on the public to control people like you who don't know better.

I have never caused an accident in 42 years of driving. For 25 of those years I regularly used a commercial radio in the work vehicle - sometimes under stressful high speed city driving conditions, for 8 of those years I regularly used a commercial radio on the work motorcycle - yes that means riding one handed while talking, for most of those years I had a ham rig, both SSB and FM in the private car, and for many years I had a ham rig on my private motorcycle. In recent years my car mobile rig has been CW only. That driving record is not luck. If you can't handle operating a radio (or a phone) while driving then don't, but don't get big brother spoil it for those who can...

>That's why these laws are being pushed on the public

Mike,

I was responding to a post that implies that hams NEVER have anything interesting to talk about, with which I differ, and that ALL hams are guilty by association. There IS no monopoly on "smarts" in any group, nor can one judge a person's knowledge of any subject based upon his being a ham or not. That's what raised my ire.

There are "idiot" hams just as less than smart CBers. There are hams who got their licenses by merely memorizing the questions. Just like you, I have run into so-called "Extra" hams who have NO knowledge of theory whatsoever. That disappoints me. Case in point: I build a version of the popular "screwdriver" antenna as a hobby and sell them at hamfests and upon request. You'd think an Extra Class ham would more than know how to install and resonate ANY HF antenna. NOT! Several times, I had antennas to come back to me, the owner complaining that it "wouldn't" work. There was, in fact, nothing whatsoever wrong with the antennas. They just didn't know how to deal with it. They are "appliance ops", not technicians. I had one to come back, and the reason it wouldn't work was that he omitted the impedance matcher that was supposed to go at the base. He couldn't figure why it wouldn't work below 20 meters! Installed the matcher, VOILA! It worked fine. He asked me when he first arrived, "What's this little thingy?" LOL! Do I know everything about radio? NO! But I am learning--for 40 years I've been learning since I started listening to shortwave on Dad's old Philco. That's why ham radio is attractive to me: the learning, the experimenting, and the public service. Further, I will NEVER know it all.

But, in spite of the bashing of hams, it still offers me much more than CB. Yes, I use CB, too. But only low power, and legally. To equal the things ham radio offers, I'd have to be ILLEGAL on CB which puts me at risk, so I do my "heavy duty" stuff on the ham bands.

You stated (are you the original poster?)at least by implication, that hams are ALL assh$$$$ with attitudes and have nothing worthwhile to say. And that's when I pointed out that when the chips are down, the HAMS are the ones called upon as a general rule. I don't doubt that there are situations where CBers are able to help, but, again, it is the exception rather than the rule. Ham radio has merit as does CB, but when you post negatives about people, i.e., hams OR CBers, you can usually expect a thread to follow.

If the government made Bill's last days miserable, then the government sucks and should reconsider its stupid laws.
Hey Government, lay off us and force people to encrypt their information if they don't want it being listened to. Stop picking on us! There should be no laws at all on reception, only transmission.
This places the responsibility on the sender if he doesn't want his communication to be understood, not us.

3090. Question about power supply grounding

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-19 00:00:00 UTC
From: Michael1998@webtv.net
Message-ID: <18340-39765EF5-2@storefull-134.iap.bryant.webtv.net>
Source record: 106826

I just bought an Astron RS-20A power supply for my shack. I am using it to power a 25 Watt 10 Meter rig (HTX-100). I live in an apartment and I am using a dipole strung across my attic for use on 10 Meters. My ham shack is directly underneath my attic, it is actually a utility room that I am currently using as my ham shack. I just got the power supply today, and I noticed it has a post on the back for connecting a ground wire. At first I didn't ground my supply, but I noticed that the radio has a rather noticeable hum in it when I don't ground it, so I now have the power supply grounded to a cold water pipe in the shack. My question is, do I HAVE to have the power supply grounded? I would assume that I do, but my brother has a Kenwood TS-50 connected to his 30 Amp power supply and he has a 10 meter mobile antenna a few feet outside on the ground of his apartment. His power supply isn't grounded, he has a ground plane kit on the mobile antenna, so maybe he isn't getting any kind of RF feedback. I am guessing that the buzz in my radio is being caused by RF getting back into my system somehow. I am feeding my dipole with about 19 feet of 50 Ohm RG58/U cable. Would it be better to ground the supply using a ground rod for a good Earth ground, or do I need a good RF ground, such as a cold water pipe. I have also noticed my SWR goes up considerably when I remove the ground wire from the cold water pipe. Could I just construct a counterpoise of some kind? What would be the best way to go about doing this, i.e. the type of wire I should use and the length, etc. My dipole is about 10 feet above the shack, but apparently some kind of RF is still getting into the radio. Before, I was using a car battery as my power source in the shack, and didn't have any problems getting on the air or hum in the radio. Can anyone help me? I hope these don't sound like stupid questions, and thanks for reading my post. E-mail me or post a reply. Thanks a bunch for any help or advice!

The simple answer to your controlling an HF or any other radio via computer is ICQ 2000 and Netmeeting.

Set up your camera to see the face of the radio for visual and use the ICQ 2000 to get the IP address to direct call for netmeeting.

Set up a voice activated system for Ptt on your radio. Use the radio side computers four speaker system output for the radios mic audio and set up the audio thru the radios computer control panel.

For talkback use your speakers mic playback on your end. Hook up the headphone jack of the radio to its computer's mic jack and set the computer mic input thru the computers control panel.

Preset your squelch RF gain and all other functions. For channel change use a standard tone generator(like the phone) which can be converted to standard bit or hex output and tie it into a Y-jack input with your computers mike. Tie in the radios computer mic line with a Y-jack to a tone convertor(on the same line as the radios input for voice activation) and tie the convertor into you radios remote channel change jack (your radio must have this function or you will be stuck on one channel unless your friend will change the channel for you.)

When you want to change the radio's channel, punch in the channel number on your tone generator while not talking(using a mic headset on your computer with a off switch for mic would do fine.)

Your radio must have the channel change capability or you can't change channels. Some higher priced radios have this capability. The tone generator can be purchased at Radio Shack and the convertor can be purchased at a computer store, Radio Shack may even have one.

Hope this helps, other than buying high priced software and a new radio setup this is the poor mans way.

You will probably want to tie the computer to a seperate telephone line with no long distance call out or call forward/waiting for this.

Yes, I agree they should have been more forthcoming, and waited for us
to go up on the 502. But, as fate would have it, we now have a more
reliable bird to go up on. So, I guess it's all water under the bridge
now. Still, it's a rocket, so cross your fingers :)

Great, not only can your boss jerk your chain at work, now he can
reach out and jerk it any time he feels like it, no matter where you
are. Sounds to me like it's time to look for alternative employment.

Existing cell phone systems don't do this at all. Handoff decisions
are made entirely on the basis of relative signal strength
measurements.

The FCC has mandated that cell phone systems must at some time in the
not too distant future provide accurate positioning measurements.
This will require (in general) a bunch of new equipment in the base
stations and, in some cases, new functionality in the phones. Your
existing cell phones probably won't play in this new world.

I have to respectfully disagree with you on this one Doc. The internet
was created by ARPA (Advanced Research Projects Agency) - part of the
Pentagon/ military IIRC.

http://www.dei.isep.ipp.pt/docs/arpa.html

Also IIRC the Rand Corporation under contract with the government
(ARPA) did a lot of research / development WRT: ARPANET, data
packets, protocols etc.

To make a long story short, eventually the 'ARPANET' (Now called the
INTERNET) was handed over by that *enslaving*, Concentration Camp
Building, government for general public use to the NSF - National
Science Foundation, where it remains today AFAIK.

Short answer: Use a separate sound card, separate modem. Give the soundcard modem a decent Viking funeral, with extreme prejudice.

Long answer: Soundcard modems are also known as combo cards, and they are the devil. The modem section is inevitably a "winmodem," designed to tap the CPU to do the job of an actual modem. The result is a modest savings in the cost of hardware, and mediocre performance. Unfortunately they also require Micros~1 Windows to function. Penguinheads the world over are trying to write so-called "linmodem" drivers, but their task is made difficult by the reluctance of hardware manufacturers to release relevant specs, which would displease the beast from Redmond.

I've had limited success with the sound card function in combo cards under Linux. The early betas of Linux PSK31 programs such as gpsk worked okay on receive, but the general performance did not fill me with confidence.

Linux plays best with real modems and real sound cards. Most external modems work fine. Hardware-based ISA modems are pretty well-supported. When I surf under Linux, the same inexpensive ISA modem I'm using now gets the job done with no problems. Compatible PCI modems are more difficult to find, as most are winmodems. Here's a modem reference that may be of some help: http://www.o2.net/~gromitkc/winmodem.html. As for sound cards, most 16-bit SB compatible cards are detected and will work under Linux. Your Linux distribution's web site will have the latest info.

Looking at the list of groups this was posted to, he is probably not
talking about a telephone modem or winmodem, but about using a soundcard
(with software) as a modem for amateur radio digital modes.

While this principally has the same problems, the modem standards used on
amateur radio are much simpler than those used on the telephone line and
a modern PC CPU has no problem at all performing this function.

To answer the question: first read the relevant documentation. It is just
a list of steps to perform.

The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled.

And what would they do then -- haul me away in chains for thought
crimes?

A "proud" (but stupid) informer tattling on thoughts and words as
though they were crimes. Stand up gentlemen and remove your hats.
Radiosigs declares himself to be a proud future citizen of the
United Soviet of America.

God save the Commissar.

Jerry,

Kind of reactionary aren't you?

Well, first off, while what you say is GENERALLY true with regards
to the raw facts, it reminds me of the old story....

The first mate came back from shore leave and found an entry
in the log for the previous day. "The first mate was drunk
today".

He confronted the captain, who said "It's true, isn't it?"

Well, the captain found an entry in the log the next day from
the
first mate. "The captain was sober today".

And while I said your facts were 'generally' true, it's not 100%.

CBers ARE involved in Skywarn and RACES in some parts of
the country. Quite the opposite of what you try to show. There
ARE HAM groups who welcome CBers as another aspect of
emergency service. HAM groups who, in my opinion, AREN'T
so insecure in themselves that they have to generate artificial
distinctions and berate CBers just for being CBers. Besides,
association is the best recruiting ground.

Technical discussions on the HAM bands? Big "F'n" deal!! I've
also heard an extra class HAM 'just discover' that alkaline
batteries last longer than NiCads! I've heard an ARRL technical
representative (an extra) actually tell someone to cut the 'lock'
line on his rig to expand coverage. On the other hand, I've heard
a discussion on CB of how to modify a Motorola PLL circuit
that uses the a dual-modulus prescaler that I'll bet not 1 out of
10,000 HAMs could understand.

And this....

> Nothing interesting to talk about? HA! I've heard technical
> conversations on the ham bands that would baffle many a
layman--includ-
> ing YOU, I betcha.

Well, that offends me. You come off with that statement as a
little self-important prick. Sorry for being so explicit. But unless

you show me a list of patents that give you such a right to be
'brain proud', my assessment stands.

Don't feel so superior over a 'technical' discussion that you've
heard on HAM. Can YOU do as good? If not, then put yourself in
your own clasification of CBer!

Sure, theres some real idiot CBers, and as a general rule, they
are the loudest and most pominant at times. But then again,
there's some real asshole HAMs as well. Don't think for a
second that ANY one group has a monopoly on the idiots out
there.

I should apologise because you don't know what I'm talking about?

> Telling me that logic is truth is just plain dumb.

Of course. The scribes give you all the truth you need, and it would
be sacrilegious to test it with logic, wouldn't it?

Review of symptoms:

1. Hates free speech
2. Glorifies a military massacre of citizens
3. Decries logic as a test for truth

... you may have missed your century, radiosigs. Maybe by a millenium
or two. What the heck are you doing in this discussion group, anyway?

But according to your view, it's alright that I've been receiving these
unwanted subscriptions. I started turning them in at the beginning of
this year.

This would also apply to commercial users, taxi cabs, wreckers,
plumbers, any NON-emergency radios.

Also, the Councilman then implies that a one handed/armed person CANNOT
operate a vehicle.

The point is not having you attention on driving. Such as dialing a cell
phone, writing on one of those dashboard notepads while talking and
driving. It isn't just cell phones, I drive a lot on the interstate and
see a lot of drivers READING while driving. You can actually spot them
ahead of you. They slowly drift out of lane and then suddenly kerk back
into their lane. Plus it is a perfect time interval between jerks. They
have a built in timer but are totally oblivious to what is around them.

This is why I am totally againest the new viewable navigation and
internet devices as they presently are. If you have these devices, they
should not be viewable by the driver, If they are driver viwable, they
should be inoperable while the vehicle is in gear/moving.

I also wonder hao many hams are quilty of having their attention
deverted while changing frequency or using a phone patch.

Plus, think of all the possible accidents as a driver suddenly attempts
to cut across a couple of lanes of traffic to get on the shoulder to
quickly answer an incoming call.

Why would anyone in his right mind throw away a vote?
We now only have two choices. Bush or Gore.
Choose whoever you think will suck less.
Voting for someone who doesn't even count (Buchanan) is just throwing your vote to the wind.

That's because cell phones are in the spotlight right now. Most
accidents are caused by some sort of inattention, and cell phone use
accounts for a small fraction of those accidents...

> It's like dealing with a two-year-old, you can't expect a two-year old

Hello group I plan to purchase an ICOM-746 and have a question about power supplies. I notice that MFJ has what they term as "switching power supplies" and that also have an adjustable regulated power supply.

The "switching" ones are smaller....is there a real difference in terms of power. Will one be prone to any noise (RF or otherwise) as opposed to the other?

Lastly if anyone has a personal favorite power supply please let me know why you like it.

Thanks please reply to group

Careful: Your "screwdriver antenna" could be confused for using a screwdriver
AS an antenna. I have actually done both. It can be amazing how low in SWR
some household tools can be. Jewelers' screwdrivers, stuck into a female N
connector, work really well for 23cm RX.

Because we can't expect grown people to do what is right, too many act like two-year olds.

Either a traditional power supply or one of the switching supplies
should do the job power wise. I've got an ICOM-706 and use an Astron
RS-20A which is sufficient for my usage - lots of listening, some CW.
If you plan on doing some RTTY / Digital modes you might want
something with a higher continuous duty rating like the RS-35 or one
of the higher rated MFJ/Astron etc. switching supplies.

I've heard mostly good comments about the switching supplies but I
have heard an occasional gripe about some RF hash, and a complaint or
two about an audible high pitched noise from a switching supply.

Just my 2 cents, unless you plan on moving the supply around a lot or
have some other good reason I'd stick with the old traditional supply,
they're certainly easier to troubleshoot if something goes wrong.

>Lastly if anyone has a personal favorite power supply please let me know why
>you like it.

I personally like the Astron supplies. They're practically a standard
and usually dependable for years. If you chose the Astron route check
www.aventrade.com for probably the cheapest prices.

Although designs have improved lately, switchers are prone to noise, and often have little reserve capacity for modulation peaks. MFJ pushes them because they're cheaper to make.

I'd personally recommend an Astron (35A, 35M, 50A, or 50M) or similar linear supply. Nothing beats a fat iron transformer with lot's of capacitance in the output for transmitting applications.

And regardless of what I bought, it would NEVER have an MFJ logo on it!

I apologize for a long reply to an off topic troll, but I felt it was appropriate.

Brother Lloyd, you are sadly mistaken if you believe the Freemasons are going to rule the world, or if you think there is any reason to believe that even if they became a force to reckon with, there would be a cause for concern.

Masonry, like practically all organizations is facing a declining membership because there are more families where both parents work, and when they get home, and get things taken care of around the house, they don't feel like doing much else.

We have had quite a few Presidents who were Masons, starting with George Washington.

Being a member of the fraternity doesn't guarantee someone will be a good guy, but when a person petitions a lodge to join, the lodge does a background check in the hopes of making sure the person is of good character.

Some churches have problems with Masonry because they don't accept the concept you can have a "non sectarian" prayer. In my limited experience, these seem to be the churches who believe only their members will be saved, and everyone else will rot in hell.

Catholics are sometimes encouraged by their church to join the Knights of Columbus instead of Masonry. Something many people don't realize is the K of C ritual was developed with assistance of Masons.

A Masonic meeting is not a religious service of any kind, but they do require members to believe in one supreme being. This is because our oaths are taken in the name of God, and if you don't feel accountable, you can't be expected to uphold an oath. As part of initiation, members are told participation in Masonic activities should not interfere with their duties to God, their family, their neighbors, or themselves.

They do read a passage from the bible during a degree, and offer a prayer as part of opening and closing their meetings.

But otherwise, the Masons are essentially a fraternity where good people can go to meet each other.

Their secrets are comprised of hand shakes, and passwords that allow one member to prove he is a member to another. Otherwise, Masons can discuss personal secrets with each other with slightly less confidentiality than they can expect when talking to a priest, minister, or lawyer.

To be sure, there are some Masons and some politicians who are scoundrels, and I personally believe one of the candidates you mention would be a horrible President. But to say a politician can not be trusted because he is a Mason is ridiculous.

Well, as much as I think a 'cell phone' law is BS, I DON'T see how a cell phone type ban would be considered ok and not supporting the ban on CB and HAM would be hypocrisy.

Cell phones are 'duplex' devices. In that sense, a person is talking and listening interactively . With a 'one way at a time' type device, there is MUCH less distraction to the driver.

When the person gets into a 'full duplex' conversation, especially though a device that limits overall interaction, they tend to concentrate on it. They still do the 'wide band' type interface actions though, like facial expressions, waving of the hands, and probably others. Watch some time, you'll see people on the cell phones waving, nodding, smiling, smirking, whatever. Do they do this with 'half duplex' devices? Nope, or at least, not near as much.

OK, why don't they do this in person in a car. Well, they do. But I think not as much. Or at least, it's not as distracting to driving in person, possibly because the interaction is still 'wide band' and is closer to what they've probably done all their life in social interaction.

Hmm, anyone who doubts the interaction of the TYPE of communication should try this experiment. Take a motorcycle, I know, dangerous, and try to maneuver around a 'test site' like a parking lot with a drivers test course on it. First try it with a hands free cell phone and a headset. Talking the whole time. Then try it with a 'half duplex' radio, something with a handlebar mounted PTT switch. THEN try it with a handheld mic!! Finally, try it with a hand held cellphone. I've done all but the last on my Gold Wing. The difficulty from hands free phone (with a headset in the helmet) and the PTT on the handlebars is just 'different'. But still distracting. Distracting even to at times make me forget to LEAVE GO the PTT! (I will just mentally 'let go' the radio and drive when needed, then realize OOPS, and go back to the radio. I have a friend that's a former F4 pilot, and he usually manages to blurt out 'stand by one' and then just goes away. Driving should be number one priority. Suspend all else when necessary. I guess some people just can't do that. What's the solution? Ban their cell phones? Hey, they shouldn't be driving to begin with!!

As to other distractions... I see the makeup, shaving, and reading
all the time. About 4 or 5 years ago I had just bought a digital
camera (I know, what does that have to do with anything, but wait
a second...) and I was commuting to work on the Mass Pike.
One day it was snowing and getting slushy. I almost got rear-
ended by this idiot about 3 or 4 times. Most weren't real pumpers,
but one got the juices flowing and was so close it gave me a rush.
He was READING A GOD DAMN MAGAZINE!!!! Well, at the
next stop and go stop cycle, I opened my door, got out, made a
snowball, and heaved it at his windshield, yelling "WAKE THE
F___ UP!!!"

Well, he took a bit of exception with that. He ended up pulling out
a 35mm (No, not a 9mm! (But then, I had mine in... NEVER MIND!))
and 'flashing' me. I don't know what he thought he was doing. So
I pulled out my Nikon and 'flashed' him back. Only I got some beautiful
digital pictures of him now driving with a magazine over his steering
wheel, in a snowstorm!

As to the other comment about navigation devices... At one point
I thought it was illegal to have any video screen that was visible by
the driver. I know that GM actually got a waiver from the FED for
the Buick that had the CRT in it. So it's amazing if the law was
changed just in time to make it legal to be distracted by GPS.

And yes, I have GPS. And I HAVE run it in the car, with the laptop
on the seat, or being held by one of the kids. But then, taking a
quick glance on an interstate is NOT the same thing as trying to
look at a display to figure out where to go in crowded traffic. Usually
I use it as the kids to tell me where the next turn will be. In that
regard,
used responsibly, I figure it's less dangerous than a map. Especially
since with the GPS I have the route already 'pre-planned' to a greater
degree than I ever did with a map before.

Web,
Switching power supplies are fine if your 'space' poor (not much room). If that isn't a consideration, then either of the two kinds of power supplies will do the same thing. As with any power supply, always get more than you need. They're sort of like closets, no matter how 'much' you have, you wish you had more. Some 'switcher' power supplies are NOT made for use around communications equipment, and are notorious for noise. Be sure the 'switcher' is designed for communications use!
I use a power supply made by Walt Williams, W5UYO(?). He makes custom power supplies to your order, almost any current draw up to the rediculous. Has a 'life time' warrenty, and they work well. (Haven't turned mine off in over 10 years, other than the occasional a/c failure).
'Doc
PS - Can also use mine to weld with, if I use 'light' rods.LOL

Haven't been in the scanning-scene for a few years since I moved
and tool the old PRO-2006 out of the cardboard box recently.
I had heard something that Bill Cheek (author of the excellent
scanner modification guides 1 thru 3) was alleged to have inoperable
cancer. If Bill has indeed passed on, my condolences to his family
and XYL. What I do find incredible (and grossly distastefull) is that some
thread has apparently started linking this man's passing with some
off-the-wall ham radio war or some other such nonsense. Makes me
glad I never got a ham ticket. I've been to 10 or 11 hamfests in the
past 10 years and I have never seen a greater collection of misfits,
screwballs
and USDA Grade-A corn flakes in any one place at any one time.
The above thread only serves to confirm my observations.

3170. KC8JBO From the FCC Amateur Radio Enforcement Log-- July 19, 2000

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-20 00:00:00 UTC
From: frg9600 <frg9600@home.com>
Message-ID: <elud5.51220$i5.729844@news1.frmt1.sfba.home.com>
Source record: 106840

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

Then your not living in the real world. Using a cell phone increases the chances of having or causing an accident by a factor of 4. About the same as driving while intoxicated.

Well good for you. And tomorrow you can easily have your first. To barrow a saying, with some modification, from the investment folks, " Passed performance does not indicate future performance".

> That driving record is not luck.

I can point you to a traffic court judge who if you should ever appear before him will very much disagree with that point.

> If you can't handle operating a radio (or a phone) while driving then
> don't, but don't get big brother spoil it for those who can...

That really is a sad point Aaron, just like the drunk driver who has yet to have their first accident, is you THINK YOU CAN. There lies the root cause of the problem. Until the day you run over somebody's kid you don't think you are driving in an unsafe manner. That is why these laws are being passed because people like you are in denial. Since you can't, or don't want too, correct your behavior it now becomes society's problem, and the solution is to pass the laws that are now being proposed to protect society by correcting your behavior for you.

> That sounds just like what the gun control people say...

That is an issue for another news group.

The person doing those things probably isn't all bent out of shape and angry because they are having an argument with the boss, spouse, teenage kid, girlfriend, boyfriend, best friend, co-worker, mother-in-law, stock broker, trying to close the 'deal of the century' or a hundred other things so that they run red lights, stop signs, fail to yield, weave from lane-to-lane, tailgate, speed up, slow down, weave from lane-to-lane, cut you off, weave from lane-to-lane, slam on the brakes, weave from lane-to-lane, or a hundred other stupid things they do instead of paying attention to the main priority at hand....driving the damn vehicle.
We would not have to have laws to regulate such things if people would use common sense, but common sense seems to be beyond a lot of people. Common sense isn't very common.

Jerry,

I wan't the original poster. I was, and I admit it, a little
reactionary
to the posting you did. There's a nerve there. One aspect of it
is a local 'wheel' who badmouths CBers, and in the past
tech-no-codes, and then even a diatribe over anyone less than
extra who ever gets a call of someone he 'knew' when they
finally did a recycle of the calls. For all his badmouthing of
CBs, I KNOW he used to use them.

No, I wasn't bashing 'all' HAMs. Just a few very visible ones. And
just like the guy you dealt with on the antenna, it's the 'bad' ones
that are the most visible. I just had a bad experience with a
certain company. Things got screwed up, then again, and again,
and finally in desperation I ended up sending a long email to a
BUNCH of people there. Well, things got done! It was actually a
supplier problem, and more of a description that the supplier
supplied kind of thing. The end result was that I'm a satisfied
customer. And I told them that. In this case you're not always
remembered for how things are when they are good, but you
won't be forgotten for how things are when they are bad. So make
sure you're remembered for how you handle them!

Put a hundred HAMs somewhere, put 100 of ANY group somewhere,
and you'll have good and bad. Standouts in BOTH extremes. But
what will people remember and talk about? The idiots!!

Sorry if I came on a bit strong. I realize your post was also fueled by
the frustrations of dealing with some of the less than mentally superior
beings!

Hmm, you sell an antenna... I'm not familiar with the 'screwdriver'
antennas. I used to have a 10-80 trap vertical but with the
divorce... It 'disappeared' when I didn't get it out fast enough.
Oh well.... Now I just have one long wire and a 40M dipole fed
with 300 twinlead for my K2. I've been thinking of another vertical,
but not sure about it yet. I currently have all the parts to build the
double coil mobile antenna from the April QST on the bench. Just
picked up the fine-thread bolt and the 'whip' recently, so
construction can really begin!!! But I'd like to hear more about your
'screwdriver' antenna. (You can email me direct through the ARRL
reflector.)

No, but I have posted the URL's, in this news group, for reports done by those who are. I suggest that you read them. From your attitude I'm sure you will not be pleased with the conclusions, but facts are facts, and your comments do not change the data collected which supports my point of view. If you can provide the URL(s) of a document, or professionally, conducted study that refutes the conclusions drawn in the studies I referenced, then post them.

I know nobody will change your mine Aaron, just like the drunk who thinks he does not have a problem. You will go to your grave and never understand why these laws are being proposed. I am not going to continue wasting my time to explain it to you. The URL's for the studies supporting the view that mobile cell phone use is dangerous I have posted before for all in this news group to read, and respond too. If you disagree with the conclusions, that's your problem. And besides, at least I have the balls to identify who I really am, and I'm not afraid to take the heat for my views.

3192. Announcement

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-20 00:00:00 UTC
From: KC8JBO <kc8jbo@my-deja.com>
Message-ID: <8l71kk$lm0$1@nnrp1.deja.com>
Source record: 106862

Fellow Newsgroupers:

After reading yesterday's posts from Doc, AF2Y, and George Wolf (Notice I used his correct name), I've decided that they are 100% correct. These attacks back and forth are useless. Therefore, I want to go on record right here and now that I, KC8JBO, is out of the war. I also want to publicly apologize to ALL that I have flame posted on here. There have been accusations of mail abuse, but I'm not the one doing it. I've been turning in all the unsolicited magazines I've been getting since the beginning of the year to the postal and law enforcement authorities. This is my END of the participation of the newsgroup bickering. I hope that you can forgive and forget, and we can focus on what we have in common..radio, instead of focusing on our differences. I am not hopeful that some will do that. I hope I'm wrong. I'm going to retest, and later get rid of this call. I never was too fond of it..especially the suffix..hi hi.
I challenge my former "detractors" on here to do a similar announcement.
Peace and all the best to you all.

Roger

Radiosig's supposed report to the secret police brings more laughter
to this party than to yours. He reveals how phony and frail your
devotion to "American democracy" really is, and THAT is what deserves
the exposure.

> >2. Glorifies a military massacre of citizens
>
> I don't recall seeing Doc glorifying the Nazi massacre of Jews in WWII

Easy to be wise about times long past. Not so easy to see the
drunken bum in your own father, or the wiggling white worm beneath
the skin of your own government.

You and radiosigs both argue by what you can and should "believe,"
putting you in the same intellectual class as "the good German."

What will you answer about these times when future generations ask,
"What did they know?" Will you shrug and say, "Nothing, I swear it!"

> >3. Decries logic as a test for truth
>
> See above.

Yes, do see above. It is logic that invented DNA testing, not
blind patriotism, religious hatred, or demonization of small
Christian churches that brought about the truth in your examples.

And passengers have been riding in automobiles since the auto was invented, but you haven't heard the amount of complaints of such behavior because of a passenger as attributed to cell phone users. So it seems that a passenger does not present nearly as much a problem as a little cell phone.

>

> We already have thousands of laws on the books to curb such behaviors.
> They don't always seem to work do they. But lets try just one more
> law...

We would not need any laws at all if people would do the right thing, but they don't. If drivers would use common sense and not use them while driving, but too many do not have or will not use any common sense so the only other way is to attempt ban their use with another law. It's like dealing with a two-year-old, you can't expect a two-year old to know what is right so you have to lay down rules with the threat of punishment if the rules are broken.

3199. battery capacity indicators

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-20 00:00:00 UTC
From: warrent_nc@yahoo.com
Message-ID: <8l74pe$o71$1@nnrp1.deja.com>
Source record: 106869

Does anyone remember a device with a rechargeable battery "fuel guage"?

The "fuel guage" I'm referring to is a couloumb counter that tells you how much battery energy is left. Laptop computers as well as cellular phones have this sort of capability.

I'd expect some of the early ham radio gear or early cell phones to have this capability.

Any insights?

Thanks,

Warren

Why do you keep answering posts twice, idiot? And why do you keep putting
W5YI and ARRL in your sig line? Trying to drag them down too? My advice to
you is to leave everyone alone and start worrying about yourself. You let
those moronic Goodfellows use you and now you will have to defend yourself.
And not one of those idiots will contribute one nickel to your defense.
You are a very stupid and pathetic individual.

......Perhaps we should all go back to hoofin' it.... you might be right...
think of all the distractions in a vehicle.... MY GOD MAN.... the world's
just not safe as long we have cars that require you to manually shift
them.... you could have an accident while bangin' gears! ...or while tunin'
the stereo to your favorite oldies channel... god forbid you should maybe
want to change a CD or Cassette without pulling to the side of the road!
Maybe the feds should outlaw riders/passengers as well and make all cars
single seaters by edict.... heaven knows how many times I've been distracted
while driving by my passengers. Maybe we should sterilize anyone who
desires a driver's license... you know how much of a distraction youg 'uns
can be on a trip. While we're at it.... for those of the public so inept at
driving, we should remove all billboards, signs, and anything else worth
looking at along the roads.... we sure wouldn't want any one to be
'distracted' from driving! No more CB's, no more Ham radios, NO SMOKING, no
eating, no talking..... NO, NO, NO! We can't have anyone distracted while
driving!

Your statistics mean little.... statistics can be used to prove almost any
point from EITHER viewpoint.

You sure are proving your guilt in this one. I never named you as the culprit, you did. You are wasting time with the police, the Postal Inspectors handle mail fraud. Open the magazine, call the 800 number inside, and ask them to mail you the subscription card. Then turn that in to the Inspectors, they will do the rest. Do not flatter yourself by naming me, I do not play illegal childish games like you do. You are a sick individual, and your attacks on myself and others only mirror your own lack of confidence and self doubt. All anyone has to do is run KC8JBO on Dejanews and they will see all of your hateful posts. You have never helped anyone on here or said a kind word to anyone. Just insulted hams with the filthiest text imagineable. You are a serious nutcase, and I suggest you get therapy immediately. Some of the judges might go easier on you then.

Message-ID: <20000720210559.28307.00001344@ng-cl1.aol.com>
Source record: 106713

I passed my tech test (element 2) today. I asked the VEC afterwards whether I get credit for element 2 when I take my code, General or Extra tests and was answered in the affirmative. Now that I'm looking at my Certificate Of Successful Completion Of Examination I find the following:
"CREDIT for ELEMENTS PASSED
You have passed the telegraphy and/or written element(s) indicated at right. You will be given credit for the appropriate examination element(s), for up to 365 days from the date shown at the top of this certificate, if you wish to upgrade your license again while a newly-upgraded license application is pending with the FCC"
Does this mean that if I want credit for element 2, I have to test for my code, General and/or Extra within 365 days?????????? Thanks for any insights.

I just had a funny thought: Connect an 800-MHz-enabled scanner to
an audio amplifier feeding a speaker under the hood of your car. Pull
up next to a cell phone user, and with scanner in search mode, find
the frequency he's using, and broadcast his conversation to him via
the audio amp.

(This is a "thought experiment," folks -- no flames necessary.)

nospam said ..
>It says it all.

No it doesn't. David J. Smith says it all. The black helicpopters are taking over the world on Jan 1, 2,000. UN troops are camped out at the national guard armory. The masons have zillions of guns stored in the basements of their lodges. The black helicopters are gassed up and ready to ride. President Clinton has signed the executive orders for them to begin urban pacification.

All we are waiting for is Jan. 1, 2,000. And when that gets here, the party's over, my fellow Americans. You think it's funny. Just you wait till Jan 1, 2,000 and we'll see who's laughing then. And when the black helicopter lands in your front yard to take you to a concentration camp, you'll see.

That's too big of an assumption. Expecting an Extra (or any other amateur [i.e., non-professional]) to have knowledge of *every* HF antenna ever designed is asking quite a bit.

It's really no different than what you're doing -- building a version of that antenna rather than selling a design of your own which you've modeled and perfected after hundreds of hours of exhaustive research. Basing your antenna on someone else's design doesn't place you all that much farther ahead of those Extras you condemn, OM.

Aaron, this is not about "big brother" or "government," whatever
those, used in that context, are supposed to be. I have never
understood why some people refer to "government" like it is some entity
that exists on its own (usually only when "it" does something they don't like).

Anyway, these laws are being pushed by other drivers who are tired of
the constant threat cellphone users present on the highway. I'm sure
most of those drivers would love to be able to make cellphone users
drive more safely without resorting to laws, but that (complaints,
education, etc.) has not worked.

You asked the VEC? You probably asked a VE.
Why do yo think you need credit for element 2?
You license is all the proof you need for continuing to the other licenses.

But I would think that anyone who got to 'extra' should at least have a
basic understanding of the concepts, not be a total appliance
operator. ESPECIALLY when it comes to parts in the box.

Geesh!! Well, it LOOKS ok. These extra parts must just be for
looks!!

Yeah, right!!

Hey, I don't know that much about antennas and antenna theory.
But I sure know that if I buy something like an antenna, I'm more
than likely going to use all the parts in the kit! And no, I'm not THAT
much of a novice either. I've built multiple VHF, UHF, and various
microwave units. My latest project was my K2 (www.elecraft.com)
which now has relegated every other piece of HF gear I own to the
storage shelf, or to the 'for sale' bin. (Although it might be nice to
pick up the RS HTX-10 to get 10m FM.)

ONLY in a ham radio related newsgroup
could you find someone posting in obsolete
code, a message to be transfered using 21st
century technology.

No wonder the CTIA and other technical bodies
want our "precious ham frequencies"! They can
certanly make much better use of all our frequencies
above 144 MHz rather than leaving it allocated
to a bunch of tightwad, old white curmudgeons.

Looks like ole Wayne Green was right in his
editorials all along. Should be fun around
2010 when ham radio is long forgotten and all
the surviving-spouses finally get their dream
wish, and cart all that "goofy radio junk" of their
dead husband's out to the sidewalk for the trash truck
to eat... ROTFLMAO!!

.... ..! ...-.-

>drunken bum in your own father,

Which appears to be another instance of your *ignorance* One of the main reasons I detest Koresh is because of the religious fanaticism *I* suffered through as a child. It's *REAL* easy to sit in a nice comfy chair and portray religious fanaticism in some great light like you're doing. It's not so easy when you've had to *personally* live through a fanatical religious upbringing like I have, Mr. Expert.

> or the wiggling white worm beneath
>the skin of your own government.
>
>You and radiosigs both argue by what you can and should "believe,"
>putting you in the same intellectual class as "the good German."

Speaking of 'The good German' I'd invite anyone that wants to , to check out
your cohort's page here and read all about "Life in Zionist Occupied America."
, how the holocaust never happened etc. A *real* charming site I must say.

http://www.mnsinc.com/SkyWriter/

>
>What will you answer about these times when future generations ask,
>"What did they know?" Will you shrug and say, "Nothing, I swear it!"

No, I'll tell the truth and say "I lived it."

What will you say Mr. Expert ? Will you entertain "Future generations" by
concocted stories of your "Truth" typed from a nice easy chair while linking to
hate sites ?

>
>> >3. Decries logic as a test for truth
>>

>On equal probability and accuracy, I can suspect your mother was a
>babboon.

And if she were I'd find that *much* preferable to the Eva Braun types you seem
to admire.

> All better now?

I've been "All better" since I escaped the religious fanaticism I grew up in about 30 years ago. It certainly is entertaining to remember "Old times" and have you inform me about how "wonderful" they were which is in direct contrast to my memories, but keep trying anyway.

Snipped it all--most of you know Lloyd's rants by now...

How does one go about answering this? Somehow the words escaped me and
I found myself wishing my dear Aunt Minnie were still around to counsel
me with her kindness and insight. She always took such a positive
approach to human nature, could always find something positive to say.

Alas, she's been deceased for some time now. What to do, what to do?

Well, I wasn't going to let a little thing like her being dead stand in
the way of my search for enlightenment. No, not me! I hacked my way
onto Art Bell's web site and found a secret portal that let me
communicate with my beloved Auntie!

She--all-knowing--was already aware of Lloyd after browsing the Deja
archives--she said she liked to keep up with what the living are up to.
So, finally I asked her what would *she* say to Lloyd and her reply was
a masterpiece in simplicity--I'll let her tell it:

Not sure what you mean by not being a "true" dual band. If you mean that it doesn't have 2 complete receivers that is correct ie: can receive to 2 bands at the same time or transmit and receive at the same time. Not sure why anyone would want to on a HT. Even on my mobile I wish I could turn it off. As a whole I like ICOM better than Yaesu, but I think the VX5 is one if not the best HT on the market. I have used Kenwood, ICOM and Yaesu. My family owns 2 VX5 which wasn't purchase at the same time.

Anyway good luck with your search and getting your ticket. Also expect to buy a mobile within a year of getting your ticket. Everyone I know that start with HTs ended up with mobile units.

The ONLY validity is that it's just another classic
example of how ham radio has sunken down into the
gutter, scraping the opposite side of the bottom
of the barrel. (the part that lays on the bare
dirt that slugs and bugs live under) This is a
PERFECT EXAMPLE of why I feel that Commercial
RF Spectrum Interests should completely be given over
exclusive rights and re-assignment to ALL Amateur
Radio Frequencies above 144 MegaHertz.

Thanks for this piece of trashy ham radio guttersniping.

You can be sure that I will forward a copy of
this post to those business and commercial
interests I personally know, who are looking for
any evidence to present to the FCC, in justification
of the re-assignment of VHF/UHF ham radio RF Spectrum
to the exploding market for Commercial Wireless Services.

Hi, Dan:

I liked your reply to that ersatz T.O.M.; didn't he get his knickers in a knot over my posting Morse code on, of all things, a ham ng? .-. --- - ..-. .-..

Do you think that '.... ..! ...-.-' he sent is his automobile tag, or maybe his idea of a ragchew on CW?

Shucks, about tags, the only Sheaffer 'Snorkelfill' pen in the O-ho-ho tag dep't ran out of the peacock-blue ink they wrote the records in. It's pencil in butcherbooks now, om. I'll probably not ever get an answer.

That ersatz T.O.M wondered about my neighbors. I once had a neighbor who abducted a few neighborhood dogs, banged on doors at 3 ayem, and killed a few other pets. He used to help me put up antennas, though. Do you think he was crazy, or weird? Should I have told my child to avoid him, and refused his neighborly offers of help? I wonder if my neighbors think I'm crazy or weird for fixing broken electronics and other stuff for them? They call me and the only beeps we hear on the phone are from the TouchTone dialing apparatus. I wonder if that ersatz T.O.M. hears those beeps, and thinks they are code?

Dan, as that ersatz T.O.M. wrote, I'm close to a dollar, super-annuated, Caucasian, and irascible, quirky, and I don't make much use of high-tech modes and those 'precious frequencies'. But, I do talk fingertalk (CW) only to other interested parties, who are entirely, to my knowledge, hams, on 40M, evenings, and T.O.M is welcome to join in. We make sense out of all these low-tech beeps. I can't tell what my modem and the SLAM are beedling and hissing back and forth at each other, even tho I can hear it.

And, Dan, I don't get wrapped around the axle cuz code appears in, *of all places*, this ham ng.

Hell no.
The FCC has no right to give up frequency to commercialism at all.
That's the whole frigging problem. The damned FCC sold off the 800Mhz
Cell band (which they had no right to do) and look what happened to us!
Now, everytime we buy a scanner, we have a big chunk of frequencies blocked on it.
Tell your buddies at the FCC, if they want to "sell out", tell them to make the commercial companies encrypt and decrypt their communications instead of crippling our equipment.

Jeff Herman,

I didn't SAY I expected every Extra Class ham to know everything about EVERY antenna made. What I said was that I meet many Extras who have NO idea how to build (implied), install, and/or operate an HF antenna.

The principles of installing and using an HF mobile antenna are basically the same. You must know the importance of grounding, you must know where to place the antenna for best results, and you must know how to get the correct impedance at the feedpoint. In the case of the screwdrivers, I include instructions on installation and what each part is for. But they couldn't understand what I meant by "impedance matching". One fellow returned saying it wouldn't work, as had a few others. I looked at, and told him that his mount was not providing a proper ground (installation issue). He wouldn't believe me. So he goes to another ham friend who tells him the same thing. Corrected the mount issue, and it worked as it should. It is also true that some guys refuse to READ instructions--and I have been guilty of that, too. The fact remains that, as the requirements have lessened, the tests have gotten easier, the less "learning" occurs.

There is nothing different about a screwdriver as oppposed to, say, a Texas Bugcatcher except for the ability to move from one band to another without leaveing the car. All other issues aforementioned are the same: if they have trouble with the SD, they'll have trouble with any other antenna.

I specifically said that I don't know everything and that I am still learning, which, for me, is one of the fascinating parts of ham radio. I never bashed all Extra class hams. Least of all, I certainly didn't bash you personally. I don't know what you know; you don't know what I know. The screwdriver antenna is NOT the only antenna I have ever built, nor is it the only thing I do now--I just used that as an example.

Lastly, I have experimented with the screwdriver design in several ways. One thing I did, is replace the PVC coil form with phenolic/nylon, and increased the wire gauge to #14 which allows one to run full legal limit if one desires. I don't use that much power--don't want to be exposed to that much RF in a vehicle. I have also build an "inside-out" screwdriver using a 4" air wound coil (Bug Catcher) whereby the coil is on the outside of the mast and the fingerstock is on the inside of the coil. It works fine--I have had enough requests for the 2 1/2" version to make continued experimentation difficult. The one I am running is 3" on a solid phenolic form (solid), #14 gauge wire, and is equal to the

regular Texas Bugcatcher--convenience of the screwdriver and "Q" of the Bugcatcher. I ain't smart, ain't dumb, either. Don't expect you are either.

I agree 100%. I know who put you up to this, and I have been used in the past as well. I just wished you had done this sooner.It would have kept some cats in the bag. About the mail fraud, I have no idea for certain who it is. I do know that it involves about 10 states currently and is being investigated. I have my suspicions, but it is up to the investigators to solve it.All you have to do is call the 800 number for subscriptions in the magazine and request a copy of the subscription card when you cancel it. Most will cheerfully send you the original or a copy, and once you get a handful, turn them over to your postmaster and fill out a report. They will take it from there. Whoever it is, they are looking at a 100 counts in 10 states. At 10 grand and up to ten years a count, I'm glad it is not me.

>Rick Tannehill
>W7RT

But you don't cite those rulings, probably because they don't exist. The U.S. Code, Title 10, Chapter 13, Section 311, defines two militias: The Unorganized Militia is made up of all able-bodies MALES between the ages of 17 and 44. The Organized Militia consists of all members of the National Guard; only if a woman is a member of a National Guard unit is she then in the militia.

See, for example, http://uscode.house.gov/usc.htm.

I can see now that nothing you write is to be believed.

As Gary Coffman was fond of saying, an amateur test is an entrance exam, not a final exam.

A newly licensed driver has none of the skills nor does he have the mental catalog of possible road events that an the long-time-licensed experienced driver carries with him. Why would you expect any more from a newly licensed radio amateur, Tech or Extra? It's what we do *after* receiving the license that counts.

Actually, there is a big difference between people using the telephone and a radio. People using the telephone, for the most part, don't think they can miss a word...they cannot put the dern thing down whereas, folks using the radio seem to have no problem leaving the other guy hanging for a few seconds while they negotiate a turn or whatever. Also, folks that are deeply involved in a personal call can and have lost track of where they are and what they are doing. I.E.: cannot stop conversation long enough to use a turn signal, weave back & forth, move from lane to lane, etc..

Some folks are better at it that others....your mileage may vary.

Dan, anyone with a -... --- --- -.- on Morse Code could have easily read David's message. You know, we do live in an age where books on just about any subject are widely available. Of course, if the message had been sent by radio, I could have used simple translation software to read it (and respond). In other words, don't pat yourself on the back too hard for being able to read a morse code message - its really not that impressive.

A 2 way conversation is a 2 way conversation
no matter what the duplex...

>Cellphones are more and more in the hands of "casual users",

I agree that more cell phone users means more accidents. More people
driving from the normal population increase also means more accidents.
Should we outlaw new licenses? That would decrease accidents...

>and "no hands on the wheel, one eye on the road" when dialing.

I can dial my cell phone with one hand, no problem. I program it so I
only need to push 2 buttons and send. I hold it up by the windshield
so that I can keep my eyes on the road when dialing, which is a heck
of a lot safer than most ham and CB mobile installations that have the
rig mounted under the dash and you really have to take your eyes off
the road to use them...

>What is worse with me, is that I need my reading glasses to see the
>small numbers on the display and dialer.

As I've said before, if it makes you uncomfortable to drive and talk,
then don't. But don't spoil it for those of us who can...

>I often pull off to the side when using the phone,

If they do pass a no cell phone law while driving, watch out for those
wild swerves to the side of the road. You know, the phone starts
ringing and you have to get stopped to answer it before the caller
hangs up. That's safer???

Basically, the operations are mainly repeater based voice, with some simplex Packet and voice.

The ARRL repeater guide and VHF Packet books are good sources of information.

You will probably note depending how close to a metro area you live that 2 meters does at times sound like the 11 meter CB. Like the one answer you got pointed out.

I mainly use my 2 meters to keep in contact with several friends and SKY WARN weather activity due to the Tornados that pop around here.

I have two radios for sale, both work fine as far as I can tell.
Both EF Johnson.

1 - EFJ 40W Challanger VHF 2 channel mobile $100
1 - EFJ 5W, 8 channel VHF portable $75, good battery (new) no charger or antenna

Both for $150 plus shipping, photos upon request

2m reminds me of what 11m might sound like in Mayberry (say Hi to Aunt Bea for me :-). The operators that I've talked to in my area, metro Atlanta, tend to be polite and work hard to run a clean station. Along with the locals, we have a number of short haul truck drivers that frequent the repeaters. They've helped me avoid bad traffic situations a number of times by providing advance warning of the problem as well as alternate routes.

Even though the original poster mentioned that he'd been a ham since 1988, there may also be new hams reading this. Please forgive me for covering things that are obvious to more experienced hams.

You'll probably want to pick up an ARRL Repeater Guide ($8) for determining frequencies, offsets, and subaudible tones. I keep one in the shack, one in the mobile, and toss one in the suitcase with a handy talkie when traveling out of town.

On 2m, you are required by the FCC to give your callsign once every 10 minutes and at the end of a conversation. You are not required to give the other stations callsign at the end of a conversation, but many 2m operators do so anyway.

Instead of calling CQ, most 2m operators will say something like "kg4gge is listening" or "kg4gge monitoring" to let other hams on the repeater know they're interested in finding someone to talk to.

When calling a specific station, you generally give their callsign followed by your own, as in "kg4frs, kg4gge" or "kg4frs, this is kg4gge calling". If the called station does not comes back within a few moments, the calling stations clears the frequency by saying something along the lines of "nothing heard, kg4gge clear".

When 3 or more stations get involved in a conversation, they will sometimes use a "round table" format. When the one station finishes transmitting, they give the next station's callsign followed by their own to specify the n ext station in the rotation, for example "pick it up kg4frs, this is kg4gge - in the group". Passing the baton like this helps prevent two stations from "doubling" (talking at the same time). A second or two of dead air is generally left between each transmission so that new stations can either join the conversation or request the use of the repeater for some other purpose.

If you want to join an ongoing conversation or request use of the repeater, you quickly say the last 3 letters of your callsign between the other station's transmissions. The operator who was about to pick up the conversation will generally acknowledge you immediately and allow you in. Emergency traffic is signified by saying "break break", all conversation should cease at this point, with the other stations listening to see if they can provide assistance.

You generally won't hear 10-codes on 2m, but some operators like to use a few of the Q signals. QSO, QSL, QSY, and QTH are the most prevalent. Many operators also use 73, the old railroad telegraph signature for "best regards", when clearing out another station.

That's 2m FM repeater operation in a nutshell. As several folks have suggested, just listening to the activity is probably the best way to determine the decorum used in your area.

Maybe in your town Jeff.

Here in SLC operations are good, clean and fun. The only problem with 2 meters is that it's VERY crowded. I've heard a lot worse on HF.

Religious fanatics may be annoying at times, true, but that hardly justifies attacks on their homes and churches with armed forces fully equivalent to those used in warfare, especially when the alleged "offenses" were acts harming no one -- and were, additionally, acts that would have been perfectly legal had the "offender" obtained a license costing around $200.

And, it must be added, religious fanatics usually pale in comparison to "liberal" fanatics. True-believing "liberals" have all the irrationality, rigidity, moralism, and willingness to inflict death and suffering on others as do religious fanatics -- but without the beautiful cathedrals and choir music.

With all good wishes,

--

The 520 series of rigs are excellent, even by todays standards. I
think you should keep it, get on the air, see what you want to do with
HF (if anything) and go from there. The 520 will serve you nicely.

Thats true David....I can see it now, you sit there with your "Morse
code book" and go one by one and write down the letter. Whats the
speed there -10?. As for the "simple translation software" on the
radio. Tell ya what. I'll send CW with a bug and lets see how
accurate your copy is. At the same time have someone there that can
really copy Morse. Then compare the accuracy.

I'm not trying to impress anyone. But if you are impressed, that
should tell you something.

Oh and BTW...it is extremely difficult for me (or any real CW operator)
to translate written dots and dashes (dahs and dits) to written words.

A real CW operator copies in his head, using his ears or his eyes in
some cases. Course I can't expect you to understand considering your
license class and all.

>Religious fanatics may be annoying at times,

900+ dead in Jonestown (including 200+ children), ~80 in Waco (including
children), roughly 30 in Heavens Gate. I'd say that's a bit more than
"annoying."

> true, but that hardly
>justifies attacks on their homes and churches

If you want to call the Murder Warehouse in Waco a 'Church' that's your
prerogative but it hardly fits my definition of one. I've been to *many*
different 'churches' in my time but off hand I can't recall stumbling across
too many converted AK-47's, grenades, silencers, piles of ammunition that
require a Bobcat front end loader to move etc. in any one of them, maybe I
should have looked in more church basements ?

> with armed forces
>fully equivalent to those used in warfare,

And even those 'forces' were repelled by the Davidians , the ATF actually
wasn't prepared for the gunfight that followed.

>especially when the
>alleged "offenses" were acts harming no one -- and were,
>additionally, acts that would have been perfectly legal had the

As they say "wudda shudda cudda."

>And, it must be added, religious fanatics usually pale in comparison
>to "liberal" fanatics. True-believing "liberals"

> have all the
>irrationality, rigidity, moralism, and willingness to inflict death
>and suffering on others

If you're referring to the Waco case in particular the investigation/ planning for it began under the George Bush (Liberal ???) administration and a Bush carryover Asst. Attorney General was still in charge when the original Waco raid took place. Let us *not* forget Ruby Ridge occurred under (Liberal ???) George Bush as well.

You'll have to blame Clinton/Reno for all the deaths at the Texas Freemen standoff and the all the deaths in the Elian Gonzalez case .... Ooooops I forgot there weren't *ANY* in those two instances.

>as do religious fanatics --

Liberals are usually harmless save for the occasional "ride home" that turns into a swim (Chappaquiddick) or the nighttime single engine plane trip over 100's of miles of open sea. Occasionally even a liberal even seems to meet poetic justice by skiing into a tree (Kennedy, not " YEW Got Me Babe " Sonny Bono) but that's another thread.

>but without the
>beautiful cathedrals

Jim Jones and David Koresh had "Beautiful Cathedrals" ? I must have missed some pictures along the way. Do you have a URL handy ?

> and choir music.

Only if you consider the sounds of rifle fire and the moans of the dying as "Choir music" in Waco / Jonestown.That sounds rather ghastly to me but again YMMV.

My suspicions are that a *goodly* portion of the organized Waco 'Concern' is a Red Herring anyway, it's merely an attempt to try and demonize the government and pick up support from the gullible in the process.YMMV.

Does anyone remember the column in CQ many years ago by one "Hashafisti Scratchi"? This series would be considered very un-Politically Correct today, but I found it very funny. I'm sure it was not written by a Japanese American, but I'm not sure a Japanese American would find it offensive. California hams were the butt of most of the satire, as I recall (Scratchi was ostensibly an Arizona ham).

You have never meet Dr. KAVORKIAN, but my ex-wife did, several times, when
she worked at the Oakland County Jail. And for the record he did most of his
"volunteers" using Carbon Monoxide, after the Oakland Country Prosecutor
took away his first "suicide machine", which used lethal injection.
Kavorkian was a man who strongly believed in what he was doing was right,
and had the balls to go to jail for life to prove it. You on the other hand
don't even have to balls to sign your name.

Of course she is the "ex-wife" because she has a little problem with the
booze. Took her over 20 years to finally break her denial and admit she had
a drinking problem. How long is it going to take you to break your denial?
Or at least be a man and sign your name, and call sign if you really have
one. Oh, maybe your not a man, humm......

Gun Ban Results In Tragic Deaths National News Service

BOSTON - National guard units seeking to confiscate a cache of recently banned assault rifles were ambushed on April 19th by elements of a paramilitary extremist faction. Military and law enforcement officials estimate that 72 were killed and more than 200 injured before government forces were compelled to withdraw. Speaking after the clash, Massachusetts Governor Thomas Gage declared that the extremist faction, which was made up of local citizens, has links to the radical right-wing tax protest movement.

Gage blamed the extremists for recent incidents of vandalism directed against internal revenue offices. The governor, who described the group's organizers as "criminals," issued an executive order authorizing the summary arrest of any individual who has interfered with the government's efforts to secure law and order.

The military raid on the extremist arsenal followed widespread refusal by the local citizenry to turn over recently outlawed assault weapons. Gage issued a ban on military-style assault weapons and ammunition earlier in the week. This decision followed a meeting earlier this month between government and military leaders at which the governor authorized the forcible confiscation of illegal arms. One government official, speaking on condition of anonymity, pointed out that "none of these people would have been killed had the extremists obeyed the law and turned over their weapons voluntarily."

Government troops initially succeeded in confiscating a large supply of outlawed weapons and ammunition. However, troops attempting to seize arms and ammunition in Lexington met with resistance from heavily-armed extremists who had been tipped-off regarding the government's plan.

During a tense standoff in Lexington's town park, National Guard Colonel Francis Smith, commander of the government operation, ordered the armed group to surrender and return to their homes. The impasse was broken by a single shot, which was reportedly fired by one of the right wing extremists.

Eight civilians were killed in the ensuing exchange. Ironically, the local citizenry blamed government forces rather than the extremists for the civilian deaths. Before order could be restored, armed citizens from surrounding areas had descended upon the guard units. Colonel Smith, finding his forces overmatched by the armed mob, ordered a retreat.

Governor Gage has called upon citizens to support the state/national joint task force in its effort to restore law and order. The governor has also demanded the surrender of those responsible for planning and leading the attack against the government forces. Samuel Adams, Paul Revere, and John

Hancock, who have been identified as "ringleaders" Of the extremist faction,
remain at large.

* * *

Oh, I forgot to mention the year - That was April 20, 1775.

Here is a better one I found after a quick search:

THE MAN
WITH THE FOOTBALL
MOVES-OUT

DEFENSE..

The man with the football moves-out.
Defensive tackle, keeping count,
See's the helmet and the legs,
of the man, too quick,
Too sure, no doubt !

The man with the football move-out.
Be sure it's him,
Got to stop first-in-ten,
Grab the quickest, quietest shirt,
It's him !

OFFENSE..
The man with the football moves-out.
Close it down, That's what we're all about.
Block 'em, Cut 'em down, It's a rout !
Power Eye, Slot Left, Red thirty-four, Not a doubt.

Suck turf, Suckers !
Defense ain't sure, who had it last,
Pigskin's missing, maybe it's been passed,
No they don't see it, nor do I,
Only the carrier with the soot on his eyes,
And, maybe, the fans by the sides.

Superscore, Nice try, first-in-ten, by-and-by.
Rub your hands, Spit on the ground,
No-one gonna know,
How you did it, again.
Beware the evil-eye,
Smart fella, Slow moves,
Touchdown !,

That does it,
The team's, Still Alive !

As advisers ? No.

IIRC: That was covered in Danforth's report which is available for download at the URL above. Of course he being a _REPUBLICAN_ , a heir to a large fortune, an Episcopalian Priest and liked by *both* Rep's and Dem's for his fairness probably just means he's in on the Big Conspiracy too.

Did you see anything wrong with calling out the Nat'l Guard to restore peace and order in IIRC 1967 when black people were rioting and burning down portions of Detroit ?

Educate us. Where in our Constitution is it prohibited? In the fall of 1958, a federalized Arkansas NG and the 101st Airborne escorted a number of black children into Little Rock Central High School. The Prez at the time was named Eisenhower.

I think you have in mind the Posse Comitatus Act which, among other things, keeps the local sheriff from using the cavalry to chase outlaws.

The Bible and the US Constitution: the two most-cited and least-read documents in history.

> that impressive.

Ummmm -- I'm partially impressed -- you got some of it right; I did write
the '>MASSIVE SNIPPAGE' portion. W5NET wrote the rest of what you
attributed to me. Really. Here's his post:
****

Dan/W4NTI wrote:
>
> May be "out of date", but I notice "The
> old man" didn't answer, or more in
> likely couldn't answer. Here is
> my reply. <snip>

Dan, anyone with a -... --- --- -.- on Morse Code could have easily
read David's message. You know, we do live in an age where books on
just about any subject are widely available. Of course, if the message
had been sent by radio, I could have used simple translation software to
read it (and respond). In other words, don't pat yourself on the back
too hard for being able to read a morse code message - its really not
that impressive.

Dwight Stewart (W5NET)

http://www.qsl.net/w5net
****

Now, here's my reply:

Hi Aaron,

I have mused over the difference. Why OK then, bad now? Are the ergonomics different? The former mobile radios were usually push to talk, simplex or half duplex. Cellphones are full duplex. Cellphones are more and more in the hands of "casual users", not just reserved to "professional" types. The most popular seems to be the full handset ("..talkie") vs. the console/speaker/mike chord combination, requiring one hand to the side of the head when conversing, and "no hands on the wheel, one eye on the road" when dialing.

What is worse with me, is that I need my reading glasses to see the small numbers on the display and dialer. I often pull off to the side when using the phone, because I don't like the uneasy, gnawing feeling of not being in the same level of control of my detroit steel when on the phone.

3321. Silent key -- Bill Culver Jax Beach, Florida NEED CALLSIGN

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-22 00:00:00 UTC
From: milguy@tds.net
Message-ID: <Uy8e5.2239$sQ.1134646@ratbert.tds.net>
Source record: 106774

Bill was a nextel authorized service manager in Jacksonville, Florida and passed away last week, way too young at 47.

Bill was licensed some time ago, but apparently his callsign lapsed.

Any help locating his call would be appreciated.

Full name: William Culver, city would have been Jacksonville or Jacksonville Beach, Florida. Could also have been licensed as "Bill" vice William...

thanks for reading, all replies appreciated.

So. Ve comes to da veal troos at last. Your words: "... one of the main reasons I detest Koresh is because ... I suffered ..." It turns out your problem with Koresh is not based on any rational principle -- it originates in the identification of David Koresh (whom you have never met) with a person from your bent and tortured childhood.

> It's *REAL* easy to sit in a nice comfy chair and portray
> religious fanaticism in some great light like you're doing. It's not

> easy chair while linking to hate sites ?

You must redefine "hate" in unusual ways to make it line up with anything I endorse. But your own words reveal the nature of your passion on the subject of Davidians: "... one of the main reasons I detest Koresh." People who have done you no wrong, about whom you know almost nothing, yet you "hate" them. If you face this statement bravely and are honest with yourself, this should set off loud alarms.

Here is an example of the passion:

> [...]
> Comparing the Murder Warehouse at Waco with "Small Christian churches"
> is about like comparing Charles Manson with the average Boy Scout, but
> nice try anyway.

You see? Classic denial of your own encysted emotions, accompanied by projection of those emotions on others.

From the very beginning, this has not been a discussion of anything real or rational, for you. It has been a journey into the pit of your own psyche. Waco has been, for you, a fantasy revenge on characters from your own childhood. Any evidence that the Waco incident was different from your fantasy is instantly dismissed by you because it threatens that identification.

[...]
> I've been "All better" since I escaped the religious fanaticism I
> grew up in about 30 years ago. It certainly is entertaining to
> remember "Old times" and have you inform me about how "wonderful"
> they were which is in direct contrast to my memories, but keep
> trying anyway.

Son, I do not believe you are "all better" yet. What you have here is a serious emotional condition that may drive you to criminal behavior, and will certainly make you miserable and distort your view of the world for the rest of your life ... or until you face up to this trauma and obsession.

For you, and for those who look on: Note (in last quoted paragraph) that Chip is so badly confused on this subject, my remarks about the Davidians were understood by Chip to be statements about, and denial of, his own childhood memories. This condition borders on psychosis and can never be resolved by rational discussion of history or politics.

In the twisted house-of-mirrors view of life from deep in the Id, Chip is correct: his Truth (childhood obsession) cannot be encompassed by mere logic.

Try not to read my sig, Chip. You will feel better that way.

<Yawn>
You don't read very well do you ? As I've posted in prior messages that two of my closest friends with whom I would trust everything I *own* with are *devout* Christians, one in particular is a Deacon in his church and a member of a Christian vocal quartet. Nice try though.

I've got a *MUCH* better idea of what that all was about having had real world experience rather than blathering about something I'm totally *ignorant* of like you do. Feel free to sit in your nice comfy chair and blather on though,

it's quite entertaining.

yet you "hate" them. If you face this statement
>bravely and are honest with yourself, this should set off loud alarms.

I detest Koresh because I've had *experience* with religious *fanatics* ,
something you, listening to your goose-stepping music in your easy chair lack,
pal.

>

<Yawn>

I'm not the one arming myself and preparing for the coming 'Apocalypse' as was
Koresh. Neither have I used *religion* as a scam to have sex with underage
females like your *hero.* Oh BTW, I haven't begun writing the Seven Seals as of
yet either , maybe you have ? Or maybe you feel you're Koresh/Christ
reincarnated ?

Big deal. One who believes in all the conspiracy BS that you do isn't very well
grounded mentally anyway.

What you have here is
>a serious emotional condition that may drive you to criminal behavior,

Well I'm 50 and yes I've gotten a couple of speeding tickets. Perhaps to be *normal* like you I should buy some 'Cammies' and start running through the woods on practice drills for the coming 'Invasion' ? Perhaps I should buy up lots of weapons and begin stockpiling ammo as well ?

>and will certainly make you miserable and distort your view of the
>world for the rest of your life ... or until you face up to this
>trauma and obsession.

It gives me an *inside* view as to what all that nonsense is about. Unlike you pal, I've been there. Lean back in your nice comfy easy chair and type out some more BS about how misunderstood Koresh was etc. Perhaps you can speak in "Tongues" and be the reincarnation of Koresh himself ?

>
>For you, and for those who look on: Note (in last quoted paragraph)

Well pal most every religous group I've seen certainly didn't like what happened at Waco but I sure don't see much of any grassroots support for them. Most everyone possessing even just a tiny bit of reasoning generally puts them in the same class as Jonestown Guyana etc.

>Try not to read my sig, Chip. You will feel better that way.

You didn't have one this time pal. Maybe one of the Secret ATF "Assassins" stole it ?

Is it time for a Truce? Time to stop all the accusations? Time for the bickering to end?
The idea has merit for sure!
Who will step forward to make peace and call a halt to this idiocy?
It takes only one peace-maker to take the first step and hopefully others will do the same.

3330. ***Kenwood TS-520SE vs. Modern Tranceivers: Question

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-22 00:00:00 UTC
From: xtx99@aol.com
Message-ID: <20000722030914.01189.00000525@ng-cl1.aol.com>
Source record: 106783

About 10 years ago I purchased a Kenwood TS-520SE hoping to eventually get my license, which I'm just working on now (got my element 2 certification this week and am now learning code). I also just ordered a manual for the old Kenwood and parts for a couple missing switches (many thanks to your replys to my earlier postings). I'm wondering what advantages there are to going out and purchasing a new transceiver versus keeping and using my old Kenwood. Do current models offer anything that my old Kenwood doesn't have? (beyond nominal differences) (performance, additional bands, filters, modes, etc.) Any thoughts are appreciated.

3331. And on another note.. 2 meters

Having been a HAM sice 1968, I hate to admit that I have NEVER worked 2 meters. I won a Radio Shack HTX 245 2meter / 70 cm HT. Sharp looking little HT. Looks like it could be a lot of fun. Anyone point me to a good publication or primer on 2 meter operations?

Thanks
Mike

North Carolina militant leader convicted of fraud
The Associated Press

ASHEVILLE, N.C. July 21, 2000 - A leader of the so-called patriot movement in North Carolina has been convicted of fraud and trying to pay off debts and back taxes with fake checks obtained from the Montana Freemen.

Jurors took less than three hours Thursday to convict Peter Stern, 57, on seven federal charges, including conspiracy, obstructing the Internal Revenue Service and threatening to kidnap two federal judges.

Stern could face more than 60 years in prison at sentencing.

Stern said he thought documents he obtained from the Montana Freemen were legitimate financial instruments. He said he never intended to defraud anyone by passing fake checks.

Nine Freemen were convicted in 1998 of conspiring against the nation's banking system. Two dozen Freemen members held FBI agents at bay at their compound for 81 days in 1996 before surrendering.

Stern attended a seminar with the Freemen in 1995.

"He came back (from Montana) with a whole idea of how to stick it to the government," Assistant U.S. Attorney David Brown told jurors.

Stern owed $90,000 in taxes and penalties before he began flooding the agency with documents and questions, Brown said. IRS agents said Stern has not paid federal income taxes since 1981.

Even when bank officials and others told Stern the documents were fake, he kept using them. "He did not want to know they were bogus," Brown said.

Stern testified that he spent hours researching federal codes, regulations and case law involving federal income taxes. He said tax forms are invalid and described why he has refused to pay.

Defense attorney Gerald Aurillo described Stern as a "a plain old guy looking for answers" against "a big government that won't give him answers." Aurillo accused prosecutors of trying to make Stern look like "a radical, crazy, right-wing nut."

Before his arrest, Stern attracted notoriety in North Carolina by taking on the title of chief justice of Macon County group, in deference to the State Supreme Court.

I'm glad that I got a chuckle from so many people with my 2m CB post...

Actually, it was only slightly tongue in cheek coming from me, since I work 11m pretty regularly here in the Northeast. There's a bunch of us that get on channel 40 every Saturday and Sunday morning here in central Massachusetts, and I've got the CB on channel 19 whenever I travel on the highway. The high number of 2m repeaters in this area makes for a wide assortment of choices if I want to just ragchew at just about any time of day or night (there's always someone around on SOME repeater, yakking away).

Form and decorum on 11m is really evidencing very little difference from other bands these days, as far as I have seen over the last few years. When there's crowding, there's pushing and shoving... when there's plenty of space, people behave politely. Where you get stupid behavior on the air is when people who are used to having plenty of space get stuck in a crowded condition and it's a new experience for them. It really doesn't matter what band this might happen on. When someone has got a pushy and rude operator they have to contend with on the air, or even here on the internet forums, it's how you respond to it that makes the difference. Once somebody gets enflamed, there's your "CB" phenomenon.

Personally, I think it's all a simple matter of how crowded any particular area of communication gets, and has nothing to do with whether the participants had to pass a test to either start keying up on the air, or posting to a forum. It's the 'crowded room' where things can start heating up.

3337. Reciprocal agreement void since US adoption of CEPT agreement?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-23 00:00:00 UTC
From: Rene Altena <pd1ald@planet.nl>
Message-ID: <8lesnl$7pgtq$1@reader4.wxs.nl>
Source record: 106590

I have a simple question.

Before the US joined CEPT, the reciprocal agreement between the US and i.e. the Netherlands could have meant that I - as a Dutch Novice-class amateur (no CEPT-class!)- would have been allowed to operate in the US.

Is this a correct interpretation of the newly adopted FCC-rule that 'if you have a license and if you are citizen of a country with which the US has a reciprocal agreement, you can operate in the US'?

My next questions:

1. Did the reciprocal agreement only apply to the same license classes that are covered by the current CEPT-agreement?
2. Does the CEPT-agreement make the original reciprocal agreement void?

If question 1: no, and question 2: no, that would make it legal for me to operate in the US?

Just some questions...

Greetings from the Netherlands,

Rene

A DPL Micor will probably do what you want; the standard Micor
VHF Mobiles are PM (using the Serrasoid modulator at that),
but the repeaters and DPL Micors have a different channel element
(with an additional pin for direct-FM). You can retrofit a
4-pin channel element to a PM Micor but you have to make sure to
apply the modulation to the pin (at least one person reported
success with this but said it wasn't worth the trouble).

Liberals are like a bad case of the runs. Thier alright until you have to get going. Then all hell breaks loose. It seems to me that those that would have this country continue on the course that it is heading now, every hard working American would be paying far more taxesto pay for the half-assed programs that don't work. Liberals think that if you through enough money at something then "tings are bound to get better". Wrong, if people started taking responsibility rfor thier own actions and stop blaiming society at large then things would get better.

If someone robs a store, put them in jail. Don't make excuses about thier " Poor childhood and having a mother that was a hooker and a father that was a drunk". Little Jonny can't read because he and his parents don't give a damn. That is why little Joihnny can't read. Take responsibility for your own actions and stop blaiming the rest of the country.

This country needs a good kick in the ass to get it back on track and thank God that Georges' son is running for President. Maybe a good dose of reality is called for now.

Rob,

Basically any low impedance (i.e. 500 to 1K ohm) microphone of
reasonable quality will work. You may have to re-wire the plug.

The best way to compare a microphone is to plug it in and see how they
like it.

3345. Re: Question about power supply grounding

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-23 00:00:00 UTC
From: Denzil Roden <denzil@rodend.freeserve.co.uk>
Message-ID: <8lffh7okt1@news7.svr.pol.co.uk>
Source record: 106598

Hello Michael,
Its generally not necessary to have an RF ground on a power supply. I would recommend a safety earth to protect against electric shock if the unit becomes live due to some fault or other.
A dipole antenna can work OK without an RF ground, but it is a good idea to have an RF ground on the rig. If using an antenna tuner - then the ground should be on the tuner chassis rather than on the rig.
You don't say how high of the ground your apartment is; If its ground level then an earth rod is feasible, but if your shack is first floor or higher, the connection to your ground rod might be several quarter-wavelengths long, meaning that the shack end of the ground connection may be anything other than ground impedance.
In which case, if you cannot get a good ground, either do without the ground, Or, use a counterpoise or use an earth tuner to simulate a good ground. If you do not get RF burns from the shack equipment, you have no real problem.
A mains lead filter is always a good idea (wind the line-cord a few turns through a large torroid) as it reduces mains borne noises and reduces RF leaking into the building power wiring.
Good luck, Denzil G3KXF.

Read it and weep. Prophet Stair has been stating this would happen for the last 5 YEARS.

Pope Urges International Status for Jerusalem
By Ellen Knickmeyer
Associated Press Writer

VATICAN CITY (AP) - Pope John Paul II on Sunday urged creation of a special international status for the holy sites of Jerusalem, saying in an appeal aimed at Camp David's negotiators that only world oversight can safeguard all the ancient city's religions.
John Paul, saying he was praying for peace to come out of the U.S.-sponsored talks between Israeli and Palestinian leaders, urged the power brokers "not to overlook the importance of the spiritual dimension of the city of Jerusalem."

"The Holy See continues to maintain that only a special statute, internationally guaranteed, can effectively preserve the most sacred areas of the Holy City," John Paul said, speaking from the window of his summer villa outside Rome.

John Paul, leader of the world's one billion Catholics, seized the potentially decisive opportunity of the Camp David talks to press the long-held Vatican position that Jerusalem's holy sites should be internationally governed.

Less than a half square mile of the walled city holds some of the holiest sites of Islam, Judaism and Christianity: the Western Wall, remnant of ancient Israel's Second Temple; Islam's Dome of the Rock, from which Mohammed sprang into heaven on a winged horse; and the Church of the Holy Sepulcher, where Christ was crucified, entombed and resurrected.

International oversight would "assure freedom of religion and of worship for all the faithful who, in the region and the entire world, look to Jerusalem as a crossroads of peace and of coexistence," the pontiff said, lingering at his window in his weekly Sunday address to pilgrims to make his case.

Israel's Foreign Ministry immediately dismissed the appeal. "It's not on the table," said Aviv Shiron, spokesman for Foreign Minister David Levy.

"The reality has shown that since Israel has controlled the holy sites, freedom of access and worship has never been greater," Shiron said in Israel.

A Palestinian spokesman welcomed the pope's words, interpreting them as siding with the Palestinians in the challenge to Israel's insistence on sole

stewardship.

"This is a sign from the pope, who is the highest Christian authority in this world, that he is denying the claim of Israeli sovereignty over Jerusalem," insisted Hassan Abdel Rahman, PLO envoy to Washington and a frequent spokesman for the Palestinians during the Camp David talks.

Israel and the Palestinians both claim Jerusalem as their capital.

Israel and the Vatican have been at odds over the city since 1967, when Israel captured and subsequently annexed east Jerusalem - which includes the Old City and its holy sites - in the Mideast war. The Vatican called the annexation an illegal occupation.

In February, the Vatican signed a strongly worded accord with the Palestinians covering the status of churches and the freedom of worship in the Palestinian territories.

The preamble declared that an "equitable solution" for Jerusalem, based on international resolutions, was "fundamental for a just and lasting peace." It called for international safeguards of freedom of religion.

The Vatican has been vague - publicly, at least - about just how extensive an international role it envisions and just how it would be administered.

The Vatican clearly is referring to sites of primary historic and religious significance, all of which are in east Jerusalem.

The pope gave no new details Sunday.

He said he was following the Camp David negotiations in his prayers. "I hope that they are always driven by a sincere desire for respect and for justice for all and for reaching a just and lasting peace."

The 80-year-old pontiff fulfilled a goal of his papacy in March when he visited Jerusalem, going to the Western Wall and placing between its stones a plea for forgiveness for Christian persecution.

Under John Paul, the Vatican has not hesitated to protest when it feels access to holy sites at risk - as in security crackdowns of the 1990s, when at times the Vatican complained pilgrims were being denied full access.

Israel routinely seals off the West Bank and Gaza strip during Jewish holidays. Security closures have sometimes stretched out for months, blocking Palestinians from prayer at the Old City's holy sites.

The rival claims to the Old City were so intense that the 1947 U.N. partition plan that gave rise to modern Israel dodged deciding them, setting out instead to make Jerusalem an international district.

But Arab armies attacked, making the partition plan moot. Jews had no access to the Arab-held Western Wall from then until Israel captured east Jerusalem from Jordan two decades later.

This idea has been around for about 14 Years. The UN was the first
to promote it, as a possible way to lift the UN condemnation of Israel's
annexing of the West Bank in the 1967 war. It seems that this area
of the Earth is in a perpetual state of religious and sectarian flux, often
violent. It is an idea who's time has come. No thanks to Brother Stair
as this is the ONLY logical way to resolve the question of Jerusalem.
I agree. Make it an International Zone like Antartica, nobody has political
claim to it, and security for the region is carroed out by a 3rd party
International Police Force, with the Vatican acting as a netural mediator.

NO GREAT REVALATION here Lloyd. It's the only course that even the
most politically ignorant can comprehend. Of course you will have people
like yourself, Lloyd, who will psychlogically "wet their panties" over the
release of such a statement by the Vatican. You do so now Lloyd, only
because you have been carefully led-by-the-snoot (programmed) for years
by folks like Stair, Swaggart, Tilton, Hargis, Angely, Robinson, and
a whole bevy of other media-preachers to react in such a manner now.

I do not fault you for this. Do as your mind desires, or has been programmed
to do. The only advice I can give 2-U is be wary when the UHF-TV preachers
start singing the "Send Me Your Money" song. Think before you open your
wallet. You might just thank me for this advice someday....

SB DX @ WW < KB8NW $OPDX.471
Ohio/Penn DX Bulletin No. 471

The Ohio/Penn DX PacketCluster
DX Bulletin No. 471
BID: $OPDX.471
July 24, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1HT, K1XN, NK1K, N2OO, K2EWB, WB2YQH/WB2RAJ & THE 59(9) DX REPORT, K4VUD, N4XP, KF4OBL, N6RT, AD7U, K8AV, K8YSE, W9VNE, DJ5AV & DX News Letter, DL6YFB, DU1/K7JOE, FK8GM, GM4SUC, GM0CLN, IK2DUW, IK7AFM, IK7JWX, JA7SSB, MM0BCR, OK1FLM, PS7AB, RA3SL, RZ1OA, S50U, SP6ECA, SP9GKM, VE7IPU, VK3EW, VK4FW and YO3JW for the following DX information.

EDITOR NOTES (by KB8NW): Individuals continue to send impressive reponses to my request of "DX IS (???)..... Is what?" (refer to OPDX.449) and I want thank the many who have. Keep your inputs coming. This will be the last week that I will ask for them.
There will "NOT" be an OPDX bulletins for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief-proof reader) and I will be going to Las Vagas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my Dad. I can really use the break!
Lastly, I want to send out a special thanks to John/K8YSE, Pete/N8TR, Bill/W8JGU, Clark/N8PZD, Carl/K8AV, Dave/WD8IOU and Ray/W8BIN for their help in getting my station back on the air, respectively, with a new Crushcraft X7 antenna. Without the technically knowledge of John/Pete/Bill, I did not think the antenna was going to make to the top of my tower (fighting the tree limbs, guide wires and the new mast pipe). It is great to know a super team like them..... TNX de Tedd KB8NW

4X85, ISRAEL (Special Event). Look for special event station 4X85FUK to be on the air celebrating the "85th Esperanto Congress" in Tel Aviv between now and August 1st. Suggested frequencies are: 7066, 14266, 21266 and 28766 kHz.

A5, BHUTAN. Charly, K4VUD, is looking for all/any radio amateurs from any country who may wish to join him in an effort to activate Bhutan during the first week in December. He can arrange your air travel from your home or from Kathmandu, or you can arrange your own travel. He expects to arrive in A5 about December 1st. He has a Bhutan contact person to

arrange passage of rigs, licenses, and hotel rooms. This is not a cheap trip. The license alone may cost 300 USD EACH! If interested, contact Charly at: k4vud@hotmail.com

A9, BAHRAIN. The "DX News Letter" reports that Gus, KH2/K4SXT, has shut down his activities from Nimitz Hill, Guam, and will be active from A9 in September. Gus prefers the lowbands, especially 160 meters.

AP2JZB CW-PIRATE. Apparently a station signing AP2JZB on CW (on July 21st at 0230Z) has been active. AP2JZB's QSL Manager Leon, K2EWB, reports that this is a SLIM and AP2JZB does not now, nor has he ever operated CW! As a matter of fact he's up in Northern Pakistan on vacation at this time.

C6, BAHAMAS. Joe Pater, W8GEX, reports the team is ready to be active from Berry Island (IOTA NA-054) for the IOTA contest next weekend. The team will be active July 27th through August 2nd as C6AJR and C6DX during the contest. They will have four stations on the air. The team consists of Mike, K9AJ, a veteran of many DXpenditions including Heard Island. Mike, N9NS, was part of the recent Clipperton Island team. Jim, W9VNE, a FOC member, has worked many CW contests from VP5. Rick, K8WWA, is a very active dxer from the Cincinnati area and making his first DXpedition. Joe, W8GEX, has been on many DXpeditions and contest groups. This experienced team will be on 6m to 40m, CW, SSB, PKS and RITTY. QSL C6AJR and C6DX to W8GEX. SASE PLEASE.

DU, PHILIPPINES. Joe, DU1/K7JOE (ex-BV/N0IAT, 7J1AOF, etc), is now active for the next two years from Manila, Philippines. Joe is a high speed CW operator who tends to favor the WARC bands. 17 meters is his preference. QSL to the W7 QSL bureau.

FO0, FRENCH POLYNESIA. Phil, KH7FQ, is now active from Huahine Island (OC-067) as FO0MCC. He was heard last week on 17 meters SSB on or around 18145 kHz between 0230 and 0330z. Reports state that he will be there until September and be active on 80-10 meters.

FS, SAINT MARTIN. By the time you read this, Brian, N3OC, will be active from here as FS/N3OC between July 24th and Aug 2nd. Activity will be on SSB/CW/RTTY and all bands including 6 meters, the WARC bands and the IOTA Contest. QSL via N3OC.

GM, SCOTLAND (Hebrides IOSA/IOTA Expedition). Andre, GM3VLB, will team up with Lorraine/MMOBCR, Alex/G(M)0DHZ and Andre's son Niall (recently VP8NJS) to activate a few Scottish island between July 21st and August 4th. The team will be based on Harris/Lewis. Weather permitting, they will activate Killegray (OH-20) and Ensay (OH-21) Islands during the period of July 21st (PM) through July 26th (AM). Their next target will be St. Kilda (OL-02/EU-059) bewteen July 28-31st (WX permitting). During the IOTA Contest they will use the callsign GM5K (Courtesy Pabay Radio Club, GM0PNS). Alex/G(M)0DHZ will be their "No. 1" CW operator with GM0VLB providing relief. At other times individual callsgns will be used. Following the St. Kilda operation further "surprise" operations may take place. The St. Kilda DXpedition will involve high costs due to its very remote/distant location out in the Atlantic. Currently, the team

reports that so far no sponsorship has been offered/received as of this writing. QSL cards for contacts other than St. Kilda (via GM3VLB) should go to the respective operators. QSL cards without adequate return postage will not be replied to. For those unfamiliar with GM3VLB's QSL - reply system, please refer to his web site at: http://www.IOSA.co.uk

IOTA NEWS.....
AS-NEW. A group of Sakhalin amateurs (RA0F...) will activate a new IOTA at the end of July from the Island of Moneron. Their activity will be on 20/15/10 meters and the WARC bands only. They are expecting to use the callsign RK0FWL/p. QSL via the RK0FWL CBA address, but in any event all QSOs will be confirmed through the bureau. ADDED NOTE: Eugene, RA0FF, reports that in the July/August of 1998, RK0FWL/p has already been worked from the Island of Moneron, but back then the island was not yet separate from Sakhalin (AS-018). Now that Moneron Island is a NEW IOTA, all relationships with RK0FWL/p for 1998 will be considered as NEW IOTA.

AS-066. Look for Alex, RU0LL, to be active from Putyatini Island between July 24th and August 1st. They will also be active during the upcoming IOTA Contest using the special callsign R0L. Activity will be on HF (including the WARC), CW, RTTY and PSK. Other operators present will be RW0LZ, RW0LV, UA0CAL, RU0LL, RZ4HF and UA0LST. Check out Alex's WEB site for this event at: http://www.qsl.net/r0l

AS-104. Six Taiwanese Ops and two Japanese Ops will team-up and be active from Kim Men Island, Taiwan, from July 28-30th. They will use the callsign BO0K in the IOTA Contest and use BO2/homecall before and after the contest. The JA Op are JR7TEQ and JA1EFO, and they will fly to Kim Men Island via Taipei, Taiwan on the morning of the 28th.

EU-073. Look for the Taranto A.R.I. Section members to sign IJ7IJU from San Pietro Island (IJ7) during the last week of July. They will be operating on 80-6 meters, CW/SSB/RTTY and VHF/ UHF-SSB. Also, they will operate in the IOTA Contest. QSL via IK7AFM, direct CBA or via the bureau or via E-mail: < roccoafm@libero.it > confirming via ARI bureau.

EU-091. Operators IK7JWX/P, IK7FPX/P and IK6CAC/P are expected to be active now from Capezzone Island (I.I.A. LE 004) on CW/SSB 10/15/20/40 meters. QSL via the bureau or direct (QRZ.COM addresses).

EU-092. Operators (probable) Jim/MM0BQI, David/GM4WLL and Colin/GM0CLN are planning an expedition to the Summer Isles from September 1-3rd. The site will be on the island of Tanera Mor for which the various references are: IOTA - EU092, IOSA - SC10, WAB - NB90 and Maidenhead - IO78HA. They hoped to operate on both HF and VHF (hopefully all bands from 160m to 2m). They plan

to be active during both the HF SSB Field Day and 144MHz Trophy contests. Callsigns to be use are: MM0BQI/P on or near usual IOTA/IOSA frequencies; All HF CW and SSB on the WARC bands by GM0CLN/P; and SSB Field Day Contest MM0BQI/P. The special VHF callsign, GB4XS, has been applied for. If for any reason this callsign is not available they will use GM4WLL/P. OPDX InterNet Subscribers will receive the long press release as an additional bulletin.

EU-115. EI1DD will be activated by the members of the Dalkey Island Contest Group during the IOTA Contest. Operators will include EI2CA, EI4FBB, EI5DI,EI5HD,EI6EW, EI7CC, EI7CD and EI8CE, and will be active from Enniskerry, Co. Wicklow. QSL is via the EI Bureau.

EU-128. DF8QJ and Ray/DL6YFB will stay on Fehmarn Island for the IOTA Contest from July 29-30th. They will be active on 80-10 meters as DL6YFB/p. QSL via the German Amateur Radio Bureau or direct to DL6YFB's callbook address or E-mail at: rlehmann@Cityweb.de

EU-132. Adam/DJ0IF, Zbig/SP6AZT, Big/SP6CZ and Andy/SP6ECA will be active from Wolin Island in the RSGB IOTA Contest as a Multi-Multi entry, callsign SN6F/1. Before the contest, SP6CZ/1 will be active from this location on RTTY until the end of the month and SP6ECA/1 on SSB. QSL via home callsigns, SN6F/1 via SP6ECA. All cards for SN6F/1's contest activity '98 and '99 were sent via the bureau.

EU-148. A group from the Framingham Amateur Radio Association will participate in the IOTA Contest from George's Island as a Multi-Operator entry signing AA1IZ. QSL via AA1IZ.

EU-153. Vlad/RZ1OA and Dima/UA1OLM will be active as RZ1OA/A and UA1OLM/A from Lyasomin Island between July 25th and August 1st. QSL via RZ1OA: Vlad Sadakov, P.O. Box 48, Arkhangelsk, 163040, Russia.

EU-170. Milan/OK1DJG, Martin/OK1FLM, Martin/OK1FUA, OK1PAT, Jaroslav/ OK1TC, Petr/OK1UCI, Svetozar/OK1VEY and Nikola/9A9AA will be active as 9A0A from Vir Island (IOCA CI-141) through the IOTA Contest. QSL via OK1FLM. They will operate as 9A/homecall before the contest from July 24th.

EU-183. Pit, YO3JW, reports that the YP1W operation for next weekend has been cancelled! This is due to a quarantine in Danube Delta. The operation will be scheduled latter.

NA-065. Caleb, AD7U, will be active in the RSGB IOTA Contest as N7U from Whidbey Island (USI WA-001S). His category will be Single Op/24-hour/IOTA Island Permanent station. QSL to AD7U via bureau or direct to: Caleb Skurdal, 1015 N Custer St, Oak Harbor, WA 98277-8201 USA.

OC-033. FK8GM, FK8HC and VK4FW (all Life members of Oceanai Amateur Radio DX Group) will be operational from Lifou Island. Their callsign will be TX8ISL. QSL Manager is VK4FW, P.O. Box 929, GYMPIE, 4570, Australia. They will be on all bands on CW/SSB. Eric, FK8GM, reports that they will also be active with their home call, FK8GM and FK8HC from OC-033 on all bands when they are not operating in the contest.

SA-020. FY5FU and FY/F5AEG will be active from the Phare de l'ile Royale in French Guyana during the International Lighthouse/Lightship Weekend August 19-20th. QSL manager F5AEG.

SA-024. Look for ZV2S and PW2S to be active from Comprida Island (DIB 21) July 25-30th. QSL Manager PY2ZY: POB 45.436, Sao Paulo-SP, 00479-970, Brasil. Suggested frequencies:
CW - 28040, 24920, 21040, 18098, 14040, 101114, 7030 and 3530
SSB - 28560, 28460, 24950, 21260, 18128, 14260, 7-055 and 3765
Checkout the Web site: http://dxpedition.cjb.net

ISLAND CHASERS WEB PAGE. Chris, NK1K, informs OPDX that the "Islands on the Web" website has opened a new web discussion forum specifically for the RSGB's IOTA contest. This forum will be used to make announcements regarding islands that will be active during the contest. Additionally, the forum will give the IOTA community a place to post claimed scores for all to see following contest. The Web page is at: http://www.islandchaser.com

KH5, PALMYRA. Mike, KH6ND, has returned here and is again operating as KH6ND/KH5. His operating schedule is not yet known as Mike is again assisting "The Nature Conservency" in its operation on the atoll. His length of stay has yet to be determined. He is expected to be active everyday on several bands. Activity so far has been on 20/15 meters CW generally between 1100 and 1230z (there was some activity around 0830z). QSL K4TSJ CBA. Tom, N4XP, also reports that it should be noted that some pirate activity did take place after Mike's departure from the atoll last month.

QSL INFO AND NEWS.....
As reported last week, the "GOLIST" now has a new Web domain at: http://www.golist.net
John, K1XN, reports this past week that coming soon will be a Windows Golist search program for accessing the "Golist Online QSL Manager Look Up Page". This Online database is updated daily with new/changed QSL routes.

QSL Manager change for DX station RZ9OU. QSL to KF4OBL via the Bureau or direct to: Susan Driggers, 129 New Grade Road, Moncks Corner, South Carolina, 29461, USA (http://home.sc.rr.com/simplyinfo/kf4obl/)
Please Notes: Please send SASE, SAE and 1 IRC, or 2 IRC's. Cards via the Bureau are OK. 100% Return QSL. Stamps of any country are accepted as donations.

Vlad, RZ1OA, reports that he has received the RZ1OA/P and UA1OLM/P QSL cards, for their EU-066 operation from the printer and has started

processing the direct requests.

QSL the S50E club station to: Radio club Cerkno, P.O. BOX 16,
5282 Cerkno, Slovenia. To see lots of photos of the S50E clubs site
that were taken during/after WRTC2000 in Bled, Slovenia (along with
photos of all locations used by the other competitors) check out the
S50E Web page for more information and details on how to receive two
special WRTC2000 stamps at: http://lea.hamradio.si/~s50e/eng/photos.htm

SPECIAL EVENT. Look for the special event station SN600UJ to be active
from July 20th through October 20th. The station will be celebrating the
600th anniversary of refounding of "Jagiellonian University" in Cracow.
They are expected to operate on all bands CW, SSB and RTTY. QSL via SP9PKZ.

SPECIAL EVENT. Special event station AX3OLY has been allocated to the
WIA Victoria by the Australian Communications Authority to commemorate the
Olympic Games being held in Sydney, Australia. WIA Victoria members will
be sporadically operating the station on DX bands over the next three
weeks. The band of operation being chosen to coincide with the best pro-
pagation at the time. AX3OLY is being activated for the first time this
week to mark the arrival of the Olympic flame in VK3 which is half way
through its 100 day torch relay around Australia. The special event station
will later highlight the holding of Olympic soccer games in the VK3 capital
city of Melbourne, Australia, which also hosted the 1956 Olympic Games.
A commemorative QSL card will be available. QSL is to VK3WI via the Bureau
or the Callbook address.

VE0NWP STATION. The ship "Simon Fraser" is recreating the voyage of the
ship "St. Roch" through the North West Passage. It was heard on Saturday
at 0521z (band was not mentioned) from the Aleutians Islands. Check
out the Web page: http://www.stroch.org

XU7, CAMBODIA. Jani, YB0US, has left Vietnam (3W2US) as of July 19th and
is active as XU7AAP through July 27th. Watch for Jani on SSB and RTTY. He
was spotted on 15/20 meters RTTY (14083 kHz as early as 1100z and as late
as 1700z and 21083 kHz between 2230z and 0100z). QSL via N2OO.

ZD8, ASCENSION ISLAND. "The 59(9) DX Report" reports that Chris, G3WOS,
will sign ZD8SIX starting October 30th on 6 meters.

ZK1, SOUTH COOK. Andy, ZK1AND, is active from Rarotonga (OC-013) for the
next month. His activity has been mainly on 20 meters SSB around 14260
kHz between 0300 and 0500z, and again around 1030z. QSL via AB7FS.

Perhaps the anit-aircraft battery the hams had installed next to the new antenna site attracted the planes attention.

You can never over defend a tower, you know.

Gee, as if anyone couldn't have just outright guessed this would happen.
Bro stair is no prophet of God. He tells everyone who disagrees with him that
they are going to hell. He's just a desparate, extreme idiot who can't afford to
be on TV. We are creating a voice recognition software that will automute
bro stair when stumbling on his stations as he is an annoying Git.

Brother Lloyd,
If you make enough prediction, some of them are bound to come
true.
It's called 'shotgunning'. Anyone can do it.

While your advice could apply to repeater operation, operating simplex
presents another story. One doesn't have to operate simplex very long
before hearing a "one sided" conversation. Depending on you location to
the answering station you may never hear it. I have heard stations
breaking in on a conversation because they couldn't hear the answering
party. Most people will wait for the "nothing heard", or "no contact"
before initiating a simplex contact themselves.

I beleive I can answer the comments and the question at the same time.

1. Utilizing US (note U.S.) military personnel against the civilian
population is expresly forbidden under the constitution.

2. In MY OPINION that also includes as "advisors". Remember
our "advisor" activities in the wargame called Vietnam and Nicaragua,
and presently Columbia?

3. I really can't comment on what happened in 1967 in this country,
other than read above. (Again...note emphasis on U.S. as in FEDERAL
troops). You see I was gone from 1965 to 1968, plus a bit more later
on and missed all the happs.

Hi
I posted on the equipment news group ,but I almost never get any replys there.So I'll try here.I'm thinking about getting a ft-920,and it's a stretch for my budget.I already have a MD-1c8 mic,and would like to use it on the 920.It seems that the MD-100 is the recommended mic for this rig,but I'll have to wait a while to get one.Will the MD-1 work on the 920?Will it work good or bad?Also, does anyone know what the differences are between the MD-1b8,the MD-1c8,and the MD-100?Thanks very much for any info.

Correct you are OM. When I first stumbled upon this
blowhard whilst tuning my completely restored Zenith
TransOceanic, I thought that I came across someone
who missed his Prozac for a few days. What a laugh
this Stare is.

> We are creating a voice recognition software
> that will automute bro stair when stumbling
> on his stations as he is an annoying Git.

What I wonder is with all the stations he is
on, who is sending this twerp all the money
to pay for airtime for the same? Either airtime
on domestic private shortwave is real cheap or
there are many more screwballs out there that I
first believed. Mabey both?? AAARGH!!

Given a choice, I think that
I would rather listen to an hour of Bob Dole and
Dan Quale debating the finer points of politics
and the benefit of Viagara over hearing Bro. Stair.

Actually, the NYT just ran an article about a research study by Harvard
that says your are more likely to be involved in a car - truck accident
than an accident involving someone using a cellular phone.

How can you call someone either a false prophet or a true
prophet, when they're not a prophet at all but only an egomaniac
who wants the world to think they're one?

Yeesh, I thought I had seen it all in some of the soc.religion
newsgroups... well, to be honest, I've seen worse. There was
this one guy who declared he was the new world savior and
actually believed it.

Anyone up for alt.usenet.kooks?

That's because there are far more trucks on the highway at the moment.
But as cellphone use grows, it will quickly out distance the number of
trucks on the road (based on current growth). The idea behind these
cellphone laws is to head this whole thing off before it becomes that
level of a problem.

I'm not going to waste my time to find out. You may think this is a game but
I don't.
Almost everyone who posts on this news group are not afraid to sign their
real names, and call sign if any, to their posts without having people play
detective to find out who they are. I frequently look up people on the Web
to see what kind of background they have. Once I have an idea where they are
coming from I have a better idea why they feel the way they do.

I think I would rather listen to an hour of Billy Tauzin and the cellular
lobby discuss why scanners need to be banned than 5 minutes of Brother
Stair.

What wasn't mentioned by Jon, was that the study was funded by AT&T
Wireless. They found the risks as follows

the odds of a driver dying while talking on the phone 6.4 in 1 million
and the odds of another motorist being hit and killed by a driver talking
on a phone at 1.5 in 1 million.

In comparison...drivers have a 16.8 in 1 million chance of being killed
in a crash with a commercial or heavy duty truck and a 17.6 in 1 million
chance of being killed by a drunk driver.

Besides, I doubt there are 75 million trucks on the road at this time.
However, the study did say that's how many cell phones are on the road
out of the approx 94 million phones out there now

Good point and probably not far off the mark for many. I also do not
relish in wall to wall paperwork and bags and boxes full of the same.

However when I was DX I made a serious effort to respond. I hope
everyone that needed my cards from far off exotic lands received them.
I still have my logs from HS1BH, circa 69/70 I think. DA2LJ 71-79.
KX6AA (Marshall Islands), around 83 I think. And with the advent of
computers and QSL programs can and will QSL if needed.

The only paper chasing I do now is contest certificates.

Correct on both comments Jeff and David. And I remember how
the "spooks" used to run cw at about 20wpm into their "machine" and
make it go super fast. Reversed the process on the other end. Then
copied it down. Sorta like modern day meteor scatter stuff. To anyone
listening it was a quick blurp in the static.

Wonder how long it will be before we can go on CW at the flash speed of
20 wpm and it will be like sending and receiving with a enigma
machine. HI HI.

Well darn, *Which* conspiracy theory am I to believe ? This one, "Waco Suits for Waco Suckers":

http://www.mnsinc.com/SkyWriter/WacoMuseum/burial/page/b_wsws.html

States that the FBI, the ATF, the Feds, Janet Reno, the Davidian's lawyers (Including Former Attorney General Ramsey Clark), the Judge , even the *Davidians* themselves were *all* in this Civil Suit together to defraud the US Treasury. How about if you conspiracy believers come up with just *one* theory at a time (or ones that *mostly* agree with each other) and we'll take it from there ?

Hi Gang,
Has anyone had an success removing the fuel pump noise in late model Ford products? I have a 1998 Merc Mountaineer (same as Explorer) and installed a IC706MIIG. The noise on 20M runs around S7-S9 and drives the AGC down to nothing. Pulling the fuel pump fuse kills the noise (and the engine a few seconds later), so I know that is the source. I took it to Ford and had them install the "fix" that is covered in a TSB. If it made any difference at all, I can't tell. I was thinking about bypass caps on the leads as they leave the tank, but I'm not sure what values or if this is even a good idea.

Any suggestions?

Thanks,
Scott, KJ7QY

Like the man said, "I don't have a solution, but I REALLY admire the problem".

Capacitors by the gas tank? Hmmmm... I have thought about having my ashes placed into orbit, but those plans were for AFTER I died of natural causes.

Seriously, if anyone has an answer to this, please post it. The interference even messes up distant AM stations on the radio. Also, does anyone know if this does anything to VHF FM? Intuitively, I'd guess not, but I've Ass-u-med things before, and assumption is the mother of all screwups.

The cites have been listed many times in many places. But, the second part of the second amendment language should be clear to anyone with reading comprehension.....the right of THE PEOPLE to bear arms shall not.....

That clearly indicates the intent of the founding fathers....the militia is all the people. If you and friends want to confiscate all guns, then let's discuss rewriting the constitution....and let's not stop at the second amendment....I think the first amendment is WAY too liberal to entrust to a citizenry to have this kind of dangerous right.... :)

>Compare the accident rates for the two
>activities [cell phones and ham rigs] to see the difference.

Where do you find such statistics? To be fair you would have to compare them on a per capita basis. If you would post your sources for your implied conclusion it would help. But let's consider it logically...

What about the distraction of a cell phone conversation? Cell phones and ham rigs would be of about equal distraction, since a conversation is a conversation is a conversation...

What about the distraction of one handed driving? From holding a hamburger, to holding a ham rig mike, to holding a cell phone handset you are still driving with one hand. No difference here...

What about the distraction of dialing? Most HF mobile rigs are mounted low (some under the dash), requiring you to take your eyes off the road to tune, and requiring constant attention when finding (dialing up?) a contact. This would seem to be more distracting than dialing a cell phone. On the other hand, VHF/UHF mobile rigs, even though channelized, require some eyes off the road keypad or dial work just like cell phones do. This seems to be at least of about an equal distraction level.

So it's possible, that when considering both HF and VHF/UHF mobiles, ham rigs (on average), just might have a worse accident rate (per capita) than cell phones do!! But generally speaking, it would seem to indicate at least, that ham rigs would not be any better (or worse) than cell phones for creating distractions (and accidents) while driving.

Conclusion: If using cell phones while driving kills people so does using ham mobile rigs. Those of you who are so quick to want a law banning cell phones while driving, beware. It won't take authorities long to figure this mobile radio connection out...

His concerns are either addressed by your stopping or your continuing.
The contents of your web page, and your desire to get lots of hits on it,
are irrelevant.

I have a EICO,model 435, DC wideband oscilloscope, serial nuimber 4781,
stock number 89337. I need to get a hold of a schematic so I can repair
the thing. If you have a schematic or information on the oscilloscope
or know where I might find a schematic please e-mail me copies.
thanks

>> more than know how to install and resonate ANY HF antenna. NOT! ....

Your use of "any" is synonymous with "every" in this case.

My reply stands:

That's too big of an assumption. Expecting an Extra (or any other
amateur [i.e., non-professional]) to have knowledge of *every* HF
antenna ever designed is asking quite a bit.

>fact remains that, as the requirements have lessened, the tests have
>gotten easier, the less "learning" occurs.

As before, the amateur test is an entrance exam, not a final exam.

It's easy enough to add a "swing" onto one's sending such that your
software wouldn't be able to read squat, yet another CW operator could
easily copy by ear.

Why not just hook it up and try it? I run an MC60 on my 920, which gives me
better reports than the MD-100 which I also have.

What if the person you are calling did answer you but isn't making into the repeater for some reason, wrong or no tone, radio on low power, transmitter dead, whatever. I f he/she hears you say "nothing heard" (I use "no contact") then they know they aren't making it, for whatever reason.

>the report stated the FEDERAL government was not liable??? Gee!
>Imagine that!! Must be that old "inmates running the asylum" syndrome,
>rearing its ugly head once again...

That analysis sounds real *reasonable* to me.

Bill Clinton gets a BJ in the Oval Office and for *months* that's all we hear about, subpoenas to Clinton, to Monica, confiscation of her computer, her parents were issued subpoenas, they even issued a subpoena to a *bookstore* to see what *books* Monica was reading.
The semen stains on her dress were analyzed to see if they matched Clinton's DNA. The results of the whole ordeal were broadcast / printed / available for download all over the *globe.*

But yet when it comes to the *deaths* of members of an obscure doomsday cult in the middle of no where (Waco Texas), The "FEDS" are *ALL* in it together in a Monstrously Complex Plot involving hundreds/ thousands of people that would make a James Bond movie look amateurish by comparison.

I like 'em, as long as they're someone else's.

God bless the honest (ime, that's the overwhelming most) QSL folks, and scourge the dis-honest ones. Send 'em a greenstamp; they send you a QSL, depending. Were you really in the log? Was the g-stamp of sufficient denomination? Did you call 'em 97 times when they wanted any area but yours?

After sending 20K+ and receiving about 20K of them, and 20years, I stopped collecting them. The postage problems went away. After a nasty, stupid civil event, the 20K went into the trash. The cartage and storage problems went away.

In pileups since, the guys I beat hear me work UR4ME and DX0XU (try that one to and fro on CW), just as I hear the calls of all the guys who beat me. For me, that's all the proof in the world: peer review.

Yet you haven't cited one case of any ham being killed due to his operating a mobile rig. Mobile operation has been permitted since 1950; name one instance of any accident that can be attributed to such operation. 73, Jeff KH6O

You are correct Dick. In my zeal to make a point I stepped all over
the facts. However I have spent some time researching this topic and
have discovered that the Posse Comitatus Act has been basically
butchered in our time. Please read below for a real eye opener.

HOW THE POSSE COMITATUS ACT OF 1878 IS BEING VIOLATED - IN THEIR OWN
WORDS
by Connect the Dots (DotHB)

The following is from an article on the Common Sense for Drug
Policy Web Page - using very good documentation - from the government's
own
press releases.
....

Military Participation in the Drug War
Brief Chronology of Domestic Military Involvement
http://www.csdp.org/factbook/military.htm

1878 -- The Posse Comitatus Act makes it illegal for the military to act
as police on U.S. territory or waters.
1981 -- Posse Comitatus Act is amended to allow limited military
involvement in policing.

1991 -- Posse Comitatus Act is amended to allow counter-drug training of civilian police by the military.
1995 -- Joint Task Force 6, under direction of the Defense Secretary, is expanded to the entire continental United States. It has 700 troops, including 125 combat-ready troops on the U.S.-Mexican border. (Houston Chronicle, 1997, June 22)
May 1997 -- Esequiel Hernandez becomes the first U.S. citizen shot and killed by JTF-6 troops.

(And, Fall 1998, Klinton suspends Posse Comitatus in military appropriation bill for incidences of domestic terrorism - hello Janet Reno's Night Stalkers and Urban Warfare exercises).

The National Guard currently has more counter-narcotics officers than the DEA has special agents on duty. Each day it is involved in 1,300 counterdrug operations and has 4,000 troops on duty. Source: Munger, M., "The Drug Threat: Getting Priorities Straight," Parameters, (1997, Summer).

Eighty-nine percent (89%) of police departments have paramilitary units, and 46% have been trained by active duty armed forces. The most common use of paramilitary units is serving drug-related search warrants (usually no-knock entries into private homes). Twenty percent (20%) of police departments use paramilitary units to patrol urban areas. Source: Kraska, P. & Kappeler, V., "Militarizing American Police: The Rise and Normalization of Paramilitary Units," Social Problems, Vol. 44, No. 1 (1997, February).

In 1996 "Drug Czar" Retired General Barry McCaffrey said of the Drug War, "It makes us all very uncomfortable to see uniformed military units getting heavily involved." Source: McGee, J., "Military Seeks Balance in Delicate Mission: The Drug War," Washington Post, (1996, November 29).

SB QST @ ARL $ARLB031
ARLB031 Florida man arrested for interference to hams, unlicensed
operation

ZCZC AG31
QST de W1AW
ARRL Bulletin 31 ARLB031
>From ARRL Headquarters
Newington CT July 25, 2000
To all radio amateurs

SB QST ARL ARLB031
ARLB031 Florida man arrested for interference to hams, unlicensed
operation

Federal authorities have arrested a Florida man and charged him with
interfering with Amateur Radio operations and transmitting without a
license. William Flippo of Jupiter was taken into custody July 20.

Flippo already faces a $20,000 fine levied last summer for
unlicensed operation, willful and malicious interference to Amateur
Radio communications, and failure to let the FCC inspect his radio
equipment. The matter was referred to the US Attorney in January
after Flippo failed to pay the fine, and the interference complaints
continued.

Armed with a search warrant, federal marshals and FCC and FBI
agents, accompanied by local authorities, took Flippo into custody.
FCC agents seized items related to the alleged offenses, including
radio equipment.

Flippo was released on a $100,000 bond. An arraignment on the
federal charges is scheduled for July 31. One condition of his
release is that he not make any radio transmissions.

Flippo was charged with four counts of transmitting without a
license--each count carrying a maximum penalty of one year in prison
and a $10,000 fine--and four counts of interfering with the
operations of licensed stations, which carry the same penalty.

Fuck you, you shallow little bastard of a dwarfed dicked ballbag licking aboriginal clusterfucker.

Bill Cheek was a great man.

Funny... You bag on him, and I am from San Diego.. However, knowing most of the people in and around the San Diego area who where hobbiests and / or tinkerers, your name doesn't ring a fucking bell.

Seems to me you probably knew Bill by reputation, and not personally.

Fuck you for baggin on someone in their death.

TollHolio...

(sorry for the language, but this pissed me off)

When you walk up to a dead person at a funeral to show him respect in real life,
if you see someone you don't like, do you shout out loud "Fuck you, you shallow little bastard
of a dwarfed dicked ballbag licking aboriginal clusterfucker"?
This is where we are to pay respect for Bill Cheek, not a place where we take out all our hate towards
every moron who gimps by us in life.

He was surely not an Elmer that I ever met.
My Emlmer knew the code and radio theory.
Was he a Ham operator?
Did he quietly have patience?

Bill Cheek was a great guy and a great help to many
who were/are involved in hobby (CB/scanner/shortwave
listening) radio. Do some research on him and I think
you'll agree.

3449. How do you calibrate against WWV ?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-25 00:00:00 UTC
From: Brian <NoSpam@here.com>
Message-ID: <GN5f5.426$u.16834@news1.news.adelphia.net>
Source record: 106567

I was wondering how exactly do you calibrate a piece of equipment against a WWV signal from
a shortwave radio. I have a 10mhz frequency standard I would like to check against WWV.
Also I have a RF signal generator PLL controlled I would like to check. I would
appreciate any help. Thanks

Brian

3450. Distortion on Alinco DX70TH

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-25 00:00:00 UTC
From: VE3TMT <mdonoghue3@home.com>
Message-ID: <OY5f5.80985$7I1.1478871@news1.rdc2.on.home.com>
Source record: 106568

When I activate the noise blanker on my DX70TH, I notice the signals become somewhat distorted. Not to the point they are unintelligible but definitely not as clean without it. It does a great job on killing the small amount of ignition noise I hear, but I was curious if any other DX70 users experience the same problems.

73,

Max

3451. how many hams does it take to change a light bulb?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-25 00:00:00 UTC
From: robh8304@my-deja.com
Message-ID: <8liskb$mf9$1@nnrp1.deja.com>
Source record: 106569

"The Eternal Question"
Question: How many Hams does it
take to change a light bulb?

Answer: 1,200

1 to change the light bulb and to post to the mail list that
the light bulb has been changed;
14 to share similar experiences of changing light bulbs
and how the light bulb could have been changed differently;
7 to caution about the dangers of changing light bulbs;
27 to point out spelling/grammar errors in posts about
changing light bulbs;
53 to flame the spell checkers;
41 to correct spelling/grammar flames;
6 to argue over whether it's "lightbulb" or "light bulb"
156 to write to the list administrator about the light
bulb discussion and its inappropriateness to this mail list;
109 to post that this list is not about light bulbs and
to please take this email exchange to litebulb-list;
203 to demand that cross posting to grammar-l, spelling-l and
illuminate-l about changing light bulbs be stopped;
111 to defend the posting to this list saying that we all use
light bulbs and therefore the posts *are* relevant to this mail list;
306 to debate which method of changing light bulbs is superior,
where to buy the best light bulbs, what brand of light bulbs work
best for this technique and what brands are faulty;
27 to post URL's where one can see examples of different light bulbs;
14 to post that the URL's were posted incorrectly and the post the
corrected URL's;
3 to post about links they found from the URL's that are relevant
to this list which makes light bulbs relevant to this list;
33 to link all posts to date, then quote them including all
headers and footers and then add "Me too";
12 to post to the list that they are unsubscribing because
they cannot handle the light bulb controversy;
19 to quote the "Me too's" to say "Me three";
4 to suggest that posters request the light bulb FAQ;
44 to ask what is "FAQ";
4 to say "didn't we go through this already a short time ago on air
pressure!

Scott,
I don't have any idea what Ford's 'cure' is, but the GM 'cure'
is exactly what you thought. By-pass the fule pump's power lead
at the gas tank. A 0.01 ceramic disk at 35-50 volts should do it.
If not, add another one or two. Ferrite beads won't do it alone,
but can't hurt with the caps.
As far as worrying about the caps near a gas tank, why bother?
I'd be more worried about that 12 volts going to the pump shorting.
'Doc

Scott.

Actually both Ford and GM have fixes for this problem. You have to find a good Service Manager to do some digging in their tech manuals but they are there, work and are available.

>century technology.

Talk about an "obsolete code," how about that code which was
invented in 1874 by some fellow named "Baudot"! Imagine any-
one even contemplating using it today?

Let's see what Britannica.com has to say about the old fellow:

Baudot, Jean-Maurice-Émile

b. 1845, Magneux, France
d. March 28, 1903, Sceauxengineer who, in 1874, received a patent on a
telegraph code that by the mid-20th century had supplanted Morse Code as
the most commonly used telegraphic alphabet.

In Baudot's code, each letter was represented by a five-unit combination
of current-on or current-off signals of equal duration; this represented
a substantial economy over the Morse system of short dots and long
dashes. Thus, 32 permutations were provided, sufficient for the Roman
alphabet, punctuation signs, and control of the machine's mechanical
functions. Baudot also invented (1894) a distributor system for
simultaneous (multiplex) transmission of several messages on the same
telegraphic circuit or channel.

Modern versions of the Baudot Code usually use groups of seven or eight
"on" and "off" signals. Groups of seven permit transmission of 128
characters; with groups of eight, one member may be used for error
correction or other function. See also teleprinter.

3461. Re: How do you calibrate against WWV ?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-25 00:00:00 UTC
From: qrm2000@aol.com
Message-ID: <20000725070223.22013.00000004@ng-fw1.aol.com>
Source record: 106579

>
>I was wondering how exactly do you calibrate a piece of equipment against a
>WWV signal from
>a shortwave radio.

1. If the shortwave radio has a whip antenna, go to step two. If not, set up a "T" connection so you can hook up both an antenna and the piece of test equipment to the ANT terminal/connector of the radio.

2. Tune the shortwave radio to WWV on 10MHZ.

3. Turn on the piece of equipment to be calibrated. Adjust the signal level so that it does not completely override WWV.

4. You should not hear any tone. If you do, you should adjust the calibration knob of the equipment for "zero beat"; i.e., the lowest frequency audio tone.

5. It is helpful to have an analog meter across the audio output of the short wave receiver. As you get very close to "zero beat", you will no longer hear the tone because of the low frequency. However, you will see the needle on the meter "pulse" slowly.

6. Normal amateur use does not demand EXACT zero beat. In fact, equiment "drifts" enough to make it unnecessary to spend lots of time trying to get that last Hertz pinned down.

>
>Conclusion: If using cell phones while driving kills people so does
>using ham mobile rigs. Those of you who are so quick to want a law
>banning cell phones while driving, beware. It won't take authorities
>long to figure this mobile radio connection out...

Regardless of what the law is, here's the bottom line:

When behind the wheel of a moving vehicle, your job is to DRIVE.

Accidents are painful and expensive. Time waiting for the cop to arrive. Time filling out insurance papers. Time getting the car to the shop and picking up the rental car. Doctor's visits (or worse, time spent in the hospital). Responding to Summons suing you and your insurance company. Physical therapy. Or the ultimate price: Knowing that someone died because of your actions. (You'll wish it had been you).

I confess to having a car full of gear: two cell phones, 2 Meters, FRS. In the past, I had a neat 20 Meter CW rig that netted me many great QSOs.

I also confess to having missed exits while on the phone and on 2 Meters. And I once went 45 miles out of my way by missing my turn on an Interstate near Scranton while chatting on 20 CW.

Today, I have the cell phones in the car, but I use them in the "dispatch" mode; i.e., rerouting, position updates, when I will be home, etc. I seldom use the 2 Meter rig, except out on the open highway. And the HF rig is in the house as a base station.

I think I'm driving better. No tickets. No near-misses. No "panic" stops. I value the use of my cell phone, and I object to having it legislated. However, I am realistic about my reflexes and multi-tasking ability slowing down as I age.

You might just be able to do that Tom.
Rep Tauzin is throwing a $2000-per-head
"Louisiana Cookin" party during one evening
of the Republican Convention. Apparently his
"constituants" in the Telecom Industry
have given him the funding to rent the 1200 seat
banquet room in the Philadelphia Hershey
Hotel (where rooms average $260.00 per night)
to throw a "big-pig" party. No doubt it will be
full of 3-piece suits who want to wreak havoc
on all RF services except their own, sloppin and chowing
down on all kinds of spicy La foods like 600-pound
hogs at a feedin-trough.

WB3KUM/9 <d.breeden@NOSPAMwcom.com> wrote:

> My question is why are they hell bent on using ESA, what
> about Russia or NASA.

Because there is no significant probability of a free launch
from either in the forseeable future for a satellite as big
as Phase 3D. There are almost certainly things going on
behind the scenes, but, despite the (very real) difficulties,
ESA still looks like our best bet. If you have contacts at
NASA or Glavkosmos, by all means, see what you can arrange!

Re-qualifying a satellite for a new launch vehicle is non-
trivial. Phase 3D is ready to go on Ariane 5; if a Proton
or Titan 4 launch were to become available, it would be
back to square one on many things.

1. Select the band of operation with the bandswitch.
2. Peak the receiver using the DRIVE control, this is also the
PRE-SELECTOR tuning.
3. Pre-set the TUNE control to the marking on the panel for the band
in use.
4. Set the LOAD control at about 25% up the scale.
5. Put the METER switch in ALC position.
6. Place the rig in TUNE using the MODE switch.
7. If you have a microphone hooked up, key rig with it.
If not use the SEND/RCVE switch on the radio.
8. Re-adjust the DRIVE control for a PEAK on the ALC meter. This will
be close already.
9. Place METER Switch in RF Position.
10. Adjust the TUNE and LOAD for MAXIMUM indication.
11. UNKEY RIG and let sit a half a minute to cool down a bit.
12. Do this part quickly.
A. If you have a CW Key in line
1. Place rig in CW position, using the MODE SWITCH.
2. While watching the RF output on the meter close the KEY
and quickly adjust the Tune and Load for MAX output. These
controls will interact.
13. B. Unkey the Key, place meter in IP position and check the
reading. Keep it under 250ma.

C. If you have NO KEY in line. Do the above, but use the
Send/Rcve.

Hope this helps somewhat. If you need further help feel free to

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help curb the growing problem of online stalking, a U.S. Justice Department report recommends. Internet service providers, which link users to e-mail and the World Wide Web, report a growing number of complaints about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation prohibiting harrassment or threats on the Internet. From the reported proposed penalty, threatening or harrassing via the Internet would be a Class 4 felony in Illinois, punishable by up to 3 years in prison. The state legislature has not yet considered this proposal.

Since Riley busted Captain Truth, K4QIJ, no word has been stated as to the closeure of this case against Capt Truth. Has this been sweptunder a carpet of secrecy? Inquiring minds want to know what will be done about this long time, hard core qrmer. How about it Mr R?

Tongue in cheek...I never heard of him either. He obviously wasn't a god cause he is reportedly DEAD. Hopefully the real judge thinks as much of him as you do. God rest his soul.

Periodically, the International Telecommunications Union (ITU),
a body of the United Nations, has an international radio conference
in order to review users' needs versus spectrum availability. There
is a LOT of wheeling and dealing behind the scenes to arrive at
compromises satisfactory to all nations concerned. The 1979 gathering,
titled World Administrative Radio Conference (WARC), had an unexpected
outcome: Amateurs were given three new HF frequency bands at 12, 17, and
30 meters. We went into that conference thinking we were going to lose
spectrum but just the opposite happened, thanks to the ARRL and the
IARU. 73, Jeff KH6O

As far as I'm concerned, my copyright has not been violated by Mr. Wirehead. Ergo, no laws were violated, except in your feeble mind.

Reposting without permission while still citing the author does not violate any so called "net-ettiquite," except in your limited demented mind.

> Plus, you have posted off-topic, Richard!

Bill, I think someone said it before "Dying is not a laughing matter".

Anyone who tried to make a life helping and catering to the people that populate this hobby has to be commended.

From the little I know most everyone who has a modified scanner owes Bill Cheek a thank you, I haven't found anyone else who has contributed more to the hobby.

The "A" hole that started this thread has already received more attention than he deserves.
My suggestion is to show our respect kill this thread and not be lured into anymore regarding a persons death.

The most recent post was on June 20, 2000 (it's been posted before).
You're just too ignorant to see it or find it in DejaNews.

> > I prefixed my list of your lies with the proof
>
> You have NEVER provided proof for any of your statements. Richard
> Kendrick, you are a liar!

My previous post said the proof resided in the archives of DejaNews.
Therefore, your accusation is baseless.

Just because you're unable to use a computer and access DejaNews is
your problem, not mine.

I have the right to choose to obey the law. And deal with the consequences of my actions through due process of the law.
It is no different than speeding in a car with a motor designed for a race track.
What or who is affected by a modified scanner? Scanners were around before cell phones and cordless phones. Most of those are digital now so the old scanners and the modifications are pretty useless for listening to those devices.

Many of the modifications that Bill Cheek publicized were prior to the law. Fortunately we still have freedom of the press and speech in this country so his books are still available.

I guess a person like you would burn your books and turn in your guns if someone passed a law.

Myself, I will continue to enjoy, support and fight for the freedoms afforded everyone in this country regardless of what unenforceable laws your elected government can dream up this decade.

Jeff, Comparing Bill Cheek to a drug dealer is simply ASSANINE!! as is the Cell laws..... If a person needs privacy DON'T use a cell phone..... There is a very large number of laws on the books through-out the US that if enforced would cause a CIVIL WAR! some of these laws ar ancient!! I'm not a Scanner Buff at all..... I could care less about modifying scanners..... I do however recognize Bill's name, Its unfortunate when Cancer or any other disease causes an un-timely death! Any ones death! Again I'm not a Bill Cheek fan, but even my casual glimpses of articles written by him, allow me to conclude the fellow made some valid contributions..... Other than BLOWING YOUR HORN, what contributions have you made??? I'm not refferring to a local level either! I don't recognize your name from any National publications..... No matter what subject a person chooses to write about critics will always be there! Pleasing everyone is highly unlikely! Why Rip on a guy after death? If you felt this negative about him, express this to a living person..... Not after he's dead and gone!

To Bill's family, hats off to the man!

Many, if not most of Bills mods had nothing to do with cell. Adding
channels, getting rid of keyboard beep, rf meters , receiving ssb on the
2006, speed up mods. . . Modified does not mean "opening the cell freqs".
Any way , most of the cell mods were legal when his books went to publish.
I'll miss Bill as well. We sent a few e-mails back and forth. He was a good
guy. He could be a jerk, I'll admit that (that's true of many of us). But
at least he posted a BUNCH of on topic , helpful info.
It seems to me that this is the perfect time NG bickering to end.

Good scanning !

I feel sorry for sarcastic people, like you. Full of so
much bile and venom that unless you spew it forth
it will of itself overtake and shorten your life.

Go back to alt.fan.art.bell Glen, where you got your
start in mudslinging and you rightfully belong, with
the folks you like who made fun of Art Bell's family troubles.

Careful with the attribution line, Dave. David Windisch didn't write the comment that you've attributed to him. Misquoting someone like that is one of the worst sins you can commit on here. 73, Jeff KH6O

Here's what you do. You post as person X telling people about your website. Then you respond to yourself as person Y telling everyone else how great the site is. Then someone else ruins your day by making a sarcastic comment about killfiling you. I'm telling you Walt, it's people like you that totally mess with a spammer's day.

3508. Re: Fwiw, Clinton's 'take' on Waco

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-26 00:00:00 UTC
From: David Lafferty <dplaff@alltel.net>
Message-ID: <8lmghq$i9i$1@news1.alltel.net>
Source record: 106523

He's probably referring to the early 1980's when the CSA compound
on the Arkansas/Missouri border was raided. Search Warrants were
obtained and there were federal indictments for several people inside
the compound. The place was surrounded and negotiations began.
After a few days the people inside the compound surrendered. No none
was injured or shots fired. I haven't searched for it, but there is
probably
some references on the Internet if you search under the Covenant, Sword and
Arm of the Lord. They were associated with the Aryan Nation and other
such organizations.

The indictments had been issued and a Search Warrant obtained. Planning was
underway on how to best approach the situation when fate took a hand. A
young man was enroute to the CSA compound when he was stopped by a
Missouri State Trooper near the Arkansas/Missouri border. The young man
had numerous weapons inside his van and as the Trooper approached, he opened
fire killing the Trooper. The events then proceeded from there. Oh, the
Trooper
stopped him to tell him that a brake light was burned out on his van.
(Another
Trooper was working in the area and he mentioned it on the radio as he
stopped
the van). Unknown to the Trooper, there were felony warrants out on the
young
man already. That young man is serving a life sentence now.

Anyway, to make sure there is some Amateur Radio content in this post, the
CSA
had set up a communications network using 2 meter radios. Most of this
operation
was conducted using bogus callsigns on an oddball frequency. I didn't take
long
for the hams in North Arkansas to stumble across them. There also was a 75
meter
frequency that they used, but I don't recall it (No, it was not 3.950!).

What really begins to bother me is that he is doing the same thing with his full coverage announcements on the dx packet cluster. If he doesn't stop that crap, someone is going to do something nasty. If anyone wants to see his web page they would already have done it by now, and if there is anything worthwhile to see, it will all take care of itself via the search engines. Guy must have some serious ego problem to want to advertise it so much; either that or he is making money on each hit.

Yes, I remember it well. I have a collection of 1930s RADIO mags with the Scratchi column, so it must have run for at least 20 or 25 years. What's really interesting to me is the racial angle. Americans in that era seem to have regarded Japanese with a mixture of simultaneous contempt for their race and respect for their achievements. An example is the pre-Pearl Harbor canard that the Japanese could not fly their (admittedly excellent) aircraft well because their eyes didn't open wide enough to see well. Pearl Harbor changed that misapprension!

3521. Re: Yaesu Mic Question

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-27 00:00:00 UTC
From: Gene Jenkins <sop@erols.com>
Message-ID: <3980C825.9FD754F@erols.com>
Source record: 106336

I just bought a used MD-1c8 to use on my FT1000 mp. The guy said he was using it on his FT1000 so I figured it would work ok. As a microphone it works fine on both the 1000 and an 847. The fast button puts the machine in fast tune mode but the up and down buttons don't work. One of these days I'll get out the manuals and rewire the mic even I don't think I'll ever use the feature. Oh what the hell:

From the 847 manual:
1 up
2 +5v
3 down
4 fast
5 gnd
6 ptt
7 mic gnd
8 mic

Damn, no pin outs on the instruction sheet for the mic...so:

On the MD1 Mic:

Fast button shorts pins 4-5 (gnd)
Down button shorts pins 3-2 (+5v)
Up button shorts pins 1-2 (+5v)
ptt button shorts pins 6-7 (mic gnd)

On the hand mic (MH-31) which comes with the 1000mp and 847 (and I assume 920):

Fast button shorts pins 4-5 (gnd) SAME
ptt button shorts pins 6-5 (gnd)
Down button shorts pins 3-5 (gnd)
Up button shorts pins 1-5 (gnd)

Well now I'm going to print this off and get out the soldering iron. The answer to if the 1c8 will work is yes (if it comes with the MH-31 hand mic). You're own your own for the MD-1b8 and the 100.

Gene,
N4Jee

The question I ask is simple. Why? To what ends do you make these posts?
Self-importance? Why?
If you can come up with a logical answer, maybe people might take you a little
more serious.

Yes, his early books, (pre-ban), gave details on cellular mods. Given that some scanner marketers blocked cellular coverage before it was made illegal by Congress, there was certainly nothing wrong with him publishing these mods.

As for why I posted it to the SAME newsgroups you posted to, I used the reply group button. You posted your inflammatory statements to all those newsgroups, I answered them so the same people could see the truth.

Hi folks,

I had some good sound-card based audio filtering software that I was using to listen to shortwave & amateur radio transmissions, but I lost it in a shuffle of switching hard drives & computers at one point. I can't remember the name of the software or the site I got it from, but I know I got it from a site that had all different kinds of ham software available for download. Does anyone have any idea what that web site might be? I've looked & can't seem to locate it again.

I know this is pretty vague, but I'm sure some of you have seen this same site at one time or another.

Thanks,
Rodney - KF4COV

>Usenet is a shared resource which depends upon
>the good will and resources of someone else.

Most Usenet servers depend on the good dollar, not good will. The servers of ISPs are paid for with subscription fees, the servers of education faculties are paid for with taxes, and the web based servers are paid for with advertising.

>the end result is that, as I post more messages,
>other messages must be removed to make room for mine.

The oldest messages would be deleted first and most servers keep new messages for at least a couple of days, and usually much longer. If you haven't read them by then you can always read them on the archived web sites. Where's the problem??

>The point is, that once you understand something about how Usenet works, you
>realize that it may be selfish (or worse) to simply post with abandon.

Have you ever really surfed Usenet? Of the over 24K groups on my server, a large percentage are empty or all spam. That is where the real waste is...

>When excessive posting crowds other users out, it is
>similar to the effects of jamming on the ham bands,

If you want to talk excessive look in the mirror. My reader puts your post at 86 lines, considerably over the average. Well except for maybe for Wex...

FOR IMMEDIATE RELEASE
July 25, 2000
NEWS MEDIA CONTACTS:
David Fiske (202) 418-0513.

FCC INVESTIGATION LEADS TO ARREST
OF UNLICENSED AMATEUR RADIO OPERATOR

The Federal Communications Commission today announced that an investigation by its Enforcement Bureau led to the July 20, 2000, arrest of Mr. William Flippo, Jupiter, Florida, for operating an unlicensed radio station on amateur radio frequencies and for intentionally causing interference to licensed amateur radio stations.

The Enforcement Bureau, responding to numerous complaints, had previously warned Mr. Flippo to stop his illegal activities and had issued him a $20,000 forfeiture. Despite the Enforcement Bureau's administrative response, Mr. Flippo did not stop his illegal activity.

The United States Attorney's Office for the Southern District of Florida charged Mr. Flippo with four counts of unlicensed radio operation (47 U.S.C. ï¿½ 301) and four counts of interfering with licensed radio stations (47 U.S.C. ï¿½ 333), which he allegedly committed between June 8, 1999, and April 11, 2000. The United States Marshals Service arrested Mr. Flippo at his Jupiter, Florida home, from which it also seized his radio transmitting equipment.

If convicted, Mr. Flippo could face up to one year in prison and a fine of up to $10,000 for each violation.

Commenting on behalf of the Enforcement Bureau, Jane E. Mago, Deputy Chief, commended the members of the amateur radio community, who provided information

leading to Mr. Flippo's arrest, and thanked the United States Attorney's Office for the Southern District of Florida and the United States Marshals Service for their efforts in prosecuting the case.

>I'm not a Scanner Buff at all..... I could care less about
>modifying scanners.....

I'm a scanner buff... but I don't see the attraction in
listening to cellular phones. BORING! Who wants to listen to
some guy call his wife and let her know what time he'll be home
for dinner? Besides, most people are moving to digital PCS.

Now cordless phone conversations, those can be interesting
(disclaimer - I am not saying I listen to them!). People do not
realize that cordless phones are RADIO TRANSMITTERS that can be
picked up within a several block radius with a good outdoor
antenna, sometimes even from a greater distance. It's amazing
what kind of information people give out over cordless phones.

I use a cordless phone myself, but if I'm going to give out
credit card data or something I ALWAYS unplug it and use a
regular corded phone. It's unbelievable the number of people
out there still using 25-channel 49 MHz unscrambled cordless
phones, and even more amazing people don't realize these can be
heard from quite a distance on a scanner. It would be nice if
someone educated the public about this, because an unscrupulous
person could commit all sorts of crimes using the information
heard over cordless phones (second disclaimer - I do not listen
to cordless phone conversations, never have, and never plan to).

Yeah, I agree, it's a mess, non-intuitive and poorly designed. I've never seen (in 10 years) a site built quite like that one, downloading applets and jar files and all kinds of garbage. It should have been built using server-side java or an application server....

Don't waste your time trying to
speak any reason to this fool
Glen Quarnstrom Lenny. He's been
knocking around this newsgroup and
others for years and is
a commensurate asshole.

Glen seems to get his rocks off
by spreading his bile and
then sitting back and watching as folks get
mad at him. The guys a total whack-job.
He's probably in need of psychological help.

He's the type of person if he don't get no attention
his anger starts welling up inside and you read about
folks like him later going into a post office
or shopping mall somewhere with a semiautomatic.

Kevin,

Well said, however the small minded, unknowing, upcoming lawyers real or imagined always relate to modifications as illegal. Because like most of their species they usually don't know what they are taking about until someone teaches them. Kind of like monkeys.

Probably because someone crossposted it to begin with. Would that have been
you?

Are you as ignorant as you are ASSANINE? Direct quote..

<snip>
That's like thanking a drug dealer for providing you with drugs
<snip>

You specifically compare it in the above statement! No matter what you
say in the next sentence, you've made a comparison here......

>

Actually Jeff I am interested........ If you've actually made a
signifigant contribution on a NATIONAL or INTERNATIONAL level please share
it!

I am posting this for a friend. He is selling his Yaesu FT-51R dual band (2 meter/440) handheld transceiver. The radio comes with several accessories, including a "drop in" desktop charger, car charger, and a speaker mic w/ display.
He is asking $250 + shipping for the entire package.
If you would like to see pictures of this equipment, please visit:

http://www.geocities.com/chrisg3_99_2000/ft51r.html

If you have any questions, please contact Chris (KD5DLP) direct, chrisg3@hotmail.com or (580) 286-6512.
Thanks!

Jeffrey I see that you are in Hawaii! Do you own a boat? If not yo
had better get one as you are breaking a state law by not owning one.
>All residents may be fined as a result of not owning a boat.
If you live in Honolulu you better be careful when in any parks, if you
are walking around and a bird fly's away you can be fined for bothering
it.
>Within the limits of any public park, it is unlawful to annoy any bird. (SEC. 10-1.2)

For all you people that live in Los Angeles California, did you know
that you can legally beat your wife? But only with a strap that is no
larger than 2 inches unless she says it ok to use one bigger.

>It is illegal for a man to beat his wife with a strap wider than 2 inches without her
>consent.

BZZZZZZZZT Try again

In your javascript coding you have

<script type="text/javascript" language="JavaScript<A
href="http://sm4.sitemeter.com/stats.asp?site=sm492" target=_top>

<IMG
src="http://sm4.sitemeter.com/meter.asp?site=sm492&refer=&hours=14&minutes=1&rtype=4"
border=0 title="Site Meter"></A

HMM the sm492 is an affilliate program number, now why would sombody
need that ... lets go see

http://www.sitemeter.com/affiliate/

Under the discription we find

Why be an affiliate?
To earn 50% of our profit, that's why!

Visitors to your site are encouraged to join an email
notification
service on dozens of topics. If they join, their names
are held securely
in our database. Mailings to those names will be offered
to brand
name clients for a fee. Because it is an 'opt-in'
service, the
subscriber has specifically asked to join, plus the

subscribers' email
address is never given out, and they can unsubscribe at
any time.

So tell me again about the hit counter not being an affiliate program
for making money????

Rick
kf7qz

btw thats the only click you got from me.

3578. Kenwood TM-g707 strong signal performance

Hello all,

I have a question about the Kenwood TM-g707 strong signal
performance.
Before I bought the rig an other local amateur said that he had
been told that the front end on this rig was "as wide as a barn door"
I have not noticed any problems with the rig until this last week end
when I was at the RIAT airshow at RAF Cottesmore where I could
hear what appeared to be the communications traffic from the gate
marshals / ambulance / etc on the 70cm band while listening to the
repeaters around the area.
The rig has not been modified to give the extended / AM receive
although air band AM RX would be of interest.
OK so my questions :-

Has any one had similar experience ?

I suspect that it is an IF image channel problem is this right ?

or is it overload of the RX amp in the front end ?

and where can I get hold of a circuit diagram as one is not supplied
with the rig.

cheers Martin G1GYC

news:8kt7q6grc1@nnrp02.primenet.com..

The best thing we could all do is to just ignore Charles and his web site. All the replies and confrontations are giving him exactly what he wants, angry replies to his baits only raise his feelings of self. Sad, but many people can not feel a sense of belonging unless their actions stimulate a response in others. He will act calm and try to further the confrontation, when someone gets angry he feels he has WON. Don't give him what he seeks.....ignore him.

Well, Gary, the two articles mention "threatening behavior online." Your
comment, "If he doesn't stop that crap, someone is going to do something
nasty" comes across as a very strong online threat, something both
articles speak out against. Just what were you planning on doing to
him? (Hopefully, you're not in Illinois!) 73, Jeff KH6O

Call it what you want to. I'm not splitting legal hairs here. You have repeatedly posted full announcements on the dx packet system to invite net users to your site. Judging from comments within the system, other folks are iritated as well. I've seen the web page and you have some interesting stuff there, but I don't enjoy being reminded of it as much as you enjoy reminding ME about it. DX clusters are intended to convey timely information on that topic. General announcements are made my participants to gather information or to share timely knowledge relevant to DXing. Advertising, in any form and by any other name, is not highly appreciated. Spam is spam.

You should pose that question to the Congress which enacted the law.

>Many of the modifications that Bill Cheek publicized were prior to the law.

Regardless of when a modification is made, it's the *listening* which violates the law. My Uniden 800XLT came from the factory with no unblocked frequency bands; the placard which came with the unit specifies what bands one should avoid. (To this day, I still haven't listened to other people's phone conversations.)

>Myself, I will continue to enjoy, support and fight for the freedoms

Yes go to

Http://www.fcc.gov/wtb/uls

You have to register in the ULS database first, and get a licensee ID #.

after you get registered, go to the ULS proper and do an administrative update.
When you do transactions in the ULS, only do one change or action at a time.
The system is a MEGA-kludge!!!!
If you do more than one transaction at a time it chunks the whole thing.

Remember when registering:
Your SSN is your TIN.
After you are successfully registered you will get a Licensee ID #.
Use the Licensee ID # along with your self assigned password that the ULS registration system asks you for, to access the ULS proper.
One other thing, the first time you access the ULS proper; some applets will be downloaded to your computer. They only work on a machine running Windows 95. The first time you sign in will take a
little longer because the applets have to be downloaded and saved and then executed.

Have patience, the system is very frustrating. It is NOT very intuitive or user friendly, it is designed to be used by power ops who access it a lot.

Jeff,
Many (90% or more) of the mods that Bill Cheek developed have nothing to do with listening to cell phones. Improved squelch, computer control of scanners, expanded memory channels, add-on signal strength meters, baseband audio taps for recording signals, just to name a few. And modifying a scanner isn't a crime, listening to phone conversations is. It's what you DO with the radio that can get you in trouble. BTW, id you think drug dealing isn't a federal crime, you've apparently never heard of the D.E.A.

I myself use one of Bill's mods, a discriminator output tap, to monitor and decode EMWIN (Emergency Managers Weather Information Net), which is distributed by the Nat. Weather Service and rebroadcast by our local amateur radio club. Ironically, it was this mod, a "data-slicer", that got Bill arrested last year. The info is freely available on a N.W.S. site. Go Figure!

No thanks. If I ever travel again, it will most certainly not be by air. The last trip (from Italy to Seattle - 27 hours and 3 airlines) was absolutely miserable.

The typical airport terminal is a nightmare - crowded, long distances between gates, dirty restrooms, bad restaurants with high prices, and sleazy people hanging around almost every back hallway.

The airplanes themselves are horrible - often old (peeling paint and rust), often dirty, always cramped seating, not enough fresh air, and far too few toilet facilities.

And, thanks to the routine, and nearly endless, delays, getting off the ground is not exactly a wonderful experience either.

Then there is the actual trip itself - bad movies, crappy food (if the junk they serve can even be called food), not enough food, and never enough liquid refreshments to drink (a person can die of thirst on a long flight).

And, when talking about airline travel, lets not forget about high ticket prices (for the miserable trip you get), the occasional lost luggage, and the occasional rude airport or airline employee.

No, like I said before, if I ever travel again, it will not be by air. In fact, if I can't find something better than what air transportation offers, I would simply rather not travel again at all.

He was inimitable, surely. I never met him but I have fond memories
of him in the old Fidonet SHORTWAVE echo. In fact, I got published in
his old newsletter "World Scanner Report" (March '92 if anyone's
keeping track.) One day, I posted my Carpet Loop plans on the echo,
and Bill was so taken by my plans that he asked my permission to
publish them if I would draw a schematic for him. I did, and he did.
I was delighted!

I know about his freebanding history--it was the subject of many a
flamewar on Fido. I don't care. Even though freebanders and hams are
supposed to be natural enemies, I could never hold that against him,
not when he worked so hard to develop mods for so many of our favorite
radios. Not when he got indicted for having a device (a data slicer)
that *I* own myself (otherwise known as a HamComm decoder!)

>Hey Bill! What freq's does St Peter
>use at the Pearly Gates ? - thanks Bill we miss ya!)

Rest assured that neither the FCC nor the CTIA will bother him again.

R.I.P., Bill

Take care,

Dave

Sorry it took me awhile to comment on this, visiting company has kept us pretty busy. Based on the discussion, I've decided to drop the whole concept of clearing from a failed call. One ham wrote me directly to share a one page document that his repeater group gives out to new hams at their VE test sessions. This seems like a good way to do a little elmering up front, before bad habits have a chance to form.

That is sort of vague. FWIW, I've tried Chromasound, the Swezey DSP
filter, one from the ILG radio site, and the one that impressed me the
most by far--and got my $25 registration fee within a week of using
it--was an excellent program called "SR5".

God, it's so easy to use and powerful--just draw the filter you want
using the mouse and you've got it, like having a graphic equalizer with
a thousand slider pots. Plus, if you've come up with a filter that you
might want to use later you can give it a name and save that
configuration.

Plus, it will record the filtered audio to your hard drive for you.

It's good stuff! The evaluation copy is only crippled to the extent
that it times out after about ten minutes and you have to restart the
program again--fair enough. And the $25 registration fee--should you
decide that the timeouts are aggravating you enough and that the author
deserves the money for his efforts--is cheaper than the competing
software that doesn't do near as well. My two cents, and then some.

Check it out at:

http://www.ar5.ndirect.co.uk/

Donald Reeve (no relation to the author of the program, John Reeve--really!)

3622. Repeaters Reno/Sparks, NV; Truckee/Tahoe/Potola, CA

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-28 00:00:00 UTC
From: mrhuey@wizvax.wizvax.net
Message-ID: <Tndg5oJPMeKb090yn@wizvax.wizvax.net>
Source record: 106368

-----BEGIN PGP SIGNED MESSAGE-----

Before you pull the trigger, at least give me a chance to say my piece ... The first week of September I'll be in the Reno/Sparks, Nevada area visiting relatives. I've done my web browsing, got my 2000-2001 ARRL Repeater directory and have about 250 to 300 repeaters to choose from.

Two problems arise from this, first is the ARRL directory tells you everything except which ones are popular (well utilized?) Second, heck, this area is in the Sierra-Nevada range and you actually have to tilt your head to see the tops of some of these peaks (as opposed to simply raising your eyeballs a fraction of an inch.)

So, would anyone care to help me whittle the choices down to a more modest 30 to 50 repeaters to program for while I'm in the area? I'll be 6m, 2m & 70cm capable on my portable and would prefer to have a couple choices in each band, in each area and for traveling between areas. I do know 6m is slim pickens, so I'll probably acquiesce and allow myself 3 or 4 selections in the 2m band for each area.

As for utilization, I'd prefer to know which seem to be the most popular with those in the area. Back here, at home, there are about 25 I can hit, but only 4 or 5 that I notice that see fairly consistent use, everyone 'hangs out' on, or are well 'monitored' around the clock ... and those are the ones I'd be interested in and like to have ready at a keystroke.

Another thing I'd be interested in knowing about would be any regularly scheduled radio-nets in the Reno/Sparks area. I'm fairly new to the service/hobby and haven't yet defined a specific direction of interest to persue, but am starting to spend time listening in on various nets to get an idea of what's out there, what's interesting and asking a question or three.

One last thing, I'm also a railfan, so I'll probably spend a day or two of quality time fanning the UP in the area. So, are there any good repeaters in the area with railfans on them, a railfan net, a spotting net or anything like that that's *active* in the area? I certainly wouldn't mind getting on the air with like minded Hams and give them a travelling Area 2 call for their logbooks while I'm around. (Sheesh, sometimes I'm fairly dense, anyone I talk to will get that traveling Area 2 call for their logbooks ... something tells me I'm going to be

a pretty popular guy when I hit the airwaves out there!!!)

Well, anyway, thanks in advance for any help you can zap my
way, maybe we'll even get a chance to chat.

Before the
Federal Communications Commission
Washington, D.C. 20554

ORDER

Adopted: July 18, 2000 Released: July 28, 2000

By the Chief, Public Safety and Private Wireless Division, Wireless Telecommunications Bureau:

I. INTRODUCTION

Kenwood Communications Corp. (Kenwood), a manufacturer of commercial and amateur radio equipment, requests1) a declaratory ruling confirming that a device it manufactures known as the ï¿½Sky Command Systemï¿½ (Sky Command)2) complies with the Amateur Radio Service Rules.3) Alternatively, Kenwood requests that should we find that Sky Command does not comply with certain amateur service rules, we grant blanket rule waivers so that amateur service licensees can utilize Sky Command.4) For the reasons set forth herein, we deny Kenwoodï¿½s requests.

BACKGROUND

Sky Command permits amateur service licensees who do not have sufficient space for High Frequency (HF) antennas, or who live in areas with restrictive covenants, to operate their HF equipment at remote locations through the use of Very High Frequency (VHF) and Ultra High Frequency (UHF) channels. 1) The antennas for systems utilizing VHF and UHF channels are much smaller than those associated with HF systems.2) Sky Command also could be useful in situations where the amateur service licensee wants to monitor HF bands while in a room other than the ï¿½shack,ï¿½3) or while away from home at a local event.4) Using Sky Command, the amateur service licensee uses a portable VHF/UHF radio to transmit control signals and audio signals on the 440 MHz (70 cm) amateur service band to a second VHF/UHF transceiver which is interconnected by an input/output unit with the licenseeï¿½s HF transceiver.5) The second VHF/UHF transceiver is used to transmit the audio output from the HF transceiver on a radio frequency channel in the 144 MHz (2 m) amateur service band to the licenseeï¿½s portable VHF/UHF radio (the control point).6) On November 4, 1999, Kenwood submitted a request for declaratory ruling that use of Sky Command complies with the Commissionï¿½s amateur service rules, or, in the alternative, a blanket waiver of any rules which would prohibit amateur service licensees from using its Sky

Command system.7) Kenwood contends that Sky Command complies with the rules and that use of the device is in the public interest.8) In the event that we conclude that Sky Command does not comply with our rules, Kenwood requests any needed rule waivers.9) In this connection, Kenwood argues that grant of such waiver request is in the public interest because it would allow amateur service licensees to operate their HF equipment from areas with limited physical space or from neighborhoods that have restrictive covenants that prohibit outdoor antennas.10) Kenwoodï¿½s request was placed on Public Notice on December 15, 1999.11) Comments or reply comments supporting Kenwoodï¿½s request were received from Gordon West Radio School, Inc. (West), Costa Mesa Emergency Service Amateur Communications (Costa Mesa), Kenwood, James M. Hicks, and Robert A. Kile. Comments or reply comments opposing Kenwoodï¿½s request were received from the American Radio Relay League, Inc. (ARRL), Robert G. Wheaton, the Bexar Emergency Amateur Repeater System (BEARS) and Kendall Amateur Radio Society (KARS). On April 17, 2000, Kenwood submitted a Request for Waiver and paid fees for waiver of two rule sections.1)

DISCUSSION

Kenwood requests a declaratory ruling, or in the alternative, a waiver with respect to several Part 97 rules.2) As set forth below, we conclude that Sky Command does not comply with Section 97.201(b), and that a waiver of the rules is not warranted. The amateur service rules provide that an amateur station on or within 50 km of the Earth's surface may be under telecommand3) (remote control) where there is a radio or wireline control link between the control point and the station sufficient for the control operator to perform his or her duties.4) A radio control link requires the use of an auxiliary station.5) The Commissionï¿½s Part 97 rules define an auxiliary station as an amateur station, other than in a message forwarding system,6) that is transmitting communications pointtopoint within a system of cooperating amateur stations.7) An amateur station that is an auxiliary station may transmit only on the 1.25 m and shorter wavelength bands, except the 219-220 MHz, 222.000222.150 MHz, 431433 MHz, and 435438 MHz segments.1) Kenwood acknowledges that in its Sky Command system the portable VHF/UHF transceiver at the control operatorï¿½s location (control point), which transmits control information and audio via a channel in the 440 MHz band to the VHF/UHF transceiver interconnected with the HF transceiver, is an auxiliary station.2) Kenwood contends, however, that the VHF/UHF transceiver interconnected with the HF transceiver, which transmits the audio output from the HF transceiver to the operator at the control point via a channel in the 144 MHz band, is not an auxiliary station.3) Specifically, it argues that because the 2 m link is not used for telecommand, it should not be considered an auxiliary station.4) We disagree. Section 97.213(a) of the Commissionï¿½s Rules requires that if radio is used for the control link between the control point and the station, the control link must use an auxiliary station,5) and Section 97.201(b) limits auxiliary stations to transmitting only on the 1.25 m and shorter wavelength bands, with the exception of certain frequency segments.6) In this regard, we note that Section 97.213(a) does not distinguish between radio control links used by the control operator for telecommand and radio control links used for other purposes, i.e., the distinction Kenwood draws between the VHF

and UHF link.7) Moreover, it is our view that the return transmissions from the HF station to the remote control point are part of the telecommand function being performed over the control link. In this regard, we note that the information transmitted from the HF station to the control operator informs the control operator as to whether the HF station is functioning in the manner the control operator desires and this information may cause the control operator to initiate, modify, or terminate functions, such as changing the HF transceiver's memories, setting or changing frequencies, or turning off the remotely controlled HF transceiver. We also note that the VHF link is integral to Sky Command and that without these VHF return transmissions, Sky Command is not of any use to an operator because the operator cannot hear what the HF station is receiving. We agree with BEARS that ignoring the return transmissions in the system, which are on the 2 m amateur service band, is at best a tortured interpretation.1) Moreover, we note that Section 97.3(a)(7) defines an auxiliary station as an amateur station ï¿½transmitting communications point-to-point within a system of cooperating amateur stations,ï¿½2) and we note that ï¿½communications point-to-point within a systemï¿½ would include all communications between the location of the HF station and the station at the remote control point. Thus, we conclude that Sky Command does not comply with Section 97.201(b) of the Commissionï¿½s Rules because Section 97.201(b) does not authorize auxiliary stations to transmit on the 2 m band. We now turn to whether a blanket waiver to permit Sky Command auxiliary stations to transmit on the 2 m amateur service band is warranted. To obtain a waiver of the Commissionï¿½s Rules, a petitioner must demonstrate either (a) that the underlying purpose of the rule(s) would not be served or would be frustrated by application to the present case, and grant of the requested waiver would be in the public interest; or (b) that, in view of unique or unusual factual circumstances, application of the rule(s) would be inequitable, unduly burdensome or contrary to the public interest, or the applicant has no reasonable alternative.3) We find that Kenwood has met neither standard. Underlying Purpose. The underlying purpose of limiting auxiliary stations to transmitting only on the 1.25 m and shorter wavelength bands is to minimize the possibility of harmful interference to other amateur service stations and operations, particularly ï¿½weak signalï¿½ activity1) in the 2 m (144-148 MHz) band.2) In a subsequent Order, the Commission reaffirmed this approach by rejecting a proposal to eliminate the frequency restrictions applicable to auxiliary stations.3) The Commission agreed with those commenters who argued that opening lower frequencies to auxiliary stations was unjustified because path lengths for such operations generally are too short to require such frequencies. 4) Further, the Commission believed that eliminating the restriction would result in harmful interference because many bands (particularly the 2 m band) already were fully loaded in many areas.5) As a result, it determined that these frequency restrictions should be retained because the rules reflect a good correlation between the frequencies authorized for auxiliary operation and auxiliary link functions.6) Moreover, it believed that the potentially disruptive interference that could occur to other amateur service operations if auxiliary operations were expanded outweighed the additional flexibility and other benefits resulting from elimination of these frequency restrictions.7) Kenwood has not shown that this is no longer correct, and several commenters raise these same concerns.8)

Accordingly, we conclude that application of the frequency limitations in Section 97.201of the Commissionï¿½s Rules to Kenwoodï¿½s proposal is consistent with the Commissionï¿½s intent to minimize potentially disruptive interference. Public Interest. Kenwood argues that grant of a waiver would be in the public interest because it would allow amateur service licensees to operate their HF equipment from areas with limited physical space or from neighborhoods that have restrictive covenants prohibiting outdoor antennas.1) As an initial matter, we note that such constraints do not necessarily prevent amateur service stations from transmitting on the HF amateur service bands. It is our understanding that amateur radio operators in apartments have used antennas designed for operating from cars and ï¿½slinky-typeï¿½ antennas to transmit on the HF bands from locations that do not allow permanent outdoor antennas and towers.2) We also note that it is our understanding that some of these restrictive covenants prohibit only antennas that are visible from the front of the dwelling or that are above the roof line, thereby allowing certain HF antennas such as ground-mounted verticals. Other amateur radio operators have used attic antennas or hollow flagpoles as support structures for HF antennas or have chosen to operate on the HF bands from mobile stations.3) Moreover, there is no firm evidence to support Kenwood's argument that granting the waiver request will allow licensees in antenna restricted locations to operate stations on the HF amateur service bands, because Kenwood has not shown that these licensees are willing or able to obtain a second location where they could install the necessary equipment and outdoor transmitting antennas. Finally, we are not persuaded by Kenwoodï¿½s argument that we should grant the requested waiver on the basis that Sky Command will allow amateur service licensees to use combinations of frequencies to form complex communications systems that will make amateur service licensees even more efficient in handling disaster, emergency, and other public service communications.4) Use of amateur service equipment and channels to form complex communications systems for public service communications reflects a choice the amateur service licensee has made as to how to use amateur service channels, rather than anything inherent in Sky Command. We also note that none of the situations in which Kenwood says Sky Command would be very useful are public service applications per se, but rather are applications that allow a licensee personally interested in operating on the HF bands to pursue this interest at locations other than the HF station.5) Unique Circumstances. Kenwood has not claimed that there are any unique or unusual factual circumstance that would justify grant of a waiver here. Further, we are concerned that granting a waiver to Kenwood for Sky Command would not be a technology-neutral approach, by favoring a particular manufacturerï¿½s product. In this regard, we note that it appears that Sky Command can be used only with certain Kenwood HF transceivers and handheld radios.6) For this reason, we agree with the ARRL that it is inappropriate for us to take actions that have the effect of favoring amateur service licensees who use the products of one particular manufacturer.7) Lack of Reasonable Alternatives. As noted above, the rules require an auxiliary station to transmit only on the 1.25 m and shorter wavelength bands, except the 219-220 MHz, 222.00 222.15 MHz, 431433 MHz, and 435438 MHz segments.1) Kenwood concedes that it could have designed Sky Command to operate on the 222 MHz band rather than the 144 MHz band.2) It states that it chose the 144 MHz band because many amateur service licensees

already own dual-band equipment operating in the 144 MHz and 440 MHz bands, and Kenwood wanted Sky Command to be compatible with existing equipment.3) Similarly, ARRL states that Kenwood currently markets a radio in Japan that transmits on the 440 MHz and 1296 MHz bands and can be used with Sky Command, but which Kenwood has chosen not to export to the United States.4) Kenwood, however, in response states its belief that there is no market for this radio in the United States because reconfiguring Sky Commandï¿½s VHF channel to transmit in a higher frequency amateur service band ignores the marketplace reality that the amateur service community demands a VHF/UHF dual-band transceiver for Sky Command application.5) We conclude that Kenwoodï¿½s analysis of the market and marketing decisions are not sufficient bases upon which we can conclude that Kenwood has no reasonable alternative to the 144 MHz band for Sky Command operations. Indeed, it appears that Kenwood prefers to use a VHF/UHF dual-band transceiver that it already markets for its Sky Command system because this VHF/UHF dual-band transceiver also can be used for other amateur radio applications, such as packet radio and voice communications. Therefore, we believe that grant of this requested waiver is not warranted because a reasonable alternative exists that would be consistent with the Commissionï¿½s Rules.

CONCLUSION
For the foregoing reasons, we conclude that use of the 144 MHz amateur service band for Sky Command does not comply with the Commissionï¿½s amateur service rules. We also conclude that Kenwood has not demonstrated that a blanket rule waiver permitting amateur service licensees to utilize the 144 MHz band to operate a Sky Command system is warranted under the circumstances presented.

V. ORDERING CLAUSES

ACCORDINGLY, IT IS ORDERED pursuant to Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. ï¿½ï¿½ 154(i), 303(r), and Section 1.925 of the Commission's Rules, 47 C.F.R. ï¿½ 1.925, the request for declaratory ruling or waiver filed by Kenwood Communications Corp. on November 4, 1999, IS DENIED.

This action is taken under delegated authority pursuant to Sections 0.131 and 0.331 of the Commission's Rules, 47 C.F.R. ï¿½ï¿½ 0.131, 0.331.

There is another ham who is interested in passing the 5wpm test, and it dawned on me that it would be more interesting to make actual contacts via Morse Code over the Internet, than only following a practice course.

Due to the herky-jerky nature of TCP/IP, each sender's transmission would have to be buffered, but it should work pretty good. I would assume there would just be some small delay in the handshake(a few seconds at most - kind of what you get when you play a video over the Internet).

I did a quick perusal of the available Morse Code programs out there, and couldn't come across anything that did this. Anyone out there know of anything like this?

I suppose one who to accomplish this would be to use an on-line voice chat group, and just feed thru the audio tones. I haven't used these on-line voice chat groups - so I don't know how feasible this would be.

Hi,
I have a ford Escort and went to ford and got an inline filter for the fuel pump and installed it my self noise is gone, also installed Gold Line filters on AC cooling fan its a two speed fan in the line and a filter on the alternator and grounded all doors and hatch and hood all noise is gone in my 10meter Ranger and in my ICOM706MII. The filter from ford was about 80 bucks. 73s

Scary thought! Use of such a high bandwidth medium for such a low bandwidth communication (which due to it's rare transport over such medium isn't even efficiently multiplexed).

It's more efficient to simply send the text, and have the remote machine TRANSLATE it to morse code.

I made that trip last year (actually, Los Angeles - Sacramento - Reno) and never figured it out. I simply kept each band (all 4 of them) on the appropriate simplex call channel. On the Los Angeles - Las Vegas runs, the same is more than adequate.

It IS funny, isn't it?!

> It's more efficient to simply send the text, and have the remote machine
> TRANSLATE it to morse code.

Yes, I agree - but remember this is for pratice purposes.

I hooked up a microphone to my computer, and I went to some Yahoo Chat rooms. I am surprised at how well it works - I dont' see much delay.

Using chat, I suppose all I need is one of those Morse beeping boxes. I suppose until I get that, I could just simulate it will my voice!!

beep-beep-beeeeeeep-beep beep beep-beep-beep

I have read over the few years about this. I have had a TMG707 and a TMV7a for 2 years and have never had a problem.. But that is because I live in a RF sparse area (lightly populated) . years ago, when I lived in Dallas, I couldn't find a radio that would let me drive through downtown without getting clobbered. I don't think there are any miracles that guarantee no intermod in any RF environment.

I have modified both my rigs to be wide band rx - and still have yet to hear a problem.

so it is kinda an answer in the negative sense, Yes, I have NOT experienced a similar problem. But, RF circumstances dictate everything.

Since you only experienced this once, in a high RF environment, then perhaps it is something to live with now and then.

I still think it is a fine radio. I won't sell mine for a long time. my $0.02 as well.

cheers

I just bought my first ham (2m) and will be taking my tech exam 8/9/00. Before then, though, I am taking a camping trip to Northern part of New Mexico. I would like to listen and learn while I'm on the trip, but I'm having a hard time finding a good site for repeaters IN THAT AREA and along the way.

I'll be traveling the Oklahoma panhandle and will be going across the top part of the Texas Panhandle and into Northern part of New Mexico (Red River).

If anyone could help/advise me on repeater info for this route, I would be very appreciative. After all, I'm a newbie and need some good "elmer" advice. I want to enjoy this hobby as much as possible.

Thanks in advance and 73,
Matthew

3638. AF2Y's back-HOORAY

Newsgroup: rec.radio.amateur.misc

Hello to all. My absence can be explained by the fact that my wife and I just flew in at 1:30 AM today from Puerto Vallarta Mexico by way of George Bush International Airport which was as screwed up, confused and bewildering as the man for whom it's named.

We stayed from July 20-27th in one of the leading hotels of the world-La Jolla de Mismaloya which the majority of you bozos could never afford; I mean ritzy beyond belief. Mismaloya is known in Spanish as Bahia Mismaloya (Mismaloya Bay) which is actually a tributary of Bahia Banderas which flows into the Pacific.

At the hotel we saw and spoke to Tom Cruise, Nicolle Kidman, Jack Nicholson and Jack Pasternack, a kosher butcher from Carmel, CA. The 1964 movie, "Night of the Iguana" was filmed there and one night we did dine at the restaurant named, "Los Sets de la Noche de la Iguana" and walked around the same area in which Richard Burton, Ava Gardner, Sue Lyons and others did. Our feet hurt since it was rocky. And the food was as lousy as the movie.

This explains why my equipment is old. I'd sooner spend 3 grand on a one week grand vacation than on ham radio and if some of you dopes who've never travelled, never been in an airplane would think along my lines instead of devoting your precious time on earth to arguing with the likes of Seymour or MXL, you'd be far better off.

Puerto Vallarta is about 2,200 miles from Puerto Clifton. It's located 200 miles west of Mexico City, right on the Pacific Coast. We had to take connecting flights from Newark to Houston and flying over Mexico was awful. I saw it as one big desert; barren, inhospitable and boring. It took 3 hours to fly from Clifton to Houston and 2 from Houston to Puerto Vallarta. Food served aboard Continental Airlines is just fair so it's better to eat decently at the airport BEFORE boarding.

I'm glad you want to know my impressions of Mexico and thanks for asking. It's like this. The hotel was a paradise surrounded by hell. Each morning for exercise, my wife and I opted to walk outdoors instead of sweating in the gym and what we saw we hardly believed.

Immediately outside the hotel there is this main highway leading from the airport right into the tops of the surrounding mountains. Mexicans "live" along that road and to see the squalor, filth and misery is appalling. Pregnant grey haired women and pregnant young teens standing outside their thatched roofed shacks minus sanitation. Pigs and piglets running all over the place. Horses and cows pooping piles all over the "property." Flies by the millions. Guys walking up and down the road holding dead chickens for dinner. Wild dog packs running in all directions.
And of course there's the heat and humidity. Unlike HOT places like Las

Vegas and Arizona, the humidity in southwest Mexico equals the 100 degree temps.

It exceeds awful. The unemployment rate is around 45% and pregnancies abound. Why?
The Pope. Mexico is 99% Catholic and what the Pope says, goes. He visits, sees the squalor and tells them to be fruitful and multiply. And the dopes cross themselves, go home, engage in sex and produce another mouth that cannot be fed. And who's left footing the bills?
UNCLE SAM.

Why do we, you ask? We have no other choice but to continue to prop up the Mexican economy or we will have big big trouble. Take a look at a map of that country. See how it borders on CA, AZ, NM and Texas? We have major problems with illegal entry into those states but keep in mind that the illegal entry is NOT hostile. Now what do you think would happen if we left Mexico to go it alone? There would be one hell of a communist revolution because there is only a rich class and a poor class, nothing to buffer in the middle. And if that revolution came to pass, there'd be continuous illegal entry as before but this time, HOSTILE in nature.

Armed invasions and despite our power, a commie Mexico looking for a fight combined with ,for instance, a nuclear power like Red China would be the greatest crisis to ever challenge this country.

I, like millions of Americans, did not fully understand the situation south of the border. I do now. Despite a luxurious vacation in a magnificent hotel which, by the way, offered the lousiest meat and fowl I've ever tasted, I came home with an uneasy feeling which had nothing to do with the water. Vincente Fox has recently been elected after 70 years of corrupt rule by one party and whomever gets elected here in November better own up to the fact that without our aid plus a strong NAFTA, we're in for MAJOR troubles. Incidentally I was never sure why so many of our astute politicians supported NAFTA. We were told it was to create jobs here. Like hell it was-it was to prevent a communist takeover of Mexico.

Now I shall translate "La Bamba" which I heard often in Vallarta, at beach and patio parties.
Para bailar "La Bamba"(In order to dance La Bamba)
Para bailar La Bamba (in order to dance La Bamba)
Si necessita la poca de gracia(it's necessary to have a little bit of grace)
Si necessita la poca de gracia
Pa ti por mi (for you, for me)
Pa ti por mi.
Yo no soy marinero(I am not a sailor)
Yo no soy marinero
Soy capitan (I'm the captain)
Soy capitan.
Bom Bom Bomba
Bom Bom Bomba
Arriba Arriba
(repeat the whole thing)

La Bamba is an IMAGINARY dance yet the song is the national tune of Mexico(not the National Anthem). It was unknown in the USA until the mid to later '50s when a Mexican American named Ricardo Valenzuela(Richie Valens) popularized it into a #1 hit and a million plus selling single.

I must state that Mexican employees of the hotel as well as those living in the area who were on the beach(Mexico's beaches are public) were extremely pleasant and courteous but the beach vendors were rip off artists. The rate of exchange was 8.65 pesos to the dollar and when I tipped in Yankee greenbacks, they'd go wild with joy.

It was an interesting week and therefore I urge all of you to TRAVEL. The world has become smaller because of jet aircraft and to deny yourselves the pleasure of sitting in a speeding bullet, cruising at 500+ miles an hour at an altitude of 37,000 feet, in order to reach a far off destination, is shameful. This is no dress rehearsal. You go through these portals just once so get off your fat behinds and see the world. By the way I gave Tom Cruise the URL of this group and he promised to log on, however based on what I saw, he prefers logging on to Nicolle. Also Tom was born and raised in Bloomfield, NJ, just one town over from Clifton.

Doc,AF2Y

>
It seems to me that many of you are giving undue credit to Mr. H. Just exactly what jammer, that has not used his FCC callsign, has been caught by the FCC? The answer is NONE.

Now there have been some notable fools that stuck their head in the noose on purpose, such as Captain Truth of Hickory NC fame. And that idiot down in Florida that did it and got arrested of all things. Then there is Lenny the loon from Texas. You remember him eh? He's the guy with a no code Tech that decided to make 313 home. Then use his REAL CALL and tell the FCC to catch him if they can. Talk about a head on a platter.

BUT.....Not even they were popped by uncle charlie, nope, it was the good old hams on the bands, and in the area, that got sick of the crap and nailed these buffons. Even the Commie Dave is quiet now, why so? That lawyer letter sent in to Riley did the trick. My oh My. And lets not forget all the dead from the battle, on both sides.

So that brings up the question of why do I say the FCC aint done nuttin with the REAL Jammers? Simple, their still there, waiting their time. And why do you ask? Its called PROPAGATION. There ain't none.

Right now on 313, the "Red Panty Man" is still going strong, a guy using ND8V's call is calling CQ and listening on 315. And the other assorted misfits with puny signals are still trying. And every night there is some flake playing the porkbut song all up and down 75 meters. So, excuse me but your burying the jammers before their time.

I hope Riley does end all this insanity, but I just don't think its possible. I know he is trying to do a job, with basically no resources. And that most of the hams out there are willing to cooperate to save this hobby/service. But Riley is as two faced as any employee of the fed govt. He can't be sued, and he has the power behind him. So what ya gonna do, eh? Thats right...back up ten and punt. Thats what the smart guys and gals did/do. Not the idiots that still occupy 313.

These comments are mine, and mine alone. There not from Rich, there not from the Goodfellows...there from ME...Dan/W4NTI. So if you desire to flame and harass you know what direction to shoot.

Just wait till this fall. Then tell me Riley is doing it all.

You mean John Kerry looks like a Republican?
Well I think this weeks poll has Bush leading the liar(algore) by 16 percentage points. I also took a look at the electoral map and I think Bush will have almost a landslide victory in Nov. if he continues as he is now. Choke on that oh socialist tree hugger.

3644. ALL - DO NOT BUY TINY TENNA or DWM PRODUCTS!

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-29 00:00:00 UTC
From: Newswatch1 <newswatch1@my-deja.com>
Message-ID: <8lvmruln1@nnrp1.deja.com>
Source record: 106190

To All Readers:

AVOID Tiny-Tenna and buying ANYTHING from DWM communications. Not that the products themselves are bad (although many say they are!), but DWM communications is actually a terroristic organization similar to the Scientologists. If you say something they do not like publicly, they will pursue you with their lawyers, tell lies to your employer, and do everything they can to smash your reputation.

Take a look at the spamming going on in rec.radio.shortwave. All of it is originating from DWM communication staff. They are currently attempting to disrupt and destroy this newsgroup through repeated, malicious spamming.

The president of the company, Bill Lauterbach, entered r.r.s for the purpose of threatening, terrorizing and spamming the group.

If you give your personal information to DWM Communications, Inc. they will most likely abuse it, and may even give it to others! This company (that makes the "Tiny-Tenna") is UNSAFE TO BUY FROM, and if you buy from them you are risking not only your money, but your sanity and peace of mind as well!

You should note that this company also advertises freely on radio stations that promote fascist and racist material and carry such programming. This makes the company a racist organization, and if you buy from them you are supporting racism!

The "Tiny-Tenna" product is simply $5.00 worth of parts that anyone could build themselves, even a child. Yet they charge $19.95 for it, making a probably 400% markup.

Take this as a warning, and NEVER buy anything from DWM.

DWM's website can be found here:

http://www.qth.com/dwm/

Their phone number is 1-517-563-2613

Their address is: P.O. Box 87-W, Hanover, MI 49241

DO NOT ORDER FROM THIS COMPANY!! You will be risking a lot, and it is not worth it! Keep your sanity, your peace of mind and your money, and order from another company instead!

If you are wise, please contact the company and let them know how you feel about the spamming going on here! And above all, avoid ordering

from this company at all costs! It will be the biggest mistake you have ever made in your life!!!

>thing.

Without a fully equipped lab and the expertise to use it, you have
no idea if the modification you make to your radio will have an
adverse effect to other users of the spectrum. Your scanner is
covered under the CFR Part 15 regulations as an unintentional radiator,
and it DOES radiate RF. There was a case where someone's unattended
scanner was radiating enough RF to lock up a repeater some distance
away.

An innocently done "mod" to your scanner might cause havoc to any
of a number of radio services; in particular, if you reside near
an airport, use special care with what you do to your radio(s).

>Selling drugs is another.
>I would hope so, you hypocritical ass!

Look fellow, you're the one spamming this newsgroup, not DWM. If you have a problem with DWM in the rec.radio.shortwave newsgroup, then post your complaint there.

As far as I'm concerned, I would never buy anything from DWM - I have a long standing rule to never purchase anything from a company with a post office box address (they are almost always dishonest).

But, in spite of my doubts about the company, I think you're talking a big risk when you post messages with obviously libelous comments in them. Companies are very protective of their reputation and are often quick to sue when backed into a corner.

> You should note that this company also
> advertises freely on radio stations that

Companies advertise on radio stations who have an audience which is likely to buy their products. If the potential customer base is there, the company is not likely to pay too much attention to the program content.

Gee...I've been ordering through Digi-Key's PO Box for twelve years now. I'll have to inform them they're crooks.

You're still living in the olden days, NET. The Postal Service has so many rules, regs and restrictions for businesses now, its actually the legitimate ones that are using the PO Boxes! You now have to watch out for the ones using street addresses.

And DWM has a street address. I saw it on their site.

This guy is trying to spread a flame-fest over to this group from another. Last week they tried to libel Bob Grove of Grove Ent. and Monitoring Times. One of the most respected men in the ham/swl hobby. The week before that it was the Palstar people. So I think DWM is in excellent, reputable company.

3656. Current results of the Brother Stair Poll

Newsgroup: rec.radio.amateur.misc

Question 1: Is Brother Stair a True Prophet

1.) Yes, He is the Sign 2 18%
2.) No, He is fake and is a false prophet 9 82%
3.) I dont know 0 0%
4.) Is not a prophet, he is a wolf in sheeps clothing 0 0%
5.) He's just a good preacher 0 0%

Question 2: Is Brother Stair on enough SW radio?
votes percent
1.) Yes 0 0%
2.) He needs more air time on WBCQ 1 10%
3.) He need 2 Transmitters on WWCR 1 10%
4.) He just needs to shut up 8 80%
5.) He needs to DECREASE his time 0 0%

Now time to get on my soapbox and preach a little....

I knew that poll would reflect those resluts, i did it to prove a point, this is a ungodly and wicked generation. You live in sin, you goto your churches that dont preach true doctrines, your children are given into pokemon cards and this stupid harry potter books. You lift up your Chirstmas and Easter like pagan holidays and not thier purpose - to glorify Christ. You need to tune into the Prophet and 3950 Liberty Net. You let the TV rule your home, and not Christ. Be warned, God will judge this world soon.

Someone without enough guts to use a true identity drooled ..
>This guy Lloyd is an insult to the people on 3950 he hangs
>out with nightly.

Ok, Captain Courageous .. there's 2 Lloyds here. One can't get on 3950. Ever.
He retired from ham radio before he passed any test with HF privileges.

The other (being me .. posting from a true identity) gets on there
occasionally. Nightly? Hmmm .. what are you smoking, there ? ?

You have bigger problems than when / where / with whom I talk on the radio.
You apparently need to undergo some drug treatment so you won't hear me on 3950
"nightly". Once you're over that hurdle, you need to get a backbone. So you
won't have to hide behind some bogus identity.

But .. we both know you won't do either of these things. So maybe you better
go see "Prophet" Stair and let him heal you.

Hi Matthew,
The ARRL sells 2 items that will help you out. The cheaper item
is the repeater directory at $8. It'll fit in your pocket. The other
is a CDrom called "Travelplus for repeaters". It has travel maps that
show repeaters along your route.

Check out the ARRL site:

www.arrl.org

Good luck on your exam!

Tom - KB2SMS

You've got an idea there. I wonder if modems could have
intercommunicated with CW. Isn't the sound you hear
from your modem actually some form of FSK? Data?
Or is it closer in lineage to packet?

3671. Another nite of L. Net 3.950 QRM on tap?

No, it isn't.

Spreading information, with the intent to help others gain knowledge is one thing.

Selling drugs is another.

You think that someone who is doing 56 miles an hour in a 55 zone is just as bad as the one who sells drugs to your daughter, too, eh?

I would hope so, you hypocritical ass!

I personally think that you are full of sh!t.
None of the "friendlies" are QRMing the "So Called" net. I suspect that since listenership has declined dramatically and the same for participation, your motive for stirring up trouble could be to provide some of the above. I suggest you crawl back under your rock. The frequency has been in the best shape EVER, thanks to Riley.
I agree that there are still some that QRM the net. Probably always will be, but for you to "accuse" those who are *not* involved just shows one of the possible reason people dislike what is going on or being said. Your welcome to your personal opinions about anyone or anything but save the accusations for when you have something of substance to back them up with, something besides propaganda that is.

Good Grief Tim!!!

Are you actually saying that the "Kind Jewish Indian" never QRM'd 3.950?
Not even you can actually believe that.

And BTW since you have included me in your e-mail loop, how about
removing me from your "kill" list. I'd like to reply to the loop on
some of those issues.

Which brings up another point...how can you support KJI, a basic commie
and still be a right winger? Help me out will ya.

Cash4Surfing

I found this on a bulletin board and decided to try it. A little while back,I was browsing through newsgroups, just like you are now, and came across an
article similar to this that said you could make thousands of dollars within
weeks with only an initial investment of $6.00! So I thought, "Yeah right,
this must be a scam", but like most of us, I was curious, so I kept reading.
Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups.
(There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured,

"What
have I got to lose except 6 stamps and $6.00, right? "Then I invested the
measly $6.00. Well GUESS WHAT!?...Within 7 days, I started getting money

in the mail! I was shocked! I figured it would end soon, but the money just
kept coming in. In my first week, I made about $25.00. By the end of the

second week, I had made a total of over $1000.00! In the third week, I had
over $10,000.00 and it's still growing. This is now my fourth week, I have
made a total of just over $42,000.00, and it's still coming in rapidly.
Let me tell you how this works and most importantly, WHY it works.
Also, make sure you print a copy of this article NOW, so you can get the

information off of it as you need it. I promise you that if you follow the
directions exactly, that you will start making more money than you thought
possible by doing something so easy! Suggestion: Read this entire message

carefully! (Print it out or download it.) Follow the simple directions and
watch the money come in! It's easy. It's legal. And, your investment is only $6.00 (plus postage)

IMPORTANT: This is not a rip-off, it is not indecent,
it is not illegal, and it is 99% no risk - it really works! If all of the
following instructions are adhered to, you will receive extraordinary dividends.

PLEASE NOTE: please follow these directions EXACTLY, and
$50,000.00 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You
will
now become part of the Mail Order business. In this business, your product
is
not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to for quality
lists.
However, the money made from the Mailing lists is secondary to the income
which
is made from People like you and me asking to
be included in that list. Here are the 3 easy steps to success:

STEP 1: Get 6 separate pieces of paper and write your name and address plus the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING

LIST."
Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent (thievery).
Next, place one paper in each of the envelopes and seal them. You should

now have 6 sealed envelopes, each with a piece of paper stating the above
phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all.
So
I
checked it out with the U.S. Post Office 1-800-725-2161) and they confirmed that it is indeed legal.

Mail the 6 envelopes to the following address:

1. Julius Tausaga, 2006 A.Fern St. Honolulu, Hawaii 96826
2. Steve Dixon PO box 511 Fairview NC 28730
3. Dan Polzin 7409 Wallingford St. Louis Mo 63121
4. Richard East 356 Grove Ln, Murray, Kentucky 42071
5. Jack Dukeshire 2 Army St, Randolph, MA, 02368
6. Bradley McMillan, RR#4, Winchester, ON, Canada, 12541

STEP 2: Now take the #1 name off the list that you see above, move The other names up (6 becomes 5, 5 becomes 4, etc.) and Add YOUR Name as number 6 on the list.

STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money YOU make! You won't get very much unless you post like crazy. This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of

integrity, the program will continue and the money that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be

receiving thousands of dollars in CASH!!! What an opportunity for only
$6.00 ($1.00 for each of the first six people listed above) Send it
now,
add
your own name to the list and you're in business!

---DIRECTIONS----FOR HOW TO POST TO NEWSGROUPS---------
Step 1) You do not need to re-type this entire letter to do your own
posting. Simply put your cursor at the beginning of this letter, drag
your
cursor to the bottom of this document, and select 'copy' from the edit
menu.
This will copy the entire letter into the computer's memory.
Step 2) Open a blank 'notepad' file and place your cursor at the top of
the
blank page. From the 'edit' menu select 'paste'. This will paste a copy
of
the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do
your
postings in different settings, you'll always have this file to go back
to.
Step 4) Use Netscape or Internet explorer and try searching For various
newsgroups (on-line forums, message boards, chat sites, discussions.)
Step 5) Visit these message boards and post this article as a new
message
by
highlighting the text of this letter and selecting paste from the edit
menu.
Fill in the Subject, which will be the header that everyone sees as
they

Scroll through the list of postings, in a particular group. Click the
post
message button. You're done with your first one!
Congratulations. THAT'S IT! All you have to do is Jump to different
newsgroups and post away. After you get the hang of it, it will take
about
30 seconds for each newsgroup! (There is a faster way. You may use
Microsoft
Outlook or Outlook Express to select newsgroups rapidly. You just need
one
time "Copy and Paste" to send to all of them simultaneously.)
**REMEMBER,
THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE! BUT: YOU
HAVE
TO POST A MINIMUM OF 200** That's it! You will Begin receiving money
from
around the world within days! You may eventually want to rent a P.O.
Box

due
to the large amount of mail you will receive. If you wish to stay
anonymous,
you can invent a name to use, as long as the postman will deliver it.
**JUST
MAKE SURE ALL THE ADDRESSES ARE CORRECT. **Now, each of the 5 persons
who
just sent me $1.00 make the MINIMUM 200 postings, each with my name at
#5
and only 5 persons respond to each of the original 5, that is another
$25.00
for me, now those 25 each make 200 MINIMUM posts with my name at #4 and
only
5 replies each, I will bring in an additional $125.00! Now, those 125
persons turn around and post the MINIMUM 200 with my name at #3 and
only

receive 5 replies each, I will make an additional $625.00! OK, now here
is
the fun part, each of those 625 persons post a MINIMUM 200 letters with
my
name at #2 and they each only receive 5 replies, that just made me
$3,125.00!!!Those 3,125 persons will all deliver this message to 200
newsgroups with my name at #1 and if still 5 persons per 200 newsgroups
react I will receive $15,625.00! With an original investment of only
$6.00!
AMAZING! When your name is no longer on the list, you just take the
latest
postings in the newsgroups, and send out another $6.00 to names on the
list,
putting your name at number 6 again. And start posting again. The thing
to
remember is: do you realize that thousands of people all over the world
are
joining the Internet and reading these articles everyday? JUST LIKE YOU
are
now! So, can you afford $6.00 and see if it really works? I think so...
People have said, "What if the plan is played out and no one sends you
the
money? So what! What are the chances of that happening when there are
tons
of new honest users and new honest people who are joining the internet
and
newsgroups everyday and are willing to give it a try? Estimates are at
20,000 to 50,000 new users, everyday, with thousands of those joining
the
actual Internet. REMEMBER, play FAIRLY and HONESTLY and this will
really

work. The possibilities can be endless...You will never know, unless
you

give it a try... otherwise, it will always be "what if."
GOOD LUCK!

YOU'RE PAYING TOO MUCH FOR THE INTERNET!

Whoaaaaa there Dan. You calling "Kind Jewish Indian" a commie? Awwww .. come on. Surely you can't be serious. And Tim is right .. 3950 is clean as a pin (relatively speaking) since Mr. Hollingsworth showed up. There hasn't been a Tarzan Yell or a Doofus Jammer, etc in months.

Where have all the "jammers" gone
Long time passing?
Where have all the "jammers" gone
Long long time ago ..

Hey .. somebody call Peter, Paul and Mary .. we may have a hit song here.

As a matter of fact, I do own a sailboat -- it's located at Slip H-19 in the Ala Wai Harbor (practically in my "back yard" -- I'm in a 10th floor condo overlooking that harbor).

Jeff

> 1149 rec.radio.amateur.misc
> 527 rec.radio.amateur.policy ..."
>Let's see: 2505/12 is roughly 200 messages per month.

Or about 6-7 per day. And this one *single* message alone will count
as five. I notice that you append "x-no-archive: yes" to the header of
each of your articles so that no count can be made of your postings.

>I'm sure that each and every one of those was necessary ...

Conversations go back and forth; do you keep a count of the
number of verbal responses you give per day? Are each necessary?
That you've responded to me means you yourself just posted five
articles (one to each newsgroup in this new thread you've started).

Many of us on here are ham radio operators -- we're communicators --
on here that involves posting responses, and responses to responses.
Do you understand?

Now, answer the query I posed in my earlier message to you. Why do those newpaper clipping bother you so much?

In the US, you can't make such a claim until you've done a thorough
reading of both Title 47 CFR Part 15 and the Type Acceptance standards
that the FCC imposed upon the manufacturer of a particular brand and
model scanner. Without a fully-equipped lab, you have no idea if
the modification you've performed keeps your scanner within the limits
of the Type Acceptance boundries.

Just giving your scanner more channels might have an adverse effect
that you're not even aware of, yet could be causing havac with other
spectrum users.

Larry, do you read any of the research NGs in the sci hierarchy?
I contend that the exchange of many of the messages contained
in such groups do not fall into the "absolutely unnecessary"
catagory. There is a healthy exchange of ideas which further
the research of many individuals.

(Of course, you might ask if research is necessary! I suppose if
someone wants to keep their job or keep the researching funding
flowing in, then the answer is "yes.")

If your query is directed to me, several hundred of those posts are due
to the posting of FAQs and charters to the rec.radio NGs. And this single
post, written to answer your concern, will count as five posts due to you
(or someone else) x-posting it to five NGs. I'd trim it down to a single
NG if I knew which of the five groups you were on.

http://www3.sympatico.ca/aquariusr/sale1.htm

Minimum purchase $25. Purchase at least $100 worth of stuff (before
shipping costs) and get a 15% discount; purchase at least $250 worth
and instead get a 25% discount.

A friend has set up a web site for me to sell off a 28 year accumulation
of electronic components including:

Coaxial Power switch,
RF power and other transistors, RF I.C.'s,
Ceramic 455kHz and 10.7MHz filters,
Minicircuits mixers and power combiners/splitters,
variable capacitors, both panel mount shaft type and trimmer
variable inductors and coil forms, RF feedthrough and standoff capacitors,

High voltage VACUUM RELAYS, HV RECTIFIERS, resistors and capacitors,

Other capacitors including, Photoflash, polypropylenes, tantulums,

Switches, such as foot switches and industrial limit (micro) switches,
Ferrites beads and cores, Transformers and inductors,
and lots, lots more.

Bob Levitt

I don't know anything about his military service but having been in the Army and the Navy is quite possible. I have known several people that have been in more than one military service and one of them had been in the Army, Air Force, Navy and Marines.

I speak the truth. That damned Houston airport is a disgrace and I ought to know because unfortunately I have had to use it for connecting flights many times and each time is worse than the last. Furthermore from the folks I talked to while waiting for the endlessly delayed flights, they don't think George is Presidential timbre. Additionally his choice of Dick Cheney is ridiculous because the guy was a hack in his pop's administration plus the fact that he's had 3 heart attacks and quadruple bypass. And this guy will be a footstep away from the Presidency? Are you mad? On the other hand Gore's choice of John Kerry as his running mate will sew things up in November because he looks exactly like Abraham Lincoln.

I'd say that the clearing from a failed call is the proper method.
Virtually all, well most, of the users here in the mid west do that.

Clearing lets others know that you are no longer available, as many, if not
most of us know each other so if we don't connect with who ever we called we
are quite likely to receive a call from some one else.

Hence clearing is a common courtesy.

Customs vary around the country, but here that is the way it is usually
done.

Well Dan if read my post again I never said KJI did or did not jam in the past. What I said was "None of the "friendlies" are QRMing the "So Called" net." "are" being the word you should key on. Yes I'll certainly remove you from any kill list. Dan, actually i don't think that your even on it - I'll check to be sure. All I was doing Dan was stressing the fact that none of the friendlies are out to QRM the net. Yes they do have some that are, I don't know who but it isn't the ones that they continually name. I think that it's time for them to stop accusing just because of "a dislike" or "past" animosity. You know it doesn't matter who does the qrming they'
ll blame dave or one of the others in the group. I'm telling you it isn't.
flame away.

Let me tell you about a bunch of teens I met at Houston International, who flew back to Newark with me and to whom I spoke waiting for the luggage at the carousel.

So help me-they all were wearing baseball caps with "I Love Jesus" above the brims. Pretty crude, right? On the back of their T shirts I read, "Mission Possible Only through Christ" and on the front there was a cross with the words BELIZE across it.

Obviously I knew they were engaged in what I misconstrued as some type of sanctimonious folly and got to speak with a few once we deplaned at Newark. They were all from New Jersey; all members of a serious religious youth group which had just returned from the Central American country of Belize which used to be British Honduras. What were they doing there?

Helping build MEDICAL INFIRMARIES and SCHOOLS. I shook hands with quite a few and wished them the best of luck and told them they were a credit to the human race.

And so you see, not all religious zealots are loonies who support a charlatan like Brother Stair. Some use Christianity as an incentive to actually do good work to help our fellow men and women in less fortunate circumstances. I truly doubt if those teens would have any interest whatsoever in Christianity turned fraudulent as attested to by Stair, other bigoted "electrolytic" preachers, the Christian Coalition phonies and the uninformed and bigoted on this board who support that type of garbage which DETRACTS from instead of ENHANCING true Christian values.

Starting tomorrow I want to search the tube for KV4FZ at the RNC in Philly. According to him he's a delegate from the USVI but then again I thought that if someone had a criminal record, he couldn't be and couldn't vote too. At any rate I'm not sure and I forgot what Herbie looks like. Can someone fill me in? And I lost track of his ham radio status too. Was his ticket lifted by the FCC and if not, why not? This FZ affair has been with us since Grant took Richmond.
AF2Y, Doc

SB DX @ WW < KB8NW $OPDX.472
Ohio/Penn DX Bulletin No. 472

The Ohio/Penn DX PacketCluster
DX Bulletin No. 472
BID: $OPDX.472
July 31, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL, K1ZZ, WB2YQH/WB2RAJ & THE 59(9) DX Report, W3UR & The Daily DX, W4MPY, N6RT, W7WX, K8EP, K8IW, K8YSE, WB8BGY, CT1ETE, DJ5AV & DX News Letter, DJ5JH, EA3EJI, EA5XX, EU1SA, F6AJA & Les Nouvelles DX, HL0C, IK7JWX, JM1LJS, LU7BQ, SP2DX, SP2UKB, TA3J, UR7GG and Ciprian Sufitchi for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief proof-reader) and I will be going to Las Vegas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my Dad. I can really use the break! However, PLEASE continue to send your DX info to me.

3DA0, SWAZILAND. "The 59(9) DX Report" states to look for Norbert, ZS6ANL, to be active August 21-24th as 3DA0/ZS6ANL. His activity will be mostly CW. QSL to: N. Taferner, P.O. Box 6282, Homestead 1412, Rep. of South Africa.

4U1UN, UNITED NATIONS HEADQUARTERS. Fritz, DL4TT, will be in New York from now through August 27th and plans to operate from the club station 4U1UN. Operations will be mainly on CW. QSL ONLY via 4U1UN, NOT via DL4TT.

4X & E4, ISRAEL AND PALESTINE. Hide, JM1LJS/T88LJ, informs OPDX that he will be active between August 6-13th as 4X/JM1LJS and E4/JM1LJS. Activity will be on 40/30/15/10/6 meters. Sightseeing is his main goal on this trip. QSL Manger for both 4X/JM1LJS and E4/JM1LJS are via JL2XUN.

7Q, MALAWI. The "DX News Letter" reports that Harry, 7Q7HB, will be active again during the next five months. He was spotted this past weekend on 21343 kHz around 1532z. It was also mentioned that he will do the first time ever QSOs on SSTV from Malawi. QSL direct only to the CBA of G0IAS.

DXCC NEWS.....
As of July 16th, there were 801 applications and 80,217 cards out-standing. The DXCC Desk was processing mail received the third week

of May. The DXCC Desk had processed 1213 Millennium DXCC Awards processed as of July 16th.

During the second meeting of the year by the ARRL Board of Directors on July 21-22st, the following topics were announced and discussed as per the minutes by David, K1ZZ and a ARRL Bulletin:
* The 12 and 17 meter DXCC's will be added in January 2001, thus rounding out the program.
* An update on the "Electronic QSLing Project" (EQSL) will proceed with written specifications for an automated system incorporating extensive electronic security measures.
* DXCC Card Checking Program will be re-evaluated at the next Board meeting.
* The Membership Services Manager was tasked with studying the possibilities for managing a QRP DXCC.
* The MSC will be developing a set of goals and criteria to send to the Contest Advisory Committee for a study of the Club Contesting program.
* A new DXAC Chairman will be appointed soon to replace Wayne Mills, N7NG, who joined ARRL staff as the Membership Services Manager.
* The ARRL Board also okayed the expenditure of up to $1,025,000 to develop a new information technology platform for ARRL Headquarters. The new computer software and hardware not only will enhance the ARRL's e-commerce capabilities but update membership information and accounting systems. It well also eventually enable such services as electronic QSLing, member Web access to DXCC records, nearly real-time updates of DXCC listings, and expanded, detailed contest results.
* The Board also agreed to put the League's muscle behind an inter-national effort to secure a 300-kHz exclusive as signment for Amateur Radio in the vicinity of 7 MHz. The 40-meter realignment issue now is on the agenda for World Radiocommunication Conference 2003.

The minutes of the ARRL Board of Directors July meeting are available on the ARRL Web site at: http://www.arrl.org/announce/board-0007/

FM, MARTINIQUE (Change of plans). The departure for Gerard, F2JD, is delayed for one month. He will leave early in September for Martinique for 4 months. Please refer to OPDX.470.

FR/T, TROMELIN ISLAND. Just a quick reminder that the Lyon DX Group is expected to be on the air by August 1st. Operators Gil/F5NOD, Larry/F5PYI, Eric/F5PXT and Erwann/F6JJX are expected to sign FR/F6KDF/T until August 16th. Activity will be on 160-6 meters on CW, SSB and RTTY. Again, suggested frequencies are as follows:
CW - 1823.5, 3504, 7004, 10104, 14020, 18074, 21020, 24894, 28020
SSB - 3790, 7065, 14195, 18145, 21295, 24945, 28495, 50110
RTTY - 14080, 21080, 28080 kHz
QSL via F6KDF, Radio Club de la Gendarmerie, 292 route de Genas, 69677 Bron Cedex, FRANCE. For more information, check out their Web site

at: http://perso.easynet.fr/~f6jjx/menu.htm

HR, HONDURAS. A group from Spain will be active from here September 17-25th, transmitting on all HF bands, SSB, CW and RTTY operation, while installing 9 new digipeaters. This will be another DXpedition of the URE (Union de Radioaficionados de Espanoles) "RADIOSOLIDARIDAD" group. There will be 7 operators going to HR-land: Angel/EA1QF, Chema/ EB1ADG, Pere/EA3CUU, Paco/EA4BT, Tony/EA5RM, Julio/EA5XX and Belinda/ EA8NN (YL). They will operate from Tegucigalpa 24 hours day, while some of the operators will be travelling throughout the country to install the new digipeaters for packet-radio. TNCs, PCs, tranceivers, coaxial, antennas, etc, will be carried from Spain and give to the HR radio amateurs in Tegucigalpa who will be in charge to keep it working in the future. No callsigns were mentioned in the press release. The QSLs will be confirmed via EA4URE, URE's Headquarter, P.O. Box 220, Madrid 28080, Spain.

HU4, EL SALVADOR. A group of Spanish operators will be active September 17-25th as HU4U. The team will operate as time permits as they will be there to install a communications network. Look for them on all bands CW/SSB/RTTY. QSL via EA4URE.

IOTA NEWS.....
AS-085. Stro, a representative of "Hanyang University Wave Research Club" (HL0C), informs OPDX that a group will go to So-An Island (under Wan Island to the southwest of Korea) near Mokpo (Cholla South Province of South Korea between August 3rd and 9th. They will be active as HL0C/4 during their DXpedition on 40/20/15 meters CW/SSB. So-An Island also has a KDN (Korea District Number) which is H30. QSL via: Hanyang University Wave Research Club, CPO 4397, 100-643, SEOUL, KOREA. They have a Web page at: http://hl0c.hihome.com

EU-052. Look for Gerard, F2VX, to sign SV8/F2VX from Keflonia Island now through August 13th. After the contest they will be active on HF CW/SSB with their individual callsigns (DH7NO, DL2RTK, DL2SWW, DL2VFR). Pictures from last year and logs after the contest will be available at: http://www.qsl.net/dl0kwh

EU-070. Eric, F5SSM, will probably be active from Les Embiez Island August 12-19th. Be careful, this island was previously EU-095.

EU-179. Look for Oleg, UR3GA, to be active from Orlov Island (UIA BS-13). He is a local resident and will operate on all HF bands CW and SSB. QSL via UR7GG, Victor Tkachenko, P.O.BOX 73, Kherson, 73000 Ukraine.

J43, GREECE. Wolff, DJ5JH, will be active from Peloponnese with the special contest callsign J43J during the WAE Contest (CW) August 12-13th. QSL via the bureau to his home call DJ5JH.

J6, ST. LUCIA. "THE 59(9) DX REPORT" reports that Juha, OH1HX, will be active August 1-6th as J6/OH1HX. Activity will be on 20, 15 and 10 meters SSB, maybe CW.

PIRATE ALERT. Marcos, LU7BQ, informs OPDX that the station signing XQ0X/LU7BQ on 20 CW, is a pirate. He has worked only SSB for about 40 years and has never gone to XQ0. He is currently receiving a lot of QSLs, and he is so sorry for the guys wasting their geenstamps and IRCs...

QSL INFO AND NEWS.....
TX0DX, 4W/N5KO and 4W/W3UR (QSL status report by W3UR & The Daily DX):
"As of Monday, July 21, U.S direct requests covering (prefixes) letters A and K0 up to K9Z were released. The next batch covering KA0 thru N9Z will be released August 10 while the final release from N0 thru WZ9 will be made August 25th. Since the validity date and submission date of October 1, 2000 will be easily met, there is no reason for 2nd QSL nor for any other action.
Each claimed QSO is being checked while QSLs containing missing QSOs will be re-processed by early September, still meeting the October 1 submission date.
During the week of July 21, the following other countries were either released or will be released; EA, F, G, HB9, I, LA, OH, OZ, SM, VE, VK, ZL. The team is currently busy on sorting out Germany and Benelux followed by South America, Russia and Eastern Europe. Everything will be completed following the same schedule as U.S.
JA envelopes (HF) will be released during the first week of August while 50MHz cards have been released by JA1BK. Considerable extra work is experienced here since another pirate was very active toward Japan - especially working on 7 MHz and 10 MHz. Large numbers of requests on these two bands will be returned..... The following team is providing you the TX0DX/4W QSL service; OH2BN, OH2BAD, OH2BH, OH2NB, OH2RF, OH3LQK, OH9MM, JA1BK, N4GN and W3UR."

Please address QSL cards for EW5HQ only to the following address: P.O.Box 469, Minsk 220050, Belarus. This is the address of the Belarussian QSL Bureau. Please DO NOT send cards to the official address of BFRR.

W4MPY is "NOT" a QSL Manager for any station! Wayne informs OPDX that in each bureau mailing, 50% of the cards are for stations for which he has printed cards in the past. He also mentions that forwarding these QSLs gets to be expensive.

John, N7CQQ, states to "PLEASE be patient" for the Clipperton FO0AAA QSL cards. He is working on them every day.

The QSL Manager for last weekend's activation of ED3IM on Medas Island (EU-078) is not EA3CCN as announced, but was changed to Santi, EA3CKX. They report that the activity had to stopped early on Sunday morning because of bad weather predictions with the possibility of strong winds which would hamper their return.

Jean Michel, F6AJA, reports that all PY0F/PY2ZDX direct requests are on their way.

F5TXM, F5TRO, FB1BON, F4BHZ were active as F5TXM/P from Noirmoutier Island (EU-064) during the IOTA Contest. QSL via FB1BON.

GM5C was activated by the Crocodile Rock Amateur Group from the "Isle of Great Cumbrae" (IOTA EU-123) during the IOTA Contest. QSL Manager is GM0DEQ.

IK7LMX/P from Pedagna Island (EU-091) was activated by the "Salento DX Team". QSL to homecall via the bureau or direct via HCA (qrz.com).

Doug, N6RT, reports that the final 7P8AA log is now available online at: http://dx.qsl.net/logs

The PZK Headquarters Station SN0HQ, which took part in the recent IARU Contest, will mail QSL cards in approx. 2 months. QSL via SP2PI CBA or via the PZK QSL Bureau. The PZK Headquarters will have a new address starting August 1st. QSL cards to Poland should be send to the following address: PZK Central QSL Bureau, P.O. Box 54, 85-613 Bydgoszcz 13, Poland.

QSL cards for TA3J, on July 26, 2000, were sent to the QSL bureaus of Bulgaria, Latvia, Brazil, Luxembourg, Estonia, Belarus, Ireland, Lithuania, Israel, Kuwait, Portugal, Finland, Croatia, Sweden, Norway, Romania, Slovakia, Japan, Greece, Belgium, Slovenia, Denmark, Hungary, Switzerland and Netherlands. QSL cards were also sent on July 28, 2000, to the QSL bureaus of the USA, Germany and United Kingdom.

Paulo, CT1ETE, reports to OPDX that a new Web Site is available which displays QSLs in a photo album (along with Database) for hams to view. He asks hams worldwide to send him your QSL in JPEG format (about 360x250; 24/16 million colors; size between 20k and 35k). The site also has a Ham Forum where individuals can start discussion threads. The Web site is at: http://www.qsl.net/ct1ete
Any suggestions are welcome via his E-mail address at: ct1ete@qsl.net

SPECIAL EVENT. The Ukrainian special event station EM500E will be active in August on all bands and modes to celebrate the 500th Anniversary of the "Cossack's Glory". QSL via UR4EYN or UR4EN.

SPECIAL EVENT. The Western New York DX Association will operate special event callsign K2L during the period August 7-20th in conjunction with the Buffalo (New York) Harborfest and culminating with operations from the Buffalo Lighthouse during the Lighthouse/Lightship Activity Weekend August 19-20th. During the August 7-18 period, activity will be on CW, SSB, RTTY and PSK31 on all bands, including WARC. During August 19-20th, activity will be on CW and SSB from the lighthouse. A special photo QSL will be available for QSLs requested direct. QSL via WB2YQH, P.O. Box 73, Spring Brook, NY 14140 with SAE/SASE. All DX QSOs will be QSLed automatically via the bureau.

WORLD TRAVELER/DXER PETER. Peter, ON6TT, currently 9A/ON6TT, informed the DX community that after being based in Kosovo for the UNWFP since February, he is moving his base to Pakistan. He plans to start setting up shop in Islamabad as of November. Peter expects to stay there for probably the next 4 years and will try to build up a station again, as he did from 5X1T (Uganda). He is sure the location will be more challenging than in Africa to work pileups. He states Mario, 5X1C, has recently joined his team and will be based in Islamabad also. Peter adds that his upcoming business trip is not only taking him to Pakistan, but to Laos, Sri Lanka, Indonesia, East Timor, Thailand, Bhutan, Cambodia and India. He is still looking for E-mail contacts of active DXers in Sri Lanka, Cambodia, and Laos (for the latter 2, any licensing information would be welcome). If you can help, Peter's E-mail address is: Home.Peter.Casier@wfp.or.ug He will only stay a week "max" in each of those places, so he will only be active after work but with no special activity nor a large scale operation.

XX9, MACAU. Ed, K8EP, will be travelling here and will operate as XX9TEP from August 17-21st. His operation will be CW/SSB on 160-10 meters. He mentions that he will be in the SEANET contest as well. QSLs to K8EP at his new Buckmaster address: Ed Sawyer, 14 Greycrest Pl, Woodlands, TX 77382.

YO DX HF CONTEST. Romanian amateurs want to remind everyone to not forget to try your skills operating in YODX HF Contest 2000, on August 6th. It runs for 20 hours (0000-2000 UTC) and it is recommended to work YO counties. Activity will be on 3.5 to 28 MHz bands CW/SSB. An ITU exchange will be used for DX stations and YO County for YO station. Logs are sent to: Romanian Amateur Radio Federation, P.O. Box 22-50; R - 71100 Bucuresti, Romania (or E-mail to: yo3kaa@pcnet.pcnet.ro). Full details on the rules are available on the Web at: http://www.qsl.net/yo3kaa

What kind of lifespan do you expect the alternator to have? If you are still running the stock electrical system you are overstressing the alt/volt reg. Most stock electrical systems are in the 60-80 amp range, and you will be pulling that just with the amp and radio running. Leaving nothing to charge the battery, or power the ignition system and acc. You better think about buying a high capacity alterantor like welders or the guys with high power audio use. Get something that can put out 150-180 amps while running cool.

You may find your cw signal gets a cleaner tone with the voltage not dropping as you key. No more people hearing doweep doweep tones instead of dah dah.
thanks, John.

Running scared, Doc? If Gore is so wonderful, why do you feel the need to defend him? Or, if he is so sure to win (as you claim), why do you feed the need to "set the record straight" about him? It sounds to me like you're the one who is not so sure about Gore. Of course, I'm sure you feel some loyality to him for creating the internet, but even you might have to eventually jump a sinking ship (look, you're all wet already).

Dwight Stewart (W5NET)

Well let me take aim Dan. First of all the "civility" that exists on 3950 now is a "direct" result of Riley's efforts. Not yours theiers of anyone else's. No one else has the authority to have an effect. secondly there have been several caught that did not give a call. their name and calls escape me right now but when it happened I did make a mental note that it was a couple that weren't using callsigns. I'll get them if you like. these I am speaking of are just from 75, I'm sure that there's more that have been warned/shut down on the other bands.
Anyway your opinion of Riley doesn't negate the obvious results of his work.

This is a true statement, at least when applied to the no-call Liberty Net jammers.
Here we have the most consistently jammed net in amateur radio, and the FCC feigns ignorance about the jamming, even with millions of dollars of high-tech DF equipment. Amazing, isn't it?

I've said this before and I will say it again.
It's my guess that the Clinton Administration has told the FCC to look the other way when the Liberty Net is jammed. I can just see some Clinton-appointed FCC boss listening to all the jamming and laughing his ass off.

If Bush gets elected, maybe this will change .... maybe.

"Political Correctness is nothing but tyranny with manners."

Believe it or not, the Hayes 1200B modems came with morse code ability. Look in one of the appendices. I think one could take the modem "off-hook" by issuing ATH2, which put the modem in "transmit mode" (and shorted the second pair of wires together), and then periods and dashes sent to it came out as code. At the end of the transmission, one had to issue a special command to keep it "off-hook" but otherwise disconnect it (i.e. "receive mode"). Too bad that it didn't actually receive the code too.

You act as though Clinton gives a damn about the net. I would think not. It's not that important to Clinton.
besides if they WERE looking the other way as you imply - where did all of the warnings and citations come from?
Let's see two to W1WCR, two to wa9kji, 1 to blb, 1 to n8wgm one to an unID in Minnesota, and I'm sure that I'm missing a few. I guess they were all issued because the (the FCC) was LQQKing the other way.

KK7HO is dead wrong ..
>You act as though Clinton gives a damn about the net. I would think not. It's
>not that important to Clinton.

Hang on, there Timmy. You know good and well that the late K5ZU reported to us all that President Clinton listens to 3950 all the time. Especially to The Great Liberty Net.

Yyyyyouuuu people make me siiiiickkkk.
You come in here.
You don't know what you're talking about.
You say President Clinton doesn't listen to 3950.
You don't have a job.
You live with your mama.
You're going to jail.
In Arkansas.

Fully 480 of them are due to the posting of the monthly FAQs and charters.
I'd gladly turn that duty over to you, if you promise to maintain those
documents to the fullest extent possible.

>I'm sure that each and every one of those was necessary ...

At least 480 of 'em are. That leaves 725 -- less than 2 posts per day.

Jeff

Re-read my comments, I never said Clinton HIMSELF (gag) was interested in the Liberty Net, he's been too busy cheating on his wife and committing treason against the United States. Rather, I suspect some zealous left-wing subordinate. Of course I can't prove this, it's just a suspicion based on the FCC's strange selective enforcement on 3950.

All those cited hams you mentioned were all easily identifiable by their call sign or on-the-air voices. It's the no-call noise and music jammers of the Liberty Net that have never been caught. The FCC had to do something about the jammers of the Liberty Net who gave their call signs, it would be too obvious if they didn't.

The Liberty Net is always good except for K4GAR. I'd rather hear jamming instead of K4GAR. I am embarrased for the Liberty Net whenever that motormouth gets on.

Too bad the Liberty Net isn't on Saturday afternoons. I could mow the lawn or go grocery shopping when K4GAR begins his transmission, and yet be done in time to hear the tail end of his transmission.

After purchasing the Rigblaster interface and CD, I discovered (much to my dismay) that my computer's PCI Sound Blaster Live! sound card simply did not mix with the Blaster Teletype program on the CD-ROM. I tried loading the Sound Blaster 16 emulator program, and discovered the PCI Live doesn't imitate the ISA SB16 close enough. Also, the printer and the SB Live emulator prog. both use 'shared resources' which causes the RTTY prog. to 'decode' garbage onto my screen. Does anyone know how to fix this annoying glitch?

"John Bombard" <flyboy4097@home.com> wrote
> I know this probably sounds stupid as well as disrespectful, but WHO THE
> HECK IS THIS GUY?

This question is often asked, here is the standard response below.

Bill Cheek was a man who lived near San Diego. He used to be active on
Fidonet but then had
to leave due to reasons we won't speak of now. He then became active on
this NG & the
internet but was again involved in much trouble. Various problems with Mr.
Cheek's action's
resulted in Peter Laws kicking him off of the "Scan-L" mailing list. More
similar problems with
Mr. Cheek caused him to have his internet access revoked by his Cable
company
ISP in summer 1998. In 1999 he was briefly held by (federal) authorities
and has
been charged in (federal) courts with various illegal actions in regards
sales for the use
of scanners. (He had admitted to other legal problems in the past, also) He
was the owner
& operator of a company called "Comtronics" & has produced a few books based
on
information he had complied from various sources.

Despite various rumors, Mr. Cheek did NOT have any FCC issues licenses
within
the last 15 years.

Mr. Cheek claimed to have been in the Army, others said he had been in Navy.
His
rank or billet is unknown.

Mr. Cheek was well known by many for various reasons in the radio community.
Some
people feel his technical knowledge was notable, some people feel certain
aspects of his
personality were notable.

Due to mounting legal problems followed by health problems, in 1999 a
donation request was
made to the general public to assist Mr. Cheek who had no health insurance.
His legal issues

were being addressed by a public defender.

Mr. Cheek was a smoker and died in July 2000 due to complications of Lung and Brain Cancer.

He is survived by his wife Cindy and his children.

Mr. Cheek will be missed.

I didn't say that all such companies are dishonest. I said they are "almost always dishonest." That does leave some room for the few that are honest (but not much).

> You're still living in the olden days, NET. The Postal Service has so
> many rules, regs and restrictions for businesses now, its actually the
> legitimate ones that are using the PO Boxes! You now have to watch out
> for the ones using street addresses.

I don't agree with that. It's just as easy today to get a post office box under an assumed name and fake address as it was anytime in the recent past (and its been a very common problem over the years).

Actually, I do understand that some companies would prefer to have mail sent to a post office box instead of another address, but that is not really a problem. Since the post office always delivers to the address just above the last line (just above the city, state, and zip), the company can put the street address on the second line, with the post office box info on the third line (just above the city, state, and zip). That puts the street address up front where it can be easily seen, but still gets the mail delivered to the post office box.

So, since it is that easy, it is suspicious when a street address is not included.

However, you're right. DWM has a street address listed on one of their pages (their policy page under their repair policies).

Well said John!!! No matter what a person thinks about someone, wou
would think that people could at least show a little respect or
compassion when someone passes on!

Great job

Garry

I admit still having mixed emotions about clearing after a failed call, but most of the comments I received after posting my initial 2m operations overview seemed to feel it was unnecessary. Here in the metro Atlanta area it's a mixed bag, some hams clear after a failed call and others don't. Clearing, either after a conversation or a call, is generally not taken to indicate that the station is going completely off-the-air, so call backs by other hams seem to be happening just as frequently since I've dropped the habit.

RfComm-Guy is on target ..
>The Liberty Net is always good except for

Well RF, there's maybe 1 or 2 more that get off track at times, but overall, the Great Liberty Net is a winner. If we are to remain objective, we mustn't let a bad apple or 2 spoil the barrel.

And (don't tell anyone .. but ..) I even agree with "Prophet" Davies on N8WGM. Mr. Tunder is a true gentleman. And he ALWAYS articulates his point well. That's my story and I'm stickin' to it. Agree or disagree .. love him or hate him .. you gotta agree he states his case clearly and politely.

3757. FS:SMA-TO-BNC ADAPTER

Due you have a need for an SMA-TO-BNC antenna adapter that is custom
made to fit and protect your H.T. or scanner radio?

Adapter allows you to:
Quickly change your antennas to base,mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to always
having to change antennas.

Adapter features:
Gold contacts with teflon insulation.
A low profile design with a rubber covering for a factory antenna look.
The base seals to the top of the radio with no spacers needed for
moisture and dirt protection.
The base also provides an excellent support for all your antenna
applications.
No need to remove to make any antenna changes.

Sizes-to-fit-radio-models:
Yaesu: VX-5,VX-1,VX-10,FT-50-R
Icom: IC-R2,IC-T8A,IC-T81A,IC-Q7A
Kenwood: TH-D7,TH-G71
Alinco: DJ-V5
Standard: C508A,C510A
Radio Shack: HTX-200,HTX-400,HTX-245
Aor: AR-16

Previewed in the May 2000 issue of CQ Magazine.

$11.95 + $1.50 S+H (One to unlimited)
(Check or money order only)

That's not what I mean, you dirty minded scoundrels. I'm talking about the campaign versus Victor Laszlo for the Senate and the latest polls show that her anti-Semitic slur is costing her dearly. The carpetbagging conniving opportunistic louse who, unlike any decent woman wouldn't, decided to stick with her husband after the worst sexual escapades by any President who was ever caught, is now TRAILING Lazio by SEVEN PERCENTAGE POINTS thanks to mass defections by Jewish voters. And before anyone comes up with a nasty remark about Jews or Jewish voters, remember that you would feel the same way had the louse used a highly perjorative term against any denomination of Christianity.

Joe, this question is often asked, here is the standard response below.

Author: John Mackey, Jr (jmackey@usaXXX.net)
Amateur Radio Extra Class call sign KS0F

Bill Cheek was a man who lived near San Diego. He used to be active on
Fidonet but then had to leave due to reasons we won't speak of now. He
then became active on this NG & the internet but was again involved in
much trouble. Various problems with Mr. Cheek's action's
resulted in Peter Laws kicking him off of the "Scan-L" mailing list. More
similar problems with Mr. Cheek caused him to have his internet access
revoked by his Cable company ISP in summer 1998. In 1999 he was briefly
held by (federal) authorities and has been charged in (federal) courts with
various illegal actions in regards sales for the use of scanners. (He had
admitted to other legal problems in the past, also) He was the owner
& operator of a company called "Comtronics" & has produced a few books
based on information he had complied from various sources.

Despite various rumors, Mr. Cheek did NOT have any FCC issued licenses
within the last 15 years.

Mr. Cheek claimed to have been in the Army, others said he had been in Navy.
His rank or billet is unknown.

Mr. Cheek was well known by many for various reasons in the radio community.
Some people feel his technical knowledge was notable, some people feel
certain aspects of his personality were notable.

Due to mounting legal problems followed by health problems, in 1999 a
donation request was made to the general public to assist Mr. Cheek who
had no health insurance. His legal issues were being addressed by a public
defender.

Mr. Cheek was a smoker and died in July 2000 due to complications of Lung
and Brain Cancer.

He is survived by his wife Cindy and his children.

Mr. Cheek will be missed.

KK7HO reports ..
>algore is 16 percentage points behind.

Well, is that good or bad? Or is it a wash? It's probably the latter. In past years, there has sometimes been a choice between the lesser of 2 evils.

This time it looks like a choice between the equal of 2 evils. Check out the link and see what you think. Scroll down to "Bush or Gore .. Does It Matter?"

Time and Time again the major point about Wacko Waco is simple this.
Koresh had only to submit to the proper authorites to have avoided the deaths
of all those innocent people. But then again, if you"re Jesus Christ I guess
you don"t have to.Do we have to endure another Oklahoma City before peope
realize that he was NUTZ.? Enough already.

3775. af2y to visit the RNC in Philly ?

Newsgroup: rec.radio.amateur.misc

Source record: 106257

Hey Doc: (or as we used to day in Philly: Yo Doc!)

What's your take on the Republican National Convention in Philly?

I think you should go to Philadelphia sometime this week to represent Amateur Radio, at the RNC, as "Ham Radio's Man-in-the-Street" - complete with a 2 meter HT and a Callsign Nametag. (try 146.685 or 147.030 two of Philadelphia's more popular 2-M Repeaters)

I'd * love * to see you make an interview on
CNN or one of the other national networks that are ALL OVER the city
right now like white-on-rice, with yer callsign on your
hat or on a namebadge! All you need is a suit or casual
dockers wear, and media is all over you. I counted more camera
crews downtown doing man-on-the-street interviews today
that during the last pro-sports parade.

While your there be sure to dine at Old
Original Bookbinders downtown.

The way I look at it, in this modern age with all the choices, people who are concerned about their
communication being understood over airwaves, should take their own responsibility and encrypt their
information instead of relying on us (the scanner people) to have our devices crippled.

I would think the problem would be sitting that close to an antenna
putting out that much power.

Any malfunctions can be corrected (computer reset) by disconnecting the battery for a few minutes. Also if you go out of your way to isolate your wires/cable with rf shield sold at any good shop, you'll minimize any potential problems. (I have a 99 Toyota prerunner)..... FYI

As a resident of Texas for the past 25 years and living in a predominantly republican district, I am hard pressed to find anyone who will admit to having voted for George W. The state constitution makes the Texas governor weak and with little power beyond that of a figurehead. The Lt. Gov is the guy who runs the state and directs the legislature.
George is just little more than a dope.

3794. Re: af2y to visit the RNC in Philly ?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-30 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m28jd$91f$1@slb7.atl.mindspring.net>
Source record: 106276

Hey man, thanks for the computer shout.

Philly is a boring city. My daughter practice taught in a suburb of it after graduation and we used to visit from time to time. Narrow streets filled with narrow minds and lousy eateries. Yuch, I can't think of a more suitable place for the Elephant lovers. Sorry to be so blunt expecially upon knowing you're a Filthydelphian but I don't beat around the Bush.

Speaking of you know what and whom, he and "Chains" will come out of that RNC smelling like roses with the polls showing a sure victory in November. And with KV4FZ running loose with placards, how can GeeDubYa lose?
He will because he had it sewn up too soon. Daddy's boy with lots of dough. A sure thing. Can't miss.

Al Gore will tear him a new one in the debates which "DubYa" will try to avoid. Georgie will prove no match for Alfie because Georgie is nothing more than a "Quaylster" with gray hair.

I should be a ham on the street doing interviews? Even if I had the chance, no way because the only good Republican I've seen in a long time was John McCain and he was tossed aside. These GOPsters are pains in the asses who don't give a
flying you know what about the average working man. They care nothing about healthcare reform as long as they have theirs. They care nothing about providing medicine at reasonable costs as long as they can afford them. They stress anti-abortion because it's all they have and yet try to pass everyone else off as murderers.

It's the party of exclusion instead of inclusion and for this country to function, we must have inclusion. I care about my fellow man because we are all connected which to some makes me a liberal. That's fine with me-I'm proud of it.
Give me Al Gore anytime and he's gonna be our next Prez. I promise.
Doc,AF2Y

>Dick - N0BK

Julius Caesar was dead for a long time before Mozart was even born. So what's your point?

SB DX @ WW < KB8NW $OPDX.472
Ohio/Penn DX Bulletin No. 472

The Ohio/Penn DX PacketCluster
DX Bulletin No. 472
BID: $OPDX.472
July 31, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL, K1ZZ, WB2YQH/WB2RAJ & THE 59(9) DX Report, W3UR & The Daily DX, W4MPY, N6RT, W7WX, K8EP, K8IW, K8YSE, WB8BGY, CT1ETE, DJ5AV & DX News Letter, DJ5JH, EA3EJI, EA5XX, EU1SA, F6AJA & Les Nouvelles DX, HL0C, IK7JWX, JM1LJS, LU7BQ, SP2DX, SP2UKB, TA3J, UR7GG and Ciprian Sufitchi for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for August 14th and 21st. I know, you heard this before, but it is true this time. My wife (chief proof-reader) and I will be going to Las Vegas (without the young adults) for our 25th wedding anniversary (How did she put up with me all these years?) and to visit my Dad. I can really use the break! However, PLEASE continue to send your DX info to me.

3DA0, SWAZILAND. "The 59(9) DX Report" states to look for Norbert, ZS6ANL, to be active August 21-24th as 3DA0/ZS6ANL. His activity will be mostly CW. QSL to: N. Taferner, P.O. Box 6282, Homestead 1412, Rep. of South Africa.

4U1UN, UNITED NATIONS HEADQUARTERS. Fritz, DL4TT, will be in New York from now through August 27th and plans to operate from the club station 4U1UN. Operations will be mainly on CW. QSL ONLY via 4U1UN, NOT via DL4TT.

4X & E4, ISRAEL AND PALESTINE. Hide, JM1LJS/T88LJ, informs OPDX that he will be active between August 6-13th as 4X/JM1LJS and E4/JM1LJS. Activity will be on 40/30/15/10/6 meters. Sightseeing is his main goal on this trip. QSL Manger for both 4X/JM1LJS and E4/JM1LJS are via JL2XUN.

7Q, MALAWI. The "DX News Letter" reports that Harry, 7Q7HB, will be active again during the next five months. He was spotted this past weekend on 21343 kHz around 1532z. It was also mentioned that he will do the first time ever QSOs on SSTV from Malawi. QSL direct only to the CBA of G0IAS.

DXCC NEWS.....
As of July 16th, there were 801 applications and 80,217 cards out-

standing. The DXCC Desk was processing mail received the third week of May. The DXCC Desk had processed 1213 Millennium DXCC Awards processed as of July 16th.

During the second meeting of the year by the ARRL Board of Directors on July 21-22st, the following topics were announced and discussed as per the minutes by David, K1ZZ and a ARRL Bulletin:
* The 12 and 17 meter DXCC's will be added in January 2001, thus rounding out the program.
* An update on the "Electronic QSLing Project" (EQSL) will proceed with written specifications for an automated system incorporating extensive electronic security measures.
* DXCC Card Checking Program will be re-evaluated at the next Board meeting.
* The Membership Services Manager was tasked with studying the possibilities for managing a QRP DXCC.
* The MSC will be developing a set of goals and criteria to send to the Contest Advisory Committee for a study of the Club Contesting program.
* A new DXAC Chairman will be appointed soon to replace Wayne Mills, N7NG, who joined ARRL staff as the Membership Services Manager.
* The ARRL Board also okayed the expenditure of up to $1,025,000 to develop a new information technology platform for ARRL Headquarters. The new computer software and hardware not only will enhance the ARRL's e-commerce capabilities but update membership information and accounting systems. It well also eventually enable such services as electronic QSLing, member Web access to DXCC records, nearly real-time updates of DXCC listings, and expanded, detailed contest results.
* The Board also agreed to put the League's muscle behind an international effort to secure a 300-kHz exclusive as signment for Amateur Radio in the vicinity of 7 MHz. The 40-meter realignment issue now is on the agenda for World Radiocommunication Conference 2003.

The minutes of the ARRL Board of Directors July meeting are available on the ARRL Web site at: http://www.arrl.org/announce/board-0007/

FM, MARTINIQUE (Change of plans). The departure for Gerard, F2JD, is delayed for one month. He will leave early in September for Martinique for 4 months. Please refer to OPDX.470.

FR/T, TROMELIN ISLAND. Just a quick reminder that the Lyon DX Group is expected to be on the air by August 1st. Operators Gil/F5NOD, Larry/F5PYI, Eric/F5PXT and Erwann/F6JJX are expected to sign FR/F6KDF/T until August 16th. Activity will be on 160-6 meters on CW, SSB and RTTY. Again, suggested frequencies are as follows:
CW - 1823.5, 3504, 7004, 10104, 14020, 18074, 21020, 24894, 28020
SSB - 3790, 7065, 14195, 18145, 21295, 24945, 28495, 50110
RTTY - 14080, 21080, 28080 kHz
QSL via F6KDF, Radio Club de la Gendarmerie, 292 route de Genas,

69677 Bron Cedex, FRANCE. For more information, check out their Web site at: http://perso.easynet.fr/~f6jjx/menu.htm

HR, HONDURAS. A group from Spain will be active from here September 17-25th, transmitting on all HF bands, SSB, CW and RTTY operation, while installing 9 new digipeaters. This will be another DXpedition of the URE (Union de Radioaficionados de Espanoles) "RADIOSOLIDARIDAD" group. There will be 7 operators going to HR-land: Angel/EA1QF, Chema/EB1ADG, Pere/EA3CUU, Paco/EA4BT, Tony/EA5RM, Julio/EA5XX and Belinda/EA8NN (YL). They will operate from Tegucigalpa 24 hours day, while some of the operators will be travelling throughout the country to install the new digipeaters for packet-radio. TNCs, PCs, tranceivers, coaxial, antennas, etc, will be carried from Spain and give to the HR radio amateurs in Tegucigalpa who will be in charge to keep it working in the future. No callsigns were mentioned in the press release. The QSLs will be confirmed via EA4URE, URE's Headquarter, P.O. Box 220, Madrid 28080, Spain.

HU4, EL SALVADOR. A group of Spanish operators will be active September 17-25th as HU4U. The team will operate as time permits as they will be there to install a communications network. Look for them on all bands CW/SSB/RTTY. QSL via EA4URE.

IOTA NEWS.....
AS-085. Stro, a representative of "Hanyang University Wave Research Club" (HL0C), informs OPDX that a group will go to So-An Island (under Wan Island to the southwest of Korea) near Mokpo (Cholla South Province of South Korea between August 3rd and 9th. They will be active as HL0C/4 during their DXpedition on 40/20/15 meters CW/SSB. So-An Island also has a KDN (Korea District Number) which is H30. QSL via: Hanyang University Wave Research Club, CPO 4397, 100-643, SEOUL, KOREA. They have a Web page at: http://hl0c.hihome.com

EU-052. Look for Gerard, F2VX, to sign SV8/F2VX from Keflonia Island now through August 13th. After the contest they will be active on HF CW/SSB with their individual callsigns (DH7NO, DL2RTK, DL2SWW, DL2VFR). Pictures from last year and logs after the contest will be available at: http://www.qsl.net/dl0kwh

EU-070. Eric, F5SSM, will probably be active from Les Embiez Island August 12-19th. Be careful, this island was previously EU-095.

EU-179. Look for Oleg, UR3GA, to be active from Orlov Island (UIA BS-13). He is a local resident and will operate on all HF bands CW and SSB. QSL via UR7GG, Victor Tkachenko, P.O.BOX 73, Kherson, 73000 Ukraine.

J43, GREECE. Wolff, DJ5JH, will be active from Peloponnese with the special contest callsign J43J during the WAE Contest (CW) August 12-13th. QSL via the bureau to his home call DJ5JH.

J6, ST. LUCIA. "THE 59(9) DX REPORT" reports that Juha, OH1HX, will be active August 1-6th as J6/OH1HX. Activity will be on 20, 15 and 10 meters SSB, maybe CW.

PIRATE ALERT. Marcos, LU7BQ, informs OPDX that the station signing XQ0X/LU7BQ on 20 CW, is a pirate. He has worked only SSB for about 40 years and has never gone to XQ0. He is currently receiving a lot of QSLs, and he is so sorry for the guys wasting their geenstamps and IRCs...

QSL INFO AND NEWS.....
TX0DX, 4W/N5KO and 4W/W3UR (QSL status report by W3UR & The Daily DX):
"As of Monday, July 21, U.S direct requests covering (prefixes) letters A and K0 up to K9Z were released. The next batch covering KA0 thru N9Z will be released August 10 while the final release from N0 thru WZ9 will be made August 25th. Since the validity date and submission date of October 1, 2000 will be easily met, there is no reason for 2nd QSL nor for any other action.
Each claimed QSO is being checked while QSLs containing missing QSOs will be re-processed by early September, still meeting the October 1 submission date.
During the week of July 21, the following other countries were either released or will be released; EA, F, G, HB9, I, LA, OH, OZ, SM, VE, VK, ZL. The team is currently busy on sorting out Germany and Benelux followed by South America, Russia and Eastern Europe. Everything will be completed following the same schedule as U.S.
JA envelopes (HF) will be released during the first week of August while 50MHz cards have been released by JA1BK. Considerable extra work is experienced here since another pirate was very active toward Japan - especially working on 7 MHz and 10 MHz. Large numbers of requests on these two bands will be returned..... The following team is providing you the TX0DX/4W QSL service; OH2BN, OH2BAD, OH2BH, OH2NB, OH2RF, OH3LQK, OH9MM, JA1BK, N4GN and W3UR."

Please address QSL cards for EW5HQ only to the following address: P.O.Box 469, Minsk 220050, Belarus. This is the address of the Belarussian QSL Bureau. Please DO NOT send cards to the official address of BFRR.

W4MPY is "NOT" a QSL Manager for any station! Wayne informs OPDX that in each bureau mailing, 50% of the cards are for stations for which he has printed cards in the past. He also mentions that forwarding these QSLs gets to be expensive.

John, N7CQQ, states to "PLEASE be patient" for the Clipperton FO0AAA QSL cards. He is working on them every day.

The QSL Manager for last weekend's activation of ED3IM on Medas Island (EU-078) is not EA3CCN as announced, but was changed to Santi, EA3CKX. They report that the activity had to stopped early on Sunday morning because of bad weather predictions with the possibility of strong winds which would hamper their return.

Jean Michel, F6AJA, reports that all PY0F/PY2ZDX direct requests are on their way.

F5TXM, F5TRO, FB1BON, F4BHZ were active as F5TXM/P from Noirmoutier Island (EU-064) during the IOTA Contest. QSL via FB1BON.

GM5C was activated by the Crocodile Rock Amateur Group from the "Isle of Great Cumbrae" (IOTA EU-123) during the IOTA Contest. QSL Manager is GM0DEQ.

IK7LMX/P from Pedagna Island (EU-091) was activated by the "Salento DX Team". QSL to homecall via the bureau or direct via HCA (qrz.com).

Doug, N6RT, reports that the final 7P8AA log is now available online at: http://dx.qsl.net/logs

The PZK Headquarters Station SN0HQ, which took part in the recent IARU Contest, will mail QSL cards in approx. 2 months. QSL via SP2PI CBA or via the PZK QSL Bureau. The PZK Headquarters will have a new address starting August 1st. QSL cards to Poland should be send to the following address: PZK Central QSL Bureau, P.O. Box 54, 85-613 Bydgoszcz 13, Poland.

QSL cards for TA3J, on July 26, 2000, were sent to the QSL bureaus of Bulgaria, Latvia, Brazil, Luxembourg, Estonia, Belarus, Ireland, Lithuania, Israel, Kuwait, Portugal, Finland, Croatia, Sweden, Norway, Romania, Slovakia, Japan, Greece, Belgium, Slovenia, Denmark, Hungary, Switzerland and Netherlands. QSL cards were also sent on July 28, 2000, to the QSL bureaus of the USA, Germany and United Kingdom.

Paulo, CT1ETE, reports to OPDX that a new Web Site is available which displays QSLs in a photo album (along with Database) for hams to view. He asks hams worldwide to send him your QSL in JPEG format (about 360x250; 24/16 million colors; size between 20k and 35k). The site also has a Ham Forum where individuals can start discussion threads. The Web site is at: http://www.qsl.net/ct1ete
Any suggestions are welcome via his E-mail address at: ct1ete@qsl.net

SPECIAL EVENT. The Ukrainian special event station EM500E will be active in August on all bands and modes to celebrate the 500th Anniversary of the "Cossack's Glory". QSL via UR4EYN or UR4EN.

SPECIAL EVENT. The Western New York DX Association will operate special event callsign K2L during the period August 7-20th in conjunction with the Buffalo (New York) Harborfest and culminating with operations from the Buffalo Lighthouse during the Lighthouse/Lightship Activity Weekend August 19-20th. During the August 7-18 period, activity will be on CW, SSB, RTTY and PSK31 on all bands, including WARC. During August 19-20th, activity will be on CW and SSB from the lighthouse. A special photo QSL will be available for QSLs requested direct. QSL via WB2YQH, P.O. Box 73, Spring Brook, NY 14140 with SAE/SASE. All DX QSOs will be QSLed automatically via the bureau.

WORLD TRAVELER/DXER PETER. Peter, ON6TT, currently 9A/ON6TT, informed the DX community that after being based in Kosovo for the UNWFP since February, he is moving his base to Pakistan. He plans to start setting up shop in Islamabad as of November. Peter expects to stay there for probably the next 4 years and will try to build up a station again, as he did from 5X1T (Uganda). He is sure the location will be more challenging than in Africa to work pileups. He states Mario, 5X1C, has recently joined his team and will be based in Islamabad also. Peter adds that his upcoming business trip is not only taking him to Pakistan, but to Laos, Sri Lanka, Indonesia, East Timor, Thailand, Bhutan, Cambodia and India. He is still looking for E-mail contacts of active DXers in Sri Lanka, Cambodia, and Laos (for the latter 2, any licensing information would be welcome). If you can help, Peter's E-mail address is: Home.Peter.Casier@wfp.or.ug He will only stay a week "max" in each of those places, so he will only be active after work but with no special activity nor a large scale operation.

XX9, MACAU. Ed, K8EP, will be travelling here and will operate as XX9TEP from August 17-21st. His operation will be CW/SSB on 160-10 meters. He mentions that he will be in the SEANET contest as well. QSLs to K8EP at his new Buckmaster address: Ed Sawyer, 14 Greycrest Pl, Woodlands, TX 77382.

YO DX HF CONTEST. Romanian amateurs want to remind everyone to not forget to try your skills operating in YODX HF Contest 2000, on August 6th. It runs for 20 hours (0000-2000 UTC) and it is recommended to work YO counties. Activity will be on 3.5 to 28 MHz bands CW/SSB. An ITU exchange will be used for DX stations and YO County for YO station. Logs are sent to: Romanian Amateur Radio Federation, P.O. Box 22-50; R - 71100 Bucuresti, Romania (or E-mail to: yo3kaa@pcnet.pcnet.ro). Full details on the rules are available on the Web at: http://www.qsl.net/yo3kaa

3801. AF2Y: SPEAK UP FOR GORE!

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-30 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m2iavtol1@slb1.atl.mindspring.net>
Source record: 106283

Gentlemen:
There are a lot of you who remain silent while supporting Al Gore. I am asking you to now come forward on this "esteemed" board as a show of solidarity against the fools in Philly who are about to make a big stink out of a Texas stinker and his old fool running mate.
WE ALL KNOW WHO WILL MAKE THE BEST PRESIDENT and he ain't Bush. So far only I and the Chipster have been setting the record straight on politics.
There is however a very strong ally out there to whom I spoke by phone today. It's none other than the "Evil Midget" from Columbus, Texas, Douglas Gerry, NR5T. He is VERY pro Gore despite being from the Lone Star State and I'm trying to get him on this board because nobody messes with "The Midget" and gets away with it.
If he does appear, between him, Chip and me, we will run all you rightwing Conservative Republican know-nothings out of here-guaranteed!
Doc,AF2Y

Attaway to go, LZS. And if you want to hear something really outrageous, listen to the American decorated hero, Col. Bo Gritz, on 9.400 in the morning. He SUPPORTS "ethnic cleansing" a.k.a. genocide and says that Timothy McVeigh is an American hero. Gritz better not step on the soil of Oklahoma City!
AF2Y,Doc

Somebody should tell Riley about this.

ARRL Section 326. Censorship (Communications Act of 1934)

Nothing in this chapter shall be understood or construed to give the Commission the power

of censorship over the radio communications or signals transmitted by any radio station, and

no regulation or condition shall be promulgated or fixed by the Commission which shall interfere

with the right of free speech by means of radio communication.

Quite frankly I think Mr. Davies is mentally ill. I could have sworn he had written a while ago that he was through with all his bigotry and support of bigots. His departure from here signalled a welcomed and needed change for the better and suddenly he reappears as deranged as before.

Will someone tell me how a Jew in a grocery store was responsible for Herbie Schoenbohm's conviction and jail sentence that was commuted to a less harsher penalty? It was KV4FZ who was a thieving WONDER, not Mr. Goldberg buying WONDER BREAD.

I'm ashamed of Mr. Davies. By now you'd think he would have grown up but then maybe it's the water in Athens, AL?

I tried calling and got an intercept saying that the number was NOT
available from my area (North Jersey).

GWB. You mean KB4GWC from Gray Tennessee? Yes, he too is in Philly. Herbie landed in Nashville and rode him to the City of Brotherly Love.

If God really wanted to save us and warn us, he wouldn't send delusional, defective trailer trash like you and stair, he would send
us
people who we would listen to, people with respect and credibility, not a couple of dumb hicks with bucked teeth and an IQ of 70
because
of family inbreeding who spew doomsday nonsense and spam Tiny-Tenna. You make your god look like an evil moron and thankfully
the real God gives people half a brain to know not to listen to your uneducated, rebel flag waving, dumb hick view of religion.

****
Mike, sometimes folks do not hone in on the REAL Question.

I just bought a palm sized HT from Radio shack
and these are my thoughts- maybe not what you are really looking for BUT

Following the manual I got the HT set up to actually operate. I bought some
extra batteries and the adapter to run it from my car cigarette lighter

Then I picked a local repeater frequency and determined the appropriate
offset,
A Net search gave me the sub autable tone, so I programed that in.

With the manual in one hand and the HT on the picnic table I finially got a
signal.

Since most of the buttons perform more than one function I developed some
crib sheets that I will type up and stick in the carry case.

1. entering repeater frequencies in the memory.
2. Set up to access closest repeater
3.details that I might use later.

all of these things will be automatic after a while but since I want to use
this HT on vacation next month I am spending some time figuring them out
now.

Hope this helps.

Check at www.qrz.com and select new hams . If you want to try
the fcc go to www.fcc.gov/wtb/uls/ and follow these steps .
1. Select- General, 2. Radio code is - HA ,3. Status is active,
4.authorization type is <no criteria>,5. go down to the bottom
of the page and select- Search . Sometimes it takes from two to
four weeks for your call to show up from the time you pass your
test . It all depends on how busy the fcc is . Your call will
show up at the fcc site before it will at qrz but qrz is easier
and faster to look up . Good luck ! Sam, alphacentauri@i-plus

Has anyone ever been prosecuted for doing such? In a highly visible case, my congressman, John Boehner, was monitored on his cell phone and a tape of it was even given to a newspaper. No one was ever prosecuted even after Congressman Boehner's repeated requests.

IMHO, the law HAS been changed by the Justice Dept's failure to enforce it.

Mr Davies:

Please tell me, do you really believe that
when Ronald Reagan passes on that the event
will really be some kind of an occultic
milestone?

Please elaborate on your own reasons why you
feel that this is so.

Please reply to the newsgroup,

Message-ID: <8m4p8i$hf0$1@slb6.atl.mindspring.net>
Source record: 106112

I am presently listening to WABC radio talk show Conservative Shawn Hannity who announced that Dick Cheney's daughter is a lesbian. As an Independent voter who can't stand modern day Republicans since, among other despicable things, they kiss the rears of the friggin' rightwing Christian Coalition, this "thing" is Phillly is going to get interesting and HOT.

Bush MUST have the support of those C.C. parasites and those C.C. parasites are greatly responsible for the hatred and animosity spread against those with alternative life styles. Keep in mind that the entire anti-abortion theme of the G.O.P. was foisted on them by those C.C. parasites and the only one with a backbone enough to tell them to go suck lemons was John McCain. And for THAT reason, Bush won the top spot because the brains of the G.O.P. knew that McCain's honesty and integrity would LOSE them the parasitic C.C. vote.

What a mess the G.O.P is now going to be in. Bush has committed to Cheney and if the former reneges, he becomes a useless wimp of the party and a betrayer of a friend. If on the other hand, Bush stays with his hand, how can the lousy C.C. support him since the standard bearer of the party will then refute "decent family values" on which the Republicans have a monopoly(ho ho ho)?

And then we have Herbie marching around with Alan Keyes placards which is appropriate since they're both useless to the Republican party. And both are as appetizing as two week old cheese steaks. Stay tuned and watch these dumb Republicans self destruct.

The Radiosigs-Guy is completely correct AGAIN ! ! ! .. let's take a closer look.

>I say it again folks-there is something definitely wrong with Mr. Davies

Bingo, Sigster-Man ..

>and the problem isn't funny either

Bingo again, Sigs-Dude. I'm searching for the right word here. Disgusting and pathetic come to mind. I'm open to more accurate suggestions.

> The man needs help.

Right on Sigs-Guy. A number of passers by have tried in vain to befriend him. Sorta like the Good Samaritan story. We believed him to be downtrodden and misdirected, and worthy of compassion. So we took him into our group at Huntsville Hamfest in 1999.

Bad idea. It was a setup. An ambush. We got bushwhacked. One of the best two-faced back-stabbings on record. So we terminated our efforts and left him to the care of The Liberty Net guys.

Now he's making kissy-face with "Prophet" Stair. This tells me that The Liberty Net guys probably saw the light and sent him on his way, also.

Should you attempt to attach an appropriate adjective to his behavior, the word "desperate" is not an option. We fell for it. No need for you to make the same mistake.

I guess the "help" he needs is for one of David J. Smith's black helicopters to pick him up and take him to "Prophet" Stair's concentration camp.

Here goes the "Called Prophet of God" again ..
>I think you are just jelous jew.

>Is'nt that what you Jews do in a store smash loaves of bread

Is'nt it strange that a "Called Prophet of God" could talk like this. I wonder if "Prophet" Stair knows about his anti-semitic attitude.

Hey Radiosigs-Guy .. this kinda stuff makes you wanna rush right out to the nearest Independent Fundamental Premillineal Bible-Believing Warm-Hearted Soul-Winning baptist Church and "get saved" doesn't it? (The lower case "b" was intentional.)

3857. AF2T: compassionate Conservatism

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-31 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m501scgp1@nntp9.atl.mindspring.net>
Source record: 106123

Question:
Why does "GeeDubYa" refer to himself as a 'COMPASSIONATE CONSERVATIVE? And why does he now discuss the G.O.P. as the party insisting upon INCLUSION? Because from 1992 to 2000 Republican standard bearers on all levels in D.C. have been UNCOMPASSIONATE and the party has been one of EXCLUSION therefore the image MUST now change. It will, in NAME only.

When I look back and think about these damn G.O.P running dogs of the right and the harm they did for eight years, it's infuriating. And no matter how seedy Clinton's been, he's still head and shoulders above those slobs and no pun intended. Now I suppose I'll read feedback from the pious putzes who in reality only wish they were at the lips of Miss Lewinsky.

Tonight we'll all be hypnotized by Laura Bush's speech about how big a Boy Scout her husband's always been. BULLSNOT. He was involved in plenty of tacky stuff in his home state and was a drunkard too. Hell, I'd rather have a Tipper as first lady than a Tipsy as first man.

If "Dubya" wasn't his daddy's son, he'd be an Austin street cleaner and the same goes for brother Jeb in Florida. BUSH is the perfect name for these bush league duds. And to boot, instead of choosing a young energetic man as a running mate, he selects a hack of his daddy's. Damn-what losers.

Here we Independents saw a really decent Republican arise by the name of John McCain-someone who could easily bring Dems across party lines-and what happens? He gets dumped because of his strong stand against Christian Coalition meddling in politics while "Dubya" brown noses them. How could anyone in this country who believes strongly in the separation of church and state have anything to do with a man like that?

Aw it's the same old crap. Deja vu. An anti-abortion platform to once again take away a woman's rights while Gore's party is interested in what makes this nation tick. The Democrats are the meat and potato guys who talk issues while the Repubs think only CUT, DEPRIVE, ASSAIL, LIMIT, ISOLATE, BE INTOLERANT, CLOSE DOWN GOVERNMENT, DEMAND, CAJOLE, ACCUSE and SCREW YOU JUST AS LONG AS I HAVE MINE. We need that kind of thinking for four years? LIKE HELL WE DO and we'll prevent it from happening.

COME ON, LIKE- THINKING READERS. LET'S GIVE 'EM HELL!

Anybody have any good designs for mounting a 2M mobile in a 1998 and up Ford F150. I can't find any good mount points whatsoever. Pictures would be great. I know someone has one mounted somehow.

Hi guys.

Just a quickie :-). I have just changed ISP's for my home pages. Both my old and new site are currently running, but the btinternet one will take over eventually.

So take a look at

http://www.btinternet.com/~g3vfp

Cheers guys.

Dave G3VFP

Just this once, the Radiosigs-Meister is wrong, wrong, wrong ..
>So far only I and the Chipster have been setting the record straight on politics.

Noooooo Sigs-Dude. I came on board weeks ago .. remember? Ok so I fell a little behind on my lines. Here let me catch up. Chipster-Guy .. if you have some new ones, pass them on.

He was NOT fund-raising at that temple.
He did NOT have sex with that woman - Miss Lewisnski.
She did NOT make that anti-semitic comment.
Attorney General Reno did GREAT at Waco.
I'm sure glad to see Vice President Gore looking so strong for Election 2,000.
He'll bring some compassion to the office of President.
I think a Gore / Rodham-Finklestein ticket would win by a landslide.
I sure hope President Gore increases welfare spending.
We need more social programs.
The NRA should be put out of business.

There .. I'm baaaccckkk ..

Yes, The "Evil Midget" would be the right one to support Gore the bore.

Reason:

He is like the "Bore" and the "Oval Office Sex Machine" in just about
every way.

1- He lied about owning a restaurant in texas, I turned out his wife
was mananger at the local "Dennys"
2- He lied about the Icom super rig he had.
3-He lied about being Jewish.
4- He lied about any and everything when the truth would fit better.

That makes him qualified to be a spokesman for "Gore the bore" because
he is just another chronic story teller. You are the right one to
support him too as you have a record of getting "Knock It Off" letters
from the FCC for your "fun" on amateur radio.

Thanks Tim.

I'm delighted that you took the trouble to email me. The drivel can always be washed down with some bourbon if you like.

Course the question begs itself what has K0FL given to any fraternity let alone amateur radio.

For an intellectual guy Tim you absolutely astound me. Not a lotta guys will know this but La Grange Kentucky has one of the best histories of America. Guys like Lafayette etc. All good bluegrass too. Amazing that you live in such a fine place, and yet it has taught you nothing by the way of good manners, that's for sure.

Next time you go down West Main St, raise a glass and say hi.

One thing is for sure Tim, I'm more of a Union fan than you are. At least I stand firmly on the square.

Dave G3VFP.

LOL

Ain't that the truth?!

Back in the middle sixties, the Mississippi State Sovereignty Commission (the state equivalent to the KuKluxKlans) used to tap the phones at a radical, revolutionary organization (the Wesley Foundation - United Methodist Church) where I occasionally stayed and we had more fun with the tappers than they did.

Of course, the Sovereignty Commission thought that they could learn all sorts of things about our radical (and probably communistic) methods but [sigh], the poor fellows forgot one very important thing: we were teenaged males and our phone calls had more to do with our girlfriends (or "potential" girlfriends) than it had to do with any sort of "subversive" activities.

Plus - because racists and other types of prejudiced "people" - are, basically, stupid (as "prejudice" always shows itself to be stupidity), the retards (as are all racists and any and all "people" who judge others by any other means other than as an individual and that individual's ethics and morality) were stupid. They didn'y know what a "ground" was and, so, everytime they activated their tap, they introduced a 60-cycle (as we said back then) hum.

We used ta dial the first number and then say, "I realize that racist oinkers are all virgins but if you pay attention, you'll be able to, at least, get a girl to go out with you". (or words to that effect)

[That was, of course, long before I realized that racists/sexists/prejudiced bigots all suffered from /really/ serious sexual problems and that we couldn't help them - that these people would all end up - sooner or later - in prison (which they might enjoy) or a mental hospital.]

I've always wanted to be blackmailed. I just want to get a decent price on the color, glossy, 8"x10"'s.

I think they would make GREAT holiday cards.

Yes, but someone else monitoring can jump in if they hear the called station reply but then hear you say "nothing heard". It might help the third party know that they might be needed to relay the message if they are so disposed. Would probably figure it out the other way too but what harm does it do to add 3 more syllables?

Hola, holy frijoles, you eejit!!!!

Prince Albert the Inventor is boring, his wife is fat and ugly,
and there will be a floor-fight at the Dem convention and this
loser won't even be nominated! There is a stealth candidate
lurking in the wings to take the Democrats to the White House.

Is that similar to watching turds float down the hole
in the toiletbowl? I mean GWB and KV4FZ. If that don't
qualify for a Maalox moment, I don't know what is.

KV4FZ, the RNC and GWB: " Better that Fibrecon ! "

> According to him he's a delegate from the

Doc: Contact the NBC-10 Tipline at 1-800-847-9228
Channel 10 Local News in Philly has one heck of an
investigative reporting division. If anyone can dig
up dirt on backgrounds of RNC attendees, they can.
They even may make it part of their regional news
broadcasts, as they have been hammering the "far-right"
attendees on the tube all day yesterday in both live
and taped BROADCAST interviews.

3904. AF2Y: RNC thrills tonight

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-01 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m7m7e$j93$1@slb1.atl.mindspring.net>
Source record: 105936

Let's see-from whom will we hear tonight at the Philadelphia Baboon Convention. Oh yes, from" Mr. Excitement," Bob Dull, Mr. Viagra who gave Bill Clinton a "run for his money" in '96. Oh brother! And some other bigwig will also be speaking but who the hell cares? They're all misfits.

Come to think of misfits, I wonder why the elegant "El Rushbo" Limbaugh wasn't invited to address the throng of gullible saps? Of all the highly paid radio stooges who engender hatred against our President, this big mouth has to be number one. He should pray Gore gets elected or the slob will be out of work.

These 2000 born again Republicans are pathetic. I don't mean in a religious sense either but rather because they've awakened to the fact that for a decade they have been thorns in the side of progress and decency. Have given just lip service to minorities. Were stalling aid to the people wiped out in the Grand Forks floods. Remember when Newt and his cronies yelled at Bill, "Give us what we want or we close down the government?" I do and Bill stood tall and proud and Newt and company did close down the government. We won't forget that. What happened to Newt will happen to "Dubya." Ease on down the road, daddy's boy!

Remember how Bill and Hillary were working like mad to push through comprehensive medical healthcare and the ugly despicable selfish Republican rats killed it? Why not-those G.O.P. fat cats in Congress have coverage, so to hell with the average guy. We're insignificant to fat catsos. We don't count because we're not millionaires from whom they derive contributions and we tax favors.

And how about the cigarette industry that was getting away with MURDERING millions of Americans until the Dems said, "You've had it, boys." Do you think the nicotine murderers would have been bothered had Dole won in '96? What a joke.
And so for laughs tune into CNN or NBC or whatever and watch these liars go to town tonight trying to pass themselves off as America's last chance and hope.

For a decade, intelligent innovative and progressive legislation has come about because of the Democrat party while withdrawal, penury and hardship have been the bywords of the G.O.Ppers. And when Tipper gets up to speak in Los Angeles and tells the throng, "You made the right choice," she won't be lying.

<radiosigs@mindspring.com> wrote in message
news:8m501scgp1@nntp9.atl.mindspring.net...
Question:
Why does "GeeDubYa" refer to himself as a 'COMPASSIONATE CONSERVATIVE? And why does he now discuss the G.O.P. as the party insisting upon INCLUSION? Because from 1992 to 2000 Republican standard bearers on all levels in D.C. have been UNCOMPASSIONATE and the party has been one of EXCLUSION therefore the image MUST now change. It will, in NAME only.

When I look back and think about these damn G.O.P running dogs of the right and the harm they did for eight years, it's infuriating. And no matter how seedy Clinton's been, he's still head and shoulders above those slobs and no pun intended. Now I suppose I'll read feedback from the pious putzes who in reality only wish they were at the lips of Miss Lewinsky.

Tonight we'll all be hypnotized by Laura Bush's speech about how big a Boy Scout her husband's always been. BULLSNOT. He was involved in plenty of tacky stuff in his home state and was a drunkard too. Hell, I'd rather have a Tipper as first lady than a Tipsy as first man.

If "Dubya" wasn't his daddy's son, he'd be an Austin street cleaner and the same goes for brother Jeb in Florida. BUSH is the perfect name for these bush league duds. And to boot, instead of choosing a young energetic man as a running mate, he selects a hack of his daddy's. Damn-what losers.

Here we Independents saw a really decent Republican arise by the name of John McCain-someone who could easily bring Dems across party lines-and what happens? He gets dumped because of his strong stand against Christian Coalition meddling in politics while "Dubya" brown noses them. How could anyone in this country who believes strongly in the separation of church and state have anything to do with a man like that?

Aw it's the same old crap. Deja vu. An anti-abortion platform to once again take away a woman's rights while Gore's party is interested in what makes this nation tick. The Democrats are the meat and potato guys who talk issues while the Repubs think only CUT, DEPRIVE, ASSAIL, LIMIT, ISOLATE, BE INTOLERANT, CLOSE DOWN GOVERNMENT, DEMAND, CAJOLE, ACCUSE and SCREW YOU JUST AS LONG AS I HAVE MINE. We need that kind of thinking for four years? LIKE HELL WE DO and we'll prevent it from happening.

COME ON, LIKE- THINKING READERS. LET'S GIVE 'EM HELL!

You misspelled "profit". Hope this helps.

Gray Shockley

Calvin: These are interesting times.
We don't trust the government,
We don't trust the legal system,
We don't trust the media,
and we don't trust each other!
We've undermined all authority, and with it, the basis for replacing it!

Hobbes: "Interesting" is a mild way of putting it.

Calvin: It's like a six-year-old's dream come true.

GNU implies UNIX based, to all intents and purposes. And, yes, even source
code. If such a thing is UNIX based, that would be cool. Tell me more.

Thanks

Bob/NA4G

Actually, no.

He's got a bad voice. His message consists mainly of
conspiracy theories, petulant complaints over past personal
mistreatment, hysterical assurances that large numbers
of people are going to Hell, and incessant demands for
money. And sometimes he starts raving so that you can't
figure out WHAT he's saying...

There's a reason he's on shortwave, and not commercial
stations.

> What time and freqs. does
>he prophesy? Would appreciate the feed back.

Just type "BROTHER STAIR" into a web browser and you'll
get all that, and probably plenty more data on him,
besides.

No, the Catholic Church hates Masons. And Gin and Tonic
apparently hates S&B. How God feels about these, He
hasn't come out and said yet.

(One of the more interesting things I've heard about George W.
is that he didn't want to join S&B at Harvard, he wanted to
join G&T, a secret club dedicated to the pleasures of partying
hardy and getting blitzed. But on the night the inductees were
to make their choices as to clubs, he opened his door to find
his father - George Sr., an S&B man - there to escort him to the
S&B house. And he didn't have the fortitute to say "No".)

Talk about inclusion. Wow, are the Republicans trying to make up fast for past sins.
A Rabbi gives the benediction? And how about the Black speakers? Wow. As I said, those G.O.P. meatheads knew they had been alienating a lot of people over the past ten years and by golly, things have to change if "Dubya's" to be elected.
Concerning the Blacks on the podium, how many have ESSENTIAL DECISION MAKING POSITIONS? Huh? Right now, all I see is tokenism including Gen. Powell who indeed would make a wonderful Secretary of State under Bush or Gore.
And wasn't Laura marvelous how she desbribed her Boy Scout husband Georgie. "Oh yes, you made the right choice" to thundering applause. Bullsnot. He's a grey haired Quayle.
And what will be the Religious Right's reaction to a Veep choice whose daughter is a lesbian? After the smoke clears in Philly, Bushie Wushie will have a 20 point lead and he's in. Right?
Like hell. We will then turn our attention to Los Angeles-to a REAL CONVENTION having REAL PEOPLE who CARE about PEOPLE. Gore will astound with his energy, drive and intelligence and I hope he chooses John Kerry, another dynamo, as his running mate.
The debates will come unless Georgie Porgie decides to hide and Al will clean his clock. Kerry will make Cheney look like the lackluster hack he is. Just wait and see. It could be a close election but the better man will win-Al Gore. And I assure you this here guy from Clifton is going to campaign for the man. I'll ring doorbells and hand out leaflets because I know what I'm talking about.

3924. Software Define Amateur Radio (SDAR)

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-01 00:00:00 UTC
From: Darryl Wagoner <darryl@shecora.com>
Message-ID: <3986E902.CB72F751@shecora.com>
Source record: 105989
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.homebrew

Remember when there was not Internet, WWW, Windows, large hard drives, CD-ROMs, Ether net, etc? What is going to be next? Part of the answer is CORBA. CORBA or Common Object Request Broker Architectural is a distributed, heterogeneous, object oriented, language and OS independent environment. How is that for being buzzword compliant?

OK, how in the world does this relate to ham radio? Glad you ask. CORBA takes objects to the client/server modal. I have a ICOM IC-746 and I use Logger to log

My QSO logging program will read the current mode/frequency very nicely from the radio.

It will also track spots from the DxClusters, which it will tune my radio to at my request.

The problem is what if I want to control two radios from the same serial port? What if I want to have more than one program controlling the radio? What if radio is connected to a different computer with a different OS? The quick answer is I am out of luck!

Now with CORBA you can put a radio control server object on the system that has the radio connected to the computer, then have the client object send request to the server object. Since it is a server it can handle request from any different clients. Also since the client doesn't need to know anything about the radio and how to control it one client can control many different types of radios. Authors of logging programs need only write one interface. Radio vendors could/should write the server object. This server object could at some point be moved directly into the radio, along with many other server objects. This is known as SDR (Software Defined Radio). The non amateur world has already created a forum to create standards for SDR. You can join the group for a only $1800.00 per year.

They claim that this is going to be an open group, but there aren't any amateur radio member companies yet. Even the ARRL isn't a member.

Because of lack of amateur support and the need, I am starting a open source, open standard group to create standards and applications for SDAR (Software Define Amateur Radio). All code will fall under either the GNU Public Licenses or GNU Lesser General Public License, which is for libraries so that application authors can use the code without being required to release their source code.

I hope it is also clear that radio control isn't the only part of radio that will benefit from using CORBA. Rotor control, call book interfaces,

digital interface, DSP and much more can and will use CORBA.

Please join me to create a useful and free standard for Software Defined Amateur Radio (SDAR). Bring back the homebrew to ham radio!

>Read on in Hebrews 11. It tells of those who were murdered for Christ's sake and the world was not worthy of them!

I like these better:

And God made the beast of the earth after his kind, and every thing
that creepeth upon the earth after its kind: and God said, "Let us
make man in our image, after our likeness"
Gen 1:25,26

(man made AFTER the beasts)

And the LORD God said, "It is not good that the man should be alone; I
will make him an help meet for him." And out of the ground the LORD
God formed every beast of the field, and every fowl of the air; and
brought them unto Adam ... but for Adam there was not found an help
meet for him.
Gen 2:18-20

(man made BEFORE the beasts)

And it came to pass after these things, that God did tempt Abraham.
Gen 22:1

Let no man say when he is tempted, I am tempted of God; for God cannot
be tempted with evil, neither tempteth he any man.
James 1:13

The dead know not any thing, neither have they any more reward.
Eccles 9:5

These shall go away into everlasting punishment: but the righteous
unto life eternal.
Matt 25:46

>> because
>> of family inbreeding who spew doomsday nonsense and spam Tiny-Tenna. You make your god look like an evil moron and thankfully
>> the real God gives people half a brain to know not to listen to your uneducated, rebel flag waving, dumb hick view of religion.

>could be a big one and proud of it. That may explain your attitudes.

I tend to take some religious judgements with a pretty large grain of
salt. When you can clear up the above contradictions (and *many* more)
then maybe I'll listen to Biblical edicts on homosexuality. YMMV.

hi don
the rca i am sure that it will work 6 mtrs i have 3 of them on
155mhz and also looking for a mod to take it to 2 mtrs i have 1 that i
am playing with to try to fig out the mod for it. a rca very few are
used in ham radio if any at all. If you fine one that is converted to
the ham bands let me know. I will tell this some of these radios the Q
curcit isn't wide at all and you have to do a lot of reconfigaration on
the if and rf boards and sometimes (i know on some radios like the
Johnson)
you all most have to rebuild the boards but their is someone that can
help if you get intouch with wb4iuy in north carolina you can e-mail
him he may be able to help you. He does a lot of mods on radio like
that for used in the 6 meter band and 2mtrs he has a few repeater up
and he build he's own repeater. I will tell you he is a busy man and if
may take a while to get back with you you can fine he's e-mail address
at qrz.com

You quickly forgot the radio vendors are in business to sell radios, NOT
software!

> This server object could at some point be moved directly
> into the radio, along with many other server objects. This is known as
> SDR (Software Defined Radio).

There already has been a call for a common API to interface different
software, such as logging, and rig control applications to different radio
equipment. The idea is to write to the API, application programming
interface, for all functions. Then the API would call a small "device
driver" which does the detailed communications to the rig. Using this
approach "generic" software can be written to operate with almost any
equipment out there that does not need to control any model specific
functions of the hardware.

The non amateur world has already created
> a forum to create standards for SDR. You can join the group for a only
> $1800.00 per year.
>
> They claim that this is going to be an open group, but there aren't any

If it is done under the GNU public license I believe the FULL source code
MUST be made available to everyone who wants it.

> I hope it is also clear that radio control isn't the only part of radio

All kidding aside has anyone ever asked Riley why he intentionally ignores the Censorship clauses in the '34 Communications Act? My guess is that if anyone's that bold, he'll counter with, "You were jamming K4OKA on May 14,2000 and your license will be revoked if it happens again." Huh? Naturally it's fraudulent and asinine but still highly effective.

You are perfectly entitled to vote for whomever you wish but keep in mind that your opinions are jaded. It was a dumbass Democrat named Lyndon Johnson who was responsible for your horrible Nam experience and therefore you have been carrying a grudge against the Donkeys ever since. And who knows that I wouldn't too if I were in your shoes?

However Dan'l your world has become one of egocentrism and by that I mean you constantly put YOU before the general welfare of the nation. You would prefer denying us intelligent leadership for the future than admit it was ONE miserable s.o.b. Democrat and his administration that caused you grief.

You gravitate therefore to the party of the narrow minded even though you're not. You gravitate to the party of shrinkage instead of the type of expansion which encompasses ALL Americans.

You forget about the millions of Americans who cannot afford health insurance while you are covered through the V.A. You forget about the millions of aged Americans who must decide whether or not to buy medicine or eat, yet does the V.A. deny them to you?

You base your dislike of Gore on his sidekick Clinton who was the most effective sleazebag Prez. this nation has ever known. Automatically because Al served under him, he must be like him. That's ridiculous.

All you'll be doing is hurting America by voting for Bush because he is ILL EQUIPPED to lead this nation and YOU KNOW IT.
Think about what I write and perhaps you'll change your mind. If not, then may your man lose fair and square.

That Radiosigs-Guy asks ..
>How much is tuition, Chip?

Don't even ask, Sigs-Dude. Just send the man a blank check. You won't regret it. After the lines he taught me, it's cheap at 10 times the price. Next to you, Chipster is the best there ever was.

But wait there's more .. If you enroll NOW you get free access to this page showing Dub-Yah's "skeleton closet".
http://www.realchange.org/bushjr.htm

It's AMAZING .. go look. But you have to promise to enroll in Chipster-University.

You could be right on this one since the HOMO in HOMOSEXUAL means 'SAME" not "man." I just never heard of women loving women as homosexuals but then again like I give a flying fig about stuff like that.

> software!

Not at all. Creating a common API be it CORBA or otherwise would be
an important port of making the radio a complete package.

>
> > This server object could at some point be moved directly
> > into the radio, along with many other server objects. This is known as

> driver" which does the detailed communications to the rig. Using this
> approach "generic" software can be written to operate with almost any
> equipment out there that does not need to control any model specific
> functions of the hardware.

That is only part of the idea of SDR and CORBA. Even with a common
API a lot is lost, such as support to distributed applications, sharing
of the API between applications and language/OS independents. Because
CORBA is distributed, it allows for client and server objects could
live on the radio itself. So it would be possible for the radio to
call complex routes on the desktop computer or other hardware systems.

> The non amateur world has already created
> > a forum to create standards for SDR. You can join the group for a only

Beats me, but non amateur are getting behind it big time.

> > Because of lack of amateur support and the need, I am starting a open
> > source, open standard group to create standards and applications for

>
> If it is done under the GNU public license I believe the FULL source code
> MUST be made available to everyone who wants it.

Yes and no. GPL requires full source release, but LGPL does not at
least
of applications created from it. That is why I like it. We can keep
the API open and free, but it won't hurt the vendors who charge for
their
wears.

Thanks for you comments, often I don't explain myself well enough and
having
people ask me questions keeps me honest.

I have a much easier time believing in a Jimmy Swaggart, or a Jim Baker, or even Gene Scott's twisted
gospel much easier than Bro Stair.
When it walks, talks, sounds and smells like a cult, chances are, it's a cult.
Not once have I ever listened to stair talk about love or salvation, only that we are going to burn in hell
unless we "get right with God" whatever that means.
If Stair thinks we are going to be sin free or we can change society, then he can forget it.
If we could be pure and sinless, then there would be no need for Jesus, would there?

3955. CTCSS tones

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-01 00:00:00 UTC
From: Anne Watson <anneb@azstarnet.com>
Message-ID: <soedq965dbm109@corp.supernews.com>

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

My ICO mobile automatically picks the correct tone, so I lately I have not paid attention to which tone was required. It used to be that almost any repeater in Arizona used 162.2

When I could not get my RS HTX-200 to make any sort of noise at all, I figured I better look at the fine print for the local repeaters..

Come to find out, THEY CHANGED THE TONE

Getting it reset to 110.9 solved the problem.

Hooray.

One nice thing about this HT and maybe it applies to all the other new models is that it receives clear up to 162.400 (the weather).

3956. Re: Software Define Amateur Radio (SDAR)

A good example of what I was talking about is the computer industry. Most
add-on hardware vendors hate having to write the OS drivers to go along with
their product. Some in fact even contract out the work to write the
software. I have seen some drivers that changed on an almost monthly basis
to add features while fixing older bugs!

> > > This server object could at some point be moved directly

> CORBA is distributed, it allows for client and server objects could
> live on the radio itself.

I don't think the radio is a good place for the software IMHO. The manufactures can barely get the embedded firmware right to control the rigs various subsystems. Remember ANY mistake may require the ROM's to be replaced. Sure they could use EEPROM's and so on, but then the hardware costs go up.

The one question is what happens when the standards change? This can happen when new features are required for example, or we find that the so called standard is not so standard requiring a more explicit description of what each function/interface is required to do.

Finally computer power increases it seems at a faster pace that advances in communication technology. Keeping the software functions on a cheap desktop PC, with a low level interface to the rig, allows one to take advantage of faster computer hardware without the need to replace to whole radio.

> > their
> > wears.

That maybe nice for the vendors, but it does nothing for the little guy who wants to take a shot at doing some software. The beauty of open source code

is it can serve to educate at the same time it lets the Ham community find bugs faster than the vendor may do it. Plus at some point the vendor will drop support for "last year's" version and will only support the new one. I can't tell you how many dollars I have spent to upgrade software because of discontinued vendor support, of the older version, in the hope that the major bugs found last time around are fixed. In many cases I don't need the extra features, which my hardware may not support anyway, but I sure needed the bugs fixed! I can see this happening with SDR software. The old version may do everything a Ham needs, but the bugs make it less than useful. If the software was open source at least somebody has a shot at trying to fix it themselves.

> Thanks for you comments, often I don't explain myself well enough and
> having
> people ask me questions keeps me honest.

No problem.

Hi!

I'm writing to let you know that you can post NYC real estate listings and jobs on our site for FREE! Please go to http://www.PeoplesList.com and click the ADD A LISTING BUTTON.

PeoplesList is a non-commericial online community posting site that offers real estate listings, job listings, personals, community postings and a whole lot of other stuff, all at no cost, and with no advertising banners.

Please feel free to post as often as you like, and email us if you have any questions!

Sincerely,

Gavin, Jimmy, & Paul
The PeopesList People

Last night we heard Laura Bush, the best little schoolmarm in Texas, tell the banner waving baboons on the floor, "You made the right choice."
Are you sure, Laura?

Bush Jr.'s Skeleton Closet

Click on the allegation of your choice:
-- Pulled Strings to Avoid Vietnam, & Got Favorable Treatment
-- Texas government corruption: State $$ for campaign funders & business cronies
-- Cocaine: felony drug use, vile hypocrisy, and a hushed up arrest?
-- His "young and irresponsible" behavior: sex, drugs and (gasp!) rock and roll?
-- Thin skinned: censors his critics with police, lawyers, $$$
-- Funeralgate: Lying under oath? Bush & staff stop investigation of contributors huge funeral home company.
-- Character: Spoiled rich kid living off his family's name and reputation
-- Made millions on insider business deals, for little work
-- -- Deal #1. Personal Profits from Failing Oil Companies
-- -- -- -- Easy Money From Odd Sources
-- -- -- -- A Surprise Deal From Bahrain
-- -- -- -- Access to the President and National Security Adviser for his foreign business partner
-- -- Deal #2. Selling Oil Stocks Just Before Iraq Invaded: lucky guess or illegal insider trading?
-- -- Deal #3. A Big Slice of a Baseball Team
-- -- -- -- Hypocrisy: using government coercion to make his private fortune

-- Quotes

Quotes

"There ought to be limits to freedom. We're aware of this site, and this guy is just a garbage man, that's all he is." -- George Jr., discussing a web site that parodies him
"[Bush Jr. hired a private detective to] determine what his opponents or the press could find on him [and] isn't terribly thrilled [with the results.] We're not talking about anything that would get him a spot on Jerry Springer, no handcuffs or dwarf orgies, but he was a handsome, rich playboy and lived that life." -- unnamed insider, quoted on MSNBC.
"It's not the governor's role to decide who goes to heaven. I believe that God decides who goes to heaven, not George W. Bush." -- George W. Bush, in the Houston Chronicle.
"I didn't -- I swear I didn't -- get into politics to feather my nest or

feather my friends' nests." -- Bush Jr., in the Houston Chronicle
"I'm a uniter not a divider. That means when it comes time to sew up your chest cavity, we use stitches as opposed to opening it up." -- Bush, on David Letterman, March 2, 2000. (the audience booed)
"I propose that every city have a telephone number 119 -- for dyslexics who have an emergency." -- George Junior
"I hope to show Hispanics that Republicans do have a heart, but I also want to send a message to people from around the country as to how to pick up the Hispanic vote" -- George Junior
"He told me his brother (Texas Gov. George W. Bush) said he could kick my butt, and I said I haven't met a Texan yet that can shame me." -- Minnesota Governor, Navy Seal, and professional wrestler Jesse Ventura, quoting Florida Governor Jeb Bush.
"When George moved back to Midland [after college], he bummed an office, he bummed golf clubs, bummed shoes. You were lucky if you saw him in a clean shirt." -- Tom Craddick, ranking Republican in the Texas House of Representatives and longtime friend of Bush's.
"It's hard to usher in the responsibility era if you behave irresponsibly." -- Junior, aiming at Clinton but backfiring.
"When it is all said and done, I will have made more money than I ever dreamed I would make." -- Bush, in the Forth Worth Star-Telegram, describing his Texas Rangers business deal.

Quote Sources

His Character: The Prodigal Son

George W. Bush, Jr. is touted as the savior of the Republican Party by the national press, because he pulls votes from minority voters and has his dad's name and fundraising connections to run on. But before we anoint him as the next president, let's look at what he's done with his life. In a nutshell, Junior
1) grew up as a very rich child of powerful parents,
2) partied from high school until he was 40,
3) made millions off of sweet insider business deals from political allies of his dad, who happened to be the President,
and 4) got elected governor of Texas mostly because of his name.
Bush Junior has done some good work as governor of Texas. He has crossed the partisan divide, reached out to minorities, and tackled at least one tough, thankless issue (school financing; his plan was voted down in the legislature.)
But 4 years -- even 4 good ones -- is a pretty short resume for the leader of the free world. No one doubts Bill Clinton's ability to handle punishment and come back for more. But Bush Junior's stamina and attention span are very real concerns. Furthermore, Bush's term as governor has also been markedly corrupt, although possibly in legal ways. What we mean is, he has taken millions in campaign contributions from certain big businessmen -- many of whom were in on the insider business deals that made him rich -- and those same businessman have received billions in sweet deals from the Texas state government during Bush's term.
Specifics: Like Al Gore, Bush Jr. attended Eastern elitist schools, in this

case Andover Prep, and Yale. According to a Newsweek profile, he "went to Yale but seems to have majored in drinking at the Deke House." He joined the secretive "Skull and Bones" club in 1968, as any good conspiracy buff can tell you.
His business career was marked by mediocrity or failure which nonetheless resulted in him getting lots of money from his father's political allies. And his political career has been handed to him on a platter by his famous name, and by his dad's cronies.
Bill Kristol, conservative pundit and Dan Quayle's former chief of staff, says "The Bush network is the only genuine network in the Republican Party. It is the establishment." Junior and Jeb Bush (recently elected in Florida) are first brothers to be simultaneous governors since the Rockefellers.
To give you an idea of how rarefied his upbringing was, George Junior had an argument with his mom at one point about whether non-Christians could go to Heaven. (Barbara Bush felt they could; George didn't.) To settle the dispute, they phoned up Billy Graham on the spot. (He sided with Junior, but warned him not to play God.).)
More recently, Bush's performance during the South Carolina primary shows that he received the worst trait common to the famous Bush family -- a vicious competitiveness that shows no compunction about dirty tricks (such as the phone calls by his surrogates calling McCain, of all people, "the fag candidate") and utterly shameless flipflops (like Bush Sr.'s "read my lips, no new taxes", and Junior's very public refusal to meet with the gay Log Cabin Republicans group until right before the California primary, when he claimed he was fine with them all along. Not to mention him suddenly becoming "a reformer" after he got shellacked in the New Hampshire primary.)
Not only does this trait demonstrate a lack of integrity -- which I define as having standards and things you believe in that you won't violate, even to win the presidency -- but there is an incredible arrogance in thinking that voters will accept and believe a candidate who blatantly changes his positions from week to week, saying whatever the local primary voters want to hear.
Unfortunately, Bush Jr. has inherited this negative family trait without receiving any of the graciousness, diligence, and bravery of his father and grandfather (a Senator who lost his seat over a principled vote in favor of birth control, back in the 1940s.)

Thin skinned: Bush tries to stifle his critics

One of the most disturbing things about Bush is that he consistently works to silence his critics using his money and power, including state police and expensive lawyers. Not since Richard Nixon has a major presidential candidate been so quick to prevent his opponents from free speech. At the very least, this shows he doesn't understand big-league politics and may not be tough enough to handle more serious opponents, such as hostile foreign countries and terrorists. At worst, it may be a sign of Nixon-like paranoia; that president's thin-skin started out with similar small potatos and grew to bring down his presidency amid enemies' lists, illegal break-ins of his opponent's offices, and forcing the IRS to audit his enemies.
Bush can't blame this on his staff, either; it comes from the top. When asked about one critical web site, he told the press "There ought to be

limits to freedom. We're aware of this site, and this guy is just a garbage man, that's all he is."
As governor of Texas, for example, Bush Junior has sent the state police to arrest peaceful demonstrators outside the governors mansion. While previous governors allowed peaceful pickets on the public sidewalk outside the mansion, Bush has claimed that they are blocking public access, and had them arrested. Not all protestors, either -- just the ones he doesn't want the press to see.
Most recently, Bush supporters including NY Governor Pataki sued to keep John McCain and Steve Forbes off the New York primary ballot in several congressional districts. Bush denied any involvement, fooling no one, but after McCain's decisive New Hampshire victory made the move look ridiculous, Bush and his top strategist Karl Rove called up his establishment minions, after which they instantly announced that they were stopping their efforts to keep McCain off the ballot. Ironically, all of the attention to ballot rules revealed that a number of Bush delegates and alternates used fraudulent signatures to qualify for the ballot. As a result, it appears that McCain and Forbes will be on the ballot statewise, but George Bush Jr. won't be in one Bronx congressional district.
Bush also can't stand criticism on the Internet. His campaign quietly -- and probably illegally -- bought up over 200 anti-Bush domain names including "bushsucks.com", "bushbites.com", and "bushblows.com" over a year ago. (Illegally because he had refused to register as a candidate, as part of his effort to make it look like people were begging him to run, so spending money for his campaign was not allowed.) If you type in any of these URLs, you end up at Bush's official web site. His campaign refuses to say whether this means that they admit that he bites, blows and sucks. (Maybe he used to be a White House intern?)
If you wanted to set up one of those sites, breathe easy because many good names are still available. The Bush camp somehow neglected to purchase "bushisaprick.com", "bushisweak.com", or "bushsucksdonkeydicks.com", so $70 makes them yours.
Even worse, Bush and his high-priced lawyers have tried twice to shut down a web site -- www.gwbush.com -- that parodies the Bush campaign, in particular his "no comment" answers on drug use in his past. You will recall that Bush has said it doesn't matter what he did "in his youth," because the question is "have you grown up" and "have you learned from your mistakes." The parody site presents a new program called "Amnesty 2000", in which Bush "proposes" pardoning all drug convicts who have "grown up."
The Bush campaign filed one complaint about the site in April 1999, after which the parody site's owners changed it to look less like the real Bush site. That wasn't good enough though, and Bush lawyers filed against the site again in May 1999. So far, it remains in business. Sources

Funeralgate: Lying Under Oath? Bush & Co. Squelch Investigation of Contributor's Funeral Homes

Texas' state commission on funeral homes (the TFSC) started an investigation of SCI, the world's largest funeral home company (with 3,442 homes, plus 433 cemeteries) after complaints that unlicensed apprenctices were embalming corpses at 2 SCI embalming centers. The commission visited a couple of

these, and ended up fining SCI $450,000.
But SCI has very powerful friends. They gave governor Bush $35,000 in the last election and $10K in 1994, gave $100,000 to the George Bush, Sr. library, and hired the ex-president to give a speech last year for $70,000. They also spread money around the Texas legislature and the Texas Attorney General's office.
The commission continued its investigation. So SCI's boss, Robert Waltrip, called the funeral commission's chairman and told him to "back off." If not, Waltrip said, "I'm going to take this to the governor."
Still, the investigation continued. So Waltrip and his lawyer/lobbyist, Johnnie B. Rogers, went to the governor's office and dropped off a letter demanding a halt to the investigation. Rogers told Newsweek that he and Waltrip were ushered in to see Joe Allbaugh, Bush's chief of staff (who is now Bush's campaign manager.) Rogers goes on to say that Bush Jr. popped his head in and said to Waltrip, "Hey, Bobby, are those people still messing with you?" Waltrip said yeah. Then the governor turned to Rogers and said, "Hey, Johnnie B. Are you taking care of him?" Rogers said "I'm doing my best, Governor."
The problem for Bush is that he swore under oath, in a July 20th 1999 affidavit, that he "had no conversations with [SCI] officials, agents, or represenatives concerning the investigation or any dispute arising from it." If Rogers is telling the truth, than Bush Jr. lied directly under oath. He filed the affidavit in an attempt to avoid testifying in a whistleblower lawsuit concerning this investigation and it's alleged squashing by Bush's administration.
In the latest development, Bush himself has admitted that he spoke with Waltrip and Rogers, but denies that it was anything substantial. Bush told the Associated Press that ``It's a 20-second conversation. I had no substantive conversation with the guy. Twenty seconds. That's hardly enough time to even say hello, much less sit down and have a substantive discussion. All I know is it lasted no time. And that hardly constitutes a serious discussion. I did not have any knowledge at all of Waltrip's problem with this case.''
Of course, nothing Bush says here contradicts what Rogers said. In fact, his careful construction of this and other phrases for reporters -- such as "When I was young and irresponsible, I was really young and irresponsible.", and his evasion about whether Jews can go to heaven -- are incredibly similar to Bill Clinton's weaseling about dope, the draft, what "is" is, etc.
Whatever Bush said out loud, Waltrip's complaints to the governor got quick results. Eliza May -- the investigator for the funeral services commission -- says that after Waltrip visited the governor, she received phone calls from three senior Bush aides asking if she could wrap up her proble quickly. She says she was also summoned to another meeting in Allbaugh's office, one month after the first one, and found Waltrip already there. The governor's top aide, she says, demanded that she turn over a list of all of the documents that she needed "to close the SCI investigation."
Since then, investigator Eliza May has been fired, 6 or 10 staff members on the commission have been fired or resigned and not been replaced, and the Texas legislature -- led by members receiving substantial contributions from

SCI -- passed a bill to reorganize the agency and remove it's head. On August 16, 199, Bush ordered his Comptroller to take over the agency and run it. May -- who, it should be noted, is a Democrat and was even state Democratic Treasurer at one point -- has filed a whistleblower lawsuit alleging she was fired because she persisted with the investigation.
Bush simply didn't show up for his scheduled deposition on July 1st in the case. (He isn't a defendant in the case, because Governors are immune from lawsuits in Texas, but is being called as a material witness.) He filed his affidavit on July 20th to indicate that he had nothing to add. A hearing is scheduled on August 30th to determine if that is the case. Since he admitted in the press that he did meet with Waltrip and Rogers, May has filed a contempt of court motion with the court as well.

Corruption in Texas Government; State $ to Big Contributors

Bush's administration has consistenly shoveled large amounts of state controlled money to men who have either contributed large amounts to Bush's campaign, or who have made Junior personally rich through sweet insider business deals, or both.
For example, the University of Texas' Investment Management Company (UTIMCO) invests $1.7 billion of state money. Most of this comes from profits from oil discovered on Texas state land. Bush's cronies dominate this board, and in return investment funds controlled by these very cronies or their friends have received nearly a third -- $457 million -- of that massive investment pool. There may even be more, but this obscure group -- created under Bush -- cloaks its operations in a thick veil of secrecy.
UTIMCO's chairman, Tom Hicks, now owns the Texas Rangers; his purchase of the team made Governor Bush a very rich man. Furthermore, Hicks and his brother gave $146,000 to the Bush campaign. In return, $252 million of the invested money went to funds run by Hicks' business associates or friends, according to the Houston Chronicle. Hicks even insisted that UTIMCO increase by $10 million an investment with a fund that he had an indirect financial interest in, but UTIMCO staff halted funding after they discovered the conflict.
Then there's Sam and Charles Wyly, the billionaire brothers who secretly bought $2.5 million of "independent" TV ads slamming McCain just before the critical Super Tuesday primaries. (They have also given hundreds of thousands of dollars to Bush Jr.'s governor and presidential campaigns.) They control Maverick Capital, an investment fund that received $90 million of UTIMCO money. The brothers earn nearly $1 million in fees alone from that money, along with a share of any profits.
Henry Kravis of Kohlberg, Kravis & Roberts -- a longtime Bush contributor -- received a $50 million investment deal in 1996. And there are many more Bush supporters who have received millions from UTIMCO, including the Bass family and Adele Hall of the Hallmark Cards family.
Another key player in the Bush world is Richard Rainwater, the billionaire Texas investor who made Bush Jr.'s original involvement in the Texas Rangers deal possible. That's the deal that made Jr. rich, of course. Bush had several other personal investments in Rainwater controlled companies. But Rainwater has received much from Bush and the state of Texas' treasury, too.

UTIMCO invested at least $20 million in Rainwater companies.
And UTIMCO is not the only Bush administration agency funneling money and favors to his supporters and cronies. T he state teacher retirement fund sold three office buildings to Rainwater's real estate company at bargain prices, and without bids in 2 of the cases. The fund invested $90 million in the Frost Bank Plaza in Austin, and sold it to Rainwater's Crescent Real Estate for $35 million. Bush signed a law that will give his former baseball team co-owners -- including Rainwater -- a $10 million bonus payment when a new Dallas arena is built. Bush also proposed a cap on business real estate taxes that would have saved Rainwater millions on his various properties (but it lost in the legislature).
In another example, Larry Paul Manley, Bush's director of the Department of Housing until he resigned in January 1999, is under police investigation for steering federal tax credits to cronies. Texas' top auditor discovered in 1997 that 60% of department contracts went to Manley's former colleagues at local savings and loans, but refused to make the findings public until long after the criminal probes began.
Bush may or may not have violated state ethics laws with all of this big money backscratching, but there is no doubt that he and these businessman are operating corruptly -- funneling large amounts of state money to the businessmen's companies, and large amounts of their personal and business money into George Bush Jr.'s pocket and political campaigns.

Avoided the Vietnam War

Most people have heard something about George W. Bush pulling strings to get into the Texas Air Guard. But the press, while reporting lots of details, has done a poor job of communicating how consistently and shamelessly Bush Jr. sought and received favorable treatment while he avoided Vietnam. Furthermore, he has weaseled like Clinton at this worst when explaining what happened.
To put it in perspective, here are 9 ways Bush got favored treatment in the service due to his political connections (he was then son of a Congressman and grandson of a former Senator):
1) He got into the Guard by pulling strings, avoiding the year and a half waiting list;
2) He took a 2-month vacation in Florida after just 8 weeks, (1 of 3 leaves), to work on a political campaign;
3) Bush skipped Officer Candidate School and got a special commission as a 2nd Lieutenant, without qualifications;
4) He was assigned to a safe plane (being phased out of active service), the F-102 ;
5) During flight school, he was flown on a government jet to Washington for a date with President Nixon's daughter Tricia ;
6) Bush got an illegal transfer (later overruled) to a base with no work;
7) He simply didn't show up for a YEAR, with no penalty;
8) George W. skipped all his medical exams after they started drug tests, and was removed from flight status;
9) He ended his service 10 months early to go to Harvard Business School;

Here are the details:
1. Pulled Strings to Get In.
On May 27, 1968, George Bush Jr. was 12 days away from losing his student draft deferment, at a time when 350 Americans a week were dying in combat. The National Guard, seen by many as the most honorable way to avoid Vietnam, had a huge waiting list -- a year and a half in Texas, over 100,000 men nationwide. Yet Bush and his family friends pulled strings, and the young man was admitted the same day he applied, regardless of any waiting list. Bush's unit commander, Col. "Buck" Staudt, was so excited about his VIP recruit that he staged a special ceremony for the press so he could have his picture taken administering the oath (even though the official oath had been given by a captain earlier.)
Bush and his allies have tried to deny this with several changing stories, but Bush himself admits lobbying commander Staudt, who approved him, and court documents confirm that close family friend and oil magnate Sid Adger called Texas Speaker of the House Ben Barnes, who called General James Rose, the head of the Texas Air National Guard, to get Bush in. Rose, who is now dead, told his friend and former legislator Jake Johnson that "I got that Republican congressman's son from Houston into the Guard."
Staudt's unit, the 147th, was infamous as a nesting place for politically connected and celebrity draft avoiders. Democratic Senator Lloyd Bentsen's son was in the unit, as was Republican Senator John Tower's, both of Sid Adger's sons and at least 7 members of the Dallas Cowboys.
2. Took a 2 month vacation in Florida after 8 weeks in the Guard.
Just 8 weeks after joining, Bush was granted 2 months leave to go to Florida and work on a political campaign, the Senate race of Republican Edward Gurney. Bush took a leave every election season, in 1970 to work on his dad's campaign, and in 1972 to work in Alabama.
3. Skipped Officer Candidate School and got a special commission as 2nd Lt.
As soon as Bush completed basic training, his commander approved him for a "direct appointment", which made him an officer without having to go through the usual (and difficult) Officer Candidate School. This special procedure also got Bush into flight school, despite his very low scores on aptitude tests -- he scored 25% on a pilot aptitude test, the absolute lowest acceptable grade, and 50% for navigator aptitude. (Bush did score 95% on the easier officer quality test, but then again the average is 88%).
What made Bush's appointment doubly unusual was his total lack of special qualifications. This procedure was generally reserved for applicants with exceptional experience or skills, such as ROTC training or engineering, medical or aviation skills. Tom Hail, a historian for the Texas Air National Guard, reviewed the Guard's records on Bush for a special exhibit on his service after Bush became governor. Asked about Bush's direct appointment without special skills, Hail said "I've never heard of that. Generally they did that for doctors only, mostly because we needed extra flight surgeons." Charles Shoemake, an Air Force veteran who later joined the Texas Air National Guard and retired as a full colonel, said that direct appointments were rare and hard to get, and required extensive credentials. Asked about Bush, he said "His name didn't hurt, obviously. But it was a commander's decision in those days."
Despite Bush Jr.'s weak qualifications, Col. Staudt was so excited about the direct appointment that he saged another special ceremony for the press,

this time with Bush's father the congressman standing prominently in the background.
The direct appointment process was discontinued in the 1970s.
4. Assigned to a safe plane -- the F-102 -- that was being phased out.
As Bush has been quick to note, National Guard members do face the chance of being called up for active duty, though few actually did during the Vietnam war. So what a lucky break for Bush that he was assigned to fly the F-102 Delta Dagger, a plane already being phased out. In fact, the Air Force had ordered all overseas F-102 units shut down as of June 30, 1970 -- just 3 months after Bush finished his training. Since training is so airplane specific, Bush was guaranteed from the beginning to be safe from combat. Bush's campaign has even used his training on the obsolete plane to justify his early discharge, almost a year before his scheduled discharge, since other F-102 pilots were also being released early. But they can't answer the obvious question -- why spend so much money to train a National Guardsman for 2 years on a plane that was already being phased out, at a time when the Guard was letting F102 pilots leave early due to oversupply?
5. Celebrity Political Date.
During his flight training, Bush's celebrity showed in a couple of ways. Most famously, President Nixon sent a jet to pick up the young flight student for a date with his daughter Tricia. Alas, the potential political marriage and dynasty was not to be. Also, the commencement speaker at Bush's graduation ceremony was -- his dad, Congressman George Bush Sr.
6. Illegal, overruled transfer to a base with no work.
In 1972, Bush once again wanted to work on a political campaign, this time in Alabama. He applied for a transfer to a nearly defunct base with no actgive training or work, the 9921st Air Reserve Squadrom at maxwell Air Force Base in Alabama. Bush's supervisors approved, but a higher headquarters overruled them, noting that the unit had no regular drills. Lt. Col. Reese Bricken, the unit's commander, told the Boston Globe "We met just one weeknight a month. We were only a postal unit. We had no airplanes. We had no pilots. We had no nothing." Even Albert Lloyd Jr., a retired Air Guard colonel who is helping the Bush campaign clarify the candidate's service, told the Globe he was mystified why Bush's superiors at the time would approve duty at such a unit. Lloyd was personnel director of the Texas Air Guard from 1969 to 1995.
7. Just didn't show up for a year -- with no punishment.
National Guard records and Bush's own supervisor's and friends show no sign of him attending any drills or performing any service for nearly a year, from May 1972 until May 1973. This period began with Bush moving to Alabama for a political campaign.
He later applied to transfer to a base that had no work; the transfer was first approved, then cancelled. Bush did nothing for several months; then in September he applied to transfer to Alabama's 187th Tactical Recon group for 3 months. This was approved, but the unit's commander, General William Turnipseed, and his then admnistrative officer, Kenneth Lott, have both said recently that Bush never showed up. "Had he reported in, I would have had some recall, and I do not," said Turnipseed. "I had been in Texas, done my flight training there. If we had had a first lieutenant from Texas, I would have remembered."

Bush claims that he did some work in Alabama, but can't remember any details. ï¿½I canï¿½t remember what I did,ï¿½ he said. ï¿½I justï¿½I fulfilled my obligation." Despite 2 years of searching through hundreds of records, his campaign has been unable to find any record of Bush's service there, nor could they find a single fellow serviceman who remembers his presence. The best they could produce was an ex-girlfriend from Alabama -- Emily Marks --who said George told her he would have to do some Guard duty later that year (1972) in Montgomery. But all that confirms is that he knew of his obligation.

In December 1972, Bush returned to Houston and was scheduled to resume duty there. But in May 1973, Bush's supervising pilots wrote in his annual efficiency report: "Lt. Bush has not been observed at this unit during the period of the report" (i.e. through April 30, 1972). Bush described one of the supervisors, the late Col. Jerry Killian, as a personal friend, so it's likely he would have noticed Bush and given him the benefit of the doubt. Later that month, two special orders commanded Bush to appear for active duty. He served 36 days of active duty during May, June and July before leaving the Guard early.

Amazingly, Bush was not disciplined in any way for his absence, and received an honorable discharge. Under Air National Guard rules at that time, guardsmen who missed duty could be reported to their Selective Service Board and inducted into the Army as draftees.

8. Skipped all his medical exams after they started drug tests.

In April 1972, the military started including routine drug tests in servicemen's annual physical exam, including urinalysis, questions about drugs and "a close examination of the nasal cavities" (for cocaine). According to the regulation, the medical took place in the month after the serviceman's birthday. For George W. Bush, this meant August 1972.

It was May, 1972 -- one month after the drug testing was announced -- that Bush stopped attending Guard duty. In August 1972, he was suspended from flight duty for failing to take his physical. A Bush campaign spokesman confirmed to the London Sunday Times that Bush knew he would be suspended. "He knew the suspension would have to take place." Bush never flew again, even though he returned to his Houston base where Guard pilots flew thousands of hours in the F-102 during 1973. The only barrier to him flying again was a medical exam (and his lack of attendance).

Careful readers will recall that when Bush issued his partial denial of drug use, he said (or implied) that he hadn't used them since 1974, but he pointedly refused to deny drug use before then, i.e. during his military service. Several sources have also indicated that it was in December, 1972 -- 4 months after his medical suspension -- that a drunk Bush Jr. challenged his father to a fist fight during an argument over the son's drunk driving. (He had run over a neighbor's garbage cans.) Shortly thereafter, Bush Sr. arranged for his son to do community service at an inner city Houston charity.

Bush's campaign aides have said he did not take the physical because he was in Alabama and his personal physician was in Houston. But flight physicals can be administered only by certified Air Force flight surgeons, and some were assigned at the time to Maxwell Air Force Base in Montgomery, where Bush was living.

9. Left service 10 months early.
Even after that easy stint, Bush couldn't fulfill his obligation. He quickly made up the missed days he had to and applied for an early release, before he had to take his next annual physical exam (with drug test.) While the official discharge date was October 1, 1973, Bush's last day in uniform was actually July 31 -- a full 10 months before the end of his 6-year, part time commitment. Al Gore also requested and received an early discharge (from the Army, in his case) to go to school.
Weasel words; his story keeps changing.
When asked about his service, Bush has weaseled in a manner eerily reminiscent of Bill Clinton. Notice the careful word choice. Bush and his campaign claimed that no Bush family or friends pulled strings. Under pressure, this changed to "All I know is anybody named George Bush did not ask him [Ben Barnes] for help." By that he meant, himself or his dad. Of course, it later came out in court that a close Bush friend, Simon Adger, had asked Barnes to get Bush Jr. into the Guard, and that Barnes did so, via General Rose.
Now's it's not even clear that a George Bush didn't ask for help. When pressed, the former president's spokeswoman (Jean Becker) said he is "almost positive" that he and Mr. Adger never discussed the Guard matter. "He [Bush Sr.] he is fairly certain - I mean he doesn't remember everything that happened in the 1960s..." In any case, Bush Sr. and Adger were very close. Ms. Becker acknowledged that "President Bush knew Sid Adger well. He loved him." Adger may have needed only a hint.
Furthermore, George Bush Jr. admits that he knew Adger socially at the time, and further admits that he lobbied Col. "Buck" Staudt, the commander of the VIP unit Bush joined. Staudt claims that he, not General Rose (who he later replaced), was the one who made the decision on admissions anyway. Bush Jr. admits that he met Staudt in late 1967, during Christmas vacation of his senior year, called him later, and -- in Bush's words -- "found out what it took to apply."
When asked how Bush came to call Staudt, his spokeswoman Karen Hughes said he "heard from friends while he was home over the Christmas break that ... Colonel Staudt was the person to contact." She says that Bush doesn't recall who those "friends" were. But we know that Sid Adger was also a friend of Staudt's, served with him on the Houston Chamber of Commerce's Aviation Committee, and in 1967 held a luncheon honoring Gen. Staudt and his unit for winning an Air Force commendation. In fact, both of Adger's sons also joined General Staudt's unit, in 1966 and 1968 respectively.
Bush and his staff also claim that he vaulted ahead of the Air Guard waiting list because he was willing to fly an airplane, and there were openings. There is nothing to support this claim, however. For one thing, the F-102 was being phased out at the time and F-102 pilots were being released from service early, as indeed Bush himself was. And Tom Hail, a historian for the Texas Air National Guard, says flatly that there was no pilot shortage in the Guard squadron at that time. Bush's unit had 27 pilots at the time he applied; while they were authorized for 29 pilots, there were two more already in training and one awaiting a transfer.
Bush also weasels on whether he was avoiding combat or not. He has stated on several occasions that he did not want to be an infantryman, and

acknowledges that he came to oppose the war itself. He claims that he joined the guard to fly planes, and would have been happy to go to Vietnam, but ignores the obvious choice of the Air Force or the Navy -- which his dad, a genuine war hero, joined. Furthermore, when he signed up for the Guard, he checked a box saying "Do not volunteer for overseas service." Later, he made a perfunctory application to transfer to a program called "Palace Alert", which dispatched F-102 pilots to Europe or the Far East -- and just occasionally Vietnam -- for 3 or 6 month assignments. But Bush was not nearly qualified, as he must have known, and was immediately turned down, and the F-102 not used overseas after June, 1970 in any case.

Insider Business Deals

Bush Jr. has made a lot of money off of three business deals. In each one, his contribution is hard to perceive, yet he walked off with hundreds of thousands or millions of dollars in deals arranged by his father's political cronies. The deals were
1. the sale of Junior's struggling oil company,
2. Junior's sale of oil stock just before the Gulf War, and
3. getting a cheap slice of the Texas Rangers baseball team, which he recently sold for a huge profit (he paid $600,000, and sold for $14 million).
The general pattern here is just as important as the details. Bush did no work in his business career that can clearly be called "excellent" or even "solid." The money he made is tangential to his efforts at best -- the oil companies lost a great deal of money during his tenure, and the Rangers cut a lot of corners -- which makes the cronyism that much more suspicious.
It's not just that one or two of Bush's deals look funky; every major business deal he has been involved with included wealthy supporters of his father, and many of those investors later received favorable treatment from either the federal government under Bush, Sr. or the current Texas administration of Junior.

Deal #1: The Oil Business: Rewarded for Losing Money

Like his dad, Junior struck out in Texas and founded an oil company, Arbusto Energy, Inc., with $20,000 of his own money. (Arbusto is the Spanish word for bush.) The company foundered in the early 1980s when oil prices dropped (and his dad was Vice President.)
The 50 investors, who were "mainly friends of my uncle" in Junior's own words, put in $4.7 million and lost most of it. Junior claims that investors "did pretty good," but Bush family friend Russell Reynolds told the Dallas Morning News: "The bottom line was there were problems, and it didn't work out very well. I think we got maybe 20 cents on the dollar."
As Arbusto neared collapse, Spectrum 7 Energy Corporation bought it in September 1984. Despite his poor track record, the owners made Bush, Jr. the president and gave him 13.6% of the parent company's stock.
Spectrum 7 was a small oil firm owned by two staunch Reagan/Bush Sr. supporters -- William DeWitt and Mercer Reynolds. These two were also owners of the Texas Rangers and allowed Bush Jr. to purchase a chunk of the team cheaply; he later sold it for over 24 times what he paid.

Within two years of purchasing Arbusto and making Bush Jr. president, Spectrum 7 was itself in trouble; it lost $400,000 in its last 6 months of operation. That ended in 1986, when Harken Energy Corporation bought Spectrum 7's 180-well operation.
Junior got $227,000 worth of Harken stock, and a lot more. He was named to the board of directors, made $80,000 to $100,000 a year well into the 1990s as a "consultant" to Harken, and was allowed to buy Harken stock at 40% below face value.
He also borrowed $180,375 from Harken at very low rates; the company's 1989 and 1990 SEC filings said it "forgave" $341,000 in loans to unspecified executives.
So what did Junior do for all this money? It's hard to say exactly, but things happened for Harken after Junior came on board:
it got a $25 million stock offering from an unusual bank with CIA ties,
it won a surprise exclusive drilling contract with Bahrain, a small Mideast country, and
an Arab member of its Board of Directors was invited to White House policy meetings with President George Bush and National Security Adviser Brent Scowcroft.

Easy Money From Odd Sources

The firm's $25 million stock offering was underwritten by Stephens, Inc., an Arkansas bank whose head, Jackson Stephens, was on President Bush's "Team 100." (That was a group of 249 rich persons who gave at least $100,000 each to his presidential campaign committee). Stephens placed the offering with the London subsidiary of Union Bank of Switzerland, which (according to the Wall Street Journal) was not known as an investor in small American companies.
Union Bank did have other connections; it was a joint-venture partner with the notorious BCCI in a Geneva-based bank, and was involved in a scandal surrounding the Nugan Hand Bank, a CIA operation in Australia whose executives were advised by William Quasha, the father of Harken's chairman (Alan Quasha.) Union Bank was also involved in scandals surrounding Panamanian money laundering by BCCI, and Ferdinand Marcos' movement of 325 tons of gold out of the Phillipines.
That wasn't the only financing connection Junior brought; after the company won its Bahrain deal (see next item), the billionaire Bass brothers of Texas offered to underwrite the drilling operation. Robert Bass is also a member of Bush's Team 100, and he and his kin gave $226,000 to Bush Senior between 1988 and 1992.

The Bahrain Contract

In January 1990, Harken was chosen out of the blue by the small Mideast country Bahrain for an exclusive offshore oil drilling contract. They beat out Amoco, an experienced and major international conglomerate, despite having no offshore oil drilling experience at all. As of March 1995, the most recent report we could find, they had found no oil.
Junior has denied that he was involved in the deal, and even told the Wall Street Journal that he opposed it. But a company insider told Mother Jones

Magazine "Like any member of the board, he was thrilled. His attitude was 'Holy shit, what a great deal!'"
If he did oppose it, he wasn't much of a consultant. Charles Strain, an energy company analyst in Houston, told Mother Jones: "Harken is not hard to understand -- it's easy. The company has only one real asset -- its Bahrain contract. If that field turns out to be dry, Harken's stock is worth, at the most, 25 cents a share. If they hit it big over there, the stock could be worth $30 to $40 dollars a share." As of December 1998, Harken Energy Corp. (HEC on Amex) is trading at $2.69 a share.

Access to the President For Bush's Foreign Business Partner

The most troubling thing that happened to Harken after it bought George Bush Junior in, was that one of its Board of Directors members was suddenly admitted to the highest levels of United States foreign policy meetings. These were not Clintonesque meet-and-greet fundraisers, but actual working policy meetings during a critical period.
After the Harken-Bahrain deal was signed, Talat Othman was added to a group of Arabs who met with George Bush and National Security Adviser Brent Scowcroft three times in 1990 -- once just two days after Iraq invaded Kuwait.
Othman was the representative of Sheikh Abdullah Bakhsh, who purchased 10% of Harken stock and had several ties to the infamous BCCI bank. Bakhsh was a co-investor in Saudi Arabia with alleged BCCI front man Ghaith Pharaon. Bakhsh's banker, Khalid bin Mahfouz, was another BCCI figure and head of the largest bank in Saudi Arabia. Sheikh Kalifah, the prime minister of Bahrain, was a BCCI shareholder and played the key role in selecting Harken for the oil contract.
This is the crowd that gained entry to the President and the National Security Adviser of the United States after George Junior made his deal with Harken.

Deal #2: Selling Oil Stock Just Before Iraq Invaded

George Bush, Junior sold 60% of his stock in Harken Oil in June, 1990 for $848,560. That was brilliant timing; in August, Iraq invaded Kuwait and Harken's stock dropped 25%. Soon after, a big quarterly loss caused it to drop further.
A secret State Deparment memo in May of that year had warned that Saddam was out of control, and listed options for responding to him, including an oil ban that might affect US oil prices.
We can't be sure that the President or an aide mentioned these developments to his son, or that Harken's representative who was admitted to meetings with the President picked up something and reported back to Junior. But it is the simplest and most logical explanation. The Bushes acknowledge that George Senior and his sons consult on political strategy and other matters constantly.
Furthermore, Harken's internal financial advisers at Smith Barney had issued a report in May warning of the company's deteriorating finances. Harken owed more than $150 million to banks and other creditors at the time. George Bush, Jr. was a member of the board and also of Harken's restructuring

committee, which met in May and worked directly with the Smith Barney consultants. He must have known of these warnings.
These are pretty clear-cut indications of illegal insider trading. The Securities and Exchange Commission, controlled at the time by President George Bush, investigated but chose not to press charges.
Junior also violated another SEC rule explicitly. He was required to register his sale as an insider trade by July 10, 1990, but didn't until March 1991, after the Gulf War was over. He was not punished or cited.

Deal #3: A Big Slice of the Texas Rangers for a Little Money (and a Big Profit)

The third unusually easy deal for George Bush Junior was his involvement in the Texas Rangers baseball team. In a nutshell, he was offered a piece of this valuable franchise for only $600,000, by supporters of his dad who also bailed out his failing oil company. He recently sold his stake for $14 million to a Texas millionaire with lots of businesses regulated by Bush Junior's administration. "When all it is all said and done, I will have made more money than I ever dreamed I would make," Bush told the Forth Worth Star-Telegram.
Bush was allowed to buy 1.8% of the team for $600,000 of borrowed money, and was even made one of the two general managers. His qualifications for partial ownership? Several years working at failing oil companies, and his political connections through his father. It's hard to be sure, but we're guessing that latter was probably more important.
Junior tripled his investment, like the other owners, with the help of massive government intervention and subsidies. But his real wealth came from simply being given 10% of the team as a "bonus" for "putting together the investment team."
Even if he really had done that work, it's an absurd bonus ($12.2 million), but the fact is that he didn't add much. Cincinatti financier William DeWitt brought Bush in, not vice versa, shortly after George Bush Sr. was elected president. (DeWitt had also invested in Junior's oil companies.). The only investor Bush actually brought in was Roland Betts, a Yale fraternity brother, and that wasn't good enough.
Under Junior's management, the deal was about to fall apart until baseball commissioner Peter Uebberoth brought in another investment group led by Fort Worth Billionaire Richard Rainwater and Dallas investor "Rusty" Rose. Since the deal, both men have profited greatly from business with the Texas administration of George Bush, Jr. Rose personally invested $3.2 million and became the other general manager of the team. Under the team partnership agreement, Bush Junior couldn't take any "material actions" wihtout Rose's prior approval. There was also a method for removing Junior as a general partner, but no way to remove Rose. Yet Rose's "bonus" for his role in setting up the deal was less than half of Junior's.
What kind of owners would approve such a big payoff to Bush? In addition to Rose and Rainwater, men with business pending before Texas government, the owners included William DeWitt and Mercer Reynolds, major contributors to President Bush who had also purchased Junior's failing oil company through their Spectrum 7 Energy company.
If this deal doesn't smell bad enough already, consider Bush's blatant

hypocrisy. The main value of the team is its new stadium (ranked by Financial World as the most profitable in baseball) and 300 acres of vacant land the team owns between the stadium and 6 Flags of Texas, which is next door.

Putting Tax Money into Bush's Pocket

The hypocritical part is, the private owners of this very valuable land didn't want to sell. Bush and his partners gave them only a lowball offer, and when it was rejected they arranged for a new government agency (the Arlington Sports Facility Development Authority, or ASFDA) to condemn it for them.

The agency foreclosed the land and paid the owners a very low price, later judged by a jury to be only 1/6th of its actual value. The agency also floated bonds, guaranteed and repaid by taxpayers, to finance the purchase. This amounted to a $135 million subsidy for Bush and partners, compared with the $80 million they paid for the franchise. Since they recently sold the entire franchise for $250 million, it's easy to see whose money Bush and friends pocketed.

The next time Junior talks about tax cuts, remember this: Arlinton had to impose a new 1/2 cent sales tax just to pay for the subsidy Bush and his partners received.

To add insult to injury, Bush and his partners continue to stiff the taxpayers for $7.5 million they owe under the terms of the agreement. It held that the team would pay all expenses over $135 million. The original owners of just 13 of the acres sued the City of Arlington, saying that the ASFDA had not paid a fair price for the land. The jury awarded them $7.5 million, but even though the project exceeded the $135 million limit, the partners have refused to pay. Given their huge taxpayer subsidy and $170 million profits, it seems absurdly selfish.

George Bush, Jr. has said in campaign speeches "I will do everything I can to defend the power of private property and private property rights when I am the governor of this state." Apparently this deal was not covered by that statement, since he wasn't governor yet.

He claims that he "wasn't aware of the details" of the land condemnations, even though he was the team's managing general partner and has bragged about personally getting the stadium built. But he told the Fort Worth Star-Telegram in October 1990 that "The idea of making a land play, absolutely, to plunk the field down in the middle of a big piece of land, that's kind of always been the strategy."

And the key to their land play was always the strong arm of government. A memo from Arlington real estate broker Mike Reilly to Rangers President Tom Schieffer dated October 26, 1990 - the day before Bush's comment about the land play - said "In this particular situation our first offer should be our final offer ... If this fails, we will probably have to initiate condemnation proceedings after the bond election passes."

On the first day of the 1993 campaign, Bush said "The best way to allocate resources in our society is through the marketplace. Not through a governing elite." Not through a private sports team buying in the President's son cheap, and then getting the government to hand them extremely valuable land.

Party Hearty: Sex, Drugs, And Rock 'N Roll?

For almost half his life, Junior was distinguished mainly by his hearty appetite for partying. A Newsweek profile by Evan Thomas, describing his college years, says he "seems to have majored in beer drinking at the Deke House." After he formed his first company (which failed), Thomas writes, "By his own account, Bush spent a lot of time in bars, trying to sort out who he was. He had a kind of ragged nervous energy in that period, and he could be a bully."
The Bush family spin is that the governor quit drinking cold turkey on his 40th birthday, straightened out by the love of a good woman (his wife, Laura.) They even pull out their secret weapon, lovable Barbara Bush, with anecdotes about what a rascal little George Junior was.
But the explosive element here is not booze. It's sex, drugs and hypocrisy. Frankly, it doesn't bother us if candidates have partied, even a lot. Who wants a bunch of namby-pamby boy scouts running the country? But George Bush Jr. makes a big point of travelling around the country and lecturing students on staying celibate, sober and drug free. He does not permit the option of partying hard until you're 40 and then stopping.
And as governor, he attacked his predecessor for allowing leniency toward first-time drug users, and pushed a "no tolerance" policy that has sent casual cocaine users -- who's dads aren't rich, or president -- to prison for years. He even has the gall to proclaim that such users "need to know that drug use has consequences." At least if you're from the wrong neighborhood.

No Handcuffs or Dwarf Orgies

Junior is so worried about his past that he hired a private detective to investigate himself. (I guess he can't remember what he did at those parties, which tells you something right there.)
According to an unnamed insider quoted on MSNBC, Bush "isn't terribly thrilled" about what they found, though no one is spilling the details (yet). "No handcuffs or dwarf orgies, but he was a handsome, rich playboy and lived that life," the insider said.
Sex: Bush volunteers to reporters that he has been faithful to his wife. However, he was married at 31 and makes no claim of virginity before that point, even as he lectures the youth of today to remain celibate. A Clinton aide who was in Bush's class at Yale has already warned him that "People who live in glass houses shouldn't throw stones."

COCAINE:

According to a new book, three independent sources close to the Bush family report that Governor Bush was arrested in 1972 for cocaine possession, and taken to Harris County Jail, but avoided jail or formal charges through an informal diversion plan involving community service with Project P.U.L.L., an inner city Houston program for troubled youths at the Martin Luther King Jr. Community Center in Houston's dirt-poor Third Ward. (In another new book, reporter Bill Minutaglio, writes that the year of community service was arranged by the Governor's father, ex-president Bush, after he caught Bush Jr. driving drunk.)
That year certainly is out of character with the rest of Bush Jr.'s life. Before and after 1972, he was a rich, hard drinking playboy. Suddenly, and

only that one time in his life, he worked for a liberal charity in an inner city ghetto. As soon as the year was over, he resumed his previous pattern and has done no charity work since.
The author of this new book, J. H. Thompson, has some interesting scandals of his own. Of course, his own flaws don't disprove what Bush did or didn't do, but the way Thompson has responded certainly undercuts his credibility. First, he admitted to a reporter from Slate Magazine that he made up at least one detail, that one of his informants spat tobacco into a styrofoam cup during their (phone!) interview.
Then, reporters -- or perhaps Bush campaign operatives -- found that the author apparently is an ex-convict, on parole for hiring a hit man to kill a former boss. That doesn't mean he can't research, of course, but Thompson's credibility suffered greatly as he claimed it was someone else, despite incredible similarities between his resume -- including unexplained job gaps during the prison years -- and confirmation from his parole officer that indeed, the author named J. H. Thompson is the one who did time.
Bush Jr.'s Evasive Responses:
Bush has essentially admitted that he used cocaine in his Clintonesque, carefully worded partial denials. He won't deny using cocaine or marijuana, though under persistent questioning he said that he hadn't used cocaine in the last 7 years. Most newspapers report that he denies using cocaine since 1974, but that's not exactly true.
That is the most favorable interpretation of what Bush said, but since Bush and his campaign have already made Clintonesque denials on other issues, we need to look at his words carefully.
What Bush actually said was ""I could have passed the [FBI] background check on the standards applied on the most stringent conditions when my dad was president of the United States - a 15-year period," Mr. Bush said. This is ambiguous because background forms ask slightly different questions, depending on the position. Drug questions can go back one year, seven years or 10 years. Bush Jr. didn't have any formal position in his father's administration, so which one applies is unclear. And 15-years is not one of the choices.
Since Bush Sr.'s presidency began in January 1989, reporters assumed that Jr. was denying drug use for 15 years before that, to 1974. But that is not at all clear. His only direct statement was for seven years before today. He could easily have been denying drug use only for 15 years before today, based on 7 or 10 years dating back from the END of his dad's term. 10 years before 1993, the end of Bush Sr.'s term, is pretty close to 15 years before today.
The Clinton administration actually has a stricter standard than Bush did -- the FBI now asks about any drug use after age 18. But Governor Bush has refused to say whether he would pass that standard, even though that is what he will be asked if he wins. Bush also has refused to answer whether he could have passed the FBI test when his father was vice president, during the 8 years from 1981-1989.
As for the arrest and diversion charge, Governor Bush admits working at the center in 1972. When asked for comment, Bush's campaign spokesman reportedly said "Oh shit... no comment." McLellan denies saying that.
Bush's father, ex-president George Bush, denies the cocaine arrest charge,

and in yet another carefully worded denial, Bush said ""It's totally ridiculous what he suggested and it's not true."
You'll recall that President Clinton made a very similar statement about Gennifer Flower's allegations of an affair, during the 1992 campaign. Later, when he had to testify under oath, it turned out that he was denying that all of the details of the story were true, not whether an affair had occurred or any specific details (many of which were accurate).
Similarly, Bush himself does not deny being caught with cocaine, or having performed community service. Bush's campaign spokesman has now denied that Bush was ever arrested on any drug charge.
The director of the center, Madgelean Bush (no relation), also denies the reports. However, her center is dependent on Texas state money, and the director, who grew up poor but has amassed several houses around the center while running it, allowed Governor Bush to use the center for a photo opportunity earlier this year.
The Bush campaign also produced Carol Vance, who was the Democratic District Attorney in Harris County in 1972, to say that there was no diversion program in that year, nor were there any Republican judges (as Hatfield's book states.)
Rock and Roll: Bush keeps a picture of himself with two members of ZZ Top, but does not play the song "Tube Steak Boogie" during his celibacy lectures. We have found no evidence to support the the most explosive allegation so far; that Bush played air guitar to a Foghat record at a party in the late 1970s. But he won't deny it, either.
When pressed on the hypocrisy issue, he speaks to hypocritical baby boomer parents everywhere: "If I were you, I wouldn't tell your kids that you smoked pot unless you want 'em to smoke pot. I think it's important for leaders, and parents, not to send mixed signals. I don't want some kid saying, 'Well, Governor Bush tried it.'"
It's amazing enough that he openly defends hypocrisy, but his own signals are very mixed. When allowed to imply that he is just another manly, hard-drinking rapscallion, Bush seizes the opportunity. "When I was young and irresponsible, I was really young and irresponsible," he often says. He even hints at pot smoking, as in the above quote, and why not? Everyone from his likely opponent Al Gore to Newt Gingrich has admitted smoking pot.
But Junior wants it both ways. When the deadly rumor of cocaine use surfaces, he retreats to his high-minded rhetoric about not giving mixed messages. If he thinks he can skate to the presidency without either his right-wing foes or embittered Clintonistas pushing his past into the limelight, then he really IS on drugs.

Do mp3 files exist on the internet, or does anybody have tapes for
sale or trade, of KA4MUJ and KV4FZ in their fight against
WB2OTK, Raincoat Charlie, etc., on 14313 and 3950?

I listened to the goings-on around 1990 and for a few years subsequent
to then.

Yes, somebody should tell him.

Sounds like you're finally warming up to the Liberty Net and it's right of free speech. It takes a long time for the light bulb to go on in some peoples head. Better late then never.

"Political Correctness is nothing but tyranny with manners."

Revisiting Radiosigs-Guy's inerrant observations ..
>The man needs help.

On second thought, Sigs-Dude, maybe he's passed the test. Maybe he's proven himself a true believer. Maybe he should forsake all these wicked worldly pursuits and go live on "Prophet" Stair's commune a few months.

Was there not a "school of the prophets"? Did not Elisha study under Elijah?

Picture it big .. "Prophet" Stair being whisked away to heaven in a chariot of fire, and dropping his mantle on "Prophet" Davies as he zooms out of sight.

First, however, "Prophet" Stair must validate his office. Maybe he could call down fire and brimstone on the prophets of Baal. Or a bunch of crooked politicians. Either one would be fine.

Well, I don't know. Davies says he wants to quit the anti-semetic
remarks and hateful posts, then posts some. It would seem that some so-
called Christians follow the "do as I say, not as I do" philosophy.

Ever notice some of these TV / Radio type "Prophets" have a 1-800
number for sending in donations / credit card orders for "merchandize"
etc but then the "Prayer Line" is a 1-900 number ? They're "Profits"
alright.

3980. GOP-2004 = 1st Alternative Lifestyle Presidency ?? - 4 KK4TL

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-01 00:00:00 UTC
From: chipster166@aol.com

Source record: 106061

It Sure is *NICE* to see all the Right Wing Republicans *WARMLY*
embrace Dick Cheney's daughter Mary and her 'Alternative' (Lesbian)
lifestyle, I guess I'll have to retract my statements about how closed
minded / discriminatory the Rep's are. I guess I've judged them wrong
all along.

I was thinking, if Mary Cheney happened to become SO (Significant
Other) with Newt Gingrich's lesbian sister and they entered politics
the GOP could possibly have the *FIRST* Alternative Lifestyle couple
running for the presidency in 2004 !!

Maybe even Pat Robertson will come around and perform the wedding
ceremony ?

Ms. Cheney - Ms. Gingrinch in 2004 ?

Comments ?

;)

Excellent call Chipster-Guy ..
> the "Prayer Line" is a 1-900 number

Yeah but just look at all the instant miracles you get. Like if you call Oral Roberts or Robert Tilton, you strike oil in your back yard the next day. Or something. Don't sweat the details, Chip-Man .. just call.

Operators are standing by. But wait .. there's more .. if you're the next 25 callers, you get a free Mr. Microphone and stuff.

My favorite is Robert Tilton. Hands down.

Mr. Reagan is a major person in the occult. Did you know that some of our elite in this country are members of a "Bohemien Owl Cult" They have a 2 week retreat and pray to a owl! How obsurd. Brother Stair talked about that today too.

> Please elaborate on your own reasons why you
> feel that this is so.

Well, I personally think that he could be, We know that both Bush's are members of Skull and Bones and are masons. God hates these secret societys, God has told me to expose them, no matter what the cost, even if it costs me my life.

A "Called Prophet of God reports ..
>Did you know that some of our
>elite in this country are members of a "Bohemien Owl Cult" They have a 2
>week retreat and pray to a owl! How obsurd. Brother Stair talked about
>that today too.

It's *obsurd* alright. But .. if "Prophet" Stair talked about it, then that clinches it for me.

>We know that both Bush's are
>members of Skull and Bones and are masons

How do we "know" that?

>God hates these secret
>societys, God has told me to expose them, no matter what the cost, even if
>it costs me my life.

The Masons are shaking in their shoes. The Shriners are leaving town in droves.
The Knights of Columbus were on the phone with Pope John Paul all afternoon.

Now back to the main point. Has God told you when President Reagan plans to leave office? Keep us posted. We don't wanna miss it. We'll all tune in to CNN as soon as you give us the go-ahead.

The Radiosigs-Guy is the best there ever was ..
>Give me Al Gore anytime and he's gonna be our next Prez. I promise.

Yep, I think you're right again. Dub-Yah alienated the Christian Coalition by accepting Mr. Cheney's daughter. But he didn't fool the gay / lesbian / feminist vote for a New York second.

So looks like Dub-Yah made some enemies without gaining any friends. Gotta love it when compromise backfires.

Gore / Rodham-Finklestein 2,000 ! ! !
If you liked Johnson-Humphery, you're gonna love this ticket.

Does anyone have a copy of the manual with a schematic for the
McKay-Dymek DR-101 receiver?

If not, perhaps the manual from a DR22 or DR33 would help.

Tnx,
Doug/WA1TUT

Actually, yes.

Homosexuals can be either men or women; lesbians _are_ homosexual,
but are, by definition, female....you were saying something about
"not knowing"...?

>You fit right in.
With homosexuals? As acquaintances, yes. As partners, no.

I understand that a lesbian is a female who prefers females.
Therefore, Al Bore is a lesbian. Al Bore invented lesbianism.

Well, that's what happens to a nation after 40 years of Demoncrat liars and related political B.S. Soon, one realizes that your vote is only good for a counter vote for the lesser of two evils.

Al Bore is a delusioned candidate who won't win. The voters aren't _that_ pathetic!

Bush isn't my idea of Presidential mettle, either, but in a side by side comparison with Al Bore, Bush is the only choice.

Solo, Bore would win. But put even a homeless wino in the running and you would have equals, except that one would smell nicer than the other. But both would be suffering from delerium tremens...

AF2Y isn't interested in Ham Radio. He's interested in politics and
he's pretty good at it. He posts the stuff here because he feels,
erroneously, that he's smarter, richer and more articulate than the
rest of the group and it makes him feel better. AF2Y would be chewed
up and spit out by more than a few political NG's that come to mind.

Too, AF2Y is hoping that he will somehow reach Herb Shoenbaum who he
has been fixated on and felt inferior to for years. AF2Y, while
possessing average political awareness lacks the gift to convey it via
the spoken word as does Herb S. He lacks the broadcast voice, the
inflection, the "hollywood" aspect of it all. You either have it or
you don't and AF2Y doesn't. -Hence his rather psychotic behaivor of
regularily bringing Herb up when everybody's forgotten or feeling
compelled to glue himself to the TV, hoping, wishing for a glimpse of
Herb at the RNC. It's weird.

Bungholius Maximus wrote:

> If God really wanted to save us and warn us, he wouldn't send delusional, defective trailer trash like you and stair,

1) I think Bro. Stair has moved up to a little cabin.

2) Hebrews 11:8 Tells us, "By faith Abraham, when he was called to go out into a place which he should after receive for an
inheritance, obeyed; and he went out, not knowing whither he went."

Talk about "trailer trash"....In your book this great man would have been even lower, as he would have been "tent trash" in your book!
Read on in Hebrews 11. It tells of those who were murdered for Christ's sake and the world was not worthy of them!

> he would send
> us
> people who we would listen to, people with respect and credibility,

Some people will listen to nothing that is Godly, but will believe the lie mentioned in II Thes. 2:11, the strong delusion that God
will send to them.

> not a couple of dumb hicks with bucked teeth and an IQ of 70

Similar BS was probably said about John the Baptist as he went about in Camel's hair and eating locusts and wild honey.

>
> because
> of family inbreeding who spew doomsday nonsense and spam Tiny-Tenna. You make your god look like an evil moron and thankfully
> the real God gives people half a brain to know not to listen to your uneducated, rebel flag waving, dumb hick view of religion.

Not worthy of comment -- obviously lies! Oh, You don't happen to be a fag do you? With a handle like Bungholius Maximus it seems you
could be a big one and proud of it. That may explain your attitudes.

Al

Stair preaches nothing but psychotic doomsday drivelings and is out to simply
make people fearful and full of anxiety in order to breed extremist people who will
give him power.
If doomsday is coming, there is nothing we can do about it.
Stair doesn't provide a way out nor tells anyone what "getting right with God" means
less how to do it.
Stair doesn't even preach the gospel, he just snips verses from revelations
and bases his whole cult on it.
I base my entire anti-beleifs on stair because he calls himself a prophet.
That in itself is a lie. What miracle has ever been worked through him?
Name even one? Jesus made himself known to be a miracle worker before he made
any claims himself as to be a miracle man. Stair claims to be a prophet with no divine
proof.
If you are going to ask me to accept stair, a mealy mouthed lunatic who calls himself a
prophet
and tells everyone they are going to hell and there is no way out of our sin, then I'll buy
that
bridge and swampland you are trying to sell me also because I would have to be the most
stupid, gullable person alive.

The Chipster hit the head on the nail but aren't WEAPONS what the G.O.Ps all about? Who's the TOP GUN(pun intended)? The drunk Charlton Heston and don't jump all over me for calling him one. He just admitted to it and he's either in a dry out clinic now or is going into one.

When have you heard a ranking Democrat calling for a gun in every crib? When was the last time you heard of a Democrat against gun CONTROL? Never, because unlike Republican slobs who derive oodles of dough from drunken Heston and friends in and about the NRA, Democrats CARE about the citizenry of these here 50 states.

Okay, if the Elephants are so in love with guns then it stands to reason they thrive on weaponry for war even if we have enough to blow up the world dozens of times. Why? Because their pals in weapons productions love all that green flowing their way. Why then should the Elephants rescind their obsession with killing despite overkill? And that applies to home and abroad! GIVE THAT KID A MAGNUM IN HIS LUNCH PAIL(that's what it sounds like to me and how unfortunate for us all)

Hell, Bush and Cheney MUST be defeated and I'm on a roll to make it happen. I CARE about you guys and gals on this board. I CARE about every fellow citizen too. Enough of this crazed Republican obsession with overkill abroad and murder at home. Enough of this Republican mollycoddling Gary Bauer, the ugly midget, and his Religious Right abomination! Enough of this Republican prediliction for closing down government if they don't get their way!

God almighy people-wake up and smell the roses. The last thing we need here is another Bush in the White House. He'll screw up the economy as did his poppa, the national debt will skyrocket; there'll be no healthcare reform; we'll have inflation and crazy rightwingers appointed to the Supreme Court. America will enter a Dark Age. That's what you want after we've made so much progress on so many issues under Bill Clinton?

George W. Bush is as unique and special as a fart at a Heinz Baked Bean Convention.

VOTE GORE....VOTE GORE....VOTE GORE.

Doc,AF2Y

In an indirect way this is already happening to some ham gear. My Kenwood TS870 HF rig can be remotely controlled by using an RS232 serial port. The rig itself should (without breakdowns) be useful for 20 or 30 years (judging from useful boatanchor gear around today). However the RS232 serial port will likely be history in just a few more years. And the operating system to run the 16 bit control software won't be far behind. I guess I should save a contemporary software/computer system just for the rig...

Sir,
In 31 years of hamming I came to realize that hams are astute, literate and well-informed, generally speaking. Of course then again we come across the "Duh,send QSL," type which you reflect.

You want to talk ham radio. Now? Why? The bands are DEAD or do you like white noise? From what I surmise, ARRL membership is declining. Welfare Extras are flooding in to speak to no one because the bands are dead. Like man, cool it and get with the program. Wait until the bands open and then you can talk about fancy antennas that catch DX or the latest Japanese revolving door of "riggery." That means you buy a Dishawoo 500 on Monday and the Dishawoo 501 comes out on Tuesday and you trade in at a loss to get it and holy smokes-here's comes the Dishawoo 502 on Friday.

In the meantime, for the most exciting news in ham radio, go to Hap Holly's site and read Riley's letters, that is if you like Wyatt Earp stories.

I am a female and am having trouble being heard or understood on HF. It's not for lack of getting out tho. It's just that my voice is not carrying too well. I have a Drake TR 7 and was wondering what would be a good mic to get for it to help me be heard/understood better? I had first thought of the Heil Gold Line mic. But in reading the literature about it, it states the the best results are with on on board transmit DSP or outboard EQ. I do not want to have to purchase an EQ too so was wondering if there is anything else that would be a good choice for my situation. Please email any thoughts, ideas, or help to me at: N9YLN@aol.com
Thanks in advance!

4010. AF2Y: G.O.P. Inclusion?

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-02 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m9adk$v36$1@slb3.atl.mindspring.net>
Source record: 105888

I saw it last night but didn't quite believe it.

The Elephants desperately seek a new image-inclusion instead of the stupid policy of exclusion that cost them the White House in '92 and '96. They are doing everything to make us believe they CARE about the average white and non-white American. They want us to embrace Mr. Bush and Ellen DeGeneres Cheney's father, Dick(no pun intended but ain't that ironic?) And so what happened?

Right on National TV, last night, the Republican Delegation from TEXAS, "Dubya's" HOME STATE, first threatened to walk out and then backed off by threatening to pray for the gay Senator from Arizona who was about to address the placard waving baboons.

Can you imagine what "Dubya" must have done upon seeing that? Some type of "Instanogram" must have been shot off telling those Texans, "You dopes. You're killing me. You're killing the platform. You're killing the whole concocted theme to trick the voters into voting for me. Wait until I'm in to go after the queers."

Remember folks-it was on Nat'l TV and on the same night such G.O.P greats as Reagan, Bush and Ford were being feted. Uh oh. You see; nothing's changed with these bigots. That's right; I calls 'em like I sees 'em and the Republican party is the party of bigotry because to Democrats it makes no difference whether a speaker is straight or gay, black or white, male or female, Gentile or Jew etc. THAT'S INCLUSION, PEOPLE, not the game day face put on by those phony creeps in Philadelphia. They yell about RIGHT TO LIFE but would deny an honorable Senator to speak because of his LIFE STYLE. What's wrong with that picture, people? And if you don't think the Dem pundits are not gonna pick up on that fiasco last night, think again. It said MUCH about the G.O.P. 2000. It said much about TEXAS and it said much about the GOVERNOR of TEXAS.

On the bright side, Reagan looked regal in those taped clips. He was the classiest man to ever hold the office of President even though stupid enough, through the advice of his speechwriter, Pat Buchanan, to lay wreaths on the graves of the Waffen SS at Bitburg cemetery. And John McCain looked splendid even though he's a pee poor speaker who talks with his lips shut. Try it, it's tough. McCain too is classy and intelligent and when you Elephants lose in November, remember I told you that it should have been John, not George, as your man. You wouldn't listen and you'll pay a price.

Ford. There never was one in the future of the USA. He was a Nixon hack and the worst possible person to lead us after Dick resigned. The man allowed South Viet Nam to fall and nearly killed himself on airplane doors and steps. Had he used a jetway, he would have gone down as a great jerk.

George Bush, Sr? He let Norman Schwartzbard beat hell out of Saddam's forces and then prevented him from going into Baghdad to finish the job. This kept Saddam in power to constantly taunt and tax our country while George got an ass kicking out of office in '92. He's supposed to be a great President worthy of being feted at the Convention? Since when is a ONE TERM PRESIDENT GREAT? WHAT BULL!

Stay tuned for more G.O.P tomfoolery tonight. Based on what I saw last night, I'm positive that either a Jew, Black, Hispanic, gay or midget will be attacked.

AF2Y,Doc

And I'm still looking for the USVI roving ambassador Herbie Schoenbohm. Perhaps I'll see him tonight waving Keyes placards which should go over really big at an all Bush convention

Boy it's really tough to give advice on mics. I use a D104 with my
TR7, and it works just fine. However, some people like a little more
bass in their output, so it might not be for you.

Best advice is to listen on-air, and when you hear a voice you like,
ask them what they're using. You'll probably get MUCH MORE info than
you ever wanted, but that's hamming.

Regards;
Neil, K1VY

This is another example of how the crap gets stired up. OTK and crew
never bothered with 3.950. FZ and MUJ were mainly on 14.300/14.313.

If you want tapes of the "war" you are refering to, then you want the
20 meter tapes. And yes I have volumes of them, and no you can't have
any. Why? read my first sentence.

4025. Re: Doc is Hallucinating Again

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-02 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8m9n5c$28p$1@nntp9.atl.mindspring.net>
Source record: 105903

I have questions for you. Just how much MORE should we spend on the military? Where does necessity begin and overkill end?

We are weak militarily? How many countries do you see taking advantage of our "weakness?" The enormity of our military strength is incomprehensible; that's how weak we are.

Whom do you feel is going to attack us? Russia? What would be her purpose in light of the fact she's getting a ton of aid from us and is finally emerging from the horror of 73 years of communism. Her progress is displayed by her people who are now living as we did in 1935 instead of 1900.

China? Her threats are bluster and nothing more. There's as much chance of her attacking us as I have walking on the moon tonight. For the first time since the Mao takeover in 1949, she's seeing the light of day and her calling herself a communist state is hooey. It's face saving. Her markets are now wide open to us and vice versa therefore we mutually gain because of PEACE. China's leaders know communism failed miserably and the only way to come into the 21st century is through the free market system which is another way of saying CAPITALISM.

North Korea? Like hell. Why do you think leaders in Pyongyang decided to sit down to talk peace and stability with South Korea? Because she's COLLAPSING and here again we see an Asian country waking up to the fact that communism just plain stinks. North Korea could never support any type of major war with anyone and that's that.

You call ME myopic? It's you who can't see further than your nose. If your man Bush gets in and decides to overhaul the military and make us powerful enough to blow up the universe instead of just earth, where will the money come from? Let me tell you.

FROM the needed funds to make life more meaningful for every average American. From monies needed to create jobs, to improve healthcare, to provide small business loans to those who want to go out on their own; to assure social security and medicare and so forth and so on. You can't have it both ways, my good man. We MUST keep the national debt as low as possible and every time a Republican gets into the White House, UP IT SHOOTS and we all pay an awful price for such recklessness. Think about what I wrote and maybe you will understand the principles of GOOD GOVERNMENT.

The last time I voted Republican was in 1988 because (1) Dukakis sounded like a digestive disorder (2) Bush was better equipped to handle HOSTILE commies than the Democrat. Communism is now dead and the once great Republican party has become nothing more than a pawn of the crazy religious right which is as great a threat to the internal security of this nation as

any external enemy ever was.

That Gingrich crowd of thugs and the gang now loose in D.C. are mean spirited s.o.b.s who are an INSULT to the party of Lincoln, Teddy Roosevelt, Dwight Eisenhower, Ronald Reagan and other great Americans. Can you imagine in this day and age at a National Convention, those mean spirited slobs DENOUNCE a fine Republican Arizona senator for being gay? Like it really makes a difference, right? To hypocrites and bigots-not to AF2Y and those like me who don't give a damn about what happenes in peoples' bedrooms. Anybody calling himself or herself an American-CARES. That's what this country's all about. In year 2000, Democrats CARE-Republicans don't give a SHIP.

The Bohemian club, outside of Sonoma, has been around a long time.
It has been in the news. There is a real world that exists beyond
the masses. Some have to take on the duty of running the show! Many
are not equipped to do so. I havnt visited the site yet-but from your
comments, there is probably some slanted media traffic. So Goes the
life.
Peaches has definetly gone south for the winter!

4032. Need help - interfacing to mobile radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-02 00:00:00 UTC
From: "Tom D." <mickeygyness@hotmail.com>
Message-ID: <39886a92$0$706$73a6f223@reader.city-net.com>
Source record: 105910

Our company has been asked to demonstrate interoperability of our equipment and a number of different mobile radios for a emergency response team for various law enforcement agencies. Our company builds mission critical audio conferencing equipment.

My problem is this - the interface to our equipment id a digital T-1 interface. Thus I would need to take the audio from the radios and mux it through a channel bank onto a T-1 stream. This would most easily be done if I have access to the 4 wire audio and maybe a couple of controls to key the mic and control the squelch. We have been asked to interface to the following radios;
Motorola Syntor X9000 (VHF - 155.055 MHz)
Motorola Syntor X9000 (UHF - 412-420 MHz)
Ericsson Orion (821-869 MHz)
Motorola Astro Spectra (860-870 MHz)
ComNet Ericsson MDX (800 MHz)

Does anyone know if the 4 wire (Rx and Tx) audio is easily available from the rear panels of these radios? If so what the interface connector would be? If not - is it necessary to purchase the radios with special options? Will it be necessary to tap the microphone and speaker to access the audio? Any good sources for the specifications to these radios?

Any help would be most appreciated. Either reply to this newsgroup or email to:

Bohemian Grove is North of SF in the coastal redwoods near Gurneville.
Nice old encampment, beautiful A&C buildings. They go there because is
cool in temperature, out of the way, yet with ability to be protected
which they certainly need. No conspiracy here, just a nice place to camp
and shoot the bull.

I will be visiting the States next week and would like to take a handie along with me. I would welcome information concerning repeater frequencies, shifts and CTCSS tones for repeaters in the areas of Washington DC, Shenandoah National Park and Cape Cod.

If my current callsign in the UK is M1DCU what callsign should I use when operating as a visiting amateur from each of the three locations listed above as I am lead to believe that this would change with location?

Many thanks...

Best wishes

Geoff

The last few 'wars' and skirmishes we've been in (Desert Storm etc)
the opposing country's air force wouldn't even get up to altitude to
MEET our *planes* , they'd get up to slightly over treetop level and
haul ass for a neighboring country (to Iran for example in Desert
Storm)

I don't know of *any* Navy that has all the aircraft carriers, nuclear
submarines, rocket launchers, destroyers, battleships , battle groups
etc and advanced technology that we do.

We're in negotiations with Russia trying to stop the proliferation of
nuclear weapons and to cut back on the number *both* sides have.

The only reason I can think of to go on a military spending spree is
to perhaps prepare for an *ALIEN* invasion because quite frankly no
one else on planet *Earth* is a match for the US.

Re-supplying our stock of cruise missiles or updating equipment,
dancing around with 'Star Wars' technology etc is one thing but it's a
far cry from being "militarily weak."

I might be inclined to join you Bob except for two things:
1) WB2CLN is a drunken souse
2) AA8DP is either too damn stupid not to keep his militia activities to himself, or, he's a government informant and uses this technique of spilling his guts to try and lure other militia-types into his fold.

My Question Is? What does Dick Cheney's Daughter
have to do with running this country? DUH!! Nothing
Didnt see her smashing,jumping and damaging some poor innocent
persons automobile. Looked Like a Young Democrat to me.
Anyway looks like the G.O.P. has picked someone who has more morals
honor and integrity in his pinkie than Clinton and Gore put
together.
I could take out a Jig-Saw and a 1/2 piece of plywood
and cut out a better man than those two yahoo's
Just my 2 cents worth.

Find an amplified D104. You didn't say what you were using right now but I assume that it's an OK mic and the problem is vocal rather than electrical. I think that you'll find good adjustability for your purpose with the D104. Actually any good mic with a built in pre-amp would probably do the job for you.

>I will be visiting the States next week and would like to take a handie
>along with me. I would welcome information concerning repeater frequencies,
>shifts and CTCSS tones for repeaters in the areas of Washington DC,
>Shenandoah National Park and Cape Cod.

The 2 meter repeater band has a 600 KHz offset.
145.11-145.49 are all -600
If you have 146.000 and above it is:
146.61-147.00 are -600
147.00-147.39 are +600
440.00-450.00 +/- 5 MHz Repeaters
430-440 are used for satellites, remote links and bases.
No 1750 Hz tone burst required but some repeaters
have CTCSS/PL tones from 38.0-208 Hz.
A good book to grab if you can is the ARRL repeater directory.

I'm sure if you do some band scanning in the morning and evenings
you will find plenty of repeaters in that neck of the woods.

If you are using the CEPT then MA is W1 and Washington/NY
are W2.

If a 4CD box set of shortwave numbers stations can sell like hotcakes (The Conet Project), 3950 tapes would be a big hit. Sorta like the Raymond & Peter cult that was big a few years back.

There's a market there...

The Radiosigs-Meister is puzzled ..
>I wonder why the elegant "El Rushbo" Limbaugh
>wasn't invited

It's simple, Sigs-Dude. Rush talks tough. And Dub-Yah is trying to have a kinder, gentler convention. In fact, he has seen the light and plans to be a kinder, gentler president.

He has realized that our strength lies in our diversity. So he is being kinder and gentler to minorities and those of "alternative" lifestyles. He's in favor of gun control. He is talking kinda pro-choice lately. Who knows, maybe he'll even talk about socialized medicine .. I mean universal health care before it's over.

What more could you want, Sigs-Man? I mean .. what more could you want?
Here's some more good info about Dub-Yah.
http://www.realchange.org/bushjr.htm

That's not that new. My Icom W-2A (pre-1992 HT) will get the entire 136-174 MHz FM 2m band (including military, commercial, maritime, and misc. government, as well as amateur) without any problems at all.

Yo, Butch!

Stair broadcasts, probably, 50-70 hours a day but he can /always/ be found on Transmitter #4 at WWCR (at least the signal is clean and not over-modulated).

WWCR Transmitter #4 - 100 KW - 90 Degrees

FREQ TIME (CST) TIME (UTC) DATES
7.435 6:00AM- 8:00AM 1100-1300 01 Jun 00-31 Aug 00
9.475 8:00AM- 5:00PM 1300-2200 01 Jun 00-31 Aug 00
7.435 5:00PM-12:00AM 2200-0500 01 Jun 00-31 Aug 00
2.390 12:00AM- 6:00AM 0500-1100 01 Jun 00-31 Aug 00

He's sorta of fun (in a funky way). Basically, he's right and everyone else is wrong. So, pack up up gear in your old kit bad (being sure to take all your money with you and move to "Walterboro, South Carolina. That's Wal-ter-boro, w-a-l-t-e-r-b-o-r-o, South Carolina in the United States of America."

He's actually not as much fun as Texe Marrs or David J. Smith, though.

"For a decade, intelligent innovative and progressive legislation has come about because of the Democrat party "

Yeah, Doc. Like the highest ever tax increases in the history of this country that Clinton initiated in 1993 and made retroactive right after his election? Now THAT is innovative!
Like the weakest military strength the United States has experienced since World War Two? That is innovative, if not subversive!
Like the FIRST president to be Impeached and fined over $90,000 for lying to a Grand Jury? That in itself it truly innovative!
Like the first president to have discovered an alternative use for White House Interns under his desk while discussing sending American troops into harms way? Innovative, but coldly immoral as can be.
And then we have an exceedingly inept Democratic Justice Department led by a Crone who could not find a burglar in a closet.
Yeah, Doc. Carry on...your myopia preceeds your ignorance.

Lloyd, I hate to break this to you but no one wants to kill you.

We have "freedom of religion" in this country and you have the right to
believe anything your little unshielded by metal "mind" wants you to believe.

And, if you choose to use rrs as your religious forum, those of us that think
you're more than a few fries short of a Happy Meal will make fun of you. And
that's /our/ "freedom of religion".

There isn't going to be - I fear - any "Saint Lloyd", just "Lloyd the
Strange".

On another subject, I've always wanted to ask someone named "Lloyd" this: is
it the first "L" or the second "l" which is silent?

Gray Shockley

Calvin: These are interesting times.
We don't trust the government,
We don't trust the legal system,
We don't trust the media,
and we don't trust each other!
We've undermined all authority, and with it, the basis for replacing it!

Hobbes: "Interesting" is a mild way of putting it.

Calvin: It's like a six-year-old's dream come true.

4071. Off Topic, but you just gotta wonder...

Off Topic, but you just gotta wonder...(besides Doc does it all the time...the last one was 17 segments according to deja.com...!)

Bill Clinton, ever searching for new ways to embarass the American people, decided to do Al Bore's dirty work by publicly lowering himself and classlessly bashing an opposing candidate.

It is an American tradition for the opponent to "go on vacation" during a party's National Convention. But it seems Slick Willy just keeps on creating new concepts in decorum.

Oddly enough, Stephanopoulos made it a point that at the RNC there wasn't any public display of Clinton or Bore bashing.

True colors can be an amazing indicator sometimes...

Hello Mrs. Valentine and I hope after my suggestion a while ago, your house is now spic and span and Tom is munching on a freshly baked pie from time to time. I don't see any of your postings especially anything concerning the RNC in Philadelphia and I'd be curious to know how an extreme rightwinger feels about the events?

I learn by reading the views of the cross section(not on lawns of people of color) of the American public and I'm positive that this esteemed board of intellectuals would enjoy reading your remarks so please let fly after you've made the beds, taken Adolf the dog for a walk and washed the dishes.

I'd be very interested in your "take" on that Rabbi who gave the opening benediction. Did you and Tom turn off the TV in anger or perhaps realize that a Rabbi's prayer possibly holds some water with anything that might be up there? And how about the fine Negro gentlemen, especially Gen.Powell, who spoke on night one?

At any rate I want you to know that I do vividly remember your less than kind toward minorities posts from way back and was wondering if you might have mellowed in the meantime?

Please send my best to hubby Tommy and when you wash the tile floor in the bathroom, I'm not sure what's best to whiten the grouting. Perhaps a toothbrush and a bit of Rembrand?

Have a nice rest of summer and hopefully you'll post a response since you add so much class to this forum.

Most respectfully with love and admiration,
Doc,AF2Y

4081. Motley Crew

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-02 00:00:00 UTC
From: "r.f.sieg" <vascot@my-deja.com>
Message-ID: <8m96uanbc1@nnrp1.deja.com>
Source record: 105976

A milestone: last Sat PM/Sun AM (29-30 July), the motley crew (AKA 75/80 Club, Garbage Pickers, or Cellar Spiders) on 3860 at 2230 ET (+ or -) exceeded the Liberty Net in duration and has been near equal or perhaps greater in number of checkins. Hope the "3950 jammer cleanup crew" enjoy their "clean" 3950 with no activity between Saturdays! The motley crew (no connection with the rock group) is great fun--all stations of good will and behavior are welcome but a few baddies from Freq X may have to be deloused first.

I am selling my leather carrying case from my Yaesu FT530. It's the CSC-56, which fits the FT530 with the FNB25. (I got a bigger battery, and now the case doesn't fit.)

It can be seen here:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=396785627

Thanks and 73s!

> range?

Yes. Simplex range can be quite farther than what you're getting.

Also, I've personally been able to use repeaters which are up to 95 miles away over land (and about 130-150 miles away skipping over the coast).

Mobile, I've gotten similar (but closer to 100 miles for repeaters). In one case, I was able to use a repeater which was at only 400' AMSL in West Los Angeles (on 23cm) from Southern Coastal San Diego County (about 100 miles - the northern border of SDC is 68 miles from the repeater site at its closest point). Power used was 10W at the mobile, and the repeater used more.

What it comes down to is:
Natural barriers - you mentioned a hill and trees, and
Jammers.

> Oh Doc, i forgot to mention that Clinton recently said ......

Duh-bya has now joined Poppy is whining about President Clinton. Hey Bushies: news flash -- YOU LOST. You lost because George Herbert Walker Bush was a failed President. He cared more about saving his job than about saving the jobs of Americans who were unemployed because of his economic policies.

In this round, the choice of Dick Cheney is the worst choice since W's Poppy chose Dan Quayle back in 1988. Cheney is no Dan Quayle; he's more dangerous, and much more conservative. His voting record is nothing short of a disaster. Nine times he voted to kill or cut Head Start -- the wildly successful government program that helps poor children. Cheney also voted against immunizing children, feeding hungry kids through the school lunch program, adult education, bilingual education and nearly every other form of education. Leave no child behind, indeed.

Bush, for all his rhetoric about children, has enthusiastically embraced Cheney's record, which can only be described as savagely anti-children. Why? Because Bush's own record is nearly as bad. Consider this: as Governor of Texas, Bush fought AGAINST including 200,000 poor children in the Children's Health Insurance Program, which President Clinton and Vice President Gore started. Bush also failed to provide nutrition assistance to 90 percent of the hungry children in his state last summer. How can you call yourself compassionate when you don't feed hungry children and don't provide health insurance for sick kids? "Leave no child behind?" So far Bush has left 200,000 poor kids behind on health care and one million kids behind on food.

The entire GOP convention -- indeed the entire GOP campaign -- is based on a fraud. The fraud is that Bush and the GOP have changed their stripes. Gone is the Gingrich gang that tried to cut Medicare, school lunches and environmental protections. In its place is the Bush-Cheney gang that, well, tried to cut Medicare, end school lunches and gut environmental protections. No wonder Newt Gingrich said Cheney's voting record was more conservative than his.

As an aside, when I was first licensed (1962) the rules said that if
such a need to violate a rule in an emergency, you were to send the FCC
a letter explaining the circumstances after the emergency was over.
This requirement may have gone the way of paper log books.

Oh, now, behave.

Like Clinton's ultra-classy public display the other day?

That kind of class?

The RNC didn't have public Clinton/Gore bashing as was mentioned by
Stephanopoulos. You can bet your bottom dollar that the DNC _will_
have _plenty_ of it.

I guess then, that class is in the mind of the one acting.

Besides, pull a classless stunt, just deny everything. that's Klinton/
Bore's biggest seller!

Wheee!

>There, now you can't say that no one ever told you! =:o

Doesn't matter. Every pack of cigarettes carries a mandatory label which basically says this product will kill you if used as intended. Didn't stop the extortion of billions of dollars from this legal industry.

In today's junk society, nobody is responsible for their actions. The "responsibility" always lies with those who have deep pockets, regardless of fault.

In the next few years, look for class action lawsuits against fast food restaurants, seeking billions in "damages" for customers who suffer from clogged arteries, obesity, etc. Ditto for auto manufacturers, due to accidents caused by impaired drivers.

> code. If such a thing is UNIX based, that would be cool. Tell me more.

It is true that GNU had it's root in Unix, but many GNU applications
have been
ported to WinTel such as GCC, emacs, vim, bash, etc.

But the idea isn't to be Unix based, Window Based, MAC based or VMS
based but
CORBA based. CORBA isn't tied to any one OS, architector, language or
machine.
CORBA routes object request via an ORB (Object Resource Broker) which
talks
to another ORB which does the work and returns the results.

Keep in mind that is just an example.
Just for example lets create a CORBA environment using todays equipment:

This CORBA ham shack has:

Computer 1: Win98 P1 with two rs232 port connect HF radio and rotor.
computer 2: P2 Linux system also with one rs232 port connect to TNC on
2m packet
DXcluster
computer 3: Win2K with great monitor and graphics also with rs232 PTT
for PSK-31
computer 4: Mac with great sound processing
computer 5: Call Book Central service (CBC) located on the Internet
computer 6: DigiQSL Card server.

All computers connected via ethernet.

ORB connection:

The control workstations (computer 3) is the Win2K which is running
OrbLog 1.0
which connect via ORBs to:

computer 1: HF radio and rotor to set/read freq/mode
computer 2: to the DXCluster to locate spots
computer 4: copies audio from the radio to the Mac where the Mac does
AF DSP
before outputting the signal to the speakers.
computer 5: to CBC Callbook Database to lookup call signs info.
computer 6: DigiQSL to send out either digital or hard copy QSL cards
once the
QSO is completed.

Impressed? Wait there is more. Using naming services, it is Plug and
Play. You move
your rotor to a different system. OrbLog finds. Move the radio to a
Linux system.
OrbLog finds it.

Buy a new radio of a totally different brand that just came out, OrbLog
doesn't care,
the ORBs takes care of those details.

This is all stuff that can be done by us, without help from radio
vendors. When
the vendors start to see the light, they will start putting ORBs in
their radios,
then magic is really going to start to happen. Notice that I said when,
not if.
CORBA is like the Internet was a few years back. Those who understand
it know
that CORBA or something like it is going to be an important part of just
about
every computer.

I am exited because once this takes hold we won't have to work about if
our
logging program will talk to radios, DXclusters, rotors, etc. It either
will or we can write a CORBA ORB without changing the app. It is going
to rock!

4114. Bugcatcher vs. wire antenna

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-03 00:00:00 UTC
From: jason_hsu@my-deja.com
Message-ID: <8mcrlj$hk0$1@nnrp1.deja.com>
Source record: 105809
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.antenna

In article <39876FDD.32D4@wt.net>,
nm5k@wt.net wrote:
<A bugcatcher would probably be one of the most efficient verticals of that size to use, but not always the best antenna. You would probably do better to just string as long a dipole up along the ceiling as you can and feed with LL and a tuner. Or use for one or two bands with coax. You could make homebrew loading coils to add efficiency to very short dipoles.>

According to NM5K, stringing a wire antenna in or around my apartment would give me better performance as well as a better price compared to using a Bugcatcher. Both offer multiband capabilities. I'm now seriously considering using a wire antenna instead of a Bugcatcher.

Does anyone here have experience with both? If a wire antenna is better than a Bugcatcher, then only mobile operators would prefer Bugcatchers. Since I have no plans to operate mobile, this points me towards a wire antenna.

Can anyone elaborate on the pros and cons of Bugcatchers vs. wire antennas?

Are there other possible apartment antennas that would offer better performance than either a wire antenna or Bugcatcher? What about the G5RV? What about MFJ-1621 portable antenna? The B&W AP-10A? Anything else I should consider?

Is there any reason NOT to use a wire antenna (as opposed to a mobile antenna, loop antenna, etc.) in an apartment? From what I have heard, its advantages are:
1. Multiband capability (with the aid of a tuner)
2. Flexibility allowing a longer antenna in a smaller volume of space
3. Better performance than Bugcatchers, other mobile antennas, small vertical antennas, and various other apartment antenna solutions
4. Cheap price: MUCH cheaper than alternatives, even the manufactured versions. In fact, a wire antenna sounds so simple that even Beavis and Butthead could create one. (Just buy a length of wire from Radio Shack.)

Is this all too good to be true?

The site is:
http://www.hamcontact.com/

As you know, the Ham Contact sells compact gel-cell batteries. Has anyone had any experience with these products? Are they as good as they sound in the QST advertisements (light weight, safeguards against overcharging, indicators, etc.)?

The bugcatcher, or any mobile antenna for that matter, is designed to
work against some sort of a ground. In this case, the vehicle. This
can be aproximated by running radials around under the antenna, if
putting it inside as you want.

In anycase using that antenna in a house is not a good idea. You will get much better results with almost any length of wire and matched out. A center fed antenna for 75 meters would be 120 foot. You can get good results with using a 1/4 wave of wire, with a radial connected to the ground of your rig. If you have the room. If not put out as much as you can, run the radial wire around the room at the baseboard. And use the tuner to tune it out.

Results will be difficult to predict, and expect some RF in the house.

Greetings Group,

NERDAlert 2000 is an ID timer, with extras.

That doesn't sound too impressive does it? Well we never thought an ID timer would be either; until it was built and put to use. :-)

The app will happily 'live' in the system tray and 'popup', flash colorfully and sound off when time to identify the station.

This app is "QSL-ware". This means all it "costs" is a comment via email. If you like it tell a friend about our site.

Download NERDAlert 2000 from:
http://www.hamtools.com/nerdalert/

Regards,
Jim

One of the main reasons I lost much interest in ham radio is because of Rich's absence. I and a multitude of hams missed his incisiveness, his astute interpretation of politics and religion and his sense of humor. Never had I met a more personable and inteligent ham in the 31 years on the air. It was a sad day when Riley accepted his unintenional letter of resignation not because it was legitimate but because by doing so he removed a brilliant yet controversial figure. I must admit that those who have been saying that our fundamental rights have been eroded on ham radio are correct despite the Dem. administration in D.C. And all along I thought it would be the G.O.Pers to accomplish it. Ham radio took a HIT when the call WB2OTK no longer was heard and I yearn for the day when, in my new humble abode, I might SWL him or even possibly have the honor to work him if conditions allow. In 31 years I have seen hams come and go but never one as popular as Rich Whiten.
Doc,AF2Y
P.S. I have a wide selection of tapes of my favorite ham and will be marketing them as CDs for $39.95 including several original OO notices sent to him by religious freaks.

The draw back is that most wire antennas are 'longer' than
your appartment. Depending on the band you want to operate
on, you may not be able to 'shorten' a wire antenna enough to
make it practical. After 'shortening' an wire antenna, it
may not work any 'better' than some alternative vertical.

jason_hsu,
A 'Bug Catcher' is a good mobile antenna, and if you don't
or can't put up some other kind of antenna, should work okay
if done properly. If you have the room and are allowed to put
up a 'wire' antenna (outside), then that's what I would do. If
you can't put up an antenna outside, then a mobile antenna is
one alternative.
'Doc

The Chip Merchant
http://www.thechipmerchant.com

Good prices and service.
The prices at the catalog houses tend to be a bit more
on the high side and not reflect market pricing as quickly
as Chip Merchant.
Get free utility GURU (Guide to RAM Upgrades)
from Newer Technology http://www.newertech.com
which will guide you to exactly the type of memory module you
need for your machine.

We should spend enough to make this country safe from terrorists, rogue third country states, drug lords and, yes, China. To bury your head in the sand and say that the threat from China that "war with the United States is inevitable" is mere sabre shaking is indeed myopic.
It is much better to be safe than sorry when it comes to threats such as this.
And China is NOT a capitalist country nor are they becoming one any time soon. To surmise so is very foolhardy. They are STILL a Communist country that uses slave labor to bolster their coffers. It is too bad that the hundreds of thousands Chinese dissidents are not alive to relay this message to you.

You can (or used to be able to) order one-ies two-sies order size crystals from
Jan Crystals,
and International Crystals. Don't know if they have web sites, or know phone
numbers off hand.
Refer to ham radio mags, like QST or 73 or CQ for ads.

Well, it has its meat in the UNIX world. Dos is a forgotten lore, and
Windoz, well....

>> And, yes, even source
>> code. If such a thing is UNIX based, that would be cool. Tell me more.

> If Bill Gates don't watch out Linux will eat Windows for dinner!

I run about a dozen different UNIX flavors, including Linux, and I do
hope they wind up giving Bill run for his money. I sense over time,
they will.

Now, if I could just fine a good realtime relay system to control
my CW via UNIX on my Suntoyz.....(:+}}... any pointers thereto are
appreciated.

I'd be *real* curious where these *invaders* would come from ? Black
UN Helicopters maybe ? Maybe some kind of creature that steps thru a
wormhole from another dimension into our world ? Hell most countries
couldn't even begin to handle our drug dealers and criminals much less
take on the military.

Date: 2000-08-03 00:00:00 UTC
From: Gerry Pieterse <gspieter@mweb.co.za>
Message-ID: <39893e5c.0@news1.mweb.co.za>
Source record: 105850

Hi guys

Despite the fact that I have been licensed on HF for several years, I am a newbie to digital modes. I currently have an AEA PK 900 with which I work vhf packet but I have not managed a single contact on hf on any of the advertised modes (Amtor, Pactor).and one very brief contact on RTTY but this lasted less than one minute.

The rig I use is a Kenwood TS-440S which has been doing a marvelous job all these years on all modes (has FSK mode for data) and is in perfect condition. Some of the names that have come up in conversations with other hams is Hal. I had a Kantronics on loan for a while and was not impressed by its performance - mind you that was a few years ago and the quality may have improved some. It just did not seem able to pick out weak signals.

One of the recent issues of CQ magazibe ran a story on the Hal and the reviewer seemed to like it a lot.

Ideally, I would also like to use it for satellite work (phase rd etc) but it sems to me
that it simply is not possible to get all modes in one package.

I would also like to know which are currently the preferred and most popular data modes

I would greatly appreciate any and all advice from you experienced bunch as to which way to go. Getting the gear to South Africa is not a problem as a friend from New York is coming to visit me in December and has kindly volunteered to bring it along

I am going to post this same message on the other packet boards as well in case some guru only reads the one board and misses it. No offence intended/

73's and all the best

Kind regards

4151. Reasonable 2 mtr simplex range

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-03 00:00:00 UTC
From: Chuck Wyatt <cwyatt@webmail.solidworks.com>
Message-ID: <8mbj0j$d5m$1@bob.news.rcn.net>
Source record: 105851

I'm hoping to use 2 meters as a way of keeping in touch with home on the way to/from work, rather than shelling out wasted $$ to the celluar phone people. Generally, I'd prefer simplex on some obscure frequency as maybe slightly more "private" than a repeater.

However, in testing, I can't seem to get these rigs to work better than 2-3 miles away. My mobile has a 70 watt KLM amp with a glass mounted antenna. Kenwood TR-9000 driving it.

At home, I have a TR-9130 with 25 watts into a Ringo Ranger II at 30 feet. I'm guessing that I'm getting attentuation from nearby pinetrees as we are behind a hill.

My commute is 14 miles -- shouldn't I be able to get that kind of simplex range?

4152. Hi, Doc: Just think ... (Was 'AF2Y: Are you sure, Laura?)

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-03 00:00:00 UTC
From: "David J. Windisch" <davidw@copper.net>
Message-ID: <DHci5.279$VK.1900@newsfeed.slurp.net>
Source record: 105852

Hi Doc:

Re our earlier repartee in the thread above:

Seeing is believing.
I'm not in 'Pennsy'.
I don't watch the boob-tube, period.
Some of us are 'trained apes', (evolution, you know), like hams, and others who are or were, say, dentists, or ambulance-chasers, not baboons.
But you know all that.
Or do you?
About or to whom were you writing?
Algore?
You must have been, cuz there's a real wooden baboon, in or out of 'Pennsy'.

Just think, Doc.
The biggest collection of political baboons meets for Liberal buffoonery in El Lay later this month, led by baboon look-alike James Carville.
It is in poor taste to speculate what that fire-hydrant-at-a-Republican-dog-show's daughters look like.
Only Liberals speculate about things like that.
You gonna see and believe *that* bunch of ape-ry in El Lay?
Maybe one of the lead male baboons out there will perform one of those special embarrassing-male-monkey-residue-legacy tricks for world news cameras, like that female-baboon-trick done on one of the blech-fas-tv shows this week.
(What a legacy: DNA samples.)
(And Liberal samples, at that.)
(Score another Liberal 'first'.)
Gives another whole (or do you prefer 'nother hole'?) meaning to 'boob tube', doesn't it?
You see that one on newsblue.com or whatever the site was?
Bet the exhibitionist-baboon was a Liberal.
Quite a contrast to the 'Laura' you malign.
Don't think Condoleeza would do that, either.
And give the devil his due: the President's wife probably wouldn't, either.
Except, maybe, for the requisite campaign contribution, and votes.
Nah.
But ...
Nah.

Now Doc, you watch all that buffoonery baboonery stuff in El Lay and report back to us with your reviews.
But, we really don't have to ask.
Reticence doesn't live where you do.

TIA

K3BHJ

The glass mount won't give you very good performance in such
marginal conditions, and will typically run a couple of S-units
lower than even a simple 5/8 center loaded mag mount on the
roof. Once you get into the higher frequencies, line of sight
is pretty much the limiting factor on communications, but
getting around it depends on the antlers. Get rid of the glass
mount and pick up a beefy collinear mobile antenna, and put a
yagi up at the house. The glass mounts are okay for working
repeaters, but what you want to do needs some better antennas,
especially here in the Northeast (I'm in Worcester).

4154. AF2Y: more non-stop G.O.P idiocy

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-03 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8mboborto1@slb0.atl.mindspring.net>
Source record: 105854

Add the night of Aug.2nd as another shining example of meathead Republicanism. Who spoke? Jesse Ventura who asked the floor, "You invited "The Rock" to speak at the RNC? Huh?"

Jesse Ventura-sure why not? The G.O.P. wants to kill gun control, put a Magnum in every crib and re-arm, waste trillions, in preparation for a war with dead communism. Yup, real bright. So now to capture the votes of idiot wrestling fans who still think it's on the level, and isn't wrestling so violent now that some states are thinking about banning it, in comes the Minnesota geek to speak. And isn't such obnoxiousness affecting our kids too? Damn, if you Elephants aren't ignorant!

Now comes some more fun, TONIGHT. Already the cauldron's bubbling and of course it concerns Dick Cheney's lesbian daughter. "Duh duh Dubya" accepts the nomination this evening and we will see "unification" on the podium. There'll be George, Laura, Senior, Barbara and the kids and grandkids. Then we'll see Cheney, his bride, his kids? But hold on-one of his kids is gay, right? Uh, that's going to present a BIG problem because the Christian Coalition vote is MANDATORY for "Duh duh" to win.

The Religious Right has no use for gays, right? The C.C. intentionally spreads homophobia, right? Gays are no good-they don't belong in society-they must be removed, so say the C.C.bastards, right? How then will that podium look tonight with Cheney's gay daughter standing alongside her dad? How will Gary Bauer, that brainless ugly evil midget, look upon that bit of "unification."

You know what? It says a lot about Dick Cheney. Wouldn't you think a man of integrity would be insulted over his party's castigation of his flesh and blood? Wouldn't you think if he were a man of class and integrity he'd rise up and tell his party to go to hell? No, power to him is worth more than the love and dignity of his daughter. Now I dislike that stinking hypocritital fraud as much as I do "Dubya."

When is the DNC going to start? I'd like to see some political class for a change.

Doc,AF2Y

4156. Morse exercises No.34

Newsgroup: rec.radio.amateur.misc
Date: 2000-08-03 00:00:00 UTC
From: DTC - Frank Schmitte <dtc@muenster.de>
Message-ID: <8mbpvs$7dg$1@news.citykom.de>
Source record: 105856
Cross-posted to: alabama.birmingham.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Dear YLs and OM,

DTC's regular Morse exercises transmitted every Monday at 19:00 h
local time in DL on 3575 +/- 3 kHz are available on the Internet as
well, being in downloadable MIDI-file format.

Currently three speeds are offered for download:

Speed "90" (= 18 wpm): http://www.muenster.de/~dtc/nr34_90.mid

Speed "60" (= 12 wpm): http://www.muenster.de/~dtc/nr34_60.mid

Speed "45" (= 9 wpm): http://www.muenster.de/~dtc/nr34_45.mid

Hoping you'll have some fun decoding either on the air or from the
Internet, you may check out your capabilities in decoding Morse. For
ease of reference the content of the Morse code transmission / file
may be accessed at DTC's web site using

http://www.muenster.org/dtc/cwtext.html

Your opinion and suggestions are welcome: dtc@muenster.org

73 es agbp de Frank (DL1YDL), DL-CW-C #030
Editor of the DTC-Web-Site.

Good reason not to stick everything in one box with a closed design. At least with computers you can upgrade them to an extent by swapping out cards, drives etc. What would be neat is a rig where you can swap out modules, such as the front end, bands, PA's etc. All you would need then is an "empty" box, with a dot matrix display front panel using soft-keys, where you just drop in the modules for the functions you want. I know this has been done to an extent before, FT-726/736 for example, but the modules were BIG and COSTLY! After ten years of advancement in electronics, and DSP, I think its time to take another look at this idea.

I can give you a couple of things to try.

For the car.
I was not impressed with the through the glass type antennas, although very large (7 1/2 feet), switch to a collinear. Simply said, it is a better antenna. Expensive, move up to a 170W amp.

At home.
Switch to a vertically polarized beam or Quad. I would look at 8-13 elements and you may need to add a amp to this.

Also, for both locations, if you are using RG-58, switch to a better Coax cable. Skip RG-223 and RG8X and look at least RG-8, RG-213, RG-214, or Belden 9913. I know RG-8 is a bit tough to run in a car, but it can be done.

IMHO, the beam may provide the most cost effective method of improving range along with better coax.

Best of luck and 73's

Dennis WB3KUM/9

I had been thinking of buying a new computer but after buying a magnificent townhouse, my funds are a bit low. I use a 1995 Mac Performa 6116 and would like to add memory to it. Will someone recommend the place offering the best price and is it something I can do myself even though I am not as much a genius with computers as I am with politics? Thanks in advance.

The basic Republican message is this: "Get yourself an education --
there are plenty of tuition-free or tuition-assistance programs already
available so that you can attend college economically. Then compete for a
job in a fair manner against the rest of the workforce without complaining
when the most-qualified gets hired. Don't expect a handout from the
government. Take control of your own future, and take the blame for your
own failures."

If you believe in that statement, vote Republican. If not, vote Democrat.

From: "E. Hoover" <hooREMOVETHISver@uk2.net>
Message-ID: <3989B232.20B3FDED@uk2.net>
Source record: 105876

Most, if not all of my 2m work is done on simplex, and myself and
another associate routinely work 5-10 watt mobile to mobile at distances
of 20 miles with no problem, sometimes over 40 miles with no problem
also, with higher power of course. This is of course mostly flat
terrain, trees included. I don't know how many hills or other objects
would be obstructing your line of sight, but I would think that between
your 25w fixed and 70w mobile 14 miles would be no problem, and if
we're talking clear flat terrain, 10 watts should be more than enough. I
would also suggest that you get a different mobile antenna, something on
the order of a Larsen 5/8 wave or equivalent, which will work better
than glass mount.
I hope this helps- 73,
Erik KK7OA

You're intentionally skirting the issue! I mentioned nothing about
infidelity and how sure am I that you yourself aren't cheating on Mrs. JLE?

And how convenient it is that Republicans target Clinton's sex life when
just about everyone knows about Dwight Eisenhower's torrid affair during
W.W.II with Kay in England while Mamie with her bangs was baking pies for
Kansas Fairs.

Come on O.M., get real. My question still stands UNANSWERED. If you are
Republican and stand for "purity," sanctity, family values and all the rest
of the bulls---for which you wave the flag, which was worse- Bill Clinton
getting fellatio who stopped and apologized to the nation or Mary Cheney
still giving cunnilingus?

And regarding Clinton, where did Christian forgiveness go? Some of you tell
the Jews to forgive those who perpetrated the Holocaust which murdered
millions and yet you refuse to forget Bill's indiscretions. What kind of
friggin' hypocrisy is that anyhow? Whom, according to the Religious Right,
is going to hell faster-Bill or Mary? And if you're a Republican who isn't
so vociferous on religion, your reply would still be appreciated.

blah, blah, blah.

Here's the way it looks to me.

Bush's message is: "I'm governor of Texas, my Poppy was President and I owned a baseball team. Elect me and I'll turn social security over to the stock brokers."

Cheney mostly last night bitched about the Democrats, rather than give us any "message" about his positions. This guy will be "a heartbeat away"? He has had (and I'm not making this up) three heart attacks, quadruple bypass surgery, cancer, gout, and almost died from eating a pomegranate. And that's what we know so far. He refuses to release his full medical records. On top of that, he has a voting record that Newt Gingrich says is to the right of his. Cheney voted to completely eliminate Head Start, to completely eliminate child nutrition programs, to completely eliminate the federal immunization program. He's now backing and filling, trying to run from his record. And maybe that's proof he's in good shape: he's running from his record faster than Carl Stevenson runs away from a CW key!

Looks like George W. will make a perfect president. He is ruthless,
inventive, can lie with a straight face, has great advisors (Daddy and
the next VP).

Sounds a lot like what we already have don't it, except for the advisor
part,....with THESE MAJOR EXCEPTIONS. George didn't go to England and
drag a coffin with the US Flag on it through the streets. George
didn't say "he loathed the military". And George didn't run like the
gutless piece of crap that he will replace in January. And George
won't have the Veterans turn their back on him like what happened to
YOUR Man at Arlington. At least he SERVED!!

I'm not worried a bit. Chaney will pull him through the ruff spots,
and big George is just a phone call away.

Your getting desperate Doc.

away,
> others will remain proprietary until hams start expecting/demanding a
> compatible interface

IMHO a common API which all Ham Radio software used to control hardware is the smart route to take. The equipment manufactures may not need to much, if anything, to support a standard common API. Most systems are designed in a layered approach anyway to isolate code modules, and systems from another. A layered approach lets each layer change internally without impacting the interface to the other modules above or below it. As a minimum the system would be the hardware level, the driver module level, and finally the application software level.

The manufactures of Ham Radio equipment may, or may not, need to add extra "commands" to their software interface to support a standard API. By allowing the manufactures to keep their current command set we will insure the rigs will continue to work with older software, while providing the extra functionality, transparently for old software, to support a Ham Radio Equipment interface standard API. Hardware which currently does not have any form of software control will need to have it added.

The driver module typically interfaces between the application software, and the Ham Radio hardware. The driver module can communicate directly with the hardware, or use another driver, for example to talk to a RS-232 port or a LAN card. In any case the driver is the place where the translation from the propriety equipment manufacture's command language, for rig control, to the standard API takes place. Even at this level it is not unreasonable to have a series of lower level drivers, one for each piece of hardware, interfacing to a high level driver, which "exports" the standard API. This is the system used by many operating systems so that additional hardware can be added, or changed, without the need to rewrite all the application software.

Finally the application software is written to the "exported" API, and NOTHING else. As long as the application programmer does not take short cuts by trying to communicate with the hardware directly, or at a level below the top level driver exporting the API, we can change the hardware at will. This is like a PC application where you can read and write a file to your ZIP drive, hard disk, or a network drive. For the application software the operation is the same because it is using the API provided by the operating

system, which works by hiding the hardware differences among the different devices from the application.

Greatest Conspiracy In World History!

Frank Murphy was a Supreme Court Justice when he discovered that there was indeed a PLOT to destroy the United States of America. Murphy had a meeting with Congressman Martin Dies, the Chairman of the House Committee on Un-American Activities. Murphy told Dies: "We're doomed! The Communists have control COMPLETELY. They've got control of Roosevelt and his wife as well."5 In 1949 Murphy was to be released from a Detroit hospital completely recovered from an illness, but suddenly had a heart attack and died. Congressman Dies was convinced he was murdered.

James Forrestal, America's first Secretary of Defense, became very dismayed over the deliberate refusal of the United States to win World War 11 two full years before the hostilities ended. The United States, by agreement between Roosevelt and Churchill of England, rearmed Russia with Lend-Lease war materials paid for by American tax payers, and then waited until Russia could march into Berlin, therefore capturing all of Eastern Europe for International Communism. This so upset James Forrestal that he stated: "These men are NOT incompetent or stupid. If they were merely stupid, they would occasionally make a mistake in our favor."

When you speak out as a government figure against the conspiracy for world government, you make enemies in high places. The following was recorded in the Congressional Record: "The Communists both American and European, had good reason to hate Jim Forrestal: HE HATED THEM. He emerged from the Second War dedicated to the destruction of Communism. He had opposed EVERY concession to bring Russia into the war against Japan. He fought General Marshall's effort to force Chiang Kai-shek to coalesce with the Chinese Communists. He battled those men in the State Department who tried to give the Mediterranean to Russia."

Forrestal knew the world of free enterprise was under seige the world over. In the book Meeting At Potsdam, it says: "(He)...was alarmed by what he took to be Roosevelt's trust in Stalin...Forrestal's nightmare was that capitalism itself was under seige ALL over the world. During the war his personal files fattened alarmingly - filled with names of journals and organizations and individuals who were under Communist influence."

Forrestal had discovered the insiders plans. He had told a friend that "They're going to catch us unprepared. American soldiers will be dying (in Korea) in a year." Forrestal wrote to his priest, Monsignor Sheehy, often about the threat of the overthrow of the U.S. government by Communists. Sheehy said: "Many, many times in his letters to me Jim Forrestal wrote anxiously and fearfully and bitterly of the enormous harm that had been, and was unceasingly being done, by men in HIGH OFFICE in the United States

Government, who he was convinced were Communists or under the influence of Communists, and who he said were shaping the policies of the United States Government to aid Soviet Russia and harm the United States."

A freshman Senator came on the scene about this time named Joseph McCarthy. It was Forrestal who personally alerted the freshman Senator to the Communist/ Illuminati menace and named names to him of KEY persons in our federal government who were "consistently shaping our policies and programs to benefit Soviet Russia."

On June 10, 1947, a memorandum was sent from the Senate Committee on Appropriations to Secretary of State George C. Marshall. Marshall was a General who helped withhold knowledge of the Japanese planned attack on Pearl Harbor that took us into World War 11. He was also partially responsible for our military not winning in Europe two full years earlier, so the Russian army could be guaranteed to take Eastern Europe. Then he turned up in China to help deliver it to Communism.

That memo read in part: "On file in the Department is a copy of a preliminary report of the FBI on Soviet ESPIONAGE activities in the United States which involves a LARGE NUMBER of State Department employees, some in HIGH OFFICIAL POSITIONS.... There is a deliberate, CALCULATED program carried out, not only to PROTECT Communist personnel in high places, BUT to reduce security and intelligence protection to a nullity....Should this case break before the State Department acts, it will be a national disgrace."

Marshall failed to clean house. WHY? He was part of the problem and coverup! McCarthy went to work against these people. Concerning Marshall's failure to act, McCarthy said: "If he was wholeheartedly serving the cause of the United States, these decisions were great blunders. If they followed a SECRET pattern to which we do not as yet have the key, they may very well have been successful in the HIGHEST degree."

These men of the past were absolutely right. Joseph McCarthy had only uncovered 10% of the State Departments penetration by the Communists. These same infiltrators into our government in secret embroiled us in the United Nations in 1945. In September 2000 the Millennium Assembly of the United Nations will meet to finalize all 514 treaties and conventions set before them They want all 188 nations representatives to be present to make the U.N. a one-world-government. Those close to the situation say that if this is achieved there will be NO turning back for America! Our nation will never be the same again! Communism will have achieved its purpose!!!

Sincerely,

David J. Smith

Source record: 105687

You are allowed to "use" your lanespace; that is you can weave a little (not so much as to cause alarm or concern or danger), but you can wander some.

True, weaving can be a sign of intoxication/fatigue, but after this 20 minute "following" session, any officer worth his salt could tell you weren't impaired or acting suspiciously.

Trouble is, that without cameras, or similar proof, you are on your own.

It would be nice to have had a videotape of the whole event, and accepted the "ticket", and hammered this guy in court.

Stopping a safe, legal, and good-driving motorist to "show a presence" is a total crock of ****.

Holding your suspicion of the officer's reason for pulling you over being "excessive antennas" in the spotlight I think is a mistake since it can't be proven or disproven. I would stand firm on the grounds that you did nothing out of the ordinary driving maneuvers, but still got pulled over to "show a presence"; moreover, you were targeted and followed for an extremely long timeframe during which, there was no reason for the officer to stop you, yet he stopped you anyway. Furthermore, you have a _right_ to know what is happening to you, and this guy proceeded to threaten you for doing so.

If he'd just stopped you to further investigate a "gut feeling", and then wasn't threatening when he realized you were _not_ a problem, checked you out and let you move on, I would be more understanding of this. I have been "checked out", and I think that this is not a bad thing, although I wasn't happy about it, if it helps catch criminals, then I'll deal with it.

I think, from hearing your story, that he issued a warning to cover his butt. It's like a trump card, and now it's your word against his.

Lloyd

Granted some boneheaded things were done back at the end of world war 2, but this is over the top, and it's off topic.

Please post these kinds of messages to a newsgroup intended for people who are interested in conspiracy theories.

Posting these messages in inappropriate news groups is rude. Think of how you would feel if you were listening to Brother Stair and someone cut in on the frequency and started discussing their last round of golf, and the fact that his dog just had puppies.

Yes they do--just got some at a RS store in Kalamazoo about a month ago--it
was 14ga copper stranded in bags 70 feet long lengths. About $6.00. I used
it to repair an old B&W trap dipole. I bought all 4 bags they had on the
shelf (and paid a bit high for it--but got it immediately). I went back a
couple of weeks later and noticed the supply was replenished. The also sell
ceramic insulators--way expensive tho.

Far to many words for me to read, but I get the gist. Usually, I
read your broadcasts, chuckle or sneer, and go on with life.
G W, for all of the mined and fabricated shortcommings posted about
him, presents, to me, an opportunity to believe. You, on the other hand
seem to believe in the tooth fairie. You have a right to that, just as
you have a right to talk about what ever cranks your habit.
This forum has been all over the Subject map during the past year. A
bit lame to point at you, as you present your "points of view" clearly
and succinctly.
Unfortunately, frequently the responses to your lines are illicit,
lame, and crude.
Hang in there!

K.M.A.G.Y.O.Y.O.

It is rec.radio.amateur.misc not free for all.misc. Topics should have
something to
do with amateur radio, a topic that doesn't fit into one of the non-misc
rec.radio.amateur.*. Miscellaneous doesn't mean everything is open, it
means
anything about amateur radio that doesn't fit into another group. Is
this so
hard to understand?

Well, yeah. But interrupting for PUPPIES is ALWAYS acceptable. ;)

By the way, two different breakthroughs on my active antenna circuit to
report & give away soon. Changes add about $4 to the materials cost,
but the
results are dramatic. It even improves my Sony 7600G and works well
into
a communications receiver too. I'll have to call it Getty-Tenna II or
something. More later.

:
: Finally the application software is written to the "exported" API, and
: NOTHING else. As long as the application programmer does not take short cuts
: by trying to communicate with the hardware directly, or at a level below the
: top level driver exporting the API,

Ouch! You just hit on an important problem. I have been investigating the
problem of remote control of a radio through networks. Think about adjusting
a tuning knob on a receiver for listening to SSB. Now, imagine a delay
between the knob adjustment and what you hear. Tuning becomes a nightmare.
Internet control of a radio introduces these delays, mostly in network
delays and audio encoding delays. If a heavily layered series of
APIs and drivers add to that delay, then the problem only gets worse.
Too much layering, or an incomplete API can interfere with smooth remote
radio control even if the other problems (delays) in the system are
solved. Some method of issuing low-level commands might be a part of
the specification.

:we can change the hardware at will. This
: is like a PC application where you can read and write a file to your ZIP
: drive, hard disk, or a network drive. For the application software the
: operation is the same because it is using the API provided by the operating
: system, which works by hiding the hardware differences among the different
: devices from the application.

Source record: 105703

Being ever mindful of the need for self improvement, especially among democrats. I have developed a self help message. KK4TL, Doc and the Chipster should replace their old oath of allegiance with this one. All others, to gain the most benefit must recite twice daily!

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to Am. history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protested while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yubbies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxed are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

Virtually anyone can be a democrat. Just quit thinking; and then, vote
that way.

I don't know Lloyd, it seems your typical post on a topic like this results in lots of flames, and no one seems to agree with you. If you enjoy this kind of reaction, perhaps you should consider the possibility there are more productive ways to have fun.

Maybe you'd enjoy starting a newsgroup or yahoo club for people who enjoy listening to the kinds of programs you like.

Leland and the group,

Everything you say is true, and a conventional API standard may indeed
be a good starting point. Conventional APIs have following
disadvanages:

1. Must live on the same system.
2. Must be loosely or tightly linked with the application
3. Language restrictions.

I am sure it has others but can't think of them now.

Of course CORBA isn't the end all either it has the follow disadvanages:

1. Limited Windows support so far. It is coming.
2. There is a small (less than 1 millsecond) performance hit,
which if handled correctly won't be an issue.
3. There is a learning curve.

I do think you are right in that we should start off with maybe a
DLL library or ActiveX.

I am going to take a first cut a radio interface spec this weekend
and post it to the project mailing list.

And he should have never been asked the question. I certainly don't want to
know who's given a knob job to whom in the g'ment, and don't even TRY to tell
me ole Willy is the only one professing undying love to their wife than
takin' a lickin'! As far as I'm concerned all of the politicians are
liers and back stabbers.
Oh, yeah: "No new taxes!".

> worse; besides where oh where is your Christian forgiveness?

No one said what Billy did was any less disgusting because someone else
did it before, but why hold him to a different standard than those other
people? Was it ok for Dwight to get a humm job because it was during ole
WWII, but now, we of oh so much morality, despise and turn to public
flogging for Billy's offenses? Let ye without sin? Isn't that what you
christians say?

>

What business is it of yours if he's nailing an intern? You think this is
the first time this has happened? I would have lied to if I wasn't given
the choice to say "screw you, none of your business!". Maybe Ms. Willy
doesn't care. Maybe she was getting some action from Monica, too.
And how about during the Regan admin. when our nations decisions were made
by Mrs. Regan's psychic? Remember that? The whole time we were told that
ole' Ronnie was given the nods, but it was The Amazing Sheena who was

pullin the strings. That seems like a lie to me. Worse than Billy's,
too. No one cared. Oh, how cute!

>
> Besides, practice what you preach..where is this forgiveness you preach

No, but as far as christian morality goes, same sex, um, sex is worse than
having a fling. I have no problems with lesbian sex. As long as I can
watch.
Yes, I'm a sick bastard.

Source record: 105709

Oh by the way realize that it is not quite "correct" so no preaching. NOW, If you LQQK down the list of post you'll see many many that should, under your prescipt, be in another NG. For example,
"is there really a God," "Vote while you still have the Chance," Buy, Sell, trade @...,"
"YO-DX Contest," "Parts for.....,", Crystals needed," " Good price on.....,"
FS ICOM....," "First medical related lawsuit filed," Bro Stair etc., etc.,"
"NRA run by...,"
"GOP 2004," Well you get the picture I'm sure. Now, if you eliminated those posts and all others similar, you may like it, but I'll guarantee that this will be one "Boring" damn NG. Let it flow man, after all it's all; From Amateurs, To Amateurs, About Amatuers, Considering Amateurs and For Amateurs. I "suggest" that if you don't like it "killfile" it. Other than that, let me know....I am certain that I and others can find OR create a NG that will keep you from expessing your thoughts to other amateurs also, while allowing us ours. LOL
You see therein *is* (there's that word again) the problem. Is (that word again) there "any" NG that is FOR amateurs, that amateurs congregate in, that can discuss various topics, thoughts and ideas to "each other?"You see, the nice thing is about rec.misc *is* (there's that word again) we all (or most of us) know each other, have associated before, and periodically enjoy other topics, (posts) and opinions from, to , and for amateurs with thoughts and opinions about various things going on around us. Oh well, just my 2 cents. If the majority in here refrains from any discussion, post, opinion or comments regarding events outside the realm of amateur radio.. I will also, or leave the NG period. Because I know that it will become dull, boring and basically just a "mixture" of the "other" rec.radio.amatuer Newsgroups with a little bit of each one contained in this one. Who wants that???

So is Dub-yah giving us a gimpse into the future, when Al is in office?
Or are the republicans venting because Willy is still in office?

> Now to answer a simple question you asked, but were able to reasonably
deduce
> an answer. Most socialist democrats have a problem with common sense.

Hmmm. Don't get it. I do believe the democrats are becoming more and
more socialist, but let's not forget the republicans. In a few more years
we will be watching the Democratic and the Socialist conventions.
Compasionate conservative = democrat all the way!

> Doc wondered

>
> Mary Cheney is (there's that word again) the lesser, of course

Not according the the bible Dub-yah is reading.

>- she has
> absolutely nothing to do with politics (we are concerned about the
presidency >& our country)

And the first wives have nothing to do with politics, so why was everyone
scared when Ms. Willy followed him into the white house? Because family
matters. That's what they say.

>except that the socialist democrats keep bitching about her
> sexuality - why?

The same reason the 'publicans bitch about Willy's sexuality. Because it gets press.

>To take the heat off of the idiot we have in the highest
> office in the land.

Why is Willy even being brought up by the 'publicans? Because they are afraid of Al Gore because he's going to stomp Dub-yah. Willy is NOT running for office! You wouldn't know it if you listened to the 'publicans, though.

>Funny thing is, they, (the socialist democrats), are
> supposed to be sooo open minded. If they are, what's "their" problem" with Mary
> Cheney".

Their problem is that the republicans are two faced bastards. On one hand they cite the morals they want to bestow on the country from their sacred bible. On the other they have a person close to the candidates who, according to the bible THEY receive their morals from and THEY cite for Willy's lack of, breaks all the rules.

Shenandoah National Park and Cape Cod.

If my current callsign in the UK is M1DCU what callsign should I use
when
operating as a visiting amateur from each of the three locations
listed
above as I am lead to believe that this would change with location?

Many thanks...

Best wishes

Geoff

If you visit HRO in woodbridge not far off the I-95 (about 20/30 min
from DC) you could get a repeater book. Use one of the mapping sites
for directions, get their address from web site www.hro.com.
Enjoy Shenendoah, Encountered bears on 2 walks there in May.

Source record: 105713

I'm going to be testing for my Tech license next week, and I have a few questions I'd like to ask.

What's are some good code teaching programs? I had a really good DOS based one around 1996, but darn if I can remember what it was. I'm looking for something that will start from ground zero, not one that assumes I already know code. Also, what are the best freqs to listen to if I'm

Is is possible (or advisable) to ground equipment just by using normal electrical outlet grounds? I can't exactly pound in a ground rod where I live right now (military barracks). If I'm still living here if/when I decide to set up a home station, some alternatives would be nice.

Finally, can anyone recommend a good, inexpensive 2M transciever? I was looking for one at Radio Shack today, but they only stock a few these days, and none of them look promising.

Thanks for the help!

Zach Babayco

You should have been paying close attention Charlie, the times they are a changing. Last night I was in Philadelphia listening to GW when I realized I was being witness to history as America is being transformed from the liberal doctrine to the responsible republican platform. Thank god America is transforming and the liberal agenda is depicted as the true threat to the Republic. How are things at the Investment challenge????

>As a point of interest, Radio Shack does not carry stranded antenna wire
>anymore.

You know, I never used stranded "antenna" wire. I just used whatever
wire I had lying around and it always works fine. I have often used
extension cords, measured for a quarter wave of length, then cut off
the ends, split the wire and I now have a half wave dipole. Just solder
to the coax and hang (or twin lead, or whatever I have lying around).
Plug into antenna tuner and see how it plays.

Hi All,

The Giant Page O'Shortwave Links (covering all areas of radio with a
focus on shortwave listening/DX'ing) was updated today with new links.
Sorry for the delay, it has been awhile. Also, a new feature has been
added - Seattle Area Scanner Frequencies, and the page has been added
to a shortwave webring. More special features are planned soon to
make this MUCH MORE than just a link page. When I get the time there
will be some MAJOR additions, making this one of the more unique
shortwave pages on the Web!

To check out this page, please go here:

http://swlinks.webalias.com

AOL Users: <A HREF="http://swlinks.webalias.com">click here!</A>

Thanks for visiting.

Hear ye...hear ye...will this board come to order?
Do your servers provide the following?
alt.radio.scanner.flame_fest
If so, how about all you political and other type of "flame throwers" gravitating to it in order to leave this board to ham radio related subjects?
Upon my request, this flame-fest forum was recommended by Jeff Herman to whom I say thanks.
It is not for the faint of heart because we're going to rock and roll therefore anyone, of any strong political persuasion, is welcome. If you have muscles to flex, do so. My and Tim's appeal goes out to friends and foes alike.
You got stuff on your mind-LET IT OUT. Dislike someone-LET IT OUT. Want to label someone, including me, an s.o.b? LET IT OUT.
Debating is healthy and hopefully this site will catch on. If not, have fun talking about ham radio and only ham radio.
73,
Doc,AF2Y

ROTFLMAO! Toilet Boy, do you actually think that by cross posting your lies and diatribes to rec.radio.amateur.misc you are going to embarrass me? There is no shame in showing the world that you are a liar and a fraud. Remember the list of your lies? Here is a reminder:

1. I proved you lied about the first date of your appearance on the Internet.

2. I proved you lied when you denied making the claim about patronizing under age child prostitutes.

3. I proved you lied when you claimed to have written "several technical articles" for the ARRL and other technical publications.

4. I proved you lied when you claimed to have adopted your dead sister's children.

5. I proved you lied when in the span of two weeks you claim to be married in one forum and single in another.

6. I proved you lied about having college degrees.

7. I proved you lied when you denied you were identified as a known Internet abuser by Joe Greco on his published lists of spammers and idiots.

8. I proved you lied when you claimed you weren't stealing Internet access and your employer terminated you for theft of services.

9. I proved you lied you claimed you've never used fictitious or illegal Internet address.

10. I proved you lied when you claimed you were not the most prolific poster of off topic messages.

11. I proved you lied when you said WD-40 was unsuitable for electronic use by posting another endorsement from Roy Lewallen, w7el@teleport.com, which you ignored.

12. I proved you lied about your place of employment when I posted your work telephone and related data. I also proved that *you* worked at that office and not your retired father.

13. I proved you lied when you claimed that Bill Cheek had never been a member of Mensa.

14. It's been proved by others that you lied when you claimed to have never lost an ISP for your forged cancels.

15. It's been proven by others that you lied when you denied using numerous fake identities on the Internet.

16. It's been proven by others that you lied when you denied you've never blown up a repeater system through your incompetence and total lack of technical expertise.

17. It's been proven by others that you lied when you denied trying to break into other computer systems using Back Orifice.

18. It's been proven by others that you lied when you claimed you had "acquired MORE FCC licenses ... than could be counted on one hand!"

19. It's been proven by others that you lied when you claimed you have made your "lioving from the Radio Communicatoins Field for most of the last15 years."

20. It's been proven by others that you lied when you denied having stalked Bill Cheek for over three years.

21. It's been proven by others that you lied when you denied being kicked off Fidonet by Bill Cheek.

22. It's been proven by others that you lied when you claimed Bill Cheek had been kicked off of Fidonet.

23. It's been proven by others that you lied when you claimed a police had been filed supposedly about harassing phone calls made to you at your place of work.

24. It's been proven by others that you've emailed death threats to your detractors on the Internet.

25. It's been proved by others that you lied when you claimed to "have helped resolve" the problems of the scanner newsgroups and have "rid this NG of trouble makers."

26. It's been proven by others that you lied when you denied sending bogus complaints using aliases to the Internet providers of your detractors.

> He doesn't seem to desire to change.
> Thank you for your support!

When it comes to dealing with scumbags like you Toilet Boy,
I'll never stop showing people you are a liar and a fraud.

Try these:

downtown:
145.19 -
145.43 -
145.17 -
147.045 +
145.11 -
147.36 +
146.76 -

south:
VA side, if you go to the HRO store in Woodbridge 147.24 +

west:
147.315 + Alexandria (just over the river)
146.79 - Fairfax (About 20 miles west of the river)
146.97 - Manassas (About 35 miles west of the river)
146.82 - Winchester (Shenandoah Valley)

Maybe someone over on the Maryland side can give you some repeaters for traveling North and East. I'm sure your call will stir up some action when it hits the repeater. Enjoy your holiday.

In article <8mcpp3$2mh$1@news.hawaii.edu>,
jeffreyh@Hawaii.Edu (Jeffrey Herman) wrote:

> blah, blah, blah.......

Last night the GOP unveiled its ticket: The Smirk and the Snarl.
Dick "the Snarl" Cheney went on the attack. Rather than bring us the
issues he attacks on President Clinton (who isn't even running) and
Vice President Gore. Cheney did not attack the Clinton-Gore economic
policy -- it's brought us the strongest economy in American history.
He didn't attack the Clinton-Gore crime plan -- it's cut crime to its
lowest level in 30 years. He didn't attack the Clinton-Gore social
policy -- it's helped lower teen pregnancy rates, unwed pregnancy
rates, and drug use. He didn't attack the Clinton-Gore welfare reform
record -- it's brought welfare dependency to record lows. So what did
Cheney do? He attacked the President (like I said, he isn't even in
the race!) personally.

I think the Republicans are acting more out of hatred than strategy.
Look at their record: In 1992, they attacked Clinton personally;
Clinton whipped their butts. In 1994, they ran on issues -- the
Contract with America was about ideas. I may not have agreed with
them, but they were issues, and the GOP won their biggest victory in 50
years on them. So what did the Republicans do once they found a
winning strategy? They abandoned it! In 1996, they went right back to
personal attacks on President Clinton -- and got their butts whipped
again. And in 1998, they again attacked the President personally as
opposed to running on issues. And, guess what? They got their butts
whipped again, giving the Democrats the biggest victory a sixth-year
President has had in 168 years.

So, on behalf of the Democratic Party, I want to thank the Republicans
for dragging President Clinton back into this. He's gonna kick your
butts again.

Cheney's attacks weren't even original. He plagiarized Al Gore's great
line from the 1992 Democratic convention: 'It's time for them to go!"
Not only was Cheney unoriginal, he was unwise in using the line. When
Gore said it, only 14 percent of the people thought we were moving in
the right direction, so it made sense to say it was time for them to
go. But today, the majority of voters think we're moving in the right
direction. Most folks -- swing voters especially -- think we're moving
in the right direction. So why is this snarling old man telling me
it's time for the folks who brought us the prosperity to go?

All of these attacks from The Snarl came after the Bushies promised us again and again that they would not attack. So we know that the Republicans are men (and women) of their most recent word. If they can't keep a promise for four days, how can they keep their promises for four years?

Jeffrey, get used to it, Duh-bya Smirk is toast!

73, Hans, K0HB

Well, Chuck, the key to your answer is right there. First, as several people have pointed out, a glass-mounted antenna is not the best choice.

Second, that hill is not doing you any favors. You need to get the antenna up above that hill. Remember, VHF is mainly line-of-site. If something is between the antennas, you are going to lose a lot of range. So, if you are able to clear those obstructions, you should be able to talk much further than 14 miles.

Better educate yourself a little more about the Christian Coalition, Doc. Based on your statements above, either you're totally ignorant of their views on homosexuality, or you're lying in an effort to hurt the reputation of this organization.

> You know what? It says a lot about
> Dick Cheney. <snip>

Yes, it does say a lot about him. It says that he is wise enough to learn the truth about an organization before judging it. Perhaps you should try to learn from his obvious wisdom.

Just repeat the following if your really a true democrat(socialist). The old oath that you boys have been repeating isn't worthy of the name "democratic oath." Try this one on for size,I'm sure it'll fit at least a couple of you to a tee.

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to Am. history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protested while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yubbies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxed are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

Virtually anyone can be a democrat. Just quit thinking; and then, vote that way.

While you were out counting all those kids (you did count them, didn't you), why didn't YOU feed them, Hans? Instead, it just appears that you were satisfied with just using them as a political weapon. If so, anything Bush did to help these kids is better than what you have done so far.

For that matter, why don't you ask Clinton what he has done to help kids here in the South? I don't see any program to feed hungry kids here. I guess the money is being spent elsewhere - like in Washington and Chicago.

>stock. Quartztek, Abracon, MMD and ECS are the no stock folks.

Gerry: You might consider doing what we used to do a long time ago --
grind your own! If you can locate xtals a bit lower in frequency than
what you need, and you're able to remove the quartz slab from its holder,
you can manually grind the slab so it will vibrate on a higher frequency.
As I type this, I'm looking at Page 309-310 of the ARRL's UNDERSTANDING
AMATEUR RADIO (1963 Edition) -- those pages describe the process in
detail.

Good luck, Jeff KH6O

Clinton and his socialists HAVE been feeding those kids...he has been feeding them the same tripe he has been feeding this country for the last 7.5 years...i.e., lies, lies, and more lies. Hillary is cool, too. She whines about the kids who are hungry and downtrodden and not looked after, but turns and says that she "cannot worry about every under capitalized business in the country". Meanwhile she sends her kid to the best private schools that money can buy.
Maybe if the Klintons would have used some of that Chinese money to feed the underpriveledged of this country we could look at them differently. Patriots they are not.
Hillary probably needed the money to pay for her first ever home that was not supplied by the government. She can afford a home now because she has saved so much by not having to pay for her travel expenses in government aircraft.
She flies, we buys.....
I will be so glad when they are at long last gone from public office. The Clintons are a foul, stinking cancer on this society.

Clinton / Gore don't need one, right now SS and the economy are *fine*
we even have a budget surplus. We'll see how long that lasts if DuhBya
slides into the Whitehouse. The only comforting thought there is at
least DuhBya's Daddy and Cheney are only a phone call away.
